Penn Central, which once operated America's largest railroad, has been in reorganization under the federal Bankruptcy Act since June 1970. Last April, it conveyed nearly all of its rail properties to Consolidated Rail Corp. (Conrail).

The reorganization plan was filed after a majority of the creditors said it was acceptable in principle. The court still must approve it before it goes into effect.

Under the agreement with the government and the U.S. Railways Association which set up Conrail, the government has agreed to accept cash and notes to cover the principal amount of Penn Central's $400 million in claims. Past-due trustee certificates totaling $50 million held by the government would be paid in full with interest.

The plan also includes a compromise agreement for unpaid real estate and other taxes owed to state and local governments. Those tax claims total an additional $400 million.

Pre-bankruptcy personal injury claims, estimated at $19 million, for amounts up to $5,000 would be paid in cash on or before the date the plan goes into effect. On other claims, a $5,000 initial payment will be made, with the balance to be paid in quarterly installments.

Bond holders would be given cash equal to 10 per cent of their claim, general mortgage bonds for 30 per cent, preference stock for 30 per cent and new common stock of the reorganized company for the remaining 30 per cent of their claim.

Unsecured creditors would receive certificates of beneficial interests, which will be worth what the valuation case determines, and 35 per cent of the new common stock.

"The spirit of the plan is that everybody gets something of a present value rather than facing a long wait," Mr. Blanchette said. "A typical reorganization does not provide for cash up front."

All of the Penn Central Transportation Co. will be liquidated with the exception of the Pennsylvania Co., a subsidiary that is involved with real estate, energy and amusements.

Some of the Penn Central's holdings include the Waldorf-Astoria Hotel, mineral rights and rights-of-way.

Vehicle Output Off In West Germany

FRANKFURT, Dec. 20 (Reuters).—West German motor vehicle production in November fell to 352,700 units from a revised 361,739 in October but was above the 311,805 in November last year, the Motor Industry Association reported.

Car production fell to 323,300 from October's revised 332,480, but was higher than the 285,588 in November last year.

In the first 11 months this year private car production rose to 3.27 million units from 2.68 million a year ago and total vehicle production to around 3.57 million units from 2.93 million.

West German Jobless

NUREMBERG, Dec. 20 (Reuters).—Unemployment in West Germany is expected to rise to over 1 million in the next few months, Federal Labor Office vice-president Helmut Minta said today. The unemployment total in November was around 985,000.

Block to Kodak Refused by U.K.

LONDON, Dec. 20 (AP-DJ).—The House of Lords, acting as Britain's highest court, refused today to grant a temporary order sought by Polaroid Corp. to stop Eastman Kodak from introducing its instant-picture cameras into Britain.

Polaroid sought the ban pending trial here of its patent action against Kodak.

A decision that Polaroid was entitled to the ban had been reversed by an appeals court on Nov. 16.

Fed Lets Loan Rates Drop; Bank Cuts to 6%

By John H. Allan

NEW YORK, Dec. 20 (NYT).—The Federal Reserve permitted the federal-funds rate, the basic interest rate of the money market, to trade at 4 9/16 per cent Friday and took no action to keep it from drifting that low. Later, the Fed announced a reduction in the volume of reserves that banks are required to hold against checking account deposits, freeing some $500 million.

One immediate result of these actions was to put pressure on major banks to reduce their prime lending rates. Today, First National Bank of Chicago cut its prime rate by a quarter of a point to 6 per cent. Morgan Guaranty, which 10 days ago cut its rate, is the only other bank to have dropped its rate to that level. However, the 6-per-cent rate is now expected to become the prevailing level.

Another effect of the decline in the key short-term U.S. money-market rate was to lower Eurodollar rates by about a quarter of a point. And as these rates nudged lower, the dollar weakened on the foreign exchange markets.

The dollar fell to 2.37 deutsche marks from 2.3875 Friday and to 2.4460 Swiss francs from 2.4522.

By its two actions, the Fed clearly showed it means to be accommodating to the credit markets as the year enters its final two weeks. With the money supply continuing to show only moderate growth, the monetary authorities are expected to continue this relaxed attitude toward the credit markets for the period just ahead.

The 12-man committee of the Federal Reserve that sets monetary policy is scheduled to meet in Washington tomorrow to determine the course from now until late January.

"The Federal Reserve isn't going to stop being accommodative," one credit market analyst said. "There's no reason not to please the incoming administration, especially when it can be justified on the basis that money supply growth is likely to continue sluggish in January."

The Fed is expected to keep nudging short-term interest rates lower. Bank loan demand, despite some increase recently, has still been expanding less than seasonally. In addition, institutional investors continue to have ample funds to be used to buy new fixed-income issues. If they do not put the money to work now, they will still have it when the new year begins, underwriters reason.

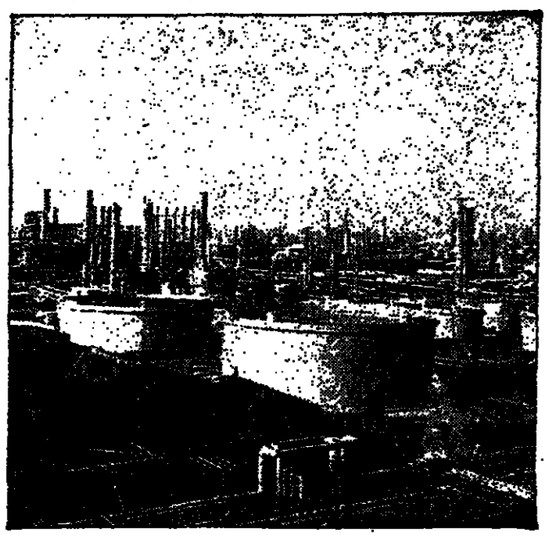
Bendix Names Agee

SOUTHFIELD, Mich., Dec. 20—Bendix Corp's president, William Agee, 38 years old, was elected chairman and chief executive officer, succeeding Michael Blumenthal, who was named Treasury secretary-designate by President-elect Jimmy Carter.

Profits, Inflation Rise Faster by Revised U.S. Data

WASHINGTON, Dec. 20 (AP-DJ).—Corporate profits, real or inflation-adjusted gross national product, and prices as measured by the GNP accounts all rose somewhat faster in the third quarter than previously reported, revised Commerce Department figures show.

After-tax corporate profits according to the revisions were at an $85.1-billion seasonally adjusted annual rate last quarter, up from $83.7 billion in the second quarter. The third-quarter rate was previously put at $84.8 billion.



Inflation-adjusted GNP, the economy's total output of goods and services, rose at a 3.9-per-cent seasonally adjusted annual rate instead of the 3.8-per-cent pace previously reported. In the second quarter, the GNP growth rate was 4.5 per cent and in the first quarter it was 9.2 per cent.

Prices as recorded by a GNP-based index, considered the broadest gauge of inflation, increased at a 4.4-per-cent annual rate, somewhat faster than the 4.2 per cent reported earlier but still slower than the 5.2-per-cent rate in the second quarter. In the first quarter the rate was 3.2 per cent.

SIR

45 years of chemistry

S.I.R. CONSORZIO INDUSTRIALE, with a consolidated turnover of approximately $ 700 million, is the third Italian petrochemical company. The largest complex of factories is to be found in Sardinia while other plants are situated in Lombardy, Veneto, Umbria, Campania and Calabria.
S.I.R. CONSORZIO INDUSTRIALE is active in
• basic chemistry (ethylene, propylene, aromatics etc.)
• primary chemistry (chemicals, plastics, rubbers, fibers)
• fine chemistry (catalysts, auxiliaries and household products)
• manufacturing field (industrialized building, textiles, packaging, plastic films, foamed polyurethane)

HOME IMPROVEMENT KEEPS IMPROVING

Do-it-yourself is bigger than ever in the United States. Lone Star is right up there among the leaders supplying everything that's needed, through our regional network of Home Care Centers. We call that being in the right place at the right time.

LONE STAR INDUSTRIES

Write for our Annual Report

One Greenwich Plaza, Greenwich, Conn. 06830, U.S.A.

All of these Securities have been sold. This announcement appears as a matter of record only.

December 1, 1976

U.S. $20,000,000

Fairchild Camera and Instrument International Finance N.V.

(Established in Curaçao, Netherlands Antilles)

5¾% Convertible Subordinated Guaranteed Debentures Due 1991

Convertible into Common Stock of, and Guaranteed on a Subordinated Basis as to Payment of Principal, Premium, if any, and Interest by

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or pid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

Can you name the 12TH largest bank in the U.S.?

We're a worldwide banking system with $9.2 billion in deposits, which includes $2 billion in personal savings.

We have $541 million in capital, $80 million in reserves, and $10.5 billion in assets.

We have 316 branches throughout New York State and 29 offices throughout the world. Have you guessed our name yet?

We have our international operations based in New York City's financial district, with key people in the world's major money centers. We have extensive experience in foreign exchange and in foreign currency management. Do you need another clue?

We do business with half of the leading U.S. national and multinational companies on the "Fortune 500" list. And over 750 banks in more than 130 countries.

Now do you know who we are?

We're the Marine Midland Bank.

Ranking based on deposits as of June 30, 1976

Currency Rates

Oil Is Discove
By South Afri

JOHANNESBURG, De (Reuters).—South Africa ported its most promis strike in a 10-year-old search.

The find, about 70 miles off the cape coas economic to exploit beca the rock structure in the drillers were encouraged fact that it showed oil-sat levels as high as 55 per ce

The drillers, Southern ploration Corp., plan to their rig to a new site hope of finding similar le oil saturation in a rock str that will make the oil ec exploit.

DENNIS THE MENACE

BOOKS

CHRISTOPHER AND HIS KIND, 1929-39.

By Christopher Isherwood. Farrar, Straus & Giroux. 339 pp. $10.

Reviewed by John Leonard

IN 1929, at age 24—with one novel, "All the Conspirators," behind him, and another, "The Memorial," in first draft—Christopher Isherwood left England for Berlin looking for "my homeland" and boys. In 1939, at age 34, with "The Last of Mr. Norris," "Goodbye to Berlin," "Lions and Shadows," a travel book and three plays with W.H. Auden behind him, he left England for New York, looking for "the ideal companion to whom you can reveal yourself totally and yet be loved for what you are, not what you pretend to be." Of the politics, sexual and otherwise, of the 34-year-old Christopher, the 71-year-old Isherwood remarks today:

"All he could do for the present was to pick up his ideas one after another and re-examine them, ring them like coins, saying: 'This one's counterfeit; this one's genuine, but I can't use it: *this one I can keep, I think.*'"

And that's pretty much what he has been doing ever since, circling around his ideas and feelings, turning them over, poking at them with a stick. If his novels since his arrival in America have lacked energy—Cyril Connolly, who once thought him the hope of English fiction, must, wherever he has gone, feel let down—they are full of a skeptical intelligence, a professional curiosity, as though, along with cocking his cool eye to record, he had also sanded his fingertips to crack the safes of character.

No, that's not right. In "Prater Violet," "The World in the Evening," "Down There on a Visit," "A Single Man" and "A Meeting by the River," his air is that of a scientist in the laboratory of behavior, his as well as others'. The superb prose, steely without glittering, is a knife or an electrode. *It sometimes seems*, especially in "Down There on a Visit"—which is roughly the fictional equivalent of "Christopher and His Kind"—that the scientist is looking for an emotion, a passion unruly enough to ruffle, and scatter his neat clauses.

Like Auden, his lifelong friend and sometime bedmate, Isherwood thought he had found that passion in the leftist politics of the 1930s. But both on sailing to America left those politics behind. Auden would stop in New York and console himself with the Christian mysteries, Isherwood would go on to Hollywood to do screenplays and, looking to the East—which seems to come with the California territory, like oranges and smog—find Swami Prabhavananda.

But I'm getting ahead of his story. In "Christopher and His Kind," he is out to revise his own record, to set the decade straight: "The book I am now going to write will be as honest and factual as I can make it, especially as far as I myself am concerned." And it is in this. The passion missing from his novels, although it is itself in "A Single Man". Meeting by the River" own homosexuality. Christ "kind," his "set," his "tri all homosexuals, or used In no way does he "acce homosexuality, as though dropped on him from Pl there was nothing he c about it. Rather, deliberat even courageously, he cl (Auden, half-jokingly, cal "a heter with good taste boys didn't exist," he s should have to invent the

Because Isherwood ha invented anything except Vidal suggests, himself, t the interest of "Christop His Kind" is in finding all the people in his novel were—which one was which one Stephen Spen original of Sally Bowles Mr. Norris, and so on.

And yet this memoir is nerving and depressing. nerving part is stylistic. prose is as good as it alw been, but the Isherwood forever criticizing the pher" of the novels a diaries. So detached is hi of objectivity from the his younger self that it reads more like biograph autobiography. Norman can don his Aquarius he and merely remind us th Mailer, lurking in the th himself. But Isherwood s himself. His youth is a s on a slide, and a disap one at that. If he had braver, the "I" seems to ing, the novels wouldn't ha so empty at their center. author would not seem a a tourist in his own life.

Really, the novels aren empty. It's just that it not as consequential as Cy nolly would have wished material is too thin. Isher still working that materi he had declared his homo ity, in "Goodbye to Berl "Lions and Shadows," w have liberated him into a consequence? The portr Bubi, Otto and Heinz in topher and His Kind" are couraging. Perhaps pas something he isn't very writing about.

If on the other hand intolerant and superstitic not much different from E. M. Forster had p "Maurice" and weather brouhaha, would be hai liberated into writing novels of the quality of to India" and "Howard's instead of descending lence? I'd like to think abilities of a Forster a Isherwood aren't comma It isn't the fault of "A Co." that they weren't on the scale of "Joyce, Co." It is, however, de that they so much wante and can't stop measurin selves on that scale, al themselves so wanting sexual choice should hat ing to do with the inhab

John Leonard is on t of The New York Times.

BRIDGE — By Alan Tri

The mixed pair winners from a recent match had a triumph on the diagramed deal when South brought home a difficult three no-trump contract. Thanks to a light opening bid of one spade by East, he knew that nearly all the missing high-card strength was on his right.

West decided that South was prepared for a spade lead, and led the heart nine, giving the declarer good reason to think that the queen was with last. The ace won the first trick, and a diamond was led to the jack in the hope that East held both top honors. East took the ace and shifted to the spade king.

It was tempting to hold up the ace, but South grabbed the trick and led to the heart king. He was pleased but not surprised when the queen fell, and he led another diamond to the queen. Unfortunately, West held the king, and the position was now this:

	NORTH	
	♠ J54	
	♡ J4	
	◇ 7	
	♣ K3	
WEST		EAST
♠ —		♠ Q1097
♡ 876		♡ —
◇ 9		◇ 10
♣ 10875		♣ 962
	SOUTH	
	♠ 82	
	♡ —	
	◇ 53	
	♣ KQJ4	

There was now some thrust and parry. West heart, and when the played from dummy, East ly discarded his diamo Now South could not pla mond to establish his mi but he had another resou ran four club tricks and spade to East, scoring and making the contract.

There was no defense diagramed position, but would have been tricky had played the diamo instead of the eight at trick. If South had cov the queen, West would be able to establish his hea the diamond nine remai an entry. However, Sou save himself by ducking

	NORTH	
	♠ J543

Controversial Calls Help Winners

ams' Defense Holds Off Cowboys, 14-12

By Dave Brady

LAS, Dec. 20 (WP).—The Angeles Rams, getting the of two close calls, won a ic defensive battle yester- 14-12 over the Dallas Cow- to advance to the National all Conference championship

final score did not measure mastery of the Los Angeles that atoned for a 37-7 game loss to the Cowboys ear. The Rams next meet Vikings in Bloomington, next Sunday for the con- title and the right to play Super Bowl. They have before been there.

er Staubach, who completed 15 of 37 passes for 150 yards no touchdowns, was hurried hurried throughout, inter- d three times and sacked times.

Cowboys were behind only when Charlie Waters block- ed his second punt of the game and gave the Cowboys a first down on the Los Angeles 17-yard line. One minute and 52 seconds remained.

Such was Staubach's lack of confidence in his running game and in his ability to cope with the awful pressure of the Ram pass rush that he hurried off four passes within 22 seconds, completing only the last one, to tight end Billy Joe Dupree.

Dupree appeared to have a first down on a difficult catch against two defenders, who pushed him back with their tackle. But when officials placed the ball down it was a foot short. The Rams ran four plays, Rusty Jackson taking a safety in the last four seconds, and the Cowboys were losers.

The call on Dupree's catch was one of several the Cowboys did not like. The other one of significance was the Rams' winning TD.

"The referee made a bad call," Dupree said of his catch. "I think what really kind of persuaded him was—I knew I had a first down—but the moment he came to place the ball, one of the defenders was beginning to protest.

"I figured the referee was a smart man. He knows the game. He knows where I caught the ball. He knows where the first down is: he'll mark it there. The Turkey didn't."

"We just couldn't let him (Dupree) fall forward," said Rams' safety Bill Simpson. It was Simpson who teamed with Dave Elmendorf for the tackle. "We knew it was a nine or 10-yard pattern. At 6-6, if Dupree falls down, he might fall in the damned endzone."

Tex Schramm, general manager of the Cowboys, complained that running back Lawrence McCutcheon did not make it into the endzone on a third-down, one-yard plunge at the beginning of the final period.

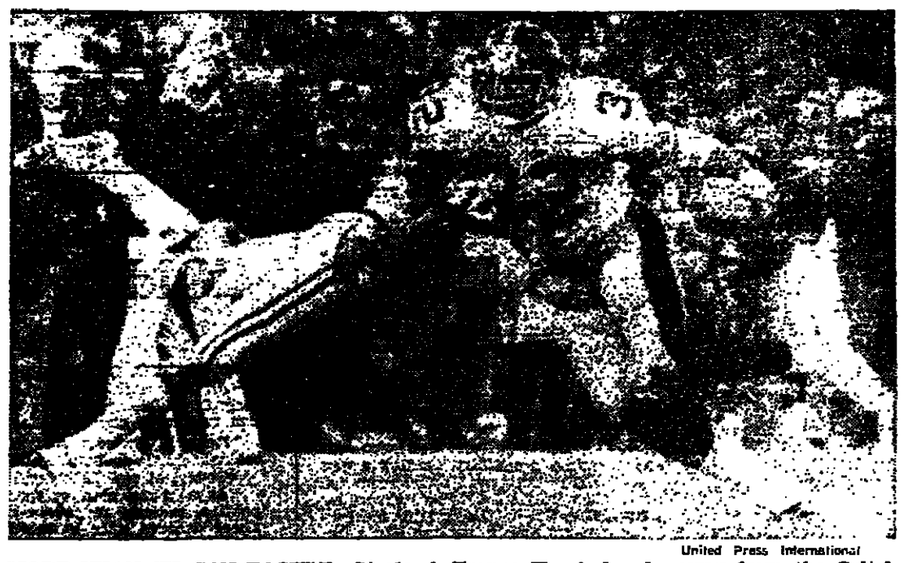
Cowboys' coach Tom Landry thought the game began to slip away in the tumultuous third quarter. The Cowboys got down to the Los Angeles 11 only to see Staubach throw an intereception from the 14-yard line; got to the Los Angeles 17 only to be intercepted again, and had Drew Pearson fumble away a pass at the Dallas 39 that the Rams took up for a game-tying 24-yard field goal by Tom Dempsey on the first play of the fourth quarter.

Then that was taken off the scoreboard—as Rams' coach chuck Knox gambled—and turned into a touchdown because safety Cliff Harris was charged with running into Dempsey, giving the Rams a first down at the Dallas three.

McCutcheon scored from a yard out three plays later.

It is an alleged cardinal sin in football to "take points off the board," meaning to give back accomplished scores. "We did it," said Knox, "because we came here determined to win."

The other Los Angeles touchdown came in the first period at the end of the game's only sustained offensive drive, one of 74 yards. The big play in the drive was a pass, Pat Haden to Harold Jackson, for 44 yards and then Haden scored the touchdown on a four-yard rollout run to his left, a courageous venture.



After the game, the philosophical Landry pronounced the Cowboys' epitaph for this year: "We usually start the season strong, fall off, then come back. But we didn't have it in the last four games (when the Cowboys lost to Atlanta, 17-10, defeated St. Louis, 19-14, beat Philadelphia, 26-7, and lost to Washington, 27-14)."

Staubach had been playing with a fractured finger on his throwing hand since the seventh game of the season and the Cowboys' running game was barely adequate over that stretch.

Over in the other dressing room was Pat Haden, the Rhodes scholar who was coming off a sprained knee ligament a week ago. But the Rams' quarterback sprightly ran four yards for his team's first touchdown and maintained his aplomb despite some mistakes of commission and omission.

At the finish there was blood all over his pants near his injured right knee, but he quickly pointed out that it came from a gash in his right elbow that was inflicted on his touchdown scoot.

Coach Chuck Knox of the Rams was savoring some emotional satisfaction: "We finally proved to the doubting Thomases we could win a big game (and on the road at that). Dallas has had our number, but this win turned that around."

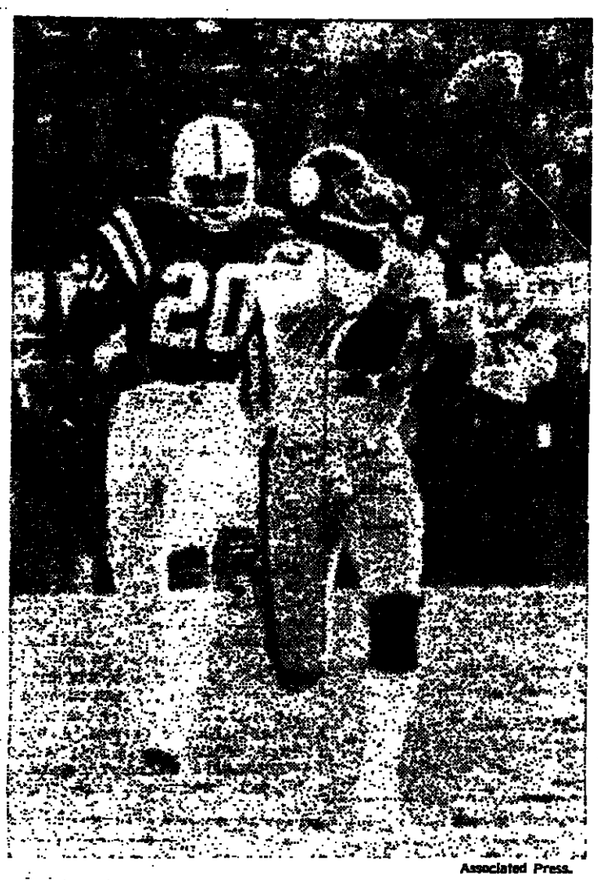
United Press International

MORE THAN HE CAN TACKLE—Steelers' Franco Harris breaks away from the Colts' Bruce Laird in the second quarter after catching a short pass from Terry Bradshaw.

teelers Punish Colts and Have the Last Laugh

By Gerald Strine

LTIMORE, Dec. 20 (WP).— Baltimore Colts made nu- us mistakes yesterday, espe- y in the defensive secondary, being brutalized by the urgh Steelers, 40-14. But biggest error, according to terback Terry Bradshaw, on the first play of the



of their guys (Ron Lee) mie Pough real hard when was returning the kickoff. hurt him," Bradshaw said some of the Colts were hing about it as we came on. old the guys, "All right, if s the way they want it, let's number on them. And that's what we did."

ugh fumbled the opening off, after being savagely ded by Lee, but Frenchy na recovered for the Steelers the 22. That was the Colts' chance. Three plays later burgh had a touchdown, on -yard pass from Bradshaw Frank Lewis, and Baltimore r caught up.

We had our first three plays d on the bench," Bradshaw . "The third one, the pass, had double coverage on Lynn ann), so that left their free y (Jackie Wallace) head up Frank. Frank put one move him, broke clear deep, and I plenty of time."

adshaw had all day to , being sacked but once. quarterback Bert Jones was strong, steady pressure Pittsburgh's front four.

e only thing to be hit harder the Colts' defense was the r level of Memorial Stadium d home plate. A pilot, ald Kroener, 42, buzzed the m in his piper Cherokee primately 15 minutes after ame ended. He lost power. crashed nose first into the ds, 20 rows below the top of stadium. He was taken to hospital unconscious, but reported in fair condition. imately, nearly all of the fans had left before the . Three city policemen were n to a hospital to be treated uts.

Associated Press.

Steelers' Frank Lewis hauls in a pass from Terry Bradshaw and outraces Colts' Jackie Wallace for TD.

An aircraft with similar markings had been reported to government authorities twice last week for flying too low over the stadium.

Police said a man named Donald Kroener was arrested last Tuesday on a warrant for reckless flying, littering and making a bomb threat against Bill Pellington, a former player for the Colts, at Pellington's restaurant.

Rolls of toilet paper and a bottle were dropped on Pellington's restaurant December 7, according to detectives.

Police said Kroener was then released on $2,100 bail.

The victory moved Pittsburgh, in its bid for an unprecedented third straight Super Bowl title, into the American Conference championship game next Sunday at Oakland. Pittsburgh now has won 10 games in a row after a 1-4 start that threatened to end its season early.

"We really feel we're undefeated, since we started playing the ball we're capable of," linebacker Andy Russell said. "Today the greatest credit should go to our secondary. They gave great coverage. Jones had no place to go early (to his primary receiver). That gave us plenty of time to get to him.

"Of course, the offense helped, too, by busting out into a big lead (26-7 at the half)."

Franco Harris was his usual formidable self, rushing for 132 yards in 18 carries even though Rocky Bleier, his 1,000-yard running mate, had to leave the game after the first series because of a sprained right toe.

Roy Gerela missed his first extra point try but came back with a 45-yard field goal seven minutes later to put Pittsburgh in front, 9-0.

Jones responded by guiding Baltimore 69 yards on nine plays for a touchdown. The young quarterback found Lydell Mitchell over the middle for 21 yards, then connected with Roger Carr in the right corner of the endzone for a 17-yard completion that reduced the Colts' deficit to 9-7.

Jones never saw Carr catch the ball. He was leveled by Ernie Holmes moments after the release. That was an indication of what was to come the rest of the afternoon. Jones's drops became deeper and deeper as he tried to get away from the rush. The Colts round up fourth-and-40 once, fourth-and-39 twice. At one point in the third quarter, trailing 26-7, they had possession for 16 plays but could gain only 36 yards.

"People don't play catch against us very well as a rule," Russell said.

That is an understatement, and the Bradshaw-Harris-Swann offense of the Steelers had Baltimore trying to catch up early. No sooner had Baltimore narrowed the count to 9-7 than Theo Bell, on the subsequent kickoff, returned the ball 60 yards to the Baltimore 32.

Harris took charge there, banging to the one, from where Reggie Harrison went over right guard for the touchdown.

Harris tore loose on a 50-yard run the next time Pittsburgh had control. Harrison fumbled two plays later at the two, but Baltimore couldn't move and the Steelers made it 25-7 on their next possession. Swann turned Lloyd Mumphord around, Mumphord stumbled, and Swann was all alone, standing at the five, waiting for Bradshaw's pass.

Bradshaw, who wound up competing 14 of 18 tosses for 264 yards, didn't miss Swann and the second half suddenly became anti-climactic.

There was no scoring in the third quarter. Pittsburgh moved out to 33-7 when Swann again beat Mumphord—this time it was a little closer—on a slant-in from the 11. The teams then traded touchdowns for the final scoreboard reading.

Totschnig First and Proell Second In Austrian Downhill Ski Parade

From Wire Dispatches

ZELL AM SEE, Austria, Dec. 20. —Brigitte Totschnig-Habersatter led Austria to a sweep of the first four places today in the women's downhill as she beat teammate Annemarie Proell-Moser for the first time.

"I am happy to have proved that even Annemarie can be defeated," Totschnig-Habersatter said after she handled the demanding 2,320-meter track in 1 minute 30.65 seconds. "Her victory in the season's first World Cup downhill last week gave us a big shock. Now, I know she can be beaten."

Nicola Spiess, the only unmarried girl of the Austrian top four, took third place in 1:31.24, Brigitte Kerscher-Schroll came fourth in 1:31.85 and Italian-born Elena Matous, racing for Iran, was the best non-Austrian, in fifth place with 1.32.15.

Proell-Moser said, "We were determined to do better than the Austrian men. We told each other before the start that we would take 1-2-3-4." The Austrian men dominated at the World Cup downhill races at Val Gardena, Italy, a few years ago.

The race here was the first of two downhill contests on consecutive days.

It was held on the same track where Proell won a World Cup downhill three years ago in a time of 1:23.68—almost two seconds better than Totschnig's this time.

"I was three years younger then," Proell, 23, said. "And seven kilos heavier." Then, like now, she was at the top of the World Cup standings.

Proell, who came back this season after 18 months of retirement, took the lead with 89 points, ahead of Lise-Marie Morerod of Switzerland, with 70, and Totschnig, with 68.

"I did better than I could expect after such a short time of training," Proell said. "I aimed at capturing 50 World Cup points before Christmas and I am already above my target."

The results underlined the Austrian supremacy in the downhill category of Alpine skiing, in both the men's and women's divisions.

Answering a question about whether Proell's comeback might have been a boost to the downhill strength of the Austrian girls, Spiess said:

"It was certainly not harmful. At any rate, it is good to have another strong skier in the team."

There have been mixed feelings among the Austrian girls about the return of the five-time World Cup champion. Some have been fearful she might try to become "the boss" again in the team.

Proell has attempted to convince her teammates she was not out to dominate the team. She said in a recent interview, "I am not a brutal hen; you can ask my husband."

WOMEN'S DOWNHILL

Borg Holds Conference to Say He Appreciates Ladies' Tennis

STOCKHOLM, Dec. 20 (AP). —Wimbledon champion Bjorn Borg, bringing his Romanian girlfriend Mariana Simionescu along for the first time, came to town today just to assure the Swedish public that he has full sympathy with women players who demand equal pay with men.

An international news agency earlier this month carried a report from Barbados, where Borg was resting, quoting the Swedish star as saying: "The women shouldn't be paid at all."

"They have no grounds for their demands, they don't attract the same crowds as the men and, in addition, play less," added the controversial report causing headlines on the sports pages in the Swedish press.

"But, of course, I was just joking. And everybody was laughing. But it seems one of the newsmen didn't get what I meant," Borg said after traveling from New York with his fiancée to attend a news conference here.

"It would be crazy of me to say that I don't think women should be paid at all since I'm engaged to a pro tennis player," he added.

Borg, 20, who shot into fame in 1974 winning the clay court titles in Rome and Paris and finishing runnerup at the Dallas World Championship Tennis finals, has been attacked by the Swedish press frequently since he moved to Monte Carlo for tax reasons a couple of years ago. But he called this "the worst blunder I've ever seen by the press so far."

Borg, who plans to take Mariana around Stockholm for sightseeing before returning to the United States, said his main goals for next year were to win the U.S. Open and defend his Wimbledon title.

Simionescu, 20, applied for papers last month that would allow her to live in the United States. But she never picked them up as the Romanian authorities recently gave her permission to travel freely, as compatriot Ilie Nastase does.

"That made me very happy since I still want to be a Romanian citizen. They even wished me and Bjorn good luck."

Nastase in Final

LAS VEGAS, Dec. 20 (AP).— Defending champion Ilie Nastase of Romania ran his World Championship Tennis Challenge Cup earnings to $250,000 yesterday, using his high-powered and accurate service to defeat Spain's Manuel Orantes, 6-2, 2-6, 6-1 in the Cup semifinals.

Nastase swept through the 1976 Challenge Cup series undefeated, adding $50,000 to his bankroll with his victory over Orantes. He had earned $10,000 each for victories over Rod Laver and Harold Solomon earlier this week.

Nastase now will face American Jimmy Connors in the finals April 10 here at Caesar's Palace. Connors has now won 13 straight challenge matches here.

Italy 4-1 Victor

SANTIAGO, Chile, Dec. 20 (AP).—Italy, led by champion Adriano Panatta, won all but one match of the 1976 Davis Cup finals which ended here yesterday.

Chile's victory came yesterday when Belus Prajoux, the country's No. 3 player, beat Italy's No. 4 man, Tonino Zugarelli, 6-4, 6-4, 6-3 in the last match of the best-of-five competition.

Italy had clinched the Davis Cup on Saturday when it beat Chile in a doubles match after sweeping the first two singles.

Panatta was the only player on either team to compete all three days. He beat Chile's No. 2 man, Patricio Cornejo, on Friday, and participated in the Saturday doubles match.

A Chilean team doctor said Cornejo, 32, was hospitalized yesterday morning with an inflamed heart muscle. Cornejo's wife said the ailment was not serious and that he would be released from the hospital today.

U.S. Wins, 4-1

TUCSON, Ariz., Dec. 20 (UPI). —Mexico's Raul Ramirez fought back in the final match to defeat Arthur Ashe, 6-3, 6-4, 6-4, yesterday and prevent the United States from sweeping the North American Zone Davis Cup tennis semifinal.

The United States finished with a 4-1 margin as Roscoe Tanner defeated Roberto Chavez, 6-1, 6-3, 2-6, 6-3, in the singles. By defeating its southern neighbor for the first time in three years, the United States advanced to the North American zone finals in mid-April at the Newport Beach, Calif., Tennis Club.

Despite his loss to Ramirez in the final match, Ashe, a member of the U.S. Davis Cup team since 1963 now has 26 victories in 30 Cup matches. However, he still expressed concern over the future of Davis Cup competition in the United States.

"The whole Davis Cup format is antiquated and needs revision," Ashe said. "I can't make myself available for every tie. No professional can. The competition needs to be condensed into a two-week world tournament. It would be like Wimbledon."

Ashe couldn't guarantee whether he would be on the U.S. team to play South Africa. "That team will be completely different from the one you saw play this weekend," he said. "You will never get your top six players to appear for all Davis Cup ties. That's impossible."

"Ninety-five per cent of the other countries have only one or two top players," he said, citing Mexico's Ramirez as an example. "He has to play for his country in every Davis Cup match and that includes doubles and singles. Yet, most other countries pay their professionals to play Davis Cup. That would be unacceptable by the American people."

s Expected, Stabler Does the Unexpected

By John Schulian

KLAND, Calif., Dec. 20 —Ken Stabler is 30. His red legs look twice that old. have turned him into a erback who belongs to an- generation, a classic passer runs only out of terror or sity.

urday terror and necessity le-teamed Stabler. There 10 seconds left on the clock, ad the Oakland raiders on England's one-yard line, and Patriots were leading, 21-17. was only one thing to do unexpected.

Stabler called a play known ake trap 32, bootleg left, U r." Then he sent Clarence plunging into the line he hobbled around left end the ball, looking for all the like a lame race horse. the goal line finally came sight, he threw himself it to give the Raiders a victory in the American rence playoffs where they suffered so much in the

hen you win a game like said defensive guard Dave , who rooted Stabler home with an Oakland Coliseum of 53,045, "you know that e the time has come for ning good to happen to

One of the good things, as far as the Oakland game was concerned, was the roughing-the-passer penalty called on the Patriots' Ray Hamilton with 57 seconds left. It came on a third-and-18 play at the Oakland 27-yard line and moved the ball to the 13, first down.

"I thought that Hamilton hit the ball," coach Chuck Fairbanks said. "In that case it wouldn't have been a penalty."

For what must have been an eternity to the raiders, the young Patriots had looked as if they weren't going to let anything stop them now that they were in the playoffs for the first time in 13 years.

Capitalizing on one Raider penalty after another and the passing of Steve Grogan, a new-breed quarterback who would just as soon run with the ball as throw it, New England spurted to a 21-10 lead in the third quarter.

"Grogan is just great," said Oakland's coach, John Madden, who celebrated by draining a can of cola. "But those penalties... those penalties were ticking me off. I thought we were going to penalize ourselves out of the ballgame."

But the defense, which handed New England seven first downs with its overzealousness, did not get down on itself.

"I've been around 10 years," said Rowe, a Patriots castoff. "And I've seen a lot of teams that point the finger at the guy who got penalized. Nobody does that on this team. I can't even remember who got the penalties."

Stabler was equally calm on the sidelines. "There's no sense worrying," the bearded quarterback said. "You just have to keep on figuring that you're going to get your shot."

His patience paid off in the fourth quarter.

Kentucky Basketball Goes on Losing Streak

By Sam Goldaper

NEW YORK, Dec. 20 (NYT).— On Thursday, Joe Hall, the Kentucky coach, suspends three players including two key starters, for curfew violations.

Saturday—Utah upsets Kentucky, 70-68, on a last-second basket by Earl Williams, ending the Wildcats' 16-game, two-season winning streak, the longest in the nation.

Sunday—The National Collegiate Athletic Association places Kentucky on football and basketball probation for two years.

In rapid succession over a four-day span, Kentucky, ranked No. 3 in the national polls, has suffered a setback to its rising basketball prestige.

The suspension of Mike Phillips, the 6-foot-10-inch center, Jay Shidler, the freshman backcourt starter and Truman Claytor, a reserve guard, played a key role in the Wildcats' losing for the first time in seven games this season. It was only the sixth time in 24 years that a team other than Kentucky had won the Kentucky Invitational Tournament.

"Yes, not having those players was probably a factor in our loss," said Hall, noting that four of his players played with four fouls during the second half. "We want to get them back into our practice and concentrate on the next game and the rest of the season." Hall said the trio, sidelined for both games of the tournament, would rejoin the squad to prepare for the Dec. 30 game against Notre Dame.

The NCAA penalties on the football program were harsher than on basketball. For the next two years the Wildcats will be limited to three basketball scholarships, rather than five, but they will be permitted to compete in the national championship tournament if they are one of the 32 teams selected.

It had been reported that some of the basketball infractions were in Kentucky's attempt to recruit Bill Willoughby of Dwight Morrow High School of Englewood, N.J. and Darryl Dawkins of Evans High, Orlando, Fla. Willoughby committed himself to attend Kentucky, but later signed with the Atlanta Hawks of the National Basketball Association. Dawkins never chose a college and signed with the Philadelphia 76ers.

Kentucky's defeat came as four other Southeastern Conference teams won tournaments Saturday night.

Bernard King and Ernie Grunfeld, New York City high school alumni, known in Tennessee as the "Ernie and Bernie show," led Tennessee to an 86-81 victory over St. John's in the Volunteer Classic. King scored 29 points and Grunfeld 27 as St. John's suffered its first defeat in seven games.

Florida won the Big Sun title on Richard Glasper's layup with 18 seconds remaining for an 84-83 victory over previously-unbeaten Memphis State. Mississippi overcame a 17-point deficit and edged Toledo, 67-64, for the Blade-Glass City Classic. Alabama overwhelmed Virginia Tech, 108-78, in the Dayton Invitational.

Moving the Economy

WASHINGTON. — President-elect Carter says his two major priorities are jobs and getting the economy moving again. It isn't as easy as it sounds.

Let me explain what I mean.

Rootin' Motors is visited by a salesman from Glutton Machinery. The salesman explains to Rootin' that Glutton can now provide machinery that will do the jobs of 1,000 men at a saving of $5 million a year. The president of Rootin' is impressed and decides to install the machinery. A year later the pink slips go out and 1,000 men, including Laidlaw, get one.

Buchwald

The president of Rootin' makes a speech to the departing men and women telling them he is sorry about the layoffs but there was no way Rootin' could stay in business if it did not install the new equipment.

While the new machinery helps Rootin' make 300 more Dolphins a day, sales are way off. The president calls in his dealers. "Why aren't the Dolphins moving?"

"Because Laidlaw is still looking for a job," one of the dealers says.

* * *

"Who is Laidlaw?" the president asks.

"He's one of the men you fired when you installed new machinery so you could be in a competitive position in the economy."

"All right," says the president. "Let's forget Laidlaw. Aren't there other customers out there for our Dolphins?"

"Streeter was, but he bugged out."

"Who is Streeter?"

"He's a bricklayer who was laid off when Laidlaw decided not to build a new house because he didn't have a job. When Streeter was laid off after Laidlaw was fired, Feldman canceled his Dolphin."

"Feldman?"

"The furniture man who was going to sell Mrs. Laidlaw a new dining room and living room set. Not only did Feldman cancel his Dolphin, but he told his brother-in-law not to buy one either, because they were laying off men at the Rootin' plant which was a sure sign of a recession."

"Just when we can make Dolphins at a price people can afford," the president of Rootin' moans, "no one can afford them any more."

"Wait a minute. What about all the people at Glutton machinery," a dealer says. "They're all working."

"Of course," the president replies. "Why didn't we think of them?"

* * *

The president of Rootin' calls the president at Glutton and says: "How many people do you have making the machinery you sold us so we could lay off 1,000 men?"

"We had 5,000," the Glutton president says, "but then the Robot Tool Co. installed a new plant for us and now we have four. Why do you ask?"

"We're trying to get someone to buy our Dolphins."

"I wouldn't call Robot. They recently developed a new assembly line which requires the services of just one man, and they're waiting for him to retire in six months so they can replace him with a computer."

The president turns to his dealers. "OK, we have the best factory in the United States but no customers for our cars. What do we do?"

"Why don't you hire back Laidlaw?" someone suggests.

"We can't afford him," the president shouts.

"Maybe instead of hiring Laidlaw back we can give him a tax cut. Then he'll want to buy a car again."

"Laidlaw doesn't pay taxes," the president says. "He's on unemployment. We've got to find a job for Laidlaw."

"How?" a dealer asks.

The president says, "That's Carter's problem, not ours."

U.S. Group Starts Mead Fund Drive

NEW YORK, Dec. 20 (AP).—The American Museum of Natural History has announced a two-year drive to raise $5 million for the Margaret Mead Fund for the Advancement of Anthropology.

Mrs. Mead, who celebrated her 75th birthday last week, maintains an office in the museum.

Part of the $5 million the museum hopes to collect in the largest fund drive of its 106-year history will be used to relocate and reorganize 22,000 artifacts in the Hall of the Peoples of the Pacific, conceived by Mrs. Mead.

Fire on Mount Athos

KARYES, Mount Athos, Dec. 20 (AP).—Fire gutted a wing of the 12th-century monastery of Zographou early today killing one of the 15 resident monks, an official reported from this capital of the monastic republic. He said that the monks took all the monastery's treasures with them as they fled the fire.

'The impetus has gone out of most poets,' Kenneth Rexroth says. 'They don't have anything to write about. They take courses in creative writing...'

'Old Beat' on Poets, Anarchy, Detachment

By Hollie I. West

MONTECITO, Calif. (WP).—When Kenneth Rexroth applied for membership in the American Communist party in the early 1930s, his application was quickly returned with a notation written by chairman Earl Browder in bold red letters.

Rexroth, Browder said, was a valuable comrade but far too anarchistic to be a party loyalist.

Today, at age 71, he still has a maverick quality.

As a young man in the 1930s, he rubbed shoulders with political radicals and avant-garde artists all over the country. Three decades later in San Francisco, his poetry helped inspire the Beat literary movement. Years before they became fads, Rexroth read poetry to jazz and studied Oriental culture.

This mixture of activities reflects the inquisitiveness that has led Rexroth to write several volumes of poetry, translate the work of several Chinese, Japanese and Spanish poets, and to write books and essays on a variety of subjects—from communalism to architecture to jazz to ancient literature.

Self-Appraisal

In the popular eye, Rexroth has been primarily associated with the Beats. But he doesn't think of himself as part of that group.

Rexroth's poetry, which spans 1920 to the present and represents several different artistic periods, has been described by Prof. M. L. Rosenthal of New York University as "a mixture of personalism, quietism and individualistic prophetics."

In "The Modern Poets," Prof. Rosenthal called him, "a man of wide cultivation and, when not too busy shocking the bourgeois reader (who would like nothing better), a genuine poet."

Rexroth and his fourth wife, Carol Tinker, also a poet, live in a two-bedroom house in this well-to-do enclave of Santa Barbara (his two daughters by a previous marriage are in college).

Paintings they have done hang on the walls of several rooms. She works mostly in oils. Rexroth's last New York show was 15 years ago.

From 1968 to 1974 he was a special lecturer at the University of California at Santa Barbara. From 1974 to last year, he was in Japan as a senior Fullbright fellow.

He is currently working on a book about Li Ch'ing Chao, the classical Chinese poet. He also has completed an anthology of poetry of preliterate people.

Rexroth thinks American poetry is in a slump. Today's good poetry, he said, is coming from various protest groups—feminists and blacks. "The impetus has gone out of most poets," he contended. "They don't have anything to write about. They take classes in creative writing. Classes in creative writing are not designed to produce writers—they're designed to produce teachers of writing. So there's terribly limited experience and there's not sufficient reason for writing poetry. But there are people. They turn up all the time and they find it difficult to get published." Rexroth said the reason for poets not being published was that magazines—mass market or specialized—don't take poetry seriously.

"I think right at the present moment there is feminist poetry of quality particularly since they've (women) stopped writing poems about how they hated their husbands," said Rexroth.

The Trouble

"The great trouble with black writers, and I told LeRoi Jones (now known as Imamu Amiri Baraka) this years ago: I said, 'Look, man, you want to end up Daddy Grace. If you keep on going the way you're going, I'm going to see you on a platform with a big, tall, gold, conical hat and long purple robe with moons and comets and Saturns on it.

"'If you haven't got sense enough to know that you're writing for a claque—you're living for a claque. And it's a hell of a claque because it's a claque that'll clap like mad if you get up on the platform and yell mother ——. What kind of business is that?'

"Now he's saying the same thing about Nikki Giovanni. It's true that it's very bad—if you're a poet particularly—to get yourself in a trap where you're writing for an assured claque. That's what the old Beats do. They haven't written a good poem—any of them—in 15 years. They write for an audience that knows what they're going to say. They tell the audience what it wants to hear. And, of course, that audience is getting smaller and smaller."

Shuttle Station

Rexroth sits in a rocker in his study, wearing blue jeans, a frayed, gray sharkskin suit coat, a rumpled navy shirt, black socks and clogs. His still ample head of hair is mostly gray. Laughter comes easily, especially when he is telling his stories.

Rexroth's interest in people may be traced to his shuttle-station childhood. His mother died when he was 10, and three years later his father died. So he lived with relatives in Elkhart, Ind., Battlecreek, Mich., Toledo, Ohio, Chicago and on various Midwestern farms.

From age 13 on he had to support himself. At age 16, he moved to Chicago's near North Side, the Bohemian district, and joined the International Workers of the World. For the next five years he hoboed around the country, making speeches for the Wobblies and working as a harvest hand, forest patrolman, packer, fruit picker and insane asylum attendant. At the same time he spent winters in New York and Chicago, moving through arts and political circles and studying painting. He is self-educated, he says.

Rexroth's study is stacked with books, but there are no signs that the poet is concerned with the everyday flow of events. He doesn't read newspapers and only a few magazines.

"I read The Nation, which always makes me feel like I'm in one of those sanitariums for old Bolsheviks in the Crimea," he laughs. "We get The Progressive and Playboy and Penthouse. And the reason we get the last two is not for the skin, but they're much more radical magazines than The Nation, for instance. They don't give a goddamn what they say and what they do."

Since the early 1930s, Rexroth said he has been "consistently anti-political—an anarchist and war resister." He doesn't vote and distrusts politicians.

"I tell older people that I don't know any students that've got any sense who believe they're going to live into the next century. I'm not just talking about the military crisis between Russia and the United States.

"Nine-tenths of what's wrong with the world today, from the dope people take to the pollution, is due to the petroleum industry. They're just absolutely fouling up the earth and fouling up the people."

Rexroth also talked about antagonisms among students, increasing homosexual prostitution, diabolist cults of murderers.

"All these things show breakdown," said the poet, hammering the air with a hand. "I'm not getting into some kind of moral rage about these poor schizophrenic girls that (Charles) Manson was able to corral. But it shows breakdown of this society all around.

"The one country I feel at home in is Japan. I don't feel at home here. I don't like a country where traffic cops are armed to the teeth."

Associated Press

THE DOCTORS—Eileen Polley Blumenthal and her husband, Michael Blumenthal, Treasury secretary-designate, at the University of Michigan last weekend. Mrs. Blumenthal earned a PhD. Her husband already has a doctorate.

PEOPLE: *Fords Go Skiing; Snow Dance Is Set*

President and Mrs. Ford arrived in Vail, Colo., Sunday—after stopping off in Ann Arbor, Mich., for Mrs. Ford to pick up an honorary degree from the University of Michigan. The Fords are on their annual skiing vacation—but the mountains are half bare. The President said that a group of Ute Indians had scheduled a snow dance Monday—"Between the Indians and myself, we knew very well that there would be some snow shortly," explaining why he had come despite poor skiing conditions. The last time the Utes performed their dance, 13 years ago, it snowed heavily for three days.

* * *

"What happens now is up to the police," said a Buckingham Palace spokesman Monday, referring to Princess Anne's being stopped for speeding on Nov. 27. Walter Stansfield, the chief constable of Derbyshire, England, said "proceedings are pending."

* * *

A long-planned dinner of the Broward County chapter of the National Association for the Advancement of Colored People took place last week in Fort Lauderdale, Fla., but Angela Davis was abruptly dropped as the main speaker. "We were told that the national bylaws of the NAACP do not allow an avowed Communist to speak, so we had to withdraw the invitation," said Richard Kurtz, president of the Broward chapter. Glostar Current, a national official, said in New York, "The NAACP has never cooperated with Communists and everybody knows that." As for Davis, she said she did not consider the cancelation as a personal affront, "but I do consider it a disservice to blacks and other people who have the right to hear my views."

* * *

Johnny Carson and Edgar Bergen's friend, Charlie McCarthy, got the top marks Sunday in Las Vegas when the American Guild of Variety Artists put on its annual awards show. Carson, host of NBC's "Tonight Show," got the Georgie award as the "entertainer of the year." Bergen, America's best-known ventriloquist, got a special award for "distinguished entertainment of the American public for more than 50 years."

* * *

And meanwhile, in Hollywood, Shirley Temple Black picked up the Louella Parsons Award "presenting the best image of Hollywood to the world." Mrs. Black, now U.S. chief of protocol, said that she is willing to continue in her job if President-elect Jimmy Carter asks her to stay on.

* * *

South Africa has given singer Johnny Mathis special permission to perform before racially mixed audiences in January, impresario Ronnie Quibell said Monday in Johannesburg, where the American entertainer will start his tour on Jan. 5. British singer Tom Jones, who was in South Africa early this year, was the last entertainer to be given similar permission by the government.

ELECTRONICS

RCA

RCA has immediate openings for Radar Technicians at the STESA Project in Spain.
Experience in the maintenance and repair of heavy ground radar necessary. Systems utilized include FPS 3/20/100 and FPS-6 variety. Experience in USAF BUIC systems desirable. Fluency in Spanish desirable but not necessary.
For immediate consideration, please forward replies, including salary requirements to: Apartado 8224, Madrid 8, Spain.

MINERVE SEEKS for AMERICAN FIRMS in PARIS.
English, Belgian, Dutch or German secretaries, knowledge FRENCH required, English shorthand. Bilingual telexists. Write or phone: 138 Avenue Victor-Hugo, 75116 Paris, France. Tel.: 727.61.89.

COMMISSION SALESMAN covering various European and Middle East markets in hotel and restaurant fields, self-starter, aggressive, perfectly experienced, to sell competitive metal tableware line from America's largest manufacturer in field. Write: Box 97,436, Herald, Paris, or call: Paris. 225-96-81.

AIRLINE COMPANY requires cargo sales representative. Previous experience in air freight sales and fluent English a must. EEC or working papers. Send photo & C.V. to: Box 97,438, Herald Tribune, Paris.
AMERICAN COMPANY in communications field needs qualified bilingual French mother-tongue secretary. Send your C.V. to: Box 97,445, Herald, Paris.
TEFL TEACHERS, PARIS, immediately. Send C.V. and photo to: Box 97,444, Herald, Paris.
LEADING FRENCH INVESTMENT bank urgently seeks female assistant for high-level corporate work. English mother-tongue and fluent French required. Experience in finance welcomed but not absolutely necessary. Will require much work but promises to be rewarding. Write to: Box 2,220, Herald Tribune, Paris.
INTERESTED IN HIRING a C.A. or a C.P.A. living in Paris even if retired to handle accounts of a private company. Very interesting conditions. Knowledge of English required. Please send your C.V. to: Box 2,517, Herald, Paris.
INTERNATIONAL COMPANY, PORTE MAILLOT, seeks experienced English mother-tongue secretary. Bilingual French. English shorthand necessary. Tel.: Paris. 256-97-48 or 226-96-63.
HAPPINESS is a job offer in France, the U.S. or U.K. Write to: SUPER SEARCH, Dept. 18B, B.P. 149-07, 75326 Paris Cedex 07.

PERSONNEL WANTED

GENERAL MANAGER with strong sales background to run car sales company selling to American military in central Germany, send complete resume with picture, salary requirement. Box 807, I.H.T., Gr. Eschenheimer Str. 43, Frankfurt/Germany.
VACANCY for English teacher starting immediately - must be U.S. certified with minimum 2 years experience, apply: American School Las Palmas, Oficina de Correos, Tafira Alta, Las Palmas de Gran Canaria, Spain.
SECRETARY, fully bilingual, dictaphone typing, required for part-time position. Flexible hours. Please address your C.V. to Box 97,409, Herald, Paris.
SALESMEN WANTED. Car Bailey, Wiesbaden/Germany. 06121-761678.

SITUATIONS WANTED

BRITISH MECHANICAL engineer, M.Sc. industrial marketing, Spanish, French, Italian and Arabic. Knowledge of petroleum industry. Age 29, seeks interesting and demanding job/assignment. Please send Box 12,027, Herald, Paris.
AMERICAN WOMAN, 27, experienced Lufthansa travel assistant, 2 years Munich airport (Lufthansa), school French, needs job somewhere. Available February, 1977. Please write Box 12,026, Herald, Paris.
HOUSEKEEP / BABYSIT / Companion, 29, capable, sweet, Physical Ed. Piemontese. Geneva 022-31 55 40, Riviera 93 68 91.

Security men putting Pieter Menten, trying to hide behind cardboard, on plane in Zurich.

After Secret Swiss Law Is Invoked

Nazi Suspect Returned to Dutch

THE HAGUE, Dec. 22 (AP).—Millionaire art collector Pieter Menten, 77, was expelled by Switzerland today and flown to his homeland, the Netherlands, to face charges of complicity in a World War II massacre of Jews in Poland.

A Justice Ministry spokesman said that the former officer of the Nazi SS was taken to a jail soon after a special police plane bringing him from Zurich touched down at a Dutch airfield.

Mr. Menten's arrival was cloaked in secrecy. Dutch authorities had refused to say in advance where his plane would land.

However, officials confirmed later that Mr. Menten arrived with his police escort at the country airfield of Beek, close to Maastricht, in the south of the Netherlands.

The spokesman said that Mr. Menten was charged on arrival with "crimes against humanity" and taken away for interrogation.

Mr. Menten fled to Switzerland in mid-November a few hours before Dutch detectives arrived to arrest him at his 40-room mansion near Amsterdam. He has been in Swiss custody since Dec. 7.

Cabinet Decision

The decision to expel him was reached at a regular meeting in Bern of the seven-man Swiss Federal Cabinet. Formal extradition was barred under the Swiss statute of limitation on the prosecution of crimes dating back more than 20 years. But the Swiss invoked for the first time a secret government decree of 1965. It permits the expulsion of persons convicted or under strong suspicion of war crimes.

Swiss Justice Minister Kurt Furgler told newsmen that his government had acted "contra legem"—against written law—in his "exceptional case," and he added: "There are moments in the life of an individual or of a government where not everything is covered by binding norms of law.

"The government is convinced that it acted in the spirit of the Federal Constitution and in the spirit of the European Human Rights Convention," he said at a news conference.

Mr. Menten, who fled his Dutch villa after being tipped off about his pending arrest, was arrested near Zurich on a warrant from Interpol, the international police agency. His escape caused a row in the Netherlands and sharp criticism of the Dutch government.

He attempted suicide shortly after he was taken into Swiss custody, but he has denied the charges against him. He claims that he is the target of a Communist propaganda campaign and faces a "lynching justice" here in the Netherlands.

Dutch authorities are investigating allegations that as a Nazi officer Mr. Menten was responsible for killing hundreds of Jews in the Polish villages of Podhorce and Lemberg in the summer of 1941.

The 1965 Swiss government decree invoked to expel Mr. Menten was never published and never discussed in the federal parliament. Its full text is still a secret.

A Swiss Justice Ministry communiqué said that Mr. Menten was handed over to Dutch authorities at Zurich following the receipt of Dutch assurances that he would not be extradited to a third country.

This was an apparent reference to the Soviet Union, which supplied the bulk of the evidence against Mr. Menten.

In 1949, Mr. Menten was jailed by a Dutch court for eight months for having collaborated with the Nazis, but the charges then did not include atrocities. The new case against him developed after magazine stories about his alleged complicity in war crimes were widely published in Israel and the Netherlands.

The Swiss Justice Ministry communiqué said that the decision to return Mr. Menten to the Dutch was based on the documents supplied by the Netherlands. "There is suspicion that Menten partly gave execution orders and partly shot and killed persons himself," the communiqué said.

The Dutch applied major political pressure to obtain Mr. Menten's return. His escape from this country caused a parliamentary storm and proved a political setback for Dutch Justice Minister Andries van Agt, who is regarded as a potential premier. Mr. van Agt traveled to Switzerland the day after Mr. Menten's arrest, to appeal for his extradition. Israeli Foreign Minister Yigal Allon also called on the Swiss to send Mr. Menten home for trial.

Under Dutch legal procedures, Mr. Menten will be called before the public prosecutor and held in custody during an inquiry. Dutch detectives are expected to visit the Soviet Union for further investigations once permits are obtained, a Dutch Justice Ministry spokesman said.

News Analysis

New Union of Egypt and Syria Is Aimed at Middle East Talks

By Henry Tanner

BEIRUT, Dec. 22 (NYT).—Egypt and Syria, in deciding to form a "united political leadership," are trying to make sure that their newly repaired alliance will not once more fall apart when they enter into negotiations for an overall Middle East settlement next year.

This, in the view of Arab diplomats, is the meaning of the statements made last night in Cairo and Damascus.

The new coordinating body is viewed as a foreign policy organ that has little or nothing to do with the internal affairs of the countries even though it includes commissions on constitutional issues, education and culture.

Presidents Anwar Sadat and Hafez al-Assad planned and fought the 1973 war against Israel together but then had a falling out over the question of how to react to the step-by-step peace efforts of the United States.

Now, by contrast, Syria accepts the negotiation methods and the "American connection" pioneered by President Sadat, who will take the limelight again as the outwardly most active personality in the Arab diplomatic offensive.

Syrian Fears

Yet, right up to Mr. Assad's departure last week for Cairo, officials in Damascus had voiced fears that the Egyptian leader would once more "go it alone" and make unwarranted concessions to the United States.

The new coordinating machinery now enables the Syrians to let Mr. Sadat take diplomatic initiatives while making sure that he stays within the formally agreed joint strategy. The new body also insures consultation between the two capitals if, at one point, one government is negotiating for both.

"One Sinai is enough—we don't need another," a source reflecting Syrian government views said this morning. The allusion was to the second Sinai agreement between Egypt and Israel that Mr. Sadat signed against the wishes of Mr. Assad and, in the final stages, without consultation with him.

The Sinai agreement was at the heart of a yearlong quarrel between the two regimes. The Syrians felt that the Sinai disengagement left Israel free to mass all its military strength against the Syrian Army. Syria's overtures to Jordan and intervention in Lebanon's civil war followed.

In exchange for Syria's agreement to give Egyptian diplomacy its chance once more, Egypt has given President Assad a virtually free hand in Lebanon.

Assad Concept

The new coordination fits into the concept that Mr. Assad has been pursuing doggedly for two years.

Syria already has a comparable "united political leadership" with King Hussein of Jordan.

The next step, informed Arab analysts here and in Damascus predicted today, will be a combined Egyptian-Syrian move to extend their coordination to the Palestine Liberation Organization of Yassir Arafat or to a Palestinian government in exile, which many officials here expect to be formed before the beginning of the negotiations at Geneva or elsewhere.

It is widely expected, moreover, that Lebanon will be drawn into the Arab negotiating front for the first time. President Elias Sarkis was quoted by a visitor two days ago as having said without elaboration: "Lebanon will be at Geneva."

Mr. Assad and Mr. Sadat dis-

New Fight Breaks Out In Beirut

Syrians in Clash With Palestinians

BEIRUT, Dec. 22 (UPI).—Syrian troops and pro-Syrian Palestinians battled radical guerrillas for about four hours in south Beirut today in the second major Syrian-Palestinian clash in two days.

Reports from the scene said the Syrian troops of the Arab deterrent force provided fire support for the pro-Syrian as-Saiqa organization, although a Saiqa official later denied that the troops had taken part. The official said, however, that the Syrians "were very unhappy."

No accurate casualty figures were available, although Saiqa said one of their men had been killed and initial reports said at least four persons died in the fighting.

Although the fighting had died down by nightfall, guerrillas throughout Moslem areas of south Beirut continued on alert and tension remained high.

Rejection Front

"It started when some of our comrades were going to visit comrades in our sister organization, el-Fatah," the Saiqa spokesman said. "Members of the Rejection Front [opposed to Syrian intervention in Lebanon] opened fire on our comrades and we were forced to reply."

As in similar clashes yesterday, the fighting started at the Chatila refugee camp and spread to the surrounding area.

Palestine Liberation Organization leaders met today to discuss what they termed the "fabricated clashes inside the Chatila camp."

The PLO chiefs said in an official statement afterward that they agreed to set up a special security force, to which all guerrilla organizations would contribute.

The force will "control security in the camps and strike with an iron fist at anyone who thinks of disturbing the peace and stability in the camps," the statement said.

"It will reply to all sources of fire, immediately and no matter from where they come, with force."

The renewed fighting occurred in mid-afternoon. It was followed by a Cabinet meeting at which the government of Premier Selim al-Hoss approved the final draft of a policy statement to present tomorrow before the first session of parliament since the civil war ended. Political sources said the statement would include a request for authority to impose a state of emergency throughout Lebanon and set up military zones.

Almost 50 persons have died in intra-Palestinian and Syrian-Palestinian fighting in Beirut and the northern port of Tripoli in the past month.

Anti-Smut Team Jailed in London

LONDON, Dec. 22 (Reuters).—Five former Scotland Yard detectives were jailed today for taking bribes from the pornographic-book dealers they were assigned to stamp out.

"The scale of it was quite staggering," said the judge, Sir William Mars-Jones, after a seven-week trial at the Old Bailey courthouse.

The court was told that the detectives, all former members of the anti-pornography squad, sold confiscated material, offered some of it for police parties and distributed their bribes every Friday night at Scotland Yard.

The longest sentence of 10 years was given to former Chief Inspector Georges Fenwick, 47. Another former officer got eight years, two others seven, and one, four.

Associated Press.

HOLD IT, HENRY—Secretary of State Henry Kissinger grabbing a basketball tossed him by Larry Rivers of the Harlem Globetrotters yesterday as the secretary was made an honorary Globetrotter in recognition of his world-girdling travels.

Between 1950 and 1966

Eight Germ-War Tests in U.S. Are Acknowledged by Army

WASHINGTON, Dec. 22 (AP).—The Army said today that between 1950 and 1966 it conducted simulated attacks with non-disease-causing substances in eight areas to determine the country's vulnerability to germ warfare. An Army spokesman said that the tests were carried out with "non-disease-causing biological substances" and that "there is nothing we have that shows any linkage between these tests and any outbreaks of infection or any deaths."

The tests were conducted at the Pentagon and San Francisco in Key West, Fla., and Fort McClellan, Ala., in 1952; Panama City, Fla., in 1953; Point Mugu and Port Hueneme, Calif., in 1954; and in New York City's subway system in 1966, the Army said. Point Mugu and Port Hueneme are in the same area.

The purpose of the tests was to determine the nation's vulnerability to possible biological attack by an enemy and to assess the U.S. ability to detect such an attack, the spokesman said.

The substance used in all the tests was serratia marcescens, which the Army said "is present throughout the environment and is considered not to cause disease."

Newspaper Report

The Newsday newspaper on Long Island reported yesterday that one man—a hospital patient—died after the 1950 test in San Francisco and that the death was caused by serratia in his bloodstream.

Quoting unnamed sources and documents, the newspaper also said that following the 1952 test at Fort McClellan, the number of pneumonia cases more than doubled in the surrounding county. It said there was also an increase in pneumonia deaths in the Key West area after the test there and added that serratia has been identified as a rare cause of pneumonia.

Records in the Alabama State Health Department confirm an increase in the number of reported cases of pneumonia in Calhoun County, Ala., where Fort McClellan is situated.

But Dr. Frederick Wolf, head of the Alabama Bureau of Preventable Diseases, said that the increase could have been derived from other causes. He said the number of cases jumped from 42 in 1950 to 98 the following year and 333 in 1952, then dropped to 139 in 1953. By 1957, it had dropped to eight cases.

Dr. Wolf said there was a mild epidemic of influenza late in 1951 and early in 1952 that could have led to an increase in pneumonia.

The Army acknowledged that serratia marcescens "could conceivably act as an opportunist and produce an infection" in persons who lack immunity to most diseases.

"The number of incidents of serratia marcescens infection cannot be determined because it is not a reportable disease," the Army said. It occurs in isolated circumstances and individuals or is invariably associated with some other disease or injury which lowers the resistance."

The Army said that one substance, used only at Mechanicsburg, had the potential of causing a disease in persons lacking resistance. A spokesman said it was felt that the substance—aspergillus fumigatus—was "rather harmless." Newsday said the substance is a fungus that can be fatal to humans.

A second substance, used in the tests in all of the places except New York, the Pentagon and Key West, is called "bacillus globigii,"

(Continued on Page 2, Col. 8)

Police in Madrid Arrest Carrillo, Top Communist

MADRID, Dec. 22 (UPI).—Police today finally caught Santiago Carrillo, the chief of the Spanish Communist party, who secretly entered the country 10 months ago.

Mr. Carrillo, 62, was seized this evening as he walked along a street near the center of Madrid.

His presence in the country, which he fled after the 1936-1939 Civil War was proven Dec. 10, when the appeared at a secret news conference here before 75 reporters and photographers. Previously, Mr. Carrillo had lived in France.

The news conference severly embarrassed King Juan Carlo's government. Shortly after the news conference, Interior Minister Rodolfo Martin Villa publicly issued a nationwide "hunt and capture" order.

Mr. Carrillo was wearing a gray wig at the time of his arrest, official sources said. They said that detectives seized the Communist leader quickly before passersby realized what was happening.

The arrest shocked Spanish political circles. Other Communist party leaders immediately called a meeting for tonight to study the situation.

Various opposition parties protested publicly against the arrest. Communist labor leader Marcelino Camacho said, "We demand his immediate release."

Strike Threatened

He added that once the demand has been made to the government, if Mr. Carrillo is not freed, "the workers will undoubtedly go on strike."

Mr. Camacho, who was released from prison a year ago under the King's first pardon, said, "When the ultra-right . . . threatens and kidnaps and beats up people like Cortes President Fernandez Miranda . . ., the worst thing the government can do is arrest such a defender of workers' freedom."

Unconfirmed reports said that the Carrillo arrest was part of a wholesale roundup of Spanish Communist leaders.

Mr. Camacho said that Catalan party chief Gregorio Lopez Raimundo was also arrested. Spanish news reports said that Simon Sanchez Montero, Pilar Bravo and Armando Lopez Salinas, all members of the national executive committee, were also detained.

Police sources said that Mr. Carrillo was alone when he was seized. It was therefore assumed that the other Communist leaders were arrested in a coordinated police operation.

The main interest in the announcement of the government's position on Mr. Carrillo was what type of action, if any, it planned to take against him. Rightist extremists were certain to push for prosecution on what they allege were "atrocities" committed by Mr. Carrillo during the Civil War, when he was a young security official on the republican side.

UPI.

Santiago Carrillo

However, government officials said after the Dec. 10 news conference that if caught, Mr. Carrillo would be treated "like anyone else who enters or resides illegally in Spain."

Earlier today, the kidnappers who seized a Basque engineer two days ago freed him, apparently because they became convinced he was not wealthy, police said.

Ramon Lopez-Andujar was found drugged in a car near the northern resort of San Sebastian.

At the same time, extreme leftist guerrillas continued to sequester the president of the Council of State, Antonio Maria de Oriol y Urquijo, who was kidnapped in Madrid 12 days ago.

Concerned by unrest in the

Italy Neo-Fascist Party Splits As Renegades Are Expelled

ROME, Dec. 22 (UPI).—The Italian neo-Fascist party split in two today in an expected showdown that was hastened by financial considerations.

The executive of the rightist Italian Social Movement (MSI), led by Giorgio Almirante, expelled 16 of its 34 deputies who broke away yesterday to form their own parliamentary group.

Raffaele Delfino, one of the rebel leaders, said that the expulsions were illegal, "but then Almirante has always interpreted the party statute in a free and easy manner, anyway."

Politicians said that the split may prove fatal to the party, which gave decisive support to four Christian Democratic governments during the 1950s.

Popular support for the MSI peaked in 1972, when it polled 8.7 per cent of the vote in a national election and became Italy's fourth largest party. Its support dropped to 6.1 per cent in this year's election as the Communist party—the country's second largest—gained and became a de facto member of the government coalition.

MSI moderates, led by Sen. Mario Tedeschi, blamed the election setback on Mr. Almirante, saying that he had become involved with rightist extremists and failed to project an image of responsibility.

A split had been expected at a party congress next month. But at least 16 of the 34 MSI deputies and 9 of its 15 senators said yesterday they were joining the new "Right Constituent-National Democracy" group, making it eligible for half of the 1.3 billion lire ($1.5 million) to which the MSI was entitled under the public financing law. Such financing is allotted to political parties on the basis of their strength in Parliament as of Dec. 31.

Pino Romualdi, an Almirante supporter who was once sentenced to death for his wartime Fascist activities, said that the rebels had no support among the rank and file.

"A party that lost nearly half of its parliamentary group certainly is a party in trouble, but in the long run things will certainly be worse for a group of deputies without a party," he said.

Politicians said that neither group had any chance of regaining power with the government. Premier Giulio Andreotti's Christian Democratic minority Cabinet depends for survival on Communist and Socialist abstentions in Parliament and would not muster a majority if it made a deal with the right.

Phone Equipment Damaged

ROME, Dec. 22 (UPI).—Vandals destroyed eight telephone relay boxes in the city during the night, police said today, the fifth day of attacks on telephone installations.

Police said that the vandals destroyed the exchange devices by forcing open metal access doors, throwing in gasoline and setting them aflame. Each of the devices handled about 500 telephone lines, they said.

Thirteen telephone exchange boxes have been destroyed since Saturday in various sections of the city.

Vietnam Resisters Blend Into Swedish Scene

By John Vinocur

STOCKHOLM (AP)—He is another subway face, another pair of galoshes and a wet overcoat shuffling into the Vallingby train, riding home in the four o'clock blackness.

No sign, no mark, no hint. There is nothing now in the way Mike Powers looks to distinguish him from the other suburban trudgers, nothing to stamp him as an exile, one of the guys who went over the hill in 1968 because he thought the Vietnam war was wrong.

Mr. Powers is going bald now, and has a bit of a gut. When he speaks English, the Bay Ridge section of Brooklyn and a kind of Scandinavian intonation à la Lawrence Welk battle for control of his accent. But in eight years Mr. Powers has blended into the gray, white and black tones of Swedish life. He is neither the immigrant who barely remembers the old country, nor the homesick expatriate who follows U.S. football on shortwave radio in the middle of the night.

His friends—John Toler of Chico, Calif., Steve Kinnamon of Indianapolis, Bob Janson of Plymouth, Mass.—are rather like Mr. Powers—resisters who have landed on their feet in Sweden. They feel secure about their situation here, dead right about the war, and contempt for the partial pardon President-elect Jimmy Carter has promised them.

There are about 250 to 300 deserters and draft resisters thought living in Sweden, a figure left vague by the immigration authorities, the U.S. consulate and military attaché's office. Thomas Birath of the immigration office said that the number was at its highest in the early 1970s when there were about 700 Americans describing themselves as opponents of the war in the country.

The details are vague because the Swedes said they never differentiate among Americans given residence permits. According to Mr. Birath, only two Americans have become Swedish citizens, but Col. William Prout, the U.S. military attaché here for the last three years, said the total is more like a dozen.

Over the years, those who could not adjust to Sweden or fell into trouble with authorities—Col. Prout maintains at least 150 were jailed—have moved on, leaving what Mr. Birath called "a pretty silent group of good boys."

Most are deserters, which means for them that the pardon would involve a case-by-case review by military authorities. Only the draft evaders would have the slate wiped clean.

Under Indictment

Mr. Powers, 26, a draft evader, fled to Sweden after graduation from a Catholic high school and is under indictment in New York. He married a science teacher here, completed a degree in History at Stockholm University, and is now working in the municipal archives. "The Carter proposal," he said, holding his infant son Hakan on his knee, "doesn't impress me at all. Here's why:

"It openly discriminates against the poor and the blacks, who are the people who didn't get any draft counseling and had to come to terms with the war after they were incorporated into service. It's too Christ-like. It's Jimmy saying I love you all. No. I'm very proud that I resisted a dirty war. Carter underestimates the solidarity between the draft resisters and deserters. It still seems that the leadership of the country doesn't want to admit it lost the war. We're their bad conscience that won't go away."

His attitude is the official line of the exiles committee here. It seems to be an accurate reflection of group opinion as the U.S. Embassy said it has no had any queries about the Carter proposal.

"Anti-Americanism was just a compensation," said Mr. Kinnamon, 32, who went over the hill in Thailand and now runs an arts and crafts program in a youth center. "It wears you out and the guys who were crazily anti-American were just covering up the pain. I think we're almost all past that.

"If you're honest you know that there's a lot of alienation among us and a lot of guys with identity problems. I wonder frankly if I could readjust to the states. I'm established here and it won't be easy to pull up roots. But we have a right to go back and I feel that very strongly. Going back without a complete amnesty would be to admit that what I did was wrong. I wasn't."

It is here, on the right-or-wrong issue, on the question of whether the United States could ever work out a formula for saying the exiles may have been motivated by honest convictions, that there seems to be the least possibility for compromise. The likelihood is that the exiles here will never return home and that the wounds will never fully heal.

WINTER WONDERLAND—Lions padding through the snow at a zoological park in central Sweden recently.

Simonet, Outgoing Energy Chief, Criticizes EEC on Lack of Joint Policy

By David Haworth

BRUSSELS, Dec. 22 (IHT).—European Economic Community governments have accomplished virtually nothing in their efforts to establish a common energy policy, according to Henri Simonet, the outgoing EEC Commissioner for energy.

The Belgian held a caustic valedictory news conference today, saying that the nine member nations had failed to prepare for any future oil embargo although it is three years since the boycott by Arab oil producers.

In addition, there has been little collective effort by the Europeans to conserve energy during that period, Mr. Simonet said, and the Community has failed to find adequate alternate supplies of energy.

Earlier this week, the council of EEC Energy Ministers failed to reach accord on whether there should be a floor price for oil of $7 per barrel.

The ministers could not agree on whether there had been a decision in principle on this issue by the EEC summit meeting in Rome a year ago. Britain's minister, Anthony Wedgwood Benn, insisted that an agreement had been reached on that occasion. But the French asserted that no such undertaking had been given.

"This sort of argument is very depressing," Mr. Simonet said today. "It has the effect of the Community losing any credibility it might have had in the energy field at an alarming rate."

Sharp Words

The commissioner said that an oil floor price at such a low level was "irrelevant." The rising price of oil made it unlikely that such a minimum selling price would be undercut, he said.

There were equally sharp words concerning the EEC from the retiring commissioner for agriculture, Pierre Lardinois, who is leaving to become president of a leading Dutch bank.

He warned that monetary disarray in the Community had reached such proportions the Common Agriculture Policy could collapse early next year.

Mr. Lardinois was also critical of the United States, to which, he said, the EEC should not go "cap in hand." The commissioner expressed concern about the EEC's growing deficit in agricultural trade with the United States. The deficit has reached $5 billion.

"This gap is having a much more serious impact on the Common Market than the EEC's total trade deficit with Japan," he said. "The deficit with Japan is likely to be $4.2 billion in contrast to $3 billion in 1975."

Irish Exports Costlier

BRUSSELS, Dec. 22 (Reuters).—The Common Market today effectively authorized Ireland to raise the price of its food exports to other EEC member states by 8 per cent by adjusting the Community's accounting system.

EEC farm ministers, meeting here, allowed Ireland to devalue by 8 per cent starting Jan. 1 the Irish "green pound"—the artificially high exchange rate used to calculate farm prices.

The devaluation will reduce the border taxes that Irish farmers have to pay on their exports to the EEC by 10 percentage points.

Such taxes, or monetary compensatory amounts, were introduced to cancel fluctuations in exchange rates between member states and to keep Community farm prices stable.

Russians Tie Chilean Red To Bukovsky

MOSCOW, Dec. 22 (UPI).—The Soviet weekly newspaper Literary *Gazette today acknowledged that* the release of Chilean Communist leader Luis Corvalan was connected with the case of Soviet dissident Vladimir Bukovsky.

Soviet newspapers had hailed the arrival here last weekend of Mr. Corvalan but only late yesterday did they report that Mr. Bukovsky left the Soviet Union over the weekend.

The Literary Gazette was the first to put the two together—and bitterly attack Mr. Bukovsky for gaining his freedom through the actions of the Chilean military regime.

"Luis Corvalan is released. He is in the Soviet Union. These words mean a lot," the weekly said.

"Evident and secret fans of [Chilean President Augusto] Pinochet try to represent the whole case of Corvalan's liberation as only the result of bargaining and trading.

'A Rabid Wish'

"He was allegedly merely exchanged for dissident, or, speaking more clearly, anti-Soviet figure Vladimir Bukovsky.

"Pinochet expressed a rabid wish to get Bukovsky through representatives of a third country. The anti-Soviet character of Bukovsky himself became much more clear after this Chilean executioner revealed his love of Bukovsky," *the Literary Gazette* said.

"There were 10,000 mass meetings and demonstrations and a flood of angry resolutions approved by workers, scientists, figures of culture and students who demanded the release of the devoted son of Chile," the weekly said.

"All of these marshaled a fiery world hatred of the regime of Pinochet; he had no other way out," the Literary Gazette concluded.

Associated Press.

Pope Paul reaching out to a child as he was carried into an audience yesterday.

Pope Bids Christians Conquer the Mafia

VATICAN CITY, Dec. 22 (AP).—Pope Paul VI today called Mafia criminal activity one of the "chronic and ingrained" vices of society and said that, in combating it, a Christmas spirit would be more effective than prisons and the police.

"We can see these vices that are so chronic and ingrained in society," the 79-year-old Pontiff said in his weekly public audience. He asked: "Who can treat the Mafia?"

"Something else than a carabiniere or a policeman or a prison is needed. Prisons can often become a school for getting worse rather than being reborn."

He said that Christmas gives everyone a chance for "human and spiritual renewal" in what he called the "Christian school." He added: "The Christian school can make man be born again, can reform moral habits. The church has converted the barbarians who were so unchecked in conquest and cruelty *and it made new peoples out* of them."

Pope Paul cited, as a source of inspiration, the case of Matt Talbot, an alcoholic Irishman who stopped drinking and performed good works for the church after converting to Catholicism. The Pontiff said he hopes to proclaim Talbot, who died in 1925, a blessed of the church soon. That is the final step before a person's *canonization as a saint.*

As Entebbe Raid Revenge

High Ugandan Officer Details Killing of Hostage Dora Bloch

By David Lamb

ENTEBBE, Uganda, Dec. 22.—Reports that Dora Bloch, the 75-year-old hijacking hostage who disappeared during the Israeli rescue at Entebbe Airport in July, was taken from her hospital room and strangled by Ugandan secret police were confirmed yesterday by a highly placed military officer. He said that her body was taken to Namanve Forest, a common dumping ground for victims of *official brutality*, splashed with gasoline and burned. Since then, at least 20 Ugandans with knowledge of her death have been executed, including the Information Ministry's chief photographer, the source said.

The report confirmed what had been common knowledge in Uganda for some time—that Mrs. Bloch, who held British and Israeli passports, was killed in revenge *against Israel by* the regime of President Idi Amin. The report, however, provided the first details of her death and of the presidential decrees following the rescue.

Since the July 4 raid, Marshal Amin has made it a capital offense to joke about or possess literature on the attack. At least two bar girls were known to have been killed after joking that their boyfriends were as aggressive as Israeli jets. All foreign publications, such as weekly news magazines, are confiscated from travelers passing through customs at Entebbe, and anyone mentioning the name of Mrs. Bloch is subject to imprisonment.

Heavily Protected

Marshal Amin was so embarrassed by the raid that he virtually dropped out of sight for more than two months. He has forbidden his officers to wear any Israeli military medal, although he still wears his Israeli paratrooper wings, and in travels about Entebbe or Kampala he is accompanied by heavily armed commandos.

The military source, whose identity is being withheld for his safety, said it was not known if Marshal Amin personally approved the slaying of Mrs. Bloch. Here is the account, confirmed by two other reliable Ugandans, that the source gave of her death and of the photographer's execution:

Mrs. Bloch, a passenger on the Air France jet hijacked to Entebbe *on June 27 by pro-Palestinians*, was taken to Mulago Hospital at 5:30 p.m. on July 2 after choking on some food. Early July 4, a British diplomat, Peter Chandley, looked in on her. She was sleeping comfortably and a nurse said it was presumed that she soon would rejoin the other 100 or so hostages. The hospital staff did not know at the time that the Israeli rescue had already taken place.

Although a Ugandan military board of inquiry into the raid denied any complicity in her death, the sources said that Mrs. Bloch was gagged and taken from her room that afternoon by three members of the secret police. She was strangled en route to Namanve Forest, eight miles east of Kampala.

Officers Alerted

On Nov. 3, Jimmy Parmar, 45, *chief photographer for the Min*istry of Information, received a tip from a military acquaintance that Mrs. Bloch's body was in the forest. He went there to photograph it.

But the same person who tipped Mr. Parmar also alerted military intelligence officers what the photographer was doing. The officers arrived and demanded the equivalent of $7,500 to remain silent. He told them he would pay when he could raise the money.

Mr. Parmar, who had been sus-

AP.

Dora Bloch

pected by Ugandan *authorities of* supplying Western news organizations with tips and photographs, returned to Kampala in his car. The film was confiscated—it was later destroyed, the sources said—and three soldiers in civilian attire forced him into the trunk of his car. He, too, was strangled. His body was dumped near that of Mrs. Bloch.

Israeli Politicians Hold Talks To Set Date for New Elections

JERUSALEM, Dec. 22 (UPI).—Leaders of Israel's Labor party met today with representatives of other factions in parliament to set a date for new elections in the wake of Prime Minister Yitzhak Rabin's resignation.

Political sources said that opposition leader Menahem Begin was still trying to put together enough votes to win a mandate to head a caretaker government *until the voting expected in mid-*May.

But Defense Minister Shimon Peres made it clear in unofficial contacts that he had no intention of splitting from Labor and taking his supporters along to join such a nationalist-rightist coalition.

Former Defense Minister Moshe Dayan said that he had no contacts with Mr. Begin or his aides and that he would leave the Labor party only if it decided to negotiate for unacceptable withdrawals from occupied territory on the West Bank of Jordan.

Former Foreign Minister Abba Eban announced tonight that he would challenge Mr. Rabin's nomination for premiership in the Labor party's convention next February.

Bemused Reactions

President Ephraim Katzir is required by law to confer with party leaders and name one of them to try to put together a new government. But a vote dissolving the Knesset and setting a date for elections was expected to halt this procedure within less than two weeks.

Israeli newspapers, meanwhile, expressed bemused reactions to the government crisis. The mass-circulation afternoon daily Ma'ariv said that the current situation "can barely be reconciled with the principles of a democratic regime."

"A transition government without a majority and which cannot be toppled and in which non-confidence cannot be expressed is a necessity in an interim period, but it is merely the least of evils," Ma'ariv said.

Al Hahishmar, organ of the leftist Mapam faction in Mr. Rabin's minority transition government, called Mr. Begin's attempt to form a government of the right "an anti-worker tactic, with possible components that have nothing programmatic in common beyond hatred for the labor movement."

Opposition sources said that they hoped to put together the 10 votes of the National Religious party—which just left the coalition—with those of the rightist opposition factions and come up with enough seats to challenge Mr. Rabin for the right to head the interim government.

It was the ouster of the National Religious party after its ministers failed to support the government in a no-confidence motion based on charges of desecration of the Sabbath that set off the crisis by depriving Mr. Rabin of his 67-seat majority in the 120-member Knesset.

Last of 4 Escapees In Custody in Wales

LLANDDARROG, Wales, Dec. 22 (Reuters).—The last two of four prisoners who escaped two days ago in a prison van gave themselves up today, police said.

The other two were captured late yesterday about five miles from the prison.

Soares Facing Crucial Test As Assembly Debates Budget

By Marvine Howe

LISBON, Dec. 22 (NYT).—Portugal's minority Socialist government faced its first crucial parliamentary debate today on the 1977 budget and development plan.

Premier Mario Soares has said that he would stake the fate of his five-month-old government on the plan that he considers vital as a first phase to stabilize this country's ailing economy.

Nevertheless, the plan is expected to meet sharp attacks *from the Communist party as* well as opposition parties on the right. There is no certainty that it will be voted by parliament. The Social Democrats have already said that they would vote against the plan in what is regarded as a tactical move to try to bring down the government.

Today's session was devoted essentially to lengthy reports by the ministers of economy, finances and social affairs outlining the general aims of the plan and budget and strategy to be followed.

Special Sessions

Mr. Soares, who returned today *from an official visit to Brazil*, will appear before the Assembly of the Republic later to defend his government's plan. The debate is set to close by next Wednesday and special night sessions have been scheduled this week and next.

Independent economists, who have studied the four-volume plan, believe it is a realistic attempt to solve the most urgent economic, financial and social problems within very narrow political limits.

The Communist press has criticized the plan for failing to emphasize measures for a redistribution of income, for not creating enough jobs and for putting the brunt of austerity programs on the working class.

The middle-of-the-road Social Democratic party and the rightist Social Democratic Center have attacked the plan for failing to guarantee the role of the private sector.

The government's planning team acknowledges that the 1977 plan is far from perfect, but notes that it had to be drafted within three months with an inadequate statistical base.

"We had to use the projects on hand for the short-term plan but now we are devising strategies at the macroeconomic level for the 1977-1980 plan," Jose Marques da Silva, a planning technician, said. He added that even the 1977 plan would be revised within six months and integrated in the medium-term plan.

The aim of the 1977 plan is to increase national production to reduce the country's dependence on imports of goods and financing. Specific targets are: a 5-percent increase in the gross national product next year, the creation of 125,000 new jobs and the containment of inflation to 15 per cent or about half the present rate.

Moscow Detains Jewish Activists In House Arrest

MOSCOW, Dec. 22 (AP).—Most of the organizers of an unofficial symposium on Jewish culture were under house arrest today, cutting the scheduled three-day event short, dissident sources said.

The KGB detained 13 organizers and many activists who had planned to read papers yesterday, according to numerous unofficial sources.

About 50 persons held a scaled-down session in a Moscow apartment yesterday. Security men pounded on the door and rang the doorbell incessantly before leaving.

Men in plain clothes stood guard outside the apartment *houses of the activists today and* prevented "unauthorized" people from entering. At least three of the organizers were being interrogated, sources said.

Police spent 18 hours last night and today searching the apartment of Vladimir Slepak, a prominent Jewish activist, sources said. Mr. Slepak was not one of the symposium organizers.

"I think they [police] might be using the symposium as a pretext *for a wider suppression*," said activist Anatoly Sharansky.

Paris Announces New Measures To Save Energy

PARIS, Dec. 22 (UPI).—The government announced today new energy-saving measures aimed at cutting French oil consumption by several million tons.

In a plan worked out by Prime Minister Raymond Barre and Industry and Research Minister Michel d'Ornano, the government set a ceiling for fuel oil purchases for the gas and electricity companies at 11 million tons next year, down from 13.8 million tons this year.

According to the plan, controls will be established on fuel and electricity consumption.

The automobile-usage tax for next year will be calculated according to the fuel consumption of the vehicle, as opposed to its horsepower as in the past.

The government will encourage investments in the development of new sources of energy and construction work aimed at improving the insulation of new and old buildings.

The government called for detailed reports of energy consumption in government offices. *It also ruled that government* vehicles must be chosen for their energy-saving aspects.

East Germany Ousts Newsman From West

BERLIN, Dec. 22 (UPI).—East Germany today ordered a West German television correspondent out of the country within 48 hours for saying, "The border guards in East Germany have strict orders to shoot at people like at rabbits," the official news agency, ADN, said.

It said that Lothar Loewe's "scandalous slander" had violated the basic East-West German agreements regulating relations between the two states. "His activities are in glaring contradiction to the final act of the Helsinki conference," ADN added.

Malagasy Martial Law

TANANARIVE, Malagasy Republic, Dec. 22 (AP).—Martial law was ordered in the Majunga district today following three days of rioting between Comoro and Malagasy families.

U.S. Ex-Mobster, 77, Acquitted Again in Italy

PALERMO, Dec. 22 (UPI).—An appeals court acquitted deported American mobster Frank (Three Fingers) Coppola, 77, and 16 others today in a hearing for 42 men accused of criminal associations. Six others were let off because of insufficient evidence and 15 were given prison sentences of up to 4 1/2 years.

It was the second acquittal for Coppola in three days. On Monday the former Kansas City gangster and two alleged accomplices were acquitted of charges that they tried to kill a police official in Rome in 1973.

French Firm to Build 6 Greek Missile Boats

ATHENS, Dec. 22 (UPI).—Greece today ordered six missile-carrying boats from a French shipyard, Constructions Mécaniques de Normandie in Cherbourg, to boost its naval strength in the Aegean.

The $40-million contract provides for building two 300-ton boats in Cherbourg and four in Greek shipyard, under the direction and plans of the French firm. Greece has already bought four missile boats in France. Another four are presently under construction.

Use of Term 'Mafioso' Upheld in Turin Trial

TURIN, Dec. 22 (AP).—A court ruled yesterday that it is no crime to describe a politician as a mafioso if he has built his career on *connections with the* Mafia crime syndicate.

The decision was made in a libel suit brought against author Michele Pantaleone by Giovanni Gioia, a former Cabinet minister and Sicily's leading Christian Democratic politician. In his book, "Mafia and Politics," Mr. Pantaleone linked Mr. Gioia to one of Sicily's wealthiest men, Francesco Vassallo, a builder who has been listed as a suspected mafioso by police.

8 U.S. Tests On Germ War

(Continued from Page 1)

which the Army said is not thought to cause disease.

The Army said that this bacillus "will not produce infection in weak individuals or those who lack the capability to develop immunity to most diseases."

A San Francisco physician, Dr. John Mills, co-authored an article in the publication "Annals of Internal Medicine" last January in which it was suggested that a possible explanation for the high frequency of serratia infections here is that in September, 1950, the U.S. Army aerosolized pigmented serratia in the [San Francisco] Bay area to monitor wind and water currents."

The Army made public in March, 1975, letter to Dr. Mills from Col. Ignacio Hernandez Fragoso, a military doctor, who wrote: "Our data indicate that these organisms decayed at an extensively rapid rate and that none remained after 24 hours."

No Connection

Dr. Hernandez-Fragoso told Dr. Mills that "there is no way that presently found organisms can be related" to the tests in 1950.

The first indication that the tests were performed surfaced during testimony before the Senate Intelligence Committee in September, 1975.

Charles Senseney, formerly assigned to the Special Operation Division at Fort Detrick, Md., testified about the experiments conducted in the New York subway system.

"What looked like an ordinary light bulb which contained a biological simulant agent" was dropped in the subway, he said. Drafts of air stirred up by passing trains dispersed the agent "through the entire subway system."

A document released by the Senate committee described a separate experiment designed to test "the vulnerability of drinking water in federal buildings to covert biological attack."

Mechanic Releases 2 After Hijacking Jet

SAN FRANCISCO, Dec. (AP).—A disgruntled airline mechanic surrendered today after taking two persons hostage aboard an empty DC-8 jetliner for almost 15 hours, authorities said.

The mechanic, Palm Hinman, 37, was taken from the plane by two of his friends, who had boarded the craft to persuade him to surrender. One of the hostages was taken to a hospital for treatment of slash wounds; the other was released unharmed.

Egypt-Syria Unity Held Linked to Talks

(Continued from Page 1)

cussed *the possibility of having a* single Arab delegation to the Geneva conference but reached no conclusion.

Nevertheless, most analysts in Arab capitals are convinced that such a delegation will be formed eventually.

Syrian sources said emphatically this morning that Syria still wants a single delegation. Egyptian Foreign Minister Ismail Fahmy, at his news conference in Cairo last night, said that individual delegations would be best. But he did not rule out the possibility of a single delegation.

The communiqué issued by the two Presidents called for the Palestine Liberation Organization to be represented by an "independent party." The phrasing, Arab sources said, was meant as an assurance to the Palestinians that they will not be "absorbed" and rendered voiceless by an overall Arab representation. It was also seen as a renewed bid by *Egypt and Syria to the United* States and the Soviet Union to send the Palestinians an invitation to Geneva.

The uncertainty that is permitted to surround the issue of a single delegation is viewed here as part of the gradual process by which the Palestinian leaders around Mr. Arafat are being drawn into the negotiating process.

Mr. Arafat is described as having decided to go along with Syria, Egypt and Saudi Arabia and to enter negotiations at their side. His decision is a reluctant one, made under the pressure of events in Lebanon. He is facing opposition from hardliners within his organization and is known to have pleaded with the Arab governments to give him time to bring around his recalcitrant colleagues.

It is not in the cards that the two countries will try to reconstitute the union they formed under Gamal Abdel Nasser, the since-deceased Egyptian president, in 1958. That union was broken up by Syria in 1961, after a military coup in Damascus. The Syrian government then charged that Egypt had exercised dictatorial control over Syria.

Nor is the new coordinating body a substitute for the existing Federation of Arab Republics, of which the two countries are members along with Libya.

The federation has languished, first because of the Egyptian-Libyan rift that developed in 1973 and more recently—after the conclusion of the Egyptian-Israeli disengagement agreement of September, 1975—because of the Egyptian-Syrian quarrel.

However, the federal institutions have never been abolished. A federal cabinet and a federal parliament still have their seats in Heliopolis, a residential suburb of Cairo.

The Syrian-Egyptian reconciliation is seen here as a triumph for Saudi Arabia, which imposed the Lebanese cease-fire on Syrian and Palestinian forces in October and summoned Presidents Sadat and Assad to Riyadh for a summit conference along with Mr. Arafat and Mr. Sarkis.

Sauri Arabia is funding Syria and Egypt and thus to a large extent is directing the political and military strategy of the two "front-line states."

Fahmy Briefs Arafat

CAIRO, Dec. 22 (UPI).—Foreign Minister Fahmy today briefed Mr. Arafat on the Egyptian-Syrian summit talks and Middle East peace moves, diplomatic sources said.

Mr. Arafat arrived here last night after visiting Libya and Saudi Arabia.

Spain Seizes Communist

(Continued from Page 1)

police forces, the government appeared hesitant to accept the kidnappers' demand to free Spain's estimated 200 political prisoners in exchange for Mr. Oriol.

Informed sources said that disciplinary proceedings had been initiated against 100 policemen, many of whom were arrested for taking part in a demonstration for more pay last Friday.

There was no further news of Mr. Oriol since his kidnappers—the First of October Anti-Fascist Resistance Group (GRAPO)—sent a note to a newspaper Monday night.

In the note, the kidnappers reiterated their demand for the release of all political prisoners.

But the government made no move to accept the demand and the press speculated that an amnesty may not be granted until after the Christmas holidays.

Blacks, Feminists Resentful Of Some Carter Appointments

By Edward Walsh

WASHINGTON, Dec. 22 (WP).—The appointment of Ray Marshall as secretary of labor drew praise from a broad spectrum of interest groups yesterday even as blacks, feminist activists and others continued to voice disappointment over some of President-elect Jimmy Carter's other Cabinet choices.

Mr. Carter's other major domestic appointment yesterday, that of Washington lawyer Patricia Harris to be secretary of housing and urban development, was criticized by some who asserted that Mrs. Harris lacks both experience and expertise in the complex housing field.

Black opposition appeared to be stiffening to the appointment of Griffin Bell as attorney general.

And a major battle appeared possible over Mr. Carter's expected selection of James Schlesinger to head a new, consolidated energy department.

The initial skeptical reaction of civil rights groups to the appointment of Mr. Bell turned into criticism yesterday with the disclosure that for the last 20 years he has been a member of the Piedmont Driving Club, an exclusive Atlanta country club that excludes blacks and Jews.

Exclusive Club

Mr. Bell, a former federal appeals court judge and longtime friend of Mr. Carter's, also belongs to Atlanta's Capital City Club, which excludes minorities as members.

Liberal members of the Senate Judiciary Committee, which will make a recommendation on Mr. Bell's confirmation, were cautious in their comments yesterday.

Committee chairman James Eastland, D-Miss., recommended Mr. Bell to Mr. Carter.

Rep. Parren Mitchell, D-Md., chairman of the Congressional Black Caucus, called Mr. Bell's membership in the segregated clubs "totally offensive" and promised "a battle right down to the wire" against the nomination.

Rep. Mitchell indicated that the Black Caucus would soften its opposition if Mr. Bell would "repudiate" the club memberships and his earlier support for President Richard Nixon's unsuccessful nomination of G. Harrold Carswell to the Supreme Court.

Mr. Bell said in Atlanta last night that he was "concerned" and would "do something" before going to Washington about membership he holds in the two Atlanta clubs.

"Up there," Mr. Bell said, "I would be the attorney general and would be the man who, in a sense, stood for equality before the law. It would be improper to be in the clubs then, and I would have to work something out."

He fell short of saying that he would resign outright from the two organizations. He said that he did not want to "lose" those initiation fees—upward of $10,000—and might try to work out an arrangement that would let him "resign temporarily or become inactive."

With most of his Cabinet now selected, it was clear from yesterday's announcements that, despite his insistence that he has sought "the best qualified person" for each Cabinet post, Mr. Carter has been walking a delicate political line, pleasing some while inevitably angering others.

Within that political context, Mr. Schlesinger, the former head of the Defense Department, the CIA and the Atomic Energy Commission, remained a central figure of controversy.

Mr. Schlesinger was AFL-CIO president George Meany's first choice to be secretary of defense, a post that Mr. Carter awarded to Harold Brown, the president of the California Institute of Technology.

Having lost that round, Mr. Meany and the AFL-CIO hierarchy lost again with their failure to secure the top Labor Department post for John Dunlop, a labor secretary in the Ford administration.

The exclusion of Mr. Dunlop from the Cabinet represented a victory for civil rights and women's groups who accused him of failure to enforce "affirmative action" programs on minority hiring and promotion practices.

Now Mr. Carter appears to be irrevocably committed to Mr. Schlesinger for the energy post even as various environmental and women's groups mobilize in opposition to his appointment.

Eight such groups have sent a telegram to the President-elect, opposing the appointment of Mr. Schlesinger and suggesting either outgoing Rep. Patsy Mink of Hawaii or the congressional budget office director, Alice Rivlin, for the post.

In making his choices amid the pull and tug of various interest groups, Mr. Carter appeared to have found someone acceptable to all factions when he selected Mr. Marshall as secretary of labor.

"We don't know enough about him but he seems to be very good," said Jane McMichael, executive director of the National Women's Political Caucus. "Our people in Texas thin' he's terrific," she said.

'76 a Bad Year For Scrooges

WASHINGTON, Dec. 22 (AP).—The Bob Cratchit family, of Charles Dickens's "A Christmas Carol," would spend about $27 today for a U.S. Christmas dinner of roast goose and all the trimmings, according to the Agriculture Department.

Dickens wrote about the Cratchits in 1843, but the Agriculture Department used 1880 to gauge the price of a Christmas meal then and now.

If the eight Cratchits had dined with Ebenezer Scrooge on Christmas Day in the United States of 1880, the Agriculture Department said, their meal would have cost about $10.

Bow of Tanker Off U.S. Splits; Rest of Oil Spills

NANTUCKET, Mass., Dec. 22 (AP).—The sinking bow of the Liberian tanker Argo Merchant split apart today, spilling the remaining oil held onto Nantucket shoals. The ship, which broke in two yesterday, has caused the worst oil spill off the U.S. coast.

"There's nothing we can do," said Coast Guard Lt. Comdr. Barry Chambers.

The spill could cost the Massachusetts economy about $235 million in fishing industry and tourism losses, state officials estimated today in the draft of a letter to President Ford seeking federal assistance.

The oil slick is continuing to spread. It was reported that some of the oil had reached the Georges Bank commercial fishing grounds.

Oil-coated birds have been spotted by the hundreds on Nantucket, but the wind and waves were sweeping the oil away from beaches. The breakup of the 640-foot tanker yesterday spilled 75 per cent of the vessel's 7.6 million gallons of heavy industrial crude oil into a slick 75 miles long and more than 25 miles wide at its broadest point.

The aged, rusting vessel—called a "suspect ship" by the Coast Guard because of 19 previous mishaps since 1964—piled onto shoals 27 miles southeast of this island a week ago. The ship was 10 miles off course when it hit the shoals.

Hurricane Carter Convicted Again

PATERSON, N.J., Dec. 23 (AP).—Former middleweight boxer Rubin (Hurricane) Carter and his co-defendant, John Artis, were found guilty yesterday of three counts each of first-degree murder, affirming the verdict of their 1967 trial.

Carter and Artis spent nine years in prison before the New Jersey Supreme Court ordered a new trial this year, on the ground that the prosecution had withheld evidence from the defense at the first trial.

That new evidence had come to light largely as a result of hearings held two years ago on the recantations of two witnesses who had identified the defendants as the murderers. The principal witness later retracted his recantation.

Fukuda Certain As Party Leader

TOKYO, Dec. 22 (Reuters).—Former Deputy Premier Takeo Fukuda will be unanimously named president of Japan's ruling Liberal-Democratic party tomorrow, automatically making him the party's choice to succeed outgoing Premier Takeo Miki as premier.

A spokesman said today that Mr. Fukuda, 71, a political rival of Mr. Miki, 69, was the sole candidate for the party presidency.

Mr. Miki is stepping down from both the presidency and the premiership in acceptance of responsibility for the party's setback in general elections earlier this month.

United Press International.

TUESDAY'S APPOINTEES—President-elect Jimmy Carter presenting Cabinet nominees at a news conference in Plains, Ga. From left: Harold Brown, defense; Ray Marshall, labor; Mr. Carter, and Patricia Harris, HUD.

Harold Brown

By John W. Finney

WASHINGTON, Dec. 22 (NYT).—Looking back at his career over the last 25 years, it almost seems that Harold Brown, the brilliant physicist, was being groomed by the scientific component of the military-industrial complex to become secretary of defense.

At the age of 23, shortly after receiving his doctorate in physics from Columbia University, Mr. Brown was recruited by the Atomic Energy Commission to help design atomic weapons. He became a protégé of Edward Teller, the developer of the hydrogen bomb, at the Livermore laboratory in California.

He was guided into various advisory jobs for the government, including membership on the President's Science Advisory Committee. Having successfully passed that apprenticeship, he was made director of research and engineering at the Pentagon, the third-ranking job there; and then moved laterally into the more prestigious but less powerful job of secretary of the Air Force.

Administrative Training

For the last seven years, he has gained administrative training as president of the California Institute of Technology. Then yesterday, President-elect Jimmy Carter named Mr. Brown, 49, as secretary of defense—the first scientist to fill the top job at the Pentagon.

His training has equipped Mr. Brown, better than any of his predecessors, to understand the technological complexities of modern warfare. But his background troubles some members of Congress and former associates in the Pentagon, as they contemplate his direction of a defense program that is driven by many more factors than just the design and cost of modern weapons.

"His approach, going back to his days at Livermore, is that technology is everything," observed a former Pentagon colleague. "He believes that technology can solve anything, with little regard as to whether the solution can be used by the soldier in the field."

It was Mr. Brown, for example, who conceived the idea of developing the TFX plane, which proved to be an embarrassing project to the Defense Department during the tenure of Secretary Robert McNamara. The concept was that the Air Force and Navy should consolidate on construction of a fighter-bomber, but so many incompatible requirements were built into the plane that the project crashed into a barrier of Navy and congressional resistance.

Decision on the B-1

One of his first assignments in the Pentagon will be to advise Mr. Carter on whether to proceed with production of the B-1 strategic bomber for the Air Force, a plane Mr. Brown helped conceive.

Although Mr. Carter has expressed some reservations about the $24-billion project, it is expected that Mr. Brown will recommend that it be approved. In a May 20 letter to Sen. William Proxmire, D-Wis., Mr. Brown said that he believed the Defense Department "has the best of the argument" over whether to produce the bomber. He has repeated that opinion to scientific colleagues more recently.

Aside from the B-1 issue, Mr. Brown's most immediate impact on defense issues may be in helping Mr. Carter in his stated goal o breaking the impasse on strategic arms limitations with the Soviet Union.

The selection of Mr. Brown was welcomed by leaders in the arms control community. They believe that the new secretary, despite his bias toward weapons technology, will be more amenable to a strategic arms agreement with the Soviet Union than his two predecessors, James Schlesinger and Donald Rumsfeld.

In a 1969 article in Foreign Affairs, written shortly after he left the Pentagon, Mr. Brown said he believed that "a properly designed agreement to limit strategic forces can better insure the security of the United States and the Soviet Union." Mr. Schlesinger had often expressed the same opinion, but as a former arms control negotiator who worked with both officials put it: "Harold can be expected to raise less ifs, ands and buts than Jim Schlesinger."

Since the strategic arms negotiations began in 1969, Mr. Brown has been an advisory member of the U.S. delegation; and he has frequently sided with the Arms Control and Disarmament Agency in opposing the views of the Pentagon.

While in the Pentagon, Mr. Brown opposed some of his conservative scientific colleagues, including Mr. Teller, in supporting the 1962 treaty limiting nuclear tests. He also questioned the technical feasibility and strategic desirability of building a defense against intercontinental ballistic missiles.

As secretary of the Air Force, he supported the bombing of North Vietnam in the early stages of that war. When Mr. McNamara asked the service secretaries whether further constraints should be placed on the bombing, Mr. Brown reportedly was the only one who opposed additional constraints.

Ray Marshall

By David E. Rosenbaum

WASHINGTON, Dec. 22 (NYT).—Last year, George Meany, president of the AFL-CIO, invited Ray Marshall, a labor economist at the University of Texas, to Washington to meet Alexander Solzhenitsyn. In introducing the professor to the dissident Soviet author, Mr. Meany said: "I want you to meet one of the few American professors who understand the working people."

That, in capsule, is Mr Marshall's reputation in labor, business and academic circles, and it is a reputation that makes him an acceptable choice as secretary of labor to a variety of interests.

Mr. Meany would have preferred that John Dunlop, the former secretary, be nominated by President-elect Jimmy Carter. But he approved of the choice of Mr. Marshall and described him yesterday as "a labor economist whose views are liberal, informed and sensible."

Representatives of women and blacks, who vigorously opposed Mr. Dunlop because he was unwilling to stress affirmative-action hiring and promotion programs, also endorsed Mr. Marshall.

Women and Minorities

His principal academic interest over the years has involved expansion of employment opportunities for women and minorities, and he has written an impressive number of books and articles on the subject. He has also directed several programs toward that end.

Mr. Marshall, according to his colleagues in Austin, Texas, has an abiding interest in improving the lot of the disadvantaged—male and female, black and white—and especially those from rural areas. It is an interest, his friends say, that derives from his own background in poverty.

Freddie Ray Marshall—he does not use his first name—was born Aug. 22, 1928, in Oak Grove, La., but his family moved when he was a baby to Mississippi. His mother died when he was a small child, and he was reared in an orphanage. Mr. Marshall has told friends that he used to rise at 3 a.m. at the orphanage to perform his chores of milking.

After obtaining his PhD, Mr. Marshall taught at the University of Mississippi and Louisiana State University before going to the University of Texas in 1962 as a full professor at the age of 34. During the late 1950s and early 1960s, according to a man who knew him, Mr. Marshall was "an outspoken champion of desegregation when that was not a popular position to take in Southern universities."

In 1967, he went to the University of Kentucky to become chairman of the economics department, but two years later he was hired back by the University of Texas at what a senior professor calls "an enormously attractive salary, much more than we usually pay a full professor."

Mr. Marshall served briefly as department chairman at the University of Texas, but, according to several of his colleagues, he did not like administrative responsibility and was not particularly good at it.

"It doesn't mean that he's not a good administrator," said Prof. Stephen McDonald, who served later as department chairman. "It's just that he didn't want to administer that job."

In addition to teaching a graduate seminar in labor economics, Mr. Marshall is director of the Center for Study of Human Resources; a full-scale manpower research facility at the university; chairman of the federal Committee on Apprenticeship in the Labor Department; president-elect of the Industrial Relations Research Association, a professional association of labor economists and other manpower specialists, and president of the National Rural Center, which sponsors research into the economic needs of rural areas.

Over the last decade, Mr. Marshall has written about a book a year, many of them on the subject of employment of blacks. He has been instrumental in encouraging blacks to enter apprenticeship programs for skilled trades and in persuading unions to take blacks into such programs.

In the last few days, Mr. Marshall discussed with his colleagues his views of government and of the duties of the labor secretary. They got the impression that he would be an active secretary and would favor spending federal money to create jobs programs. He has been working, his friends said, to develop new approaches to make public service jobs programs more effective in combating unemployment.

Fears Nuclear Counterattack

Jane's Annual Warns U.S. Of Superior Soviet Aircraft

LONDON, Dec. 22 (UPI).—The Soviet Union is so far ahead in military aviation that the United States might be forced to use nuclear weapons if war broke out between the two superpowers, according to Jane's All the World's Aircraft.

The new edition of the authoritative annual, published today, said that the present U.S. armory consists mainly of aging bombers and interceptors while the Soviet Union is building supersonic swing-wing bombers and versatile fighters far surpassing the sophistication of the MiG-25 landed in Japan by a Soviet defector in September.

In expressing doubts about the present U.S. ability to match the Soviet Union in a conventional war, J.W.R. Taylor, editor of Jane's, said that Washington was seriously underestimating the latest MiGs and the Soviet bomber, Backfire, which could strike at U.S. targets from Soviet bases and fly on to Cuba.

Warns of Accord

Mr. Taylor warned against U.S. acceptance of Soviet demands made at the Strategic Arms Limitation Talks to declare Backfire a tactical (close support) rather than a strategic (long-range) weapon. He said that such acceptance, if only for the sake of reaching an accord, would lessen the hope for lasting peace.

He quoted the chief of staff of the Royal Air Force as saying that Backfire—faster than the Concorde and with a much longer range—may prove "an even greater danger to allied shipping than the relatively slow-moving Russian submarines."

Mr. Taylor stressed that those who treated the MiG-25 landed in Japan as somewhat old-fashioned in design and materials were dangerously wrong. It was, he said, an extraordinarily advanced plane for the mid-1960s when it was built and that it has been far excelled by generations of new MiGs.

"Any dismay felt by members of the Soviet Defense Ministry at having the MiG-25's secrets revealed," Mr. Taylor said, "must have been mitigated by the conclusions and reactions published in the United States."

Mr. Taylor said that U.S. preoccupation with nuclear missiles had enabled the Soviet Union and its allies to build a large lead in other key weapons. He said it had always been assumed that, to avoid mutual annihilation in an exchange of intercontinental missiles, both sides would attempt initially to restrict combat to conventional or tactical nuclear weapons.

Mr. Taylor said that Britain disastrously assumed 20 years ago that since any war would be nuclear there was no need for new bombers and interceptors.

Advice to U.S.

"The United States had the same wrong thought somewhat later and has yet to take the positive step of rebuilding its air defense," he said, offering the following advice:

"The three immediate requirements for the United States are to recognize that Backfire is a strategic weapon, to build the B-1 bomber as its wholly essential and uniquely flexible counterpart, and to order as a matter of urgency replacements for aerospace defense command's time-expired F-106 Delta Dart interceptors.

"The most alarming possibility for the Western powers and indeed for the world as a whole is that their politicians might grasp eagerly at implied shortcomings in Soviet aircraft like the MiG-25 as an excuse for penny-pinching defense economies," he advised.

Patricia Harris

By Linda Charlton

WASHINGTON, Dec. 22 (NYT).—"A mind like a steel trap," says an old friend of Patricia Harris, named yesterday by President-elect Jimmy Carter to be secretary of housing and urban development. "Warm and motherly" were the words used by someone else to describe her.

The 52-year-old lawyer, politician and sometime diplomat is the second woman and the first black named to Mr. Carter's Cabinet. Throughout her career, what a friend described as her "quality"—an improbable and generally effective mix of toughness, sharp mind and charm—has been her trademark.

Less than a month after she became dean of Howard University Law School in 1969, Mrs. Harris quit rather than submit to the demands of the student body for a more important role in running the school.

"The final decisions must be made by people who have a long-range commitment to the institution," Mrs. Harris said.

Call for Resignation

During the same disruption at Howard, Mrs. Harris encountered a black student who was carrying a sign calling for her resignation and the appointment of a male replacement. "I told him I didn't stop being the white man's nigger to become a black man's nigger," Mrs. Harris recalled later.

Yesterday, at the news conference at which her selection was announced, Mrs. Harris said she was "honored and pleased." Friends say that she considers the HUD post an important one—or she wouldn't have taken it.

Joining the Carter administration will mean leaving the large Washington law firm in which she is a partner, a well-paid specialist in litigation.

"There are a number [of posts] she would have turned down," said a friend, indicating that Mrs. Harris was "interested in being her own boss" and "very serious about any responsibility she undertakes."

Criticism by Mayors

Her career has not included any previous experience in the area overseen by HUD, a fact that prompted criticism from the United States Conference of Mayors. In a statement, John Gunther, executive director of the group, said the appointment showed "a striking insensitivity to the problems of cities" and was "a major disappointment for mayors across the country."

By 1965, she was well enough known as a lawyer and active Democrat to be appointed ambassador to Luxembourg by President Lyndon Johnson, whose nomination she had seconded at the Democratic National Convention in 1964.

In her new post, associates say, Mrs. Harris is likely to stress equal treatment for blacks and women. She has been co-chairman of the National Women's Committee for Civil Rights and was a member of the 1969 National Commission on the Causes and Prevention of Violence.

As a member of the commission, she filed a minority report endorsing the concept of nonviolent civil disobedience, including acceptance of the penalty, as a technique that "may well prevent, rather than cause, violence." Back in 1943, she was one of a group of Howard University students who tried to force the desegregation of a Washington white-only cafetaria through a sit-in.

In 1972, Mrs. Harris became temporary chairman of the Credentials Committee for the Democratic National Convention against the opposition of the party's reform wing.

Her emergency as a public figure, a friend says, has made Mrs. Harris "a little bit entranced with her own voice." Others say that until she feels at ease in a job or situation, she can be stiff and even self-important, but no one denies that she is hardworking and precise and, ultimately, confident and firm in her decisions.

N. Zealand MP to Quit In Homosexual Row

WELLINGTON, New Zealand, Dec. 22 (Reuters).—A former Labor government minister embroiled in a row over alleged homosexual behavior said today that he intends to resign his parliamentary seat.

Colin Moyle said he had decided to resign so he could seek a vote of confidence from his Auckland constituency of Mangere.

Ford Acknowledges Resignations of Four

VAIL, Colo., Dec. 22 (AP).—President Ford has accepted this week the resignations of four members of his administration, including Leonard Firestone, ambassador to Belgium.

The President also accepted the resignation of Fred Ikle and John Lehman jr., director and deputy director respectively of the Arms Control and Disarmament Agency. Also leaving the administration is Robert Hughes, assistant director of the National Science Foundation.

News Analysis

Survival of Rhodesia Parley Cited as the Sole Geneva Success

By Henry Kamm

PARIS (NYT)—"A modest success" was the way Ivor Richard, the British chairman of the Geneva conference on Rhodesia, characterized the two months of meetings which he adjourned last week hoping for a resumption Jan. 17.

That is one way of looking at it, and perhaps the only way for the man whose task it is to keep the four nationalist delegations and the government of Prime Minister Ian Smith talking. They are talking about a transition from government by the representatives of Rhodesia's 270,000 whites over all of the country's approximately 6.5 million inhabitants, most of whom are disfranchised, to majority rule.

The British and other Western diplomats interested in the success of what may be the last chance of more or less peaceful settlement of the problem of giving African rule to an African country point essentially to the fact that the conference has survived since Oct. 28 to justify their claim of success, however modest.

Another View

But another view is more frequently heard in the corridors of the Palais des Nations in Geneva, the site of 20 years of diplomatic debacles when it served as the home of the League of Nations and a number of post-World War II conferences, none of which lived up to the hopes they raised. That view is that the conference, in surviving until adjournment, has done nothing more clearly than to point up the profound differences, including those between black and black.

To many delegation members and experienced observers of African affairs, the differences look unbridgeable by the present participants. Certainly, the farewell declarations of the two key delegations, those of the Ian Smith government and of the so-called Patriotic Front of two nationalist groups, showed no narrowing of the gulf. That gulf has looked even wider in the Swiss atmosphere of democracy than it does in the segregated worlds of Salisbury and its vast satellite, the black township of Highfield.

Foreign Minister Pieter van der Byl declared loftily and with no visible displeasure that the conference so far had made agreement more remote than it was before it began. Robert Mugabe and Joshua Nkomo of the Patriotic Front left proclaiming "intensification of the armed struggle" and in a blast at Britain, which has, if anything, leaned toward the nationalist viewpoint, characterized the Smith government as "its protégé, the Rhodesian racist regime."

Having said that, Mr. Mugabe set out for Belgrade, reputed to be one of the guerrillas' principal suppliers of arms.

Visible Result

One of the visible results of the conference is the way Mr. Nkomo and Mr. Mugabe, representing the most intransigeant positions, have crowded the two more moderate delegations out of the spotlight and perhaps out of real contention.

Bishop Abel Muzorewa, in fact, left for Salisbury before adjournment for the apparent purpose of strengthening his hand by bringing out a large street demonstration in Highfield, his fiefdom, in his favor. Rhodesian observers feel it may be his only means of making up the ground he has lost here. The fourth delegation, that of the Rev. Ndabaningi Sithole, was invited as an afterthought and has left no imprint on proceedings.

The issue lies between the white minority regime and the most extreme spokesmen for the black majority. It is much more than details of an interim government structure and a timetable, a willingness by black and white to live together under majority rule. Nothing in their actions so far shows that the white leaders are any more willing to subordinate themselves to the majority than the black leaders are to accept whites living among them even in a subordinate capacity. And neither side has made a secret of its deep suspicion of Britain, which is to be the honest broker to bring them together.

Of course, Britain is not alone. The United States is counted on by many, mainly on faith, of having powers over people with none of whom it maintains close relationships. But the nationalists, including all four delegation leaders, miss few opportunities to denounce "imperialism," whose hand they profess to see behind the Smith government.

Looking to U.S.

And the Smith government looks hopefully to the United States because it seems honestly to believe there is a community of interest between Salisbury and Washington founded on what in Salisbury are called Western, or sometimes Christian, values and civilisation. The Rhodesian government's knowledge of the U.S. mood is based on perceptions that predate Rhodesia's isolation since independence, the U.S. trauma in Indochina and the U.S. government's heightened awareness of the strength of its black electorate.

Britain and the nationalists hope that the United States can build on Secretary of State Henry Kissinger's success in September in pushing Mr. Smith to the conference table. But Mr. Smith's reluctance to surrender any of the elements of the white Rhodesians' privileged way of life has not been enhanced by his delegation's experience in Geneva with the nationalist unwillingness to make concessions.

At the same time, U.S. readiness to push Mr. Smith harder may well be limited by concern that disunity among nationalists may cause any package that the United States persuades white Rhodesians to accept to come apart in the application and with it an orderly transfer of power. The United States would no more than Britain want to feel responsible for the chaos and bloodshed that could follow.

Abernathy Weighs Running for Congress

ATLANTA, Dec. 22 (AP).—The Rev. Ralph Abernathy says he is giving "thoughtful and prayerful" consideration to leaving his post as president of the Southern Christian Leadership Conference to run for Congress.

Mr. Abernathy said there was "a strong possibility" that he would run for the 5th District seat (Atlanta) if Congress approved President-elect Jimmy Carter's nomination of Rep. Andrew Young, a Democrat, as ambassador to the United Nations. Mr. Abernathy founded the SCLC with the late Rev. Dr. Martin Luther King jr.

IRA Announces Christmas Truce

BELFAST, Dec. 22 (UPI).—The outlawed Provisional IRA officially announced today that it will observe a three-day Christmas cease-fire in Northern Ireland.

The truce will begin at midnight tomorrow and end at midnight Sunday, an IRA leader in Belfast said.

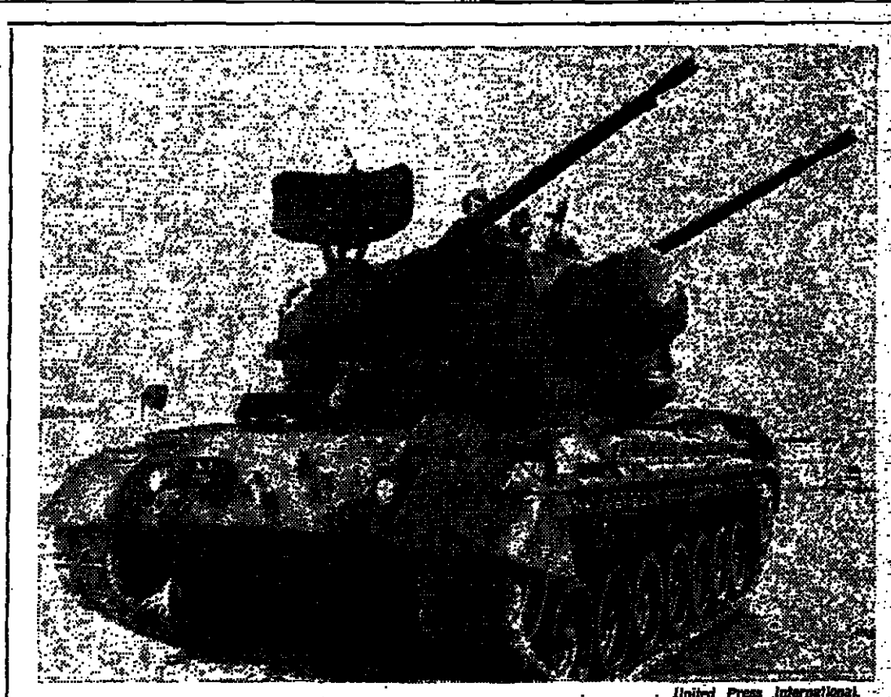
"But the war will go on from Monday," he added. A British Army spokesman said normal patrolling would continue during the truce period.

S. Africa Asserts It Has Released Most Detainees

PRETORIA, Dec. 22 (AP).—Most of the 81 persons that South African Police Minister James Kruger has promised to release from detention without trial have already been freed, it was announced today.

But S.S. van der Merwe, under secretary of justice, added that he was not certain if all 81 would be freed in time for Christmas, Saturday.

The government has refused to provide a list of those being released or to confirm the names of 50 of them so far published in the press.



The 81 are known to be among an estimated 102 "black consciousness" supporters held under South Africa's Internal Security Act along with 300 others said by the Institute of Race Relations to be held under other security legislation.

They were all jailed under detention-without-trial regulations after the racial demonstrations that began in the African township of Soweto, near Johannesburg.

Brink's in Montreal Robbed of $525,000

MONTREAL, Dec. 22 (AP).—A bandit carrying a rifle concealed under Christmas wrapping paper and two accomplices robbed Brink's guards of an estimated $25,000 yesterday, the police reported.

They said the robbery occurred as two guards were transferring money to their truck from a Bank of Montreal branch in an East End shopping center.

United Press International

SOMETHING NEW—The first Leopard tank fitted out with anti-aircraft guns was recently delivered to the West German Army. The twin 35-mm guns can fire up to 1,100 rounds a minute at targets "acquired" by its radar fire control system. Each of the 40-ton tanks will cost in the neighborhood of $2.2 million.

In 10 Years Since Sanctions

Rhodesian Industry Thrives On Varied Substituted Goods

By Robin Wright

SALISBURY, Rhodesia, Dec. 22 (WP).—The game on display in a Salisbury store is a near-duplicate of Monopoly—except for the local names of exclusive hotels and prominent avenues. It is called Round Rhodesia.

The two submachine guns available from local arms dealers are so much like the Israeli-made Uzi that they can use Uzi ammunition and magazines. They are known here as the "Rhusi" and the "gun."

The fishing rod sold at the local sports shop is a near-duplicate of the Canadian-made Blanchard. The local manufacturer has branded it the Rhodesrod.

From razor blades to refrigerators, insecticidal dog shampoo to fiberglass tubing, Rhodesian industries over the last 10 years have developed substitutes for so many goods made unavailable by economic sanctions that were first imposed in 1966 that a local industrial economist boasted:

"Sanctions were, in many ways, good for our economy. A decade of sanctions has forced us to devise ways that would probably have taken us 20, 30 maybe even 50 years under normal circumstances."

More than 1,000 new industries have been developed since the world reacted to the Rhodesian government's unilateral declaration of independence in 1965 by putting trade off-limits, according to John Handford, author of a study of the economy under sanctions.

During that same period, most of black Africa's newly independent countries struggled to maintain the level of colonial production, despite financial assistance from the World Bank and allies, according to James Girdlestone, senior economist of Associated Rhodesian Industries.

The growth rate of the economy of Zambia—formerly Northern Rhodesia and similar to Rhodesia in self-sufficiency potential—was two-hundredths of 1 per cent, according to World Bank figures for the period 1965–1973, while the growth rate in Rhodesia was 3.5 per cent—one of the three highest on the continent.

Through an elaborate undercover network, Rhodesia still imports a great variety of goods from an unusual range of countries—pins, stationery and razors clearly marked "Made in China," Japanese electronic equipment, Russian-made toys, Italian clothes and U.S. computers.

Foreign currency restrictions and trade limitations, however, have led to what a University of Rhodesia economist called a stunning increase in self-sufficiency for a very short period.

Associated Rhodesian Industries research shows that the average young couple setting up a home could find 90 per cent of the materials needed to build, furnish and equip a house manufactured within Rhodesia. Prices are generally equivalent to those on the European market.

Self-Sufficiency

Before sanctions were imposed most clothing was imported. Now, about 80 per cent of it is made by Rhodesian firms, the government claims. On basic foods, Rhodesia has reached 90 per cent self-sufficiency. Late last year, Rhodesia began producing its own cigarettes, now the only ones on the market.

There still is no local substitute for instant coffee. Wine, which requires at least a six-year maturation period in the Rhodesian climate, is just reaching drinkable standards. Local Scotch is unbearable.

Rhodesian candy manufacturers have found a recipe for chocolate that does not require cocoa. Rhodesia buys the framework, engines and chassis of foreign cars—Peugeot, Renault and Alfa Romeo—in kit form and assembles them at plants abandoned by Ford and the British Motor Corp. after sanctions were declared. Local glass, batteries, tires and electrical wiring are added.

The impact of sanctions, so far, has failed to reach the potentially disastrous level predicted in 1966. The London Sunday Express reported in 1974 that Rhodesia's economy, with a balance-of-payments surplus and an annual growth rate of 7 per cent, was doing a little better than Britain's.

Inflation, oil price increases and huge new defense expenditures have since resulted in a balance-of-payments deficit and decreased the rate of expansion. It would take only the cut-off of aid and export-import facilities in South Africa to devastate the economy.

Munro Leaf, 71, Children's Book Author, Is Dead

GARRET PARK, Md., Dec. 22 (AP).—Munro Leaf, 71, author of "The Story of Ferdinand" and more than 30 other children's books, died of cancer yesterday at his home.

Mr. Leaf was perhaps best known for "Ferdinand"—the story of a Spanish bull that would rather smell flowers than fight in the ring. The book, published 40 years ago, has been translated into more than 60 languages and has been made into an animated cartoon.

That book was illustrated by Robert Lawson, who also collaborated with Mr. Leaf on "Wee Gillis." But Mr. Leaf illustrated most of his own books. Mr. Leaf once said of his own work: "Early on in my writing career I realized that if one found some truths worth telling they should be told to the young in terms that were understandable to them. Some 200 translations have seemed to bear me out."

Anna Marzorati Rizzoli

MILAN, Dec. 22 (AP).—Anna Marzorati Rizzoli, 86, widow of Italian publisher-tycoon Angelo Rizzoli, died at her home here yesterday. Rizzoli, a large Italian publishing house, owns a number of daily newspapers and magazines, including the Italian daily with the largest circulation, Corriere della Sera.

J. Frank Drake

NEW YORK, Dec. 22 (NYT).—J. Frank Drake, 96, former head of the Gulf Oil Corp. and for many years a leader of the nation's oil industry, died Monday at Concord Hospital in Concord, N.H.

FBI Reports Drop In Violent Crime

WASHINGTON, Dec. 22.—The rate of violent crime in the United States dropped by 5 per cent during the first nine months of this year while overall serious crime increased by 2 per cent, the FBI reported yesterday, according to the Los Angeles Times.

The 2-per-cent increase in reported crime, the smallest in three years, compared with an 11-per-cent rise during the same period last year.

The 5-per-cent decrease in violent crimes—murder, forcible rape, robbery and aggravated assault—was the result of a 10-per-cent drop in murder and robbery. Forcible rape and aggravated assault showed no change from last year's rate.

Rhodesia Urges U.S., U.K. Probe Massacre of 26

SALISBURY, Rhodesia, Dec. 22 (UPI).—The Rhodesian government said today that it would welcome an immediate British or U.S. investigation into the massacre of 26 tea plantation workers Sunday.

The nationalist guerrillas and the Rhodesian government accuse each other's forces of being responsible for the killings.

Nationalist leader Joshua Nkomo yesterday called the slayings "ghastly" and suggested that they may have been committed by "mercenaries seeking to justify their employment."

13 Killed in Action

SALISBURY, Rhodesia, Dec. 22 (UPI).—A military communiqué reported the deaths in action in the last 24 hours of eight guerrillas and five Rhodesian troops.

The fatalities raised the toll in the four-year campaign to 2,268 guerrillas, 201 Rhodesian troops of all races, 65 white civilians and hundreds of black civilians killed either by guerrillas or by Rhodesian troops.

Cuba-Vietnam Accord

TOKYO, Dec. 22 (AP).—Cuba and Vietnam signed today in Hanoi an agreement on economic, scientific and technical cooperation for 1976-80, the Vietnam news agency reported.

French Tax Compromise On Americans

Jan. 1, 1979, Set For Status Change

PARIS, Dec. 22 (IHT).—A joint French legislative committee has voted to put off for two years tax code changes affecting Americans with incomes in France, the Finance Ministry said today.

The Senate-National Assembly compromise version of the new tax law means that the suppression of Article 164, which exempted Americans from paying taxes here on income already taxed in the United States, will be put off until Jan. 1, 1979.

The Senate committee had wanted the suppression delayed until Jan. 1, 1980, and the National Assembly committee argued for 1978. They compromised on 1979.

Twin Opportunities

The two-year extension gives French and American negotiators time to seek a new tax treaty that would exempt all sources of U.S.-taxed income from tax levies by France. It also gives Americans residing in France time to make portfolio adjustments, according to U.S. officials.

U.S. and French tax officials met last month to negotiate several measures exempting Americans residing in France from being taxed here on income taxed in the United States. The American Chamber of Commerce in France maintains that there are several situations in which Americans may face double taxation, unless the negotiations, which are to resume early next year, are successful.

Marxists on Top In Mauritius Vote

PORT LOUIS, Mauritius, Dec. 22 (Reuters).—A new Marxist party triumphed today in the first general elections held in Mauritius since the Indian Ocean island won independence from Britain in 1968.

With races for 59 of the 62 parliamentary seats decided, the Mauritian Militant Movement had outdistanced all other parties by winning 29 seats—three short of an absolute majority. The movement, which campaigned on a platform proposing nationalisations and the redistribution of wealth, has not been represented in Parliament before.

The Prime Minister, Sir Seewoosagur Ramgoolam, was reelected to Parliament but his ruling coalition—combining the Labor party and the Muslim Action Committee—suffered a severe setback.

The search for Jack Daniel's Whiskey.

Some of our friends have a difficult time finding Jack Daniel's. We hope this list of fine hotels, restaurants and bars will solve that problem.

Because of the slow, careful way we make our whiskey, mellowing each drop through 12 feet of charcoal, the supply is sometimes less than plentiful. But we'd rather ask your patience than lose your respect. Because speeding up our process would mean changing our whiskey. And one sip will convince you that Jack Daniel's should never be changed.

EUROPE ALLIED AGAINST CANCER

$10 from you.

Is that too much to ask?

We are asking every one who reads this issue of the Herald Tribune to send us $10. This is to help fight cancer by co-ordinating, in 10 countries, research on its treatment. EORTC—European Organisation for Research on Treatment of Cancer—is the only pan-European body to co-ordinate such research.

Please send a donation of any amount in any currency to the EORTC Foundation at one of the banks listed below.

Belgium: Société Générale de Banque, Montagne du Parc 3, 1000 Bruxelles.
Denmark: Den Danske Landmandsbank, 12 Holmens Kanal, 1092 Kobenhavn.
France: Banque de Paris et des Pays Bas, 3 rue d'Antin, Paris 2.
German Fed. Republic: Dresdner Bank AG, Gallusanlage 7-8, 6000 Frankfurt/M.
Holland: Bank Mees & Hope, Kneuterdijk 13, 's-Gravenhage.

Thumbing Around Globe At 60-Plus

By Jerry Belcher

HOLLYWOOD.—At a time of life when many people are content to sit at home twiddling their thumbs, Joop and Toos Wouters use theirs to hitchhike around the world.

He is 66. She is 62. They believe they are the world's oldest husband-and-wife hitchhiking team.

During the 28 years since they climbed their first ride in their native Holland, the Wouters have covered 132,400 miles, always together and always on thumb power. Now U.S. citizens, they live in Hollywood. Mr. Wouters, a tall, precise man, says they have hitched "the equivalent of five times around the world."

Other statistics: They have visited 75 countries, all 50 states and all 50 state capitals. Their longest trip was in 1971, a 22,133-mile circuit of the United States—it took them five months. They wear out a pair and a half of shoes on every journey.

Mr. Wouters is a retired map maker. His wife is a retired credit checker for the Bank of America. They got the idea of hitchhiking from American GIs, just after the war. "Before World War II," Mr. Wouters said, "hitchhiking was unknown in Europe. Then the Americans and Canadians came, and we saw them hitchhiking... I thought it was fantastic—I'll try it too." He made some solo trips before his marriage in 1947 but doesn't count that mileage in their 132,400-mile total.

The Wouters made their first trip together in April, 1948, hitchhiking from The Hague to Antwerp. "We went to Antwerp because you could get nylon hose there," Mrs. Wouters said.

Los Angeles Times.

Joop and Toos Wouters talking about their travels.

During their three-week vacation that same summer, they hitchhiked through eight European countries. From then on, they knew how they would spend every subsequent vacation of their lives. They have never had any major trouble, never been robbed or mugged, never been arrested although hitchhiking is legally frowned on in some places.

"The police always are cooperative—many times the highway patrol or a sheriff's deputy will pick us up and take us to the end of their beat," Mr. Wouters said. "Sometimes they will radio ahead to the next patrol car and have it pick us up."

There are certain people the Wouters refuse to accept rides from—"drunks, people who act strange, or those who insist on giving us a ride." "When in doubt," Mrs. Wouters advises, "don't do it. That is a very good rule."

They say that women are more likely to pick them up than men, but they haven't figured out why. "Can it be my irresistible charm?" Mr. Wouters asks.

Neither are sure that their age is an advantage in getting rides. "Some people take us because we are older people," Mr. Wouters says, "but others say they wouldn't pick us up because we are older."

Occasionally some motorists scold them for thumbing rides "at your age." Mr. Wouters has a standard reply: "Should I be sitting at home waiting to die?"

The toughest country to hitchhike in is the United States, they say, but the longest wait for a ride was in Australia.

The Wouters are setting off again in April, this time for Ireland and Scotland, through Europe and on to Morocco and Algeria.

And then?

"We'll keep on doing this," Mr. Wouters says, "as long as we can put one foot in front of the other."

French Riviera City Survives Money-Makers

NICE, France (AP).—La Baie des Anges, the angels' bay that wraps the Nice shoreline in a rainbow of gradually deepening blue tones, has survived a money-making plan that could have deformed its remarkable Mediterranean profile with dubious plastic surgery.

Mayor Jacques Médecin, who also serves as President Valéry Giscard d'Estaing's minister of tourism, has announced quietly to the City Council that a project to build a four-story leisure complex, partly on 16,000 meters of land to be reclaimed from the sea, is dead.

At the same time, in what seems to be an unusual outpouring of environmental good sense, the city is studying a way to take cars off the Promenade des Anglais, the six-lane thoroughfare at the water's edge that nearly bursts with up to 90,000 cars a day during peak periods in the summer.

The leisure complex, proposed by British and French developers for a site near the middle of the perfect four-mile sweep of shoreline, apparently died because of the promoters' lack of ready cash. But its failure was assisted by citizens' groups which damned the project as an aesthetic abomination and the Nice marine biology center, which said it could be an ecological disaster.

The Plan

The plan called for the construction of a 50,000-meter building on four levels that would have had theaters, swimming pools, a shopping center, a casino, cafés, restaurants, a therapeutic center and a parking lot with room for 3,000 cars (IHT, Aug. 13, 1975).

Most of the building was planned for below the level of the sea wall, but it would have projected into the bay in a way that would have broken its symmetry and perspective. The beach in the area would have disappeared and, according to a spokesman at the marine biology center, "Water will stagnate, garbage will collect and marine life along that stretch of coast will die."

Mr. Médecin's reply when the development project was approved by the council in November, 1974, was that he was "satisfied with the total view of the leisure center." Two years later, the news that the project was dead was greeted at a council session without questions or comments.

The project to get the cars off the Promenade des Anglais involves two proposals, one from a private Riviera environmental association and the other from the city itself. Both propose sending automobile traffic underground.

The private plan calls for a two-level system, with the surface level for gardens, pedestrians and hansom cabs and a second underground tunnel level for cars. The side closest to the water in the tunnel would have a glass wall, though, so that drivers could still get a look at the bay while bathers were protected from exhaust fumes.

The city version proposes a more Spartan-type tunnel.

Georges Lautaud, the municipal director of public works, said, "Although we haven't really projected the cost yet, putting cars along the promenade underground is far from science-fiction. It would bring the city right down to the beach and eliminate a big air-pollution problem. For once, there's an urban development plan around that everybody seems to like."

Higher Tolls in Italy

MILAN, Dec. 22 (AP).—Italian superhighway tolls will be raised an average of 10 per cent starting Jan. 1.

Lina Prokofiev and Some of Her Memories

By Donal Henahan

CHICAGO (NYT).—Lina Prokofiev sat in front of the picture window overlooking Chicago's wintry lakefront and fingered through more than half a century of memories, selecting one now and then to share with her visitor. Now 79 years old, she spoke about the first time she, a young Spanish singer living in New York, saw Serge Prokofiev, a virtually unknown young composer from the Ukraine. "It was at Carnegie Hall in December, 1919. I heard him play his first piano concerto. Altschuler was the conductor, I think." Four years later they were married.

Mrs. Prokofiev, the first—and she firmly contends the only—wife of the Soviet composer, who died in 1953, was in Chicago earlier this month to attend the premiere of a new Lyric Opera production of "The Love for Three Oranges" at the invitation of radio station WFMT. "I was last in America in 1937 or 1938," she said. "This whole trip abroad has brought back my childhood and my youth. I lived here, in New York, for not less than 10 or 12 years, you know. I was about to apply for United States citizenship when Prokofiev came along and changed my mind."

In Memories

"The Love for Three Oranges", which had its world premiere in Chicago on Dec. 30, 1921, with the composer conducting, actually does not figure as importantly in Mrs. Prokofiev's memories as some later works, "I did not come to Chicago for the 1921 premiere, and when the New York premiere came I also missed that. I don't remember why. I first saw the 'Oranges' in Cologne in 1928, a beautiful production. The director in Chicago, they say, was not at all subtle."

Mrs. Prokofiev left the Soviet Union two years ago for a visit abroad and has not been back since. But she refuses to discuss published suggestions that she is considering staying in the West. "I am not a defector. I have an apartment in Moscow, and I have a visa for two years, with a prolongation for two more years." Mrs. Prokofiev added that she has a family in the Soviet Union, including her son Svyatoslav and a grandson. "My other son, Oleg, is an artist who lives in England and he also has a lovely son." Both Svyatoslav and Oleg are the children of Prokofiev, who left his wife during World War II to live with Myra Mendelsohn, a young poet and Communist party worker.

Living in Paris

Mrs. Prokofiev, who speaks English fluently and six other languages as well, has been living in Paris and occasionally visiting England to see her son and his family. She is a remarkably youthful looking woman at 79, bright-eyed and charming, and a fountain of aphorisms and quotations in several languages. "My grandmother used to tell me fables—La Fontaine and so on—and I remember one about a butterfly that left its hiding place and was torn apart by children. To live happily one must live hidden, was the moral." Until recently, she kept so successfully out of the public eye that few people in the West even knew there was a Lina Prokofiev.

She vehemently denies that her own life has been a tragic one, however, or that the subtitle of a biography of her husband by Victor Seroff, "A Soviet Tragedy," accurately describes the composer's career. Along with other composers, Prokofiev fell out of favor once with the Soviet authorities, but he was "an apolitical man," according to Mrs. Prokofiev. Mrs. Prokofiev herself spent "eight years in prison and in the North" for reasons she did not want to discuss. The Seroff version is that she attempted to leave the Soviet Union after her husband left her, and she was arrested for "espionage." But, she said, "Seroff never met me so how did he know?"

A Contention

It is Lina Prokofiev's contention, no matter what official Soviet biographers of Prokofiev may write, that Prokofiev never divorced her or actually married Myra, who died in 1968. That point could become significant in legal proceedings eventually, because the question of who should receive Prokofiev's royalties in the United States has never been settled. Neither the Soviet Union nor the United States signed the Bern copyright convention of 1886 and, though agreements were reached recently between the Soviet Union and one American publisher, Schirmir, the problem of these undistributed American royalties has yet to be resolved.

A spokesman for Boosey & Hawkes, which has published all of Prokofiev's works in this country, said he could not comment on the case. It is common practice, however, to hold such disputed payments in a trust fund.

Mrs. Prokofiev also was adamant in refusing to talk about the royalty question. "There is no theme I want to discuss except my husband's music. I don't want to make statements." She did want to go on record with rejections of much that has been written about her and Prokofiev.

"My husband was not a political man, and I know nothing about politics. Nobody has yet tried to find the exact truth about what went on. There has not yet been a good book about Prokofiev."

Does she contemplate doing a good one herself? "I have no such intention. I don't believe in biographies. I have known so many famous people and when I read what is written about them, it makes me laugh. So much embroidery."

2,500-Year-Old Letter Deciphered in U.S.S.R.

MOSCOW Dec. 22 (UPI).—Soviet archaeologists have unearthed a 2,500-year-old Greek letter written on lead sheet on Berezan Island on the Black Sea.

Tass said that the rolled sheet was deciphered and turned out to be from a Berezan Island merchant to his son, relating the hardships he had suffered on one of his journeys. The Greek city of Borysthenes was located in the Berezan Island region in the seventh century BC, according to Tass.

The luxury cigarette with American flavor

PHILIP MORRIS International

Around Rome Galleries

Gastone Novelli, retrospective, Marlborough, 5 Via Gregoriana, Rome, through January.

One of the most inventive and original painters of modern Italy, Novelli elaborated a vocabulary of his own, an intuitive fusion of pictorial marks and written words. A web of lines, accented with jabs of paint, snares the viewer into a strange universe, a mirror image of the humdrum world, transmuted by fantasy. Private and public events have been changed into intriguing inventories, alphabets, enigmatic keys, fossils, stars and creatures. They swarm or slip away in diverse patterns over vast milky or snow-gray fields.

Always irreverent, Novelli, in his early work, could be too idiosyncratic, too faceted, too minutely thought out. Twombly was an influence and confirmed, with his half-wiped-away sentences (not to be read as words but as the essence of poetic content), Novelli's own quest for a new expression.

In the sixties, towards the end of his life—Novelli died at 43 in 1968—his paintings had become unified. They were either an onslaught, a rain of marks, or large, quiet, unfolding areas—all immensely free, lyrical and pungent.

The emphasis of this exhibition is less on the sweep of the last works but rather on the different paths and humors that led to them, which is interesting but not altogether satisfying. As a young partisan, Novelli was caught by the Germans and condemned to 30 years in prison. In a transformed way, his work, fey and refined, was meant as a social message. Impish and intelligent and purposely childish, Novelli used iconoclasm as renovation.

* * *

Le Corbusier, Drawings and Gouaches, Il Segno, 4 Via Capoleasse, Rome, through January.

The great architect apparently kept himself busy drawing everywhere he went. Wavy generous lines, large bulbous shapes, female bodies like vessels, their volumes fitting into each other, always pertain to arrangement of space. The colors are not "fine art colors" but posterish, and the period look, reminiscent of the work of his friend Ozenfant, of Léger, of Picasso, is engaging. To see these drawings and busy doodles is like looking over Corbusier's shoulder.

* * *

Rooms, Galleria Giulia, 148 Via Giulia, Rome, through January.

Paintings, drawings and prints by figurative artists have been brought together to compare ways of regarding an interior. William Bailey experiences it as a setup of household objects monumentally defined by a still, even light. Rosofsky sees it as homely clutter of familiar things in a slightly incongruous context. Barnes, McGarrell and Caroll favor a close atmosphere filled with post-Victorian anguish and dun colors. All the above are Americans who live in Italy most of the time. Of the Italians, Ceccotti paints ordinary city apartments so diligently that the very intensity creates sinister overtones. Residues of peculiar events are left around like so many clues in the interiors of Ferroni, Guccione, Cremonini, Cano and Fioroni, but are too obvious to make one wonder what really happened.

* * *

Photographs by Carla Bianco and Marzio Marzot, Tyler School, 15 Lungotevere A. da Brescia, Rome, until Dec. 24.

The original Roseto is a village at the crossroads of ancient cattle tracks in the Abruzzi mountains; the Roseto in Pennsylvania was settled by immigrants from there. Ethnic development and mutation, the persistence or change of old customs, how old peasant strength and wisdom holds up under adverse circumstances in a new and industrialized country is recorded in straight and incisive photographs. Bianco and Marzot, because they refrained from using arty angles and personal interpretation, achieved sober documents of great impact. These black and whites together with recorded oral tradition, taped songs, sayings and proverbs, will appear in an anthropological study, "The Two Rosetos," to be published by Indiana University Press.

—EDITH SCHLOSS.

ART CONSEIL CLUB AND THE CHRISTMAS & NEW YEAR'S HOLIDAY

A work of Art is a gift that honours the person who receives it; it is a mark of good taste on the part of the person who offers it.

ART CONSEIL offers a personal membership card to its adherents (1). Thanks to this card, ART CONSEIL allows you to purchase at a good price, works of renowned and esteemed painters.

1976 N° 0010669

ART CONSEIL-INVESTISSEMENTS

Mrs. C. Smith

If you use this card before the end of the year, you will get a 25% discount on our editions and a large rebate on our paintings (2). If used in 1976, the card will be renewable in 1977. So, use it for your Christmas presents.

ART CONSEIL is open daily from 10 a.m. to 7 p.m. except Sunday. 123 Rue La Boétie, 75008 PARIS. ART CONSEIL will exceptionally be open on Sunday, December 12 and 19, to facilitate your eventual purchases.

(1) If you don't have a card please come to the Gallery... without obligation, and apply for it.

(2) If desired, you may buy now and pay later.

The Cabinet Choices

In choosing Harold Brown as secretary of defense, President-elect Carter offers the nation for the first time a man to head its military establishment who is fully conversant with strategic weapons in all their awesome power and intricate complexity.

As head of the Livermore Laboratory, a major center of weapons research, as the Defense Department's research chief, and then as secretary of the Air Force, Brown gained a sophisticated knowledge of missiles, planes, and nuclear bombs. He is highly qualified to preside over the Pentagon in a period of rapid technological change.

In recent years, Brown has served on the U.S. delegation to the Strategic Arms Limitation Talks with the Soviet Union and is fully informed about the tangled problems that have delayed a SALT-2 agreement. He should be able to work effectively with Secretary of State-designate Cyrus Vance in reaching Carter's primary foreign policy objective—control of the weapons of mass destruction.

Having served as secretary of the Air Force from 1965 to 1969, Brown was directly involved in high policy decisions concerning the Vietnam war. At his news conference on Tuesday he rightly spoke of that "catastrophic" period with its egregious mistakes of judgment. It would serve no useful purpose to try to determine whether Brown was a "hawk" then and is a "dove" now. Carter has made it abundantly clear that the United States ought not to go plunging militarily into underdeveloped countries and that military action should be reserved for those rare occasions when the vital interests of the United States are directly threatened.

* * *

Ray Marshall of the University of Texas is Carter's surprise choice as secretary of labor. Although he lacks the long experience in labor-management bargaining of former Secretary John Dunlop, he otherwise brings an impressive background to his new post. He is one of the nation's foremost experts in manpower problems including apprenticeships, upgrading of unskilled labor, and the special needs of black and Mexican-American workers. Dealing with these problems is central to the Labor Department's task.

Although part of today's unemployment is due to slow economic growth, it would be wrong to ignore the particularly serious difficulties that women, young blacks, and rural workers encounter in the labor market. Since Mr. Marshall, Juanita Kreps, who is to be secretary of commerce, and Charles Schultze, who is to be chairman of the Council of Economic Advisers, are well versed in manpower problems, Carter has assembled a strong team to deal with unemployment.

* * *

Patricia Roberts Harris, an articulate and accomplished attorney, is easily one of the nation's best-known women. She was on virtually every list of possible Cabinet appointees in a Carter administration. She is relatively inexperienced in the housing field, but on her record, she is likely to give the Department of Housing and Urban Development the intelligent and spirited leadership that it requires.

Long active in the Urban League and the National Association for the Advancement of Colored People, she is sensitive to the housing needs of the urban minorities. She is also an astute negotiator, having gained diplomatic experience not only as ambassador to Luxembourg but also in the more arduous job of Credentials Committee chairman at the Democratic National Convention in 1972. The Housing Department is a daunting assignment because the nation has yet to solve the problem of how to provide rental housing for low-income families. Mrs. Harris will need all of her vigor and resilience in her new assignment.

THE NEW YORK TIMES.

Mayor Daley

Mayor Richard J. Daley of Chicago was the last and perhaps the ablest of a vanishing breed of big-city bosses. New York has not seen a leader in city politics with his unrivaled power since Charles Murphy of Tammany Hall died more than half a century ago. Other big-city mayors or party bosses in the old style—James M. Curley of Boston, Frank Hague of Jersey City, Tom Pendergast of Kansas City—met defeat or disgrace at the end of their careers.

But when Daley died on Monday at age 74, he was serving his sixth consecutive term, having been overwhelmingly re-elected last year; and his control over the nation's second-largest city was undiminished.

He liked to boast that Chicago is "a city that works" and, if one wasn't poor or black, in a limited sense he was right. By deft cooperation with the city's business community, he smoothed the way for a construction boom that remade Chicago's skyline in the last two decades. He held welfare rolls down while keeping essential services functioning at minimal cost. But Chicago has not escaped the problem of accelerating "white flight" to the suburbs, endemic police corruption and excesses, as well as the same fiscal pressures that plague other cities.

Although a big and small "D" Democrat in principle, Daley was an autocrat in practice. He tolerated no criticism or insubordination in his own political organization. The harsher face of this authoritarianism was evident to the nation on television during the police riot against young dissenters that marred the 1968 Democratic National Convention.

Like many other autocrats before him, Daley refused to limit his power by designating a successor. Now the struggle begins for the power that once was his.

THE NEW YORK TIMES.

Landslide in Jamaica

Jamaica's fourth general election since independence offered the voters a clear-cut choice and they delivered a clean-cut verdict: a landslide for Prime Minister Michael Manley's People's National party. It was unfortunate that the election was held under a state of emergency and with some government opponents in detention; but the *dimensions of the PNP victory left no doubt* that most Jamaicans want Manley to continue to lead the country toward his own brand of democratic socialism.

It is obvious that a large majority of Manley's own people believe his assertion that Communism "is just not part of the stream of our history," and rejected the opposition's allegation that his developing ties with Cuba threatened to move the country toward Communism. Manley who had accused the CIA of conducting a "destabilization" campaign against his government, now says he will seek improved relations with the United States—an effort that ought to elicit a positive response from the Carter administration.

A stable Jamaica, making steady progress in its social and economic problems, would be an influence for stability in a restless Caribbean. It is clearly in the best interests of the United States to assist in this process; and over the long run Jamaica's links to Cuba might prove to be an asset for peace in the region, rather than a liability.

International Opinion

OPEC's Decision: Sense of Relief

A first reaction to last week's price decisions by the Organization of Petroleum Exporting Countries (OPEC) is a sense of relief that the larger increases mooted in advance have not materialized. The world at large is fortunate that the particular circumstances of Saudi Arabia and its allies in the United Arab Emirates have permitted them to take a broad, medium-term view of the world economy . . There is no doubt the policy adopted by Saudi Arabia is the one best attuned to the present state of the world economy . . It is too early yet to know what significance to attach to Sheikh Yamani's remarks that Saudi Arabia will now expect the West, and particularly the United States, to show "appreciation" through their policies in relation to the Arab-Israeli conflict and in the North-South dialogue. Certainly many people would feel that the OPEC countries would not be being unreasonable in looking for some further movement from the developed nations to break the impasse in the North-South dialogue . . .

Seventy-Five Years Ago

December 23, 1901

WASHINGTON—The agitation and interest regarding the Panama Canal has attracted much attention in Washington. But the opinion is general here that if ever there was a chance of the U.S. government purchasing the Panama Canal that time has now passed. The sentiment of Congress and the country is unquestionably united in favor of the Nicaragua route.

Fifty Years Ago

December 23, 1926

WASHINGTON—Three thousand additional enlisted men are needed in the U.S. Navy for 1928 to man new carriers and the modernized battleships, the Chief of the Bureau of Navigation states in his annual report filed with the Secretary of the Navy. "The commissioning of the Saratoga and the Lexington plus the extra planes will necessitate a personnel increase," the report said.

U.S. Diplomacy: A Grand Design?

By Victor Zorza

WASHINGTON.—Suddenly, everybody is talking about prospects of a Sino-Soviet rapprochement. Only a year ago the very possibility of it was laughed out of court. Now the argument is no longer about whether a rapprochement might occur, but how to prevent it. The question which few people ask, however, is why the West should try to prevent it.

Wouldn't the whole world stand to gain from a lessening of tensions between China and the Soviet Union? The Washington-Moscow-Peking triangle, which became part of the Nixon-Kissinger "grand design," was built on the unrelenting hostility of China and the Soviet Union. As the Carter team begins to draw up its own grand design, should it not seek to develop a new concept—a détente triangle?

It is not something that would come naturally to Zbigniew Brzezinski, Carter's national security adviser, who has often stressed the benefits derived by the United States from continuing Sino-Soviet hostility. When hostility between the Soviet Union and China was one of the main facts of international life, Henry Kissinger could easily maintain, as he often did, that it was not for the United States to interfere—which was a diplomatic way of saying, let them stew in their own juice. This was one of the few aspects of Kissinger's policy which met with Brzezinski's approval.

Push Peking

Those who advocate a policy of strict nonintervention in the Sino-Soviet dispute maintain that Peking will consult its own best interests and will act accordingly. In their view, any attempts by the United States to interfere in order to keep the dispute alive would be counterproductive. It might push Peking further into Soviet arms instead of keeping it out of them.

The contrary view, that the United States should work against a rapprochement, is ably presented in a paper by Prof. Donald Zagoria distributed recently by Columbia University's Research Institute on International Change—of which Zbigniew Brzezinski happens to be the head. Zagoria's views obviously do not commit Brzezinski in any way, but the two men have been associated at Columbia for a number of years. Whether this means anything only the future will show.

Zagoria lists the benefits derived by the United States from the Sino-Soviet dispute. Militarily, he says, half of the Soviet armed forces are tied down on the Chinese border, which gives Moscow a strong incentive to avoid a crisis in the West. Ideologically, Peking is challenging Moscow in the Third World and in the international Communist movement. Politically, Moscow must contend with the virulent, worldwide campaign against Soviet influence. Diplomatically, the dispute has given Washington diplomatic leverage against Moscow—something that Brzezinski himself has also stressed on a number of occasions.

Issue of Taiwan

Zagoria's recommendation is that, to preserve these advantages, Washington should "tilt" toward Peking by accelerating the process of normalization with China. He believes that a formula could be found which would preserve the independence of Taiwan without compromising Peking's claim to sovereignty over the island. He says that while U.S. arms should not be sold "directly" to China, Washington should facilitate such sales by allies.

Zagoria's argument deserves serious attention, so far as it goes, but in my view it does not go far enough. If the Carter plan for restructuring the world order implicit in his campaign speeches is more than pre-election rhetoric—and I believe it is—then it cannot be accomplished without bringing both the Soviet Union and China into it. But he will not be able to bring them into it if they remain at odds. An important part of the Carter grand design, which was so signally lacking from the Nixon plan, is the recognition of the needs of the less developed countries, and of their role in a new world order. This requires a new framework of international relations which cannot be devised by the United States alone.

Both the Soviet Union and China would have to be brought into it if the structure were to have any stability. Attempts at strategic arms limitation between the United States and the Soviet Union will be increasingly bedevilled by China's growing nuclear arsenal, unless Peking is brought into the SALT negotiations. There are many other areas in which a Sino-Soviet reconciliation could promote international cooperation and stability rather than detract from it.

On the other hand, however, too rapid a development of Sino-Soviet détente would certainly deprive Washington of some of the most important diplomatic cards which Kissinger has used so ably in the past. For the first year or two the new administration will need all the cards it can get for the "tough" negotiations which Carter has promised to conduct with the Kremlin. What this analysis suggests, therefore, is that in the short run the Carter administration may wish to use the many means available to it to slow down and to limit the extent of the Sino-Soviet rapprochement which is now in the making.

But it should be clear in its own mind, and it should make it clear to others, that this is simply a holding operation, and that its ultimate aim is a détente triangle from which both the Soviet Union and China could benefit—to say nothing of the United States and the rest of the world.

Letters

Artistic 'Atrocities'

Warren Brown's article (IHT, Dec. 15), "The American Heritage of Artistic 'Atrocities'", can certainly be ill-taken. And Marvin S. Sadik of our National Portrait Gallery comes across as a true blue bureaucrat. Nikita Khrushchev also had great misgivings over the "quality" of contemporary art, but then not to worry because Nikita had ultimately more power than Brown or Sadik will ever even dream of having.

The tradition of preserving the faces of our leaders as contemporary artists see them is truly ancient. The busts of Roman emperors and Greek leaders are profuse and fill our museums.

The thing is, we accept the principle that those we chose as leaders should be preserved for posterity to see. It is proper this should be done at public expense in one way or another. In all ages these commissions have gone to support the artist.

A man might paint for 10 years before someone pays him or commissions him. Hopefully he will paint or sculpt for another 30 years. The artist sees a person at his time in his place and represents him for posterity through his art. This is a true record of the times. Certainly no two artists will have the same idea in detail, for if they did we would question if they were artists.

America has never really subsidized the arts properly. Prominent men get grants and how many promising men are ground under heel?

My objection to Brown's article mainly stems from his reiteration of fee structure and fund source. To a working artist one of these commissions is like a grant, it gives him more freedom to create. Artists are subsidized by these public and traditional commissions. They should have to answer to only their own conscience and their own art. Brown and Sadik don't say, but they do imply that we should have a computer selecting official portraitists.

Let all of our gods work hard from here on in to protect us from Big Brother.

RICHARD CRAIG.

New Attorney General

Carter's First Slip

By James Reston

WASHINGTON.—The interesting thing about President-elect Carter's selection of Griffin Bell to be attorney general of the United States is that Carter must have known he would have been accused of picking an old neighbor and political buddy for one of the most sensitive assignments in the government, but then went ahead and did it anyway.

Maybe the governor is right in proclaiming that Griffin Bell will be a "great attorney general." Other controversial appointments have been spectacularly successful. Franklin Roosevelt nominated Hugo Black to be an associate justice of the Supreme Court of the United States, despite his former membership in the Klu Klux Klan, and he turned out to be one of the most distinguished justices of this century.

In fact, few things are more misleading about the future than the records and the writings of the nominees in the past. Felix Frankfurter came to Washington as one of the most liberal philosophers of the New Deal, but ended his career on the Supreme Court as a model of strict constitutional conservatives. And even President Nixon's appointees to the court voted against him in the end.

Harding's Woes

Harding was destroyed in the 1930s by the corruption in his Justice Department. Truman had trouble by putting his own friends in charge of Justice. Eisenhower promoted his political manager, Herbert Brownell to be attorney general, and Nixon appointed his law partner John Mitchell, who put politics and personalities ahead of principle and is still under indictment for crimes never before charged against an attorney general of the United States.

Against this background, it is odd that President-elect Carter decided to nominate his personal friend, Griffin Bell, as attorney general. Mr. Carter was warned against this by almost every member of his staff, but he rejected their advice and chose Bell anyway.

Carter's own staff is worried by his decision to nominate Judge Bell as attorney general. They are not only privately but publicly critical, and feel that he is losing the theme that won him the nomination and election in the first place.

For the first time since his election, Carter is in trouble with his own people. It has been coming on during the nomination of the Cabinet, but has really become an issue with the Bell nomination.

Some of his own people are saying, privately, that the Bell nomination is not only wrong but is actually a "disgrace," and Carter is beginning to get in trouble with the labor union and black leaders who helped, and may even have been decisive, in his election victory.

Carter has all kinds of problems in this transition period. He is under pressure from these unions and blacks who think they are responsible for his election; he is trying to reconcile the power center that want bigger military budgets and the people who want more money for the poor people of the United States and for the developing nations.

No day goes past but he is overwhelmed by people who want him to commit the new administration to more missiles or more food for the hungry poor of the world, and his response to this usually is that he will always try to be objective and fair.

The nomination of Bell, his neighbor and political supporter, however has only added to his problem. For even his closest supporters are asking why he could have made such a personal decision, against the advice of all his closest friends.

Watchers

In the transition period between the old and the new administrations, this capital watches for indication of the theme or tendencies of the new administration. It has watched the choice of Cyrus Vance as secretary of state, and wondered about the delay in the choice of secretary of defense, but above all, it has been waiting for Carter's selection of attorney general, and, in all honesty it is disappointed by his choice of an old neighbor and friend.

The special thing that has made this town hopeful about Carter is that maybe he had a new philosophy, maybe even a new integrity to bring to national politics. That was his main appeal, and it is still a valid hope around here. But his appointment to the Justice Department startled even his most enthusiastic supporters in Washington. Griffin Bell somehow seemed to be part of the old buddy-system Carter had opposed during the campaign, and somehow he seemed to defy the principles he had supported all during the election campaign.

Castro Ups the Ante

By Rowland Evans and Robert Novak

WASHINGTON—Cuba's Moscow-financed Africa corps, far from shrinking as Fidel Castro promised last May, has grown to almost 20,000, with alarming indications that hundreds of black Cubans are now "settling in" with Angolan wives for what begins to look like permanent residence.

The exact count of Castro's mercenaries is never given in the controlled Cuban press. Nor can troop traffic between Cuba and southern Africa be measured accurately. But intelligence reports from both Cuba and Angola are now showing a rising, permanent Cuban presence. The Communist-backed Angolan government of Agostinho Neto has been totally unable to consolidate its hold over the central and southern part of that vast country, requiring Cuban troops.

That raises this disturbing probability: an "Africanized" Cuban military force, highly trained in the use of sophisticated Soviet military equipment, residing in Angola as a friendly force available wherever a new need might arise. Such a need might come tomorrow in South-west Africa now trying to achieve complete independence from South Africa as the new nation of Namibia; or it might come the day after tomorrow in white-dominated Rhodesia, where Soviet weapons funnelled to black guerrillas through Marxist Mozambique are being used to gain black majority rule.

Ignored Challenge

Indeed, Castro's potential for troublemaking in his announced purpose of using Cuban military power to advance "the world revolution" seems today almost limitless in southern Africa. Accordingly, President-elect Carter must deal with the Cuban challenge in Africa which has been ignored by the Democratic Congress.

Angola was Castro's first major African venture in trying to carry out his pledge to advance the world revolution (spelled out in the oath of allegiance for Cuban army officers). Castro's flexibility displayed in Angola shows that, unless the West is willing to confront him directly, his threat to dominate emerging countries of black Africa may prove to be the transcendent political event in the post-colonial period.

For example, reports from qualified sources in Cuba now indicate that Castro is freer of Soviet influence in his African intrusion than originally thought. "The Russians tried to get him to pull back months ago, but all he did was make a promise and then break it," one Western expert told us.

That promise was Castro's letter to then Swedish Premier Olof Palme, timed to coincide with Secretary of State Henry Kissinger's visit to Stockholm. The letter pledges Castro to end his occupation of Angola.

Instead, first hand reports indicate that the Cuban Africa corps is at its highest point today—just under 20,000 men. There are two plausible explanations:

First, Castro is deliberately using southern Africa to thin out his own black population (Cuba is about 11 per cent black, 53 per cent mulatto, the rest white).

Second, the success of anti-Neto guerrilla operations under the overall direction of Jonas Savimba, the non-Communist leader, rules out withdrawal of Cuban forces. Savimba can now put 10,000 guerrilla troops in the field and control an area roughly the size of Pennsylvania.

Power Equation

Experts here lean toward the second of these two explanations. But they worry more about the first, because of its horrendous implications for the future. The "settling in" of the black Cubans, including marriages to Angolan women, points to a new power equation in southern Africa.

A more or less permanent Cuban Africa corps available for duty wherever the occasion required, with established roots in Angola, could tip the balance of power toward the anti-Western, pro-Communist side in one of the world's major regions of political competition.

Congress flatly refused to face this fact a year ago when President Ford pleaded for a U.S. response. Now, Castro's intentions are far clearer than they were then. It will be up to Jimmy Carter and a new Congress whether Castro continues to enjoy unlimited initiatives in the vast tip of the continent which controls the strategic tanker routes for the West's supply of oil.

PARIS, THURSDAY, DECEMBER 23, 1976

Japan Rejects EEC Plan on Shipbuilding

TOKYO, Dec. 22 (AP-DJ).—Japan is not convinced of the "appropriateness" of sharing shipbuilding orders on a fifty-fifty basis starting next year, as proposed by the Common Market this month, EEC representative Josef Loeff said today after two days of talks on shipbuilding problems.

The two sides did, however, agree to hold monthly informal exchanges concerning shipbuilding orders, industry backlogs, cancellations and market conditions and will hold further consultations at some unspecified time, Mr. Loeff, the acting director general of EEC industrial and technological affairs, told reporters.

The EEC side, however, "expressed concern" whether such information exchange would actually deal with the "gravity of the problem," Mr. Loeff said.

Japan does not dispute the fact that its shipbuilding industry took about 85 per cent of all ship orders in the Organization for Economic Cooperation and Development area in the first three quarters of 1976, an official of the Japanese Transport Ministry said.

But Japan explained to the EEC that this figure must be viewed along with the mounting cancellations and changes in the size of ship orders that currently plague the Japanese industry, the official said.

Politics Cited

The EEC representatives said the Common Market thought the Japanese responses at the meeting could "be helpful" and "positive" and that they recognized the "internal Japanese political situation makes immediate measures difficult."

"We didn't have any guarantee at all" on the main questions and major problems facing the shipbuilding industry, Mr. Loeff added.

Mr. Loeff emphasized the EEC "can't accept our shipbuilding industry slipping away." He said the EEC Commission had already been asked by individual states to study the possibility of "autonomous measures" to deal with Japanese competition.

Proposed Split

The EEC proposed at the Dec. 5-6 OECD meeting in Paris to split shipbuilding orders equally between Japanese makers on one side and the Association of Western European Shipbuilders—which includes makers in the EEC states plus Sweden, Norway, Finland, Spain and Portugal—on the other.

Apparently, the two sides are no closer to such an understanding.

The EEC will continue to push its proposal for the fifty-fifty split as a "temporary measure" to overcome the massive problems that overcapacity in the world shipbuilding industry has caused European makers, Mr. Loeff said.

It is estimated that world shipbuilding demand, which peaked about three years ago at 36 million gross tons a year, will run at about 12 million tons a year for the rest of the decade.

Mr. Loeff said Europe is worried that the Japanese, while holding the line on overall gross registered tonnage, would cut sharply into production of specialised and sophisticated ships now that tanker production is projected to almost disappear by 1980.

In terms of compensated gross tonnage, or production adjusted for intensity of manhours required, the Japanese have held only about 36 to 45 per cent of the market since 1970, while winning about 50 per cent of total orders tonnage in recent years, the EEC representative said.

An EEC official said the next round of OECD talks scheduled for mid-January may be postponed. The EEC probably will make a report on its talks with Japan to the OECD, he said.

Russians Seen Raising Price of Oil 33%

BONN, Dec. 22 (AP).—The price of Soviet oil is expected to jump by as much as 33 per cent for Russia's customers in Eastern Europe next year, Western analysts report.

Such a rise would place the nominal price of Soviet crude oil at about $8.10 a barrel—170 per cent above the 1974 cost. That is still well below the $12.70 being imposed on the rest of the world by 11 of 13 members of the Organization of Petroleum Exporting Countries as of Jan. 1, 1977.

By the end of the decade, however, Soviet prices inside the East bloc are likely to be brought up to the world market level, the analysts say.

A new Soviet increase, unlike the sudden 130-per-cent rise announced in 1975, will not surprise the Kremlin's allies, since it is prescribed under a Comecon formula worked out in Bucharest last year. Comecon is the East bloc equivalent of the European Common Market.

Under the formula, prices are supposed to be calculated on a movable five-year average of world prices. The 1977 price would be calculated on the 1972-76 average, delaying for one year the impact on the bloc of the recent two-tier OPEC increases decided in Qatar.

The split in the OPEC cartel, with Saudi Arabia and the United Arab Emirates opting for only a 5-per-cent rise, makes projections on 1978 Soviet oil prices difficult, analysts say. But a pre-Qatar projection, based on an assumed 15-per-cent OPEC price increase, indicated Comecon importers of Soviet oil will be paying about 29 per cent more, or approximately $10.42 a barrel, in 1978.

To their basic price, the Russians add a transportation charge, equal to about half the cost of transporting oil from Kuwait to the border of the importing Eastern European country.

Bulgaria, Czechoslovakia, East Germany, Hungary and Poland import the bulk of their oil from the Soviet Union.

However, the Russians are now pushing to expand their petroleum exports to the West to offset a trade deficit that amounted to $3.6 billion last year. As a consequence, East Germany, Czechoslovakia and Hungary have been making deals with Middle East producers to insure that their full needs are covered.

Stocks Gain in Higher N.Y. Volume

NEW YORK, Dec. 22 (IHT).—Feeding partly on carryover demand from yesterday, New York Stock Exchange prices moved ahead smartly today in heavy trading.

Analysts said many traders were encouraged by the rebound in glamours and blue chips late in the previous session, and by the fact that more banks have joined the move to a lower prime interest rate.

Although pared somewhat by profit-taking, the Dow Jones industrial index posted a 6.15-point advance, closing at 984.54. The index had risen as much as 10 points during the day, and at 3 o'clock was up 7.56.

Advancing issues led decliners by about 980 to about 500.

Volume totaled 26.97 million shares compared with 24.4 million yesterday.

Missouri Portland Cement rose 3 7/8 to 26 5/8. It said yesterday it agreed in principle on a merger into H. K. Porter Co.

Bell Telephone of Canada rose 1 1/4 to 46 1/2, while American Telephone picked up 3/8 to 63 7/8.

Coca-Cola, continuing a recent firm trend, climbed 2 1/2 to 77 1/4.

Also higher were Ford Motor ahead 1 1/8 to 60 1/8, Standard Oil of Ohio 2 1/2 to 78 1/2, Pepsico 1 3/4 to 77 1/4, and Du Pont 7/8 to 138 7/8.

Heavily traded A.B. Dick was unchanged at 7 3/4 on 346,200 shares, most of which involved a block of 228,400 shares.

Xerox fell 1 3/4 to 55 1/4 following a company forecast of a small rise in fourth quarter operating earnings.

Prices on the American Stock Exchange advanced in brisk trading. The Amex index rose 0.94 to 105.26.

Profit-taking in the closing minutes of a dull session trimmed gains in farm commodity futures on the Chicago Board of Trade.

Soybean futures closed on a mixed tone after an early gain of nearly 7 cents, soybean oil futures gained about one-third cent a pound, but meal prices were irregular. Corn and oats prices were up about 2 cents a bushel, while wheat gained 1.

U.S. Accounts Show Deficit

WASHINGTON, Dec. 22 (AP).—A key yardstick of the U.S. international payments position registered its biggest deficit in two years in the third quarter, the government said today.

The Commerce Department said the U.S. current account showed a deficit of $1.06 billion for the three-month period ending in September, compared with a surplus of $816 million in the previous quarter.

It was the biggest deficit since the $1.48-billion shortfall in the third quarter of 1974.

The current account measures all international transactions involving the United States, except for long-term capital flows, and indicates the nation's position in relation to its trading partners.

The Commerce Department said the major factor in the third-quarter deficit was a $1.69-billion increase in the deficit in the trade in goods. The deficit totaled $3.03 billion for the quarter.

Counting services as well as goods involved in trade, the U.S. accounts were in surplus by $869 million, but that still was down from a $1.74-billion surplus in the previous quarter.

The Commerce Department said other factors in the third-quarter performance were an increase in U.S. government grants overseas and an $8.9-billion increase in U.S. assets abroad, even though that capital outflow was $1 billion less than in the previous quarter.

That outflow was accompanied by what the Commerce Department called a sharp increase in purchases of foreign securities by Americans. The outflow on that item amounted to $2.8 billion, up by $1.4 billion from the previous quarter.

North Sea Field Said to Be a Major Discovery

LONDON, Dec. 23 (AP).—Mesa Petroleum of Texas announced yesterday it has struck a new North Sea oil field off northeast Scotland that industry sources say could be a major discovery. Reports indicated the field could have recoverable reserves of up to 500 million barrels.

Mesa said the second of two wells drilled in 135 feet of water is producing 6,197 barrels a day —above average for exploratory North Sea strikes.

The major significance of the new discovery is that it is closer to shore than most big fields in the British sector and in shallower water than other producing areas. The average North Sea well is in 400 feet of water.

These factors, the sources said, could make the new field a commercial proposition on the basis of smaller reserves than deep-water fields, since production costs will be lower.

Chase Cuts Loan Rate By a Quarter Point

NEW YORK, Dec. 22 (Reuters).—Chase Manhattan Bank today cut its prime lending rate to 6 per cent from 6 1/4 per cent.

The cut follows Morgan Guaranty Trust Co., which moved to 6 per cent on Dec. 10 and has been followed until now by only one other major bank, First National Bank of Chicago.

Banking sources said that banks are under increasing pressure to cut their prime rates after a fall in short-term interest rates and Friday's Federal Reserve Board decision to cut bank reserve requirements.

3 Guilty of Fraud In Share Scheme That Bilked Stars

TULSA, Okla., Dec. 23 (AP).—Robert Trippet, president of Home-Stake Production Co., was convicted yesterday on charges of a securities fraud in which stage and screen stars and businessmen were swindled.

Mr. Trippet and other officers of the now-defunct company pleaded no contest to charges of conspiracy and mail fraud.

At the time of their indictment last December it was charged that the accused set up an elaborate scheme based on paying investors dividends disguised to appear as deriving from oil profits.

In reality, the indictment said, it was a Ponzi scheme, in which initial investors were paid with money obtained from later investors.

The scheme is named after Charles Ponzi, who in 1919-20 promised investors $1.40 within three months for every $1 invested. Ponzi took in $10 million before being arrested.

In the Home-Stake case, the indictment said, the plan was to draw new investors who had heard from the original group of investors that they were receiving big returns on the money.

Named among the investors were comedian Jack Benny, who invested $300,000; singer Liza Minnelli, $231,000; singer Andy Williams, $538,000; Walter Wriston, chairman of Citibank, $211,000; and George Goodman, who writes investment advice under the name of Adam Smith, $110,000.

Home-Stake's losses ran to about $40 million.

Mr. Trippet was sentenced to three years' probation and a fine of $19,000.

U.S. District Court Judge Allen Barrow also ordered him to pay $100,000 within 90 days as a fund for people who could prove they were made destitute by investing in Home-Stake.

Frank Sims, senior vice-president of the firm, received one-year's probation and was ordered to pay $5,000 to the trustee fund.

Harry Fitzgerald, former executive vice-president, was placed on a one-year unsupervised probation. He was not fined after the judge noted he was $43,399 in debt.

Oil Nations May Reduce Funds Abroad

LONDON, Dec. 22 (Reuters).—Some oil-exporting countries with large development programs may have to withdraw part of their short-term deposits and investments overseas following the two-tier pricing decision by the Organization of Petroleum Exporting Countries, bankers here said today.

The increase in disposable revenues stemming from higher oil prices may be confined to a few large producers, such as Saudi Arabia, if OPEC's pricing dispute is not resolved quickly, the bankers say.

If this is correct, withdrawals of deposits held in Western banks by some oil exporters and for outright borrowing in international capital markets for payments purposes could accelerate next year, the bankers said.

West Germany's Trade Surplus Shrinks in Month

WIESBADEN, West Germany, Dec. 22 (AP-DJ).—West Germany posted an international trade surplus of 3.003 billion marks in November, against surpluses of 3.585 billion marks in October and 3.154 billion marks a year earlier, the Federal Statistics Office said today.

Exports in November totaled 22.195 billion marks, against 22.886 billion in October and 19.080 billion a year earlier. November imports were 19.192 billion marks, against 19.281 billion a month earlier and 15.936 billion a year earlier.

The current account—comprising merchandise trade, services and transfer payments—showed a preliminary surplus of 1.7 billion marks in November, against surpluses of 1.4 billion marks both a month earlier and a year earlier.

For the first 11 months of 1976, Germany had a trade surplus of 31.26 billion marks, down from the year-earlier 34.045 billion. Exports in the period totaled 231.899 billion marks, up from 201.011 billion a year earlier. Imports were 200.639 billion, up from 166.965 billion.

The current account in the first 11 months showed a surplus of 7.5 billion marks, little changed from 7.4 billion a year earlier.

French Auto Output

PARIS, Dec. 22 (AP-DJ).—French output of private cars and light vans jumped by 23.4 per cent in November to 268,299 units from a year earlier, but was still 1.4 per cent below that of the same month in 1973, according to latest figures released by the Auto Producers' Association. Over the first 11 months of this year, output stood at 2,679,208 units—17 per cent more than over the same period last year and 1.2 per cent above that of 1973.

Spanish Cost of Living

MADRID, Dec. 22 (AP).—Spain's cost of living index went up by 1.87 per cent in November for an 18.54-per-cent increase since January this year, government figures showed.

No AKZO Interim Payout

ARNHEM, the Netherlands, Dec. 22 (AP-DJ).—The supervisory council and board of management of AKZO NV has decided not to propose an interim dividend for the financial year 1976, the company announced.

Way Cleared For IMF's Loan to U.K.

PARIS, Dec. 22 (AP-DJ).—International monetary experts finished work today on a $3.9-billion loan for Britain, but a solution to the country's "sterling balances" problem is still under discussion.

The British credit is scheduled to be formally approved by executive directors of the International Monetary Fund on Jan. 3.

Meanwhile, it is expected that continuing negotiations will enable the board of governors of the Bank for International Settlements to agree on a formula for removing pressure exerted on the pound by foreign-owned sterling at their next meeting in Basel on Jan. 10.

Work on the IMF credit was concluded when deputy finance ministers of the Group of Ten, comprising the most industrialized members of the fund, agreed to replenish the IMF's kitty with currencies equivalent in value to 6 billion special drawing rights (the SDR is worth about $1.16).

Group of Ten members will provide 2.56 billion SDRS of the total, with the remaining 300 million coming in the form of a special loan from Switzerland, which is not an IMF member.

Drawn Over Two Years

The British standby credit will total 3.36 billion SDRs, 500 million of which will be provided from existing IMF resources. The credit can be drawn upon over the next two years, and a tranche totaling 1 billion SDRs will be available next month as soon as formal approval is granted. The remainder will be made available in quarterly installments.

To qualify for the loan, Britain agreed to cut government spending, to attempt to continue voluntary wage and price controls and to more strictly control the expansion of the country's money supply.

Monetary experts who met in Paris yesterday under the auspices of the Organization for Economic Cooperation and Development said those steps, combined with rising North Sea oil output, will enable Britain to soon begin accumulating enough foreign currency to repay the IMF and other foreign creditors years ahead.

Britain's balance of payments, currently in deficit, is expected to show a surplus as early as 1978.

Iranian Company Buys Italy Firm

ROME, Dec. 22 (Reuters).—An Iranian company has taken over an Italian subsidiary of a West German electrical goods firm, a Foreign Ministry statement said today.

The ministry said the Iranian group, Ritaco Co. Ltd., would take over the management of the subsidiary, Philco Italiana SpA, in February.

The parent company, Robert Bosch GmbH, said Philco had lost 50 million marks since its foundation in 1972.

The Iranian purchase is the second investment by an oil producing country in Italy this month, following a $415-million deal between Libya and the Fiat motor company.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

SALES ENGINEER

We are looking for a Sales Engineer to sell Blood Processing Equipment in France and to manage the importation of shipments from the United States, clearance through customs, delivery to customers, installation and training and after sale service.

This will begin as a one-man operation but will expand as the business grows.

Location Paris. Extensive travel in France.
We need a versatile person who can work with minimum direction. Technical background. Business experience necessary. Fluency in both English and French essential. Salary, expenses and company car.

Send resume in confidence to:

Box 31,788, I.H.T., 28 Great Queen St., London, WC2.

EUROPE £8.000

Multinational company with substantial interest throughout Europe is extending its corporate auditing activities and requires

FINANCIAL/OPERATIONAL AUDITORS

who are willing to pursue a challenging career. Candidates should be certified accountants or hold equivalent qualifications and have 3-4 years public auditing experience in a senior capacity. Bilingual (French or Italian) applicants may be asked to relocate within Europe.
Write in confidence to: Box 869, I.H.T.,
Gr. Eschenheimer Str. 43, Frankfurt, Germany.

New first-class hotel located in

GENEVA

is looking for modern minded, dynamic and experienced

SALES MANAGER

ideal age 28 to 40 (fluent French, English, German), able to integrate with young team, excellent salary conditions, fringe benefits, free to start rapidly.

Send applications to: C. P. 218, CH-1211 Geneva 2

FOR INFORMATION AND COSTS OF ADVERTISING IN THE INTERNATIONAL EXECUTIVE OPPORTUNITIES SECTION CONTACT THE LOCAL OFFICE IN YOUR COUNTRY:

Paris: Mr. Max Ferrero Tel.: 225-28-90.
London: Mr. Adri Van Veen Tel.: 242 6593.
Brussels: Mr. Bill Finnerty Tel.: 513 57 40.
Amsterdam: Alfons Grim Tel.: 76 86 66/76 86 67.
Frankfurt: Miss I. Oettinger Tel.: 28 36 78.
Lausanne: Mr. Guy Van Thuyne Tel.: 29.58.14.
New York: Mr. John Quigley Tel.: 752 38 90.
Rome: Mr. Antonio Sambrotta Tel.: 679 34-37.

THE "INTERNATIONAL EXECUTIVE OPPORTUNITIES" appears every TUESDAY, THURSDAY & SATURDAY

EXECUTIVES AVAILABLE

EDITOR

Managing editor of most influential business magazine looks for challenging position in press or other related fields. French born, fluent in German and English.

Write: Box D 5,613, Herald, Paris.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or pid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

French Company To Dismiss 9,000

HAYANGE, France, Dec. 22 (AP-DJ). — The Sacilor-Sollac French steel group informed its workers committee yesterday it will gradually dismiss 9,000 persons from now to mid-1979.

It is the first official announcement of outright dismissals in the crisis-ridden steel industry of the Lorraine region.

Last week the company announced an extension of the current temporary layoff of most of its 32,100 workers through Feb. 5 next year because of dwindling orders.

The group, which produces 9 million tons of steel, or 30 per cent of French output, employs over 48,000 workers—about 32,100 at Sacilor and 16,000 at Solac.

Schlumberger

The undersigned announces that as from December 22nd, 1976, at Kas-Associatie N.V., Spuistraat 172, Amsterdam, div. cp. No. 8 of the Certificates Schlumberger N.V., each repr. 5 shs. of common stock of U.S. $1 par value, will be payable with Dfls. 2.50 net (div. per record date 9.20.76; U.S. $0.30 per share).
This dividend distribution is not subject to tax-withholding at source.
The Board of Directors voted a three for two split of common stock of the company to the shareholders of record December 20, 1976. For this purpose div. cp. No. 9 of the Certificates has been designated.
The Board also declared a quarterly dividend of $0.30 per share before the split to shareholders of record on December 20, 1976. Div. cp. No. 10 will be designated for this purpose.

BE A NEW SUBSCRIBER
and save up to 47% of the newsstand price
(Depending on your country of residence)

Take advantage of the International Herald Tribune's 25% Introductory Discount on the regular subscription rates. That's a big saving. But remember that the newsstand prices are always higher than the subscription rates. When you compare the reduced subscription rates with what you have been paying at the newsstand, you find that your saving is a lot more—you can save up to 47% of the newsstand price. In the Herald Tribune you'll find unsurpassed international news coverage and respected and influential columnists including James Reston, C.L. Sulzberger, Anthony Lewis, William Buckley, Art Buchwald, Russell Baker, Red Smith and Brian Glanville. In addition, you'll find special reports from the principal cities of Europe including Claire Sterling from Rome, John Dornberg from West Germany and Peter Lennon from London. You'll also find excellent important coverage of international business and economic news. And complete, daily Wall Street stock tables. Complete the coupon below and mail it to us with your check or money order today.

As the world gets smaller, everyone needs a newspaper with a bigger point of view.

These are the special rates after deduction of the introductory discount.

BOOKS

A DEATH IN CANAAN

By Joan Barthel. Introduction by William Styron. Thomas Congdon Books/E.P. Dutton, 328 pp., $9.95.

Reviewed by John Leonard

NEAR the end of this appalling book, someone says: "What an education this has been for all us. For us, and for our kids. I can't watch 'Petrocelli' anymore. 'Petrocelli' is a big fairy tale."

Indeed, "Petrocelli" is. And so are all the police thrillers on television, because the characters in them have been reduced to sandwich boards, advertising this or that emotion; and the law itself, the processes of justice, have been made to appear more coherent in dramatization than they ever are in fact. Odd, then, that so many of the real-life characters in "A Death in Canaan" spend so much of their time watching fairy tales. They remember when and where they were in their lives by referring to the TV programs they have seen. If our physical coordinates depend on the TV schedule, what about our moral coordinates?

Barbara Gibbons of Canaan, Conn., 51 years old, white, semi-Bohemian, welfare mother, was murdered the night of Sept. 28, her throat slashed and her legs broken. Her 18-year-old illegitimate son, Peter, was charged with the crime. He had more or less admitted it, after being held incommunicado for 26 hours, without much sleep or food. A kind of serial confession was pieced together from scraps of interrogation and polygraph testing. It seems on the reading to be less a statement of facts than a work of plausible fiction, for which three policemen provided most of the ideas and to which Peter signed his name. A day later, Peter repudiated this confession. He was, nevertheless, tried for murder, convicted of first-degree manslaughter and sentenced to 15 years in prison.

I must pause. Joan Barthel reprints huge sections of the typescripts of the tapes recorded during Peter's interrogation and his testing by lie detector. You may be tempted to skip over these sections. Please don't. No, they didn't use a rubber hose on him. The truncheons were psychological. A moody, insecure, out-of-focus 18-year-old was led to acknowledge ambivalent feelings about his mother, told outright that everybody had such feelings and that in fact he was the victim instead of his mother, urged to imagine what if anything he might be capable of doing to her when he was angry, and encouraged to transfer his trust to the father-image of Lt. James Shay. They played his nerves, fears, confusions and fatherlessness like a harp, until they heard the tune they liked. These sections are horrifying.

But Peter was lucky. The citizens of Canaan didn't believe he was guilty, and formed a defense committee. By accident, a writer—Mrs. Barthel, who had been a staff reporter for Life magazine and was trying out the freelance life—learned of the case and undertook an article for New Times. Without that article, there wouldn't have been money to engage a lawyer and to put up bail. Without the continuing efforts of Mrs. Barthel and the citizens' committee, Peter Reilly would not have come to the attention of such celebrities as Brendan Gill, Arthur Miller, Mike Nichols, Renata Adler and William Styron. Mr. Styron contributes an introduction to this book; Mr. Miller was in several ways responsible for finding the new lawyer and the psychiatrists who reopened the case and obtained Peter's freedom.

I must pause again. Much is made of radical chic, most of it nonsense. I can't think of a better use of one's celebrity than to lend it to a worthy cause. What else should one be doing with it? Tennis tournaments? Television commercials? Peter was about as radical as a pet rock. That certain well-known writers and artists wanted to and could help him should inspire us to question our motives for not having done so instead of theirs for having acted.

This rich and scary book is impossible to summarize with justice to the many subtleties of Mrs. Barthel. "A Death in Canaan," unlike the equally absorbing "Blood and Money" by Thomas Thompson, lacks glamorous dramatis personae. They are just trying to do their job, and decency is an unearned dividend. It lacks, actually, *evil*, and is in a way naive: You mean the system isn't perfect? Where's Kojak or Serpico or Petrocelli? And just like "Blood and Money," it *is* littered with loose ends: Who is Auntie B. and why did she behave that way? Whatever happened to the third wallet? Has anybody analyzed the stain on the plaid jacket? How come John Sochocki drowned? Whither the Parmalee brothers? Which means it isn't an episode of "Kojak," "Serpico" or "Petrocelli." It's as messy as the law that anthology of our many ways of being fallible. It is also first-class journalism.

The use of the polygraph as a thought-reader, and of coercive psychologizing and heavy parochial suggestion on the part of the crime-minded readers of the polygraph charts were damnable. And just a grain tips scales. If Peter had been a punk, and Barbara had been respectable, Peter might have ended up serving 18 years to life, instead of graduating from high school and becoming the victim-as-hero that Mrs. Barthel feels so ambivalent about.

John Leonard is on the staff of The New York Times.

BRIDGE — By Alan Truscott

The diagramed deal is a demonstration of the art of not drawing trumps. South opened with a weak two-bid in hearts. The response and rebid followed a plan used by many experts: two no-trump asked South to describe his hand in steps, in terms of the strength of his trump suit. Three diamonds, the second available step, showed a relatively weak suit but a relatively strong hand.

North's bid of three hearts left the final decision to South, who continued to game. He won the opening spade lead with the ace, and although there was no apparent advantage of ruffing, he recognized that this was not a hand on which to draw trumps. He set about taking as many ruffs as could be managed.

After one spade ruff, he led a diamond to the king, leaving open the possibility of establishing the diamond suit. East won and played another spade, ruffed in the closed hand. After a diamond to the queen and the ruff of the last spade, dummy was entered with a club to the king.

A diamond was led, and when East showed out, it was safe to ruff low without any danger of an overruff. The club ace was cashed, and a club was ruffed with the heart king. By this time East was reduced to nothing but trumps, and was forced to underruff, muttering under his breath. The declarer already had nine tricks, and the A-J of trumps were good for two more, giving him an overtrick.

In East Germany, Success in Sports Leads to Privileges

By Craig R. Whitney

This is the second of a series on East Germany's system for building Olympic champions.

EAST BERLIN (NYT).—Kornelia Ender is an 18-year-old East German citizen who grew up in the smoggy, smelly industrial city of Bitterfeld, which until last summer was known chiefly for the chemicals manufactured there.

Ender changed all that at the Montreal Olympics, where she won four gold medals and one silver in swimming—an astonishing performance.

The precious metal now rests in a closet in her father's home in Bitterfeld and she has ended her athletic career. But in a society that values Olympic triumphs as highly as diplomatic recognition, sports has changed her life.

Most of those with whom interviews were permitted are at the end of their careers. But the system that produced them is already processing their successors the same way, training and educating them the way Ender was trained and schooled.

She is a big woman—broader in the shoulders than most men her age. She has been separated from "normal" schoolmates, shut up in a dormitory at a specialized sports school away from home in the city of Halle, since 1969. This schoolgirl's afternoons were spent swimming six to seven miles a day in the pool reserved for champion athletes, not flirting after classes or collecting Western records. Her rewards have been privileges—the right to travel to the West, to buy the Western clothes all teen-agers here love, to choose the field of study she wants.

Stepping Stone

It is perhaps no wonder that Ender has a poise and self-confident presence most 18-year-olds lack. She has no regrets, and her conscience is clear about quitting.

"I gave the state quite a lot with my four gold medals," she said, "and before that with my world records (she broke 23 during her career). I want to try to give something back now by making a contribution to society as a pediatrician, perhaps, or in some other field of medicine."

How "Konny" Ender and other East German champion athletes are picked out, encouraged and trained had been a secret until recently. But the East German government, perhaps anxious to show that an ugly concrete wall keeping most of its 17 million citizens from fleeing to the West is not the summit of socialist cultural achievement, has begun allowing glimpses into the lives and training programs of some of its Olympic champions.

Some of them, like ski jumper Hans-Georg Aschenbach, are members of special army clubs that seem to have no military function beyond producing champions for the Winter Olympic Games. Aschenbach was promoted to first lieutenant after he won a gold medal in the 70-meter jump at the 1976 Winter Games in Innsbruck, Austria.

As children, they were plucked from their home towns and taken from their friends and packed off to special training schools, often with their own dormitories.

For those left behind, like Volker Grosch, a 13-year-old boy in Zella-Mehlis, those friends who go to the athletic schools are in another world. "It's hard to keep contact with them," he said. "The school is not in the neighborhood and the kids there do sports all day long."

When Ender was 8 years old, she began swimming after school in one of East Germany's 8,000 factory sports clubs—truly amateur organizations. This one was in Bitterfeld, and her trainer there, Lothar Boettker, saw that she had extraordinary talent. So in 1969, he sent her on to Halle, to the exclusive and specialized championship training center in the Chemie Club.

There, Ender has been training for seven years. Halle is a city of 100,000 with only three swimming pools. One of them belongs exclusively to her club; she lives in a dormitory for sports students about 15 minutes away by streetcar and goes home to Bitterfeld to visit her family every weekend. Her father is an officer in the East German Army, so her political background was no hindrance to her being taken into the expensive championship sports system—loyalty to, if not actual membership in, the Communist party is a prerequisite.

"Swimming was always fun for me," she said here the other day, "but there were times when, honestly, I felt I'd had a snootful of training. But I never seriously thought of giving up."

Work, Work, Work

One of the East German discoveries that helped produce Ender's records was that women can be trained just as hard as men. According to Ulrike Richter, 17, a teammate of hers, normal training is three to three and a half hours a day, two-thirds of that time swimming (six to eight miles a day) and one-third spent exercising outside the pool, in three separate periods.

Eberhard Schramm, head of the swimming department at the German Sports Institute in Leipzig, said that experts there had determined that the ideal training regime for swimmers included gymnastics, isometrics, games and weightlifting.

"Weights are quite effective, but only up to about 40 per cent of the maximum a swimmer can lift," he said. "We want to build up endurance and flexibility, not maximum strength." Ski jumpers and skaters also work with weights, but differently—with heavy weights to prepare the muscles for bursts of maximum strength required in those sports.

East German women did much better in last summer's swimming events than the men, and Rudolf Schramme, the Olympic coach, said the men's squad had already devised a strategy to try to catch the United States men's team in the Moscow Games in 1980.

"The men's team obviously has a lot to make up for in calisthenics and above all in weight training," Schramme said. "Exactly how depends on what the coaches come up with, but probably a lot more time will be spent with the iron."

In some ways, the East German system is self-perpetuating. Rolf Pyttel, a tall blond swimmer whose shoulders are so broad he is shaped almost like an inverted triangle, wants to become a sports teacher. Aschenbach is going to study sports medicine because a knee injury in Czechoslovakia last March forced him to give up ski jumping.

Material worries are not part of any East German athlete's life. Students pay no tuition, and even room and board at the Leipzig Sports Institute runs to only about $30 a month for all students.

Students who are taken from their studies for training camp or competitions are given extra tutorial lessons to compensate, or are allowed to take an extra year to get their diploma, sports officials said.

Aschenbach didn't even have that worry in the army. In a Wehrmacht-era gray-green uniform the other day in a hotel room at the Winter Sports Training Center in Oberhof, he displayed his first lieutenant's bars and said:

"I enlisted when I was 18, for three years, after I came out of the Winter Sports School in Zella-Mehlis. I thought I'd have a better chance of training up to my potential in the Army Sports Club here. I was promoted to first lieutenant because of my Olympic victory and I'll be finishing my studies next year."

He is studying with the Leipzig Institute to become a coach, but wants to go on to medicine later.

Competition for All

All of the dozen or so champion athletes presented to a group of Western reporters on a recent tour were students or schoolchildren. But East German law also provides that a worker who is qualified or is taking a "training course" for an international competitive event may be given paid leave by his factory for the entire time he is away.

Ender will never get rich or be permitted to make money endorsing commercial products like some of her Western competitors. But life has its other rewards here.

After last summer's Games, she and her fiancé, the backstroke swimmer Roland Matthes, received a vacation trip to Cuba from the East German government. Her plans to study medicine—a coveted field—probably will not be disappointed, though no one else competing for premedical admissions can be so sure.

"I think that through sports I have demonstrated a certain amount of will power," she said, "and if I really want something, I'm pretty sure I can do it."

Kornelia Ender and fiancé Roland Matthes, members of the East German swim team, together at Montreal Games.

Bayern Munich Ties in Brazil To Take Crown in Club Play

BELO HORIZONTE, Brazil, Dec. 22 (Reuters).—Bayern Munich of West Germany, despite a lack of sleep, won the Intercontinental Cup club soccer title here last night by holding Cruzeiro of Brazil to a 0-0 draw in the second leg of the final.

Bayern, holders of the European Cup, had a 2-0 lead over the South American champions from last month's first leg in Munich.

The Brazilians, led in attack by World Cup star Jairzinho, strove in vain to break down a resolute Bayern defense in which goalkeeper Sepp Maier was outstanding.

With the crowd of 114,000 becoming increasingly frustrated at Cruzeiro's failure to score, Bayern winger Kapellman was hit by a firecracker thrown from the terraces. He was not hurt.

Match receipts totalled a record 6.3 million cruzeiros (more than $500,000).

Bayern coach Ditmar Kramer said after the victory:

"We slept for only five hours in two days. Our physical condition is always much better than it was when we played tonight. We had a lot of luck in the first half; we recuperated in the second half."

Steeler (Only One) Speaks Kindly of Raiders

By Michael Katz

NEW YORK, Dec. 22 (NYT).—It was as if a Hatfield had admitted he liked a McCoy. A Pittsburgh Steeler called the Oakland Raiders "a good bunch of guys."

The two opponents for next Sunday's American Football Conference title game at Oakland have been making the kinds of statements about each other for years that are usually confined to debates at the United Nations. Some Raiders talk to some Steelers only through their attorneys. The two teams lead the National Football League in lawsuits against each other.

Andy Russell knows only what he reads in the papers. "There's some stuff between wide receivers and defensive backs," the Steelers' 34-year-old linebacker said by phone from Pittsburgh yesterday.

It was business as usual for Russell. On the day after Pittsburgh's outrageously easy 40-14 victory over the Baltimore Colts in the first round of the playoffs, he was attending to his real estate business. But like all of Pittsburgh, Russell was a bit preoccupied with the condition of Franco Harris and Rocky Bleier, the Steelers' two 1,000-yard rushers.

X-rays were negative on the running backs, but both were listed as "questionable," which in NFL jargon means their chances of playing at Oakland were 50-50.

Harris's injury was more critical, Bleier's more serious. Franco suffered two bruised ribs after a late hit by Joe Ehrmann of the Colts early in the third quarter. It only hurts when he breathes, but Harris is a quick healer and the Steelers hope heat treatment this week will have him ready.

"We do have some good backup people," said Russell, "but it's not the same as Franco being there."

Bleier suffered a sprained big toe on his right foot on his first carry. Harris might be able to play while hurt, he can stand the pain. But a running back needs big toes to push off when starting and cutting. Bleier has the kind of injury that makes the Steelers glad they also have John (Frenchy) Fuqua, who gained 54 yards rushing and 34 receiving at Baltimore. Reggie Harrison, who replaced Harris at fullback, also had a good game, gaining 40 yards rushing and 37 receiving.

But against the Raiders, the Steelers need everyone healthy. Pittsburgh has beaten Oakland in the AFC title game the last two seasons on the way to Super Bowl triumphs and in the playoffs three of the last four seasons. But in this season's opener, Oakland rallied for a 31-28 victory over Pittsburgh. "It's kind of a healthy rivalry," said Russell.

It's a rivalry between perhaps the two finest teams in football, and that's what Russell likes about it. As one professional to another, he likes and respects the Oakland Raiders. Some of his best friends are Raiders.

"I know Ted Hendricks very well," he said. "We attend a lot of the various functions together in the off season. I also spend a lot of time with Phil Villapiano. We know a lot of them from the Pro Bowl games.

"An example. Their linebackers play a kind of a game with their tip drills; it's very good for hand-and-eye reflexes. Don Shinnick, their linebacker coach, taught it to us at the Pro Bowl; in training camp this year, I wanted to teach it to the Steelers, but I couldn't remember all the rules. Unsolicited, I got a letter from Shinnick with a list of all 32 rules, the last of which is that any rule was subject to immediate change."

The Steelers acknowledge a deeper debt to the Raiders for Oakland's victory over Cincinnati, which allowed Pittsburgh to capture the Central Division title and a place in the playoffs. Russell said the Raiders had "appeared fired up" against the Bengals, "maybe because our infantile harassment got their goat." In the weeks preceding that game, the Steelers were expressing fears that Oakland would let down against Cincinnati to prevent Pittsburgh from making the playoffs. "You can know you're being conned and still feel the heat," said Russell.

Charles Finley
... confident of victory.

Kuhn Power Only Opposed By A's Finley

CHICAGO, Dec. 22 (AP).—Charles Finley was the only owner opposing 1964 amendments to the major league agreement that broadened the powers of commissioner Bowie Kuhn, the American League president, Lee MacPhail, testified yesterday.

MacPhail ended a second day on the stand in Finley's $3.5 million suit that charges Kuhn with unfairly voiding his cash sale of three Oakland A's stars within hours of the June 15 trading deadline.

Finley tried to sell Joe Rudi and Rollie Fingers to the Boston Red Sox for $1 million each and Vida Blue to the New York Yankees for $1.5 million. Kuhn voided the sale June 18 after conferring by phone with five of the six members of baseball's executive council.

MacPhail testified that Kuhn had also acted against his advice and that of National League president Charles Feeney.

"As I recall, it was unanimous," MacPhail said of the 1964 voting to accept the amendments binding owners, "with the exception of Mr. Finley." But MacPhail said Finley did eventually sign the new agreement, despite his vocal opposition to it.

Article 1, Section 4 gives the commissioner the authority to take legal action, propose legislation or do anything else to stop that "which is deemed by the commissioner not to be in the best interests of baseball."

Earlier yesterday, the former owner of the Texas Rangers, Robert Short, testified that he once offered Finley $1 million for Blue. He said he later nearly traded three players and $500,000 cash for Blue.

MacPhail testified that the amendment was added to the 1921 major league agreement "to broaden the power of the commissioner," and he said no members of baseball's establishment tried to define what was meant by "not in the best interests of baseball."

Finley's lawyers, ending the fourth day of their case, hope to finish their arguments in the Federal District Court tomorrow.

Don King: A Fight Promoter Still Promoting His Legend

By Red Smith

NEW YORK, Dec. 22 (NYT).—On the wall that faces the entrance to Don King Productions, Inc., 67 floors above the Rockefeller Center skaters, is a photograph of two broad smiles. One set of teeth belongs to Jimmy Carter, a former peanut farmer from Georgia, the other to Don King, a former numbers operator from Ohio. It is a big, bold shot inscribed in big, bold script: "To my great friend Don King—Jimmy Carter."

The picture was made during the presidential campaign in either Macon or Plains, Ga. (King couldn't remember which.) "It was a beautiful thing," he said of the campaign. He said he got a lot of votes for the Democratic candidate who "keeps in touch with me all the time." Later, Don would draw a parallel between the career of the farmer "who could go from the fields to the oval office, the most powerful office in the world, and yours truly, a product of the hardcore ghetto, an ex-numbers operator and ex-convict who could rise to the pinnacle of the boxing world. Carter and I have had a somewhat synonymous life."

The "number one premier promoter in the boxing world" had invited the press up to hear about nine fight cards that he was lining up for January, February and March and a couple more planned for April and May. He conceded that it was a fairly imaginative program and the press tended to agree on hearing about a six-bout show to be staged on the flight deck of the aircraft carrier Lexington off Pensacola, Fla., with the precision flying team called The Blue Angels roaring wing-to-wing over the Gulf of Mexico.

Moving Around

More or less like Athena who sprang full-grown from the head of Zeus, King burst upon the scene three years ago fully attired in sequined dinner jacket, to promote heavyweight championships in venues like Zaire, Kuala Lumpur and Manila. Then, balked in his campaign to take charge of boxing in Madison Square Garden, he went into partial eclipse with the Capitol Center in Landover, Md., as his base.

"When the legend himself took a temporary leave of absence," he said yesterday, "many thought I was just going into a hole and headed for extinction."

Not so, he said, announcing an extraordinary schedule of attractions for television beginning with a lightweight title defense by Roberto Duran against Vilomar Fernandez in Panama and including a match between George Foreman and Larry Middleton and a double-header presenting Foreman versus Jimmy Young and Duran against Hector Medina.

In addition, he outlined plans for top contenders in eight weight divisions to compete in an elimination tournament for United States championships with a total of $1.5 million in purses for winners and losers. He said these shows would be presented, with no admission charge, on the Lexington, at the military and naval academies in West Point and Annapolis, and at "one of my alma maters, the Marion Correctional Institute" in Marion, Ohio.

"The U.S. championship tournament is truly a dream come true," the legend himself said. "It will revitalize boxing in all divisions. All the championships have eluded us. They have went to Latin America. They have went to Europe. They have went to the Far East."

He outlined an escalating pay scale for tournament fighters. The heavyweights, naturally, get most—$15,000 a man in the quarterfinals or first round, $30,000 each in the semifinals and, in the final bout, $135,000 for the winner, $45,000 to the loser. Thus the champion would collect $180,000 for three bouts, the runner-up $90,000.

Who is putting up the money?

"I have sold all the programs to television and I am selling sponsorships in other areas. Like Botany 500, who would clothe the champion. I'm talking to General Motors and Ford, who might end up giving cars to the winners and I'm talking to fast food chains. There'll be contests where, if you pick so many champions in advance, you would get a trip to the Bahamas for the whole family."

In his spare time King is working "very hard and dedicatedly" on raising $15 million for a rematch of Foreman and Muhammad Ali. If he succeeded and it became necessary to postpone the Foreman-Young bout, he would promise Young the first title match with the winner.

All promoters want Foreman and Ali, including those at the Garden whom King described as "inept in their matchmaking, archaic and behind the times and I know when I speak with such candor it can come back to haunt you." He said he had nothing against the people at the Garden.

College Football Powers Set To Challenge NCAA's Rules

By Gordon S. White Jr.

DALLAS, Dec. 22 (NYT).—Fifty-six of the nation's most powerful football colleges have met to form a new group that will campaign for changes in National Collegiate Athletic Association rules they consider unfavorable to their programs.

This organization, which will be called the College Football Association, is seen by some other colleges as "a political move and a threat to break up the NCAA," and by others as "a power play to get their way against the majority of the membership" of 717 colleges.

Dr. Earl Ramer of the University of Tennessee, chairman of the meeting and a former president of the NCAA, strongly denied that the new association had such intentions. He referred to it as a "forum for discussing our mutual problems and to identify our issues."

But Tom Hansen, assistant executive director of the NCAA, said: "Yes, it's a political threat. I don't know in just what direction yet, but it's a political move." Hansen spoke by phone from his office in Shawnee Mission, Kan., while the 56 college representatives met in the Dallas-Fort Worth Airport Marina Hotel.

Among the changes contemplated by this group is a reorganization of the NCAA so that the football powers can be in a group of their own. At present these schools are in NCAA Division I, which has 247 members, including many major basketball colleges that do not stress football. These basketball powers do not want to be known as anything other than Division I schools and are willing to fight a reorganization that would lower their ranking in any way. The smaller NCAA colleges are in Division II or III.

The Rev. Edmund P. Joyce, vice-president of Notre Dame, who was at the meeting, said: "The NCAA recognizes the need to reorganize. We want the chance to determine our own destiny."

The men and women at the gathering represented such institutions as Penn State, Pittsburgh, Syracuse, Alabama, Texas, Arkansas, Georgia, Maryland, and Boston College. Seventy-eight colleges were invited, and notable by their absence were the members of the Big 10 and Pacific Eight Conferences. The absentees included Ohio State, Michigan, Southern California and the University of California, Los Angeles.

Super Conference Feared

Those present returned to their campuses with membership applications to be approved by their presidents and returned by Feb. 1.

Among the criteria for membership in the College Football Association is a stadium seating capacity of 30,000, an average home-game attendance of 20,000 over the last three seasons and a schedule that includes CFA opponents in at least 70 per cent of the games.

The obvious financial strength of this group, which bases its membership upon an ability to draw crowds by selling tickets, is one of the reasons others fear its potential threat to smaller athletic programs. They remember threats over the last 10 years from major college coaches, who said they wanted to pull out of the NCAA and establish a "super conference." Some persons believe a super conference could corner the football college TV market, which is currently controlled by the NCAA.

But Ramer, long an advocate of NCAA policies, said the CFA planned to apply for membership in the NCAA and to "work within it to achieve our goals."

Moscow Ignores Major TV Networks, Cooperates' With U.S. Trade Firm

MOSCOW, Dec. 22 (AP).—The Soviet Olympic Committee confirmed today that it has signed a "cooperation" agreement with an American trading company—other than any of the three American networks—for the U.S. television rights to the 1980 Summer Games here.

But a spokesman for the Russians stressed that the "rights have not been sold to anyone" and said the committee would go on negotiating with other companies, such as the major networks—NBC, CBS and ABC.

A representative for Satra Corp., a New York-based company with years of dealings with the Russians, said Moscow provisionally awarded the rights to his firm for a "flexible" price he did not want to reveal until the deal is approved by the International Olympic Committee.

Spokesmen for ABC and CBS both said they did not believe Satra had sealed the deal. NBC said it was awaiting word from the Russians.

"I don't think they made a deal and if they did, I don't think the IOC will approve it," said Roone Arledge, president of ABC Sports.

He said he believed the firm naming the contract would have to be a "bona fide broadcasting organization" with stations, not just a supplier of programs.

Satra officials, who have been working with the Russians for 15 months, steadfastedly contend they can do a good job.

The three networks walked out of negotiations with the Russians last Friday after being told the winning firm would have to guarantee $50 million for basic facilities beyond payment for the rights.

Satra Corp., whose participation in the rights' talks was announced at the last minute, negotiated with the Soviet committee throughout the weekend. A protocol agreement was signed yesterday, according to Satra and Soviet representatives.

While not disagreeing with the Soviet version of what was signed, Satra spokesman Carl Longley jr. saw the agreement as a clear approval for his firm to handle American TV for the 1980 Games.

"We've come to a satisfactory arrangement on the rights," Longley said, refusing to discuss any of the monetary terms. Estimates of what it would cost an American television company to win the U.S. rights to the 22d Olympiad have run as high as $100 million.

The spokesman for the Soviet Olympic Committee also declined to talk about money. Committee spokesman Allan Starodub said the Soviet Union had signed with Satra "an agreement on cooperation which envisages consultations with the International Olympic Committee."

He added this did not mean that the rights definitely had been sold, but that the Russians had finished talking with ABC, NBC and CBS. He did not elaborate.

Longley said there still was a lot of work to be done to finalize the rights agreement but "we don't see any obstacles to satisfactory completion."

Satra is representing "backers" that it so far has refused to identify. The backers reportedly are companies with experience in the television industry.

After walking out of the talks here, the three networks issued a statement saying they hoped to get approval from the U.S. Justice Department for pool coverage of the 1980 Games.

Auto Race World Has Settlement

PARIS, Dec. 22 (UPI).—The Argentine Grand Prix motor race will take place on schedule Jan. 9, the International Sports Commission announced today, now that constructors and organizers have agreed to patch up their quarrel.

"The fight had lasted long enough and it is now over," said a spokesman for the commission, which is motor racing's governing body.

He said racing car constructors and race organizers had agreed to a compromise under which organizers would guarantee constructors at least $300,000 a race.

This compromise was suggested last week by Pierre Ugeux, president of the commission. Ugeux had threatened to cancel the 1977 season unless the compromise was agreed to.

Eagles' Lineman Stabbed to Death

BLACKWOOD, N.J., Dec. 22 (AP).—Philadelphia Eagles starting defensive lineman Blenda Gay has been fatally stabbed in the neck at his apartment, police said. His wife has been charged with murder.

Gay, 25, just completed his second season with the Eagles, both as a starter. The 6-foot-5 255-pounder played college ball at Fayetteville State.

Canucks Name Coach

NEW YORK, Dec. 22 (NYT).—Orland Kurtenbach, one of the quietest and most efficient "enforcers" in the National Hockey League during his playing days, was named coach of the floundering Vancouver Canucks yesterday. Kurtenbach replaced Phil Maloney, who will devote full time as general manager.

College All-Star Game Loses Its Charity and a Pro Contest

CHICAGO, Dec. 22 (UPI).—The College All-Star Game, a midsummer classic for 43 years which pitted the defending National Football League champions against the best college players, was discontinued yesterday by the Chicago Tribune Charities because of rising costs.

The series was conceived by Arch Ward, the late sports editor of the Chicago Tribune, in 1934. President Ford, a center at Michigan, was one of the early participants.

Robert Hunt, president of the Chicago Tribune and Tribune Charities, cited uncertainties in recruiting player personnel and the doubling of player insurance costs as prime reasons for the cancellation.

Left unsaid but implied were fears that last year's lopsided game, won by the Pittsburgh Steelers, would turn into a riot. Officials ended the game, played in monsoon-like weather, with 1:22 left in the third quarter with Pittsburgh leading 24-0 after rain flooded Soldiers Field and scores of fans, some sullen, some happy, spilled from the stands and began belly-flopping, body-surfing and manhandling players.

In all there have been 43 games with the pro champions dominating the series, 31-9-2. The game has been played every year since 1934 except for 1974 when a players' strike forced cancellation.

Art Buchwald

Christmas Gift List

WASHINGTON—It's that time of year when I have been Christmas shopping for all my readers. You, above all, deserve something for what you've put up with in 1976 and I've been spending all my time trying to find a meaningful gift to show my appreciation.

Buchwald

It hasn't been easy.

At first I was going to give each and every one of you a cabinet position in President-elect Carter's administration, but at $60,000 a year I'm sure not many of you could afford it.

I was going to give you a tax cut, but I can't get Mr. Carter to make up his mind on it, and even if he did he would want full credit for it.

* * *

Then I was going to invite you all to the inauguration at my expense but unfortunately, many people who don't read the column have been invited and I don't want you mingling with them as they're not really that much fun.

My gift to the ladies was almost wrapped. I had arranged that any woman who became pregnant while working would be given sick leave with full pay. But then the Supreme Court ruled this was unconstitutional and I had to send the packages back.

For the men I was going to send a secretary who couldn't type, but my wife was afraid I'd get in trouble with the U.S. Postal Service.

They had a sale on swine flu serum, and I was going to give every reader a free shot, but HEW canceled my order until further notice.

I toyed with giving everyone five British pounds but I was afraid by the time I sent them out, the postage might cost me more than the gift.

I tried to get Richard Nixon's TV show to be shown on Christmas Eve, but David Frost said it wouldn't be ready in time and he'd be lucky to get it on the air by Easter.

Then someone offered me 30 million copies of Ronald Reagan's acceptance speech as the Republican presidential candidate in Kansas City. I would have probably bought them, except I had to take his running-mate Richard Schweiker's acceptance speech as part of the package.

* * *

A travel agent suggested I give everyone a weekend in Uganda with Idi Amin, but El Al airlines said it couldn't provide enough planes and hotel rooms during the holiday season.

He then suggested a week at the Bellevue-Stratford in Philadelphia, but it was booked solid for 1977.

"Why don't you offer everyone an interview with Barbara Walters?" someone suggested. I called Barbara and asked her if she'd do it but she said, "Not for a million dollars."

I was going to get all the department stores in the United States to remain open on Christmas Day to help the economy, however, they said they weren't prepared for it this time but would seriously consider it for next year.

I was about to write out a check for 700,000 Chryslers when they were all recalled.

I asked Jimmy Carter if he could give you full employment and a balanced budget, a strong defense and a low inflation rate and he said, "I can't deliver them until 1980."

* * *

Goodwill Industries offered me the entire Ford administration at half price. But what can you do with them now that they're out of power?

Finally, I decided there was one thing you needed this year more than anything else and that was cash. So I've arranged with the South Korean Embassy in Washington to send each and every one of you, in a plain white envelope, the same amount of money they gave many of our congressmen during the past few years. All you have to do in exchange is think kind thoughts of South Korea and make sure they get everything they ask for from the United States in the coming year.

U.S. Group Cites Trend by Nations To Manage News

NEW YORK, Dec. 22 (NYT).—An independent study group warned yesterday of the danger of an increasing trend toward manipulation of the news media by governments as a tool to stimulate economic development.

Freedom House, a nongovernmental organization that monitors liberties around the world, said in its annual report that resolutions had been adopted at various international conferences that condoned practices that could lead to governmental control of the news media in some countries.

The most controversial proposal on this subject was the so-called Soviet resolution introduced at the general conference of the United Nations Educational, Scientific and Cultural Organization in Nairobi last month. It has been interpreted widely as an attempt by the Soviet Union to get the UN agency to give its moral sanction to government control of all news media operating withing a country.

The resolution was not adopted, but it is expected to be re-introduced at the agency's next general conference in 1978.

The Freedom House report also refers to resolutions approved at a regional Unesco conference in San Jose, Costa Rica, in July.

Los Angeles Times.

REMEMBRANCE OF THINGS PAST—Skating on the town pond or river is a memory to many—French, Dutch, Germans, New Englanders. But it's not over for the Canadians, as this scene of Ottawa's Rideau Canal proves.

The Winds of Chancellery and the Book Trade

By Herbert Mitgang

NEW YORK (NYT).—Government sensibilities play a part in the flow of books across the Atlantic and across Europe's sensitive borders, too. What occurs in volatile bureaucratic offices—call it the winds of chancellery—can often determine what writers write and licensed publishing houses publish.

At the moment several of East Germany's writers, whose books have appeared or soon will in the United States, are walking across the thin ice of protest. The trouble started a few weeks ago when Wolf Biermann, a folk singer and poet who satirizes bureaucracy, was not allowed to return to East Germany while on a concert tour of West Germany.

Concern for Continuity

This exile-in-reverse caused many of East Germany's best-known writers to petition their government to reconsider Biermann's expulsion. They included Stefan Heym, Christa Wolf, Stefan Herlm, Gunter Kunert and Jurek Becker, most of whom are authors or poets who have been published here or have lectured at American universities. In turn, they are now being criticized.

Among those vitally concerned for the well-being of these authors, their families and the continuity of trans-Atlantic reading is Melvin Kornfeld, professor of comparative literature at York College in Jamaica, Queens, part of the City University of New York. He translated Jurek Becker's "Jacob the Liar" for the Helen Wolf imprint of Harcourt Brace Jovanovich last year and also wrote the subtitles for the East German film based on the novel.

"Jurek Becker's new novel, 'Der Boxer,' is also about survival after the concentration camps," Kornfeld says. "It depicts without accusation or stridency the chaos of postwar Europe. The novel has not yet found an American publisher but, considering the dangerous condition of these authors fighting for freedom to write, it would be an important symbolic gesture to have Becker, Kunert and the others published here."

One important work of fiction by an East German novelist, Reiner Kunze, is already on the spring publishing list of George Braziller. It is titled "The Wonderful Years," a series of vignettes published to great acclaim in West Germany but not published in East Germany. The fact that a New York publisher has taken it on is more than a literary act; it sends a message across the wall.

Another window on the international publishing scene is being opened by the Organization of American States in Washington. Its cultural affairs department is encouraging publishers to help the Latin American book trade with production knowledge as well as by translating Latin American authors.

One of the leaders in this movement is Siegfried Unseld, sometimes called "the Alfred Knopf of West German publishing," because of his extensive list of foreign writers. His publishing house, Suhrkamp Verlag, has 24 Latin American books in German translation. Among the North American authors published by Suhrkamp are Donald Barthelme, Leonard Michaels, Henry Miller and Susan Sontag.

A Seminar

The OAS is also behind a seminar of writers and historians to be held in Peru next June. It is expected to be chaired by Mario Vargas Llosa, the celebrated Peruvian writer who is president of international PEN, the organization of poets, essayists, editors and novelists. One of the aims is to inform the world that Latin America has more than Mayan monuments; its treasures include living novelists and poets.

"Little magazines are the pollinators of works of art," Cyril Connolly once wrote about the British publications. "Literary movements and eventually literature itself would not exist without them."

The same holds true in the United States, if not more so, because of the greater variety of publications here. But some of these little magazines face extinction unless they receive renewed assistance from the National Endowment for the Arts and/or Humanities, both federal government agencies.

Eleanor Shakin, the idealistic executive director of the Coordinating Council of Literary Magazines, points out that the annual grant to this nongovernmental organization may be ended for the next fiscal year. If this occurs, hundreds of little magazines, all noncommercial, would not be able to receive grants to keep them alive. The average grant is only a little more than $1,000 annually.

The little magazines include such interesting titles as the Yardbird Reader; Telephone; Tree; Oyez Review, and any number of poetry publications.

PEOPLE: *Putting Baby Seal Toys Under Christmas Trees*

Swiss environmentalist Franz Weber has been so successful in his campaign to put a baby seal toy under every Christmas tree that he can't meet the demand, reports John Callcott of United Press International. Weber plans to use the money from the toy sales to take two planeloads of journalists to Canada to "describe the annual slaughter of baby seals off the Canadian Atlantic coast where every winter the pack ice turns red with blood." Weber's toy seals sell for 30 Swiss francs each. "It's been a crazy success," he said. "So far we've sold 30,000 in Switzerland alone and the factory can't meet the demand." He said that the toys had brought in about 600,000 francs so far. "We will need about 1 million francs to charter the aircraft to go to Canada in February and I know we will easily collect that much even though half of the proceeds go back to the factory." Weber will go to the United States in January where he hopes to raise more money for the junket. "Only by having the news media go to the scene itself and having them report exactly what they saw and felt can the killing be stopped," he said.

Franz Weber ... a junk

A Polish woman who is trying to sail around the world alone arrived in Sydney last week, her halfway mark. But Krystyna Chojnowska-Liskiewicz got no royal welcome. She had no means of notifying anyone of her arrival—her engine, generator and electrical equipment, as well as her shortwave radio, were out of order. Miss Chojnowska-Liskiewicz, 40, is a naval architect. "It was very frightening and dangerous without any navigation lights, cabin lights and no electric equipment," she said when the press caught up with her this week. "I hope the Indian Ocean and the South Atlantic will be more friendly than the Pacific has been." She began her trip aboard her sloop in the Canary Islands, passing through the Panama Canal, sailing on to Tahiti and Fiji before reaching Australia. She sets out on the final leg of her trip in February.

Norwegian actress Liv Ullmann is the best actress of '76, according to the National Board of Review of Motion Pictures. She got the award from the New York-based organization for her performance in "Face to Face." David Carradine is best actor for "Bound for Glory." The best English-language film is "All the President's Men" with Eric Rohmer's "The Marquise of O" the best foreign-language film.

* * *

The Iowa chapters of Rainbow Girls have rejoined their international order, which has dropped an unwritten policy that kept blacks out. "Since this new policy eliminates what we in Iowa considered as discriminatory membership practices, the state executive board of Iowa has unanimously voted to rejoin the International Order of Rainbow Girls," the board said Tuesday.

Liv Ullmann ... an award

The Iowa group was suspended and later dropped its affiliation in a dispute over admitting a 12-year-old black girl, Michel Palmer, to the Indianola chapter of the Masonic group.

* * *

Plans to stage a "fight to the finish" between Japanese karate expert Mamoru Yamamoto and a wild Bengal tiger were announced Wednesday in New York by Tokyo promoter Yoshio Kou. In a press conference that the fight will take place in a soccer stadium in Port au Prince, Haiti on Jan. 29 or Feb. 5. Haiti was selected, Kou said, because "it is probably the only country in the world that would permit an event like this."

* * *

Kenya's new permanent representative to the United Nations will be Margaret Kenyatta, the 33-year-old daughter of President Jomo Kenyatta. Kenyatta announced the appointment of his daughter, mayor of Nairobi since 1970, in the capital city Tuesday. Earlier this year Miss Kenyatta had announced that she would not seek re-election as mayor, but later reversed herself in response to demands from women's groups. That set off a dispute in the city council, and as a result the government postponed elections indefinitely. Miss Kenyatta's UN appointment was viewed as a means of moving matters off dead center and opening the way for elections.

—SAMUEL JUSTICE.

Madrid Protesters Fight Police, Seek Release of Carrillo

MADRID, Dec. 23 (UPI).—Central Madrid erupted in leftist fury over Santiago Carrillo's demonstrations today. Riot police fought to disperse stone-throwing demonstrators with rubber bullets and smoke grenades.

The government of Premier Adolfo Suarez worked into the evening to deal with what the Spanish Communists called "a new and grave crisis in the democratization process."

Smoke filled the Puerta del Sol plaza where police opened fire with smoke bombs as Communists and other leftists began to assemble this evening in front of the national security headquarters to demand the release of Mr. Carrillo. The 62-year-old general secretary of the party was arrested yesterday. Today, he was moved to a top-security prison. He had been living clandestinely in Spain for 10 months before his arrest.

In the coal mines of the northern Asturias region, hundreds of miners staged work stoppages in protest against Mr. Carrillo's arrest.

Young Demonstrators

In the Madrid protests, thousands of demonstrators, mostly young, tried to gather. Pedestrians fled as police opened fire with rubber bullets and smoke grenades almost indiscriminately.

The demonstrators swept through the main downtown street, the Gran Via, and through the narrow streets around the Plaza Mayor.

Not far away, near the Atocha train station, several hundred protesters were able to gather for a few moments before the police waded in.

Police jeeps with sirens wailing rushed to the main battle areas.

Long after the clashes began, groups of demonstrators were still attempting to take their protest to the Puerta del Sol plaza. Police replied with renewed fire of smoke grenades and rubber bullets.

"Assassins, assassins," the protesters chanted.

A group of 2,000 demonstrators marched on the Gran Via, waving red flags.

Referring to the exiled Communist party president, Dolores (La Pasionaria) Ibarruri, 82, the demonstrators chanted: "Yes, yes, yes, Dolores to Madrid."

'Total Amnesty'

They also shouted "You can feel it, the Communist party is here," and "Total amnesty."

Leaflets thrown throughout the city said: "The freedom of Santiago Carrillo is absolutely necessary for freedom and democracy in Spain. Madrid workers, in all factories in all the neighborhoods and towns, everyone united to free Santiago Carrillo."

The national news agency Cifra said young protesters started the clashes by stoning officers in the Puerto del Sol plaza.

Police detained about 25 persons and there was an undetermined number of light injuries, police sources said. They said that despite reports of several pistol shots being fired, police officers at no time used their firearms.

Earlier today, economist and author Ramon Tamames and other members of the illegal Communist party's national executive committee went to the Premier's offices in what they said was "the first time the Spanish Communist party has sought an interview with the government." They asked for Mr. Carrillo's release.

Mr. Suarez was meeting with his Cabinet and the Communist message was accepted by an aide.

In their note, the party pledged to mobilize "the maximum initiative" to free Mr. Carrillo.

After spending the night in various police stations, Mr. Carrillo was transferred to the suburban Carabanchel prison and his

Leonid Brezhnev greets Luis Corvalan during their meeting yesterday at the Kremlin.

Hails Release as Victory

Brezhnev Greets Corvalan in Moscow

MOSCOW, Dec. 23 (AP).—Soviet Communist party chief Leonid Brezhnev hugged and kissed Chilean Communist party leader Luis Corvalan in the Kremlin today and told him that his release was "a major victory" for world Communism.

Without mentioning Soviet dissident Vladimir Bukovsky, who was freed last week in exchange for Mr. Corvalan, Mr. Brezhnev attributed the Chilean's release to pressure brought by "the Communist movement [and] the forces of democracy and peace."

Mr. Corvalan made his first public appearance in Moscow today after flying to the Soviet Union last Saturday following an exchange for Mr. Bukovsky at Zurich airport.

Mr. Corvalan had been imprisoned in Chile since 1973, when the Soviet Union began a propaganda campaign for his release.

Looking healthy and cheerful, the 60-year-old Chilean was flown to Moscow from an undisclosed city.

Support for Struggle

Greeted by more than 500 Russian and Latin American students chanting: "Partido Comunista," Mr. Corvalan expressed thanks for "the mass support for our struggle" by people outside Chile and specially to "the Communist party of the Soviet Union and its Central Committee."

In a Kremlin reception later, Mr. Brezhnev hugged Mr. Corvalan, kissed him, said, "Let me hug you again," and hugged and kissed him again.

"Corvalan," cried Mr. Brezhnev when he walked into the room. "I'm glad. I'm glad to see you on our soil. In Moscow. At last.

"Our party, the Communist parties of Socialist countries, the Communist movement have done their work. Even the double-dyed [Chilean] junta has been forced to submit.

"As for me, what can I say? I'm filled with . . . I'm filled with joy and feelings that are hard to put into words," Mr. Brezhnev said.

Speaking in a strong voice, Mr. Corvalan said, "I want to express my deep gratitude for everything that the Soviet people have done

● Bukovsky says Soviet inmates must go on hunger strikes to get basic rights. Page 2.

and are still doing for the liberation of all political prisoners, including myself."

He promised to "do everything possible so liberty can return to Chile."

There was speculation that the reception for Mr. Corvalan was delayed to avoid distracting attention from Sunday's 70th birthday celebrations for Mr. Brezhnev.

The Soviet press has rejected the idea that Mr. Corvalan's release was part of an exchange for Mr. Bukovsky, who has been labeled here as a "criminal."

Mr. Bukovsky, 33, was serving a seven-year prison term which began in 1972. He had been one of the most active members of the Soviet dissident community and was largely responsible for bringing international attention to the Soviet practice of placing dissidents in mental asylums.

Califano Completes Cabinet

Schlesinger Gets Post; Sorensen to Head CIA

By Austin Scott

PLAINS, Ga., Dec. 23 (WP).—In the last of a two-week series of news conferences, President-elect Jimmy Carter today completed his Cabinet, naming Washington attorney Joseph Califano jr., a former special assistant to President Lyndon Johnson, as secretary of Health, Education and Welfare.

Mr. Carter also named Theodore Sorensen, who was a close aide to President John Kennedy, to be both director of the CIA and director of central intelligence.

And he picked one of his own close pre-election advisers, former Defense Secretary James Schlesinger, to fill a newly created job, that of coordinating all *federal energy policy from the White House.*

The choice will keep Mr. Schlesinger, whom the President-elect passed over for defense secretary, close to Mr. Carter and handy for a number of possible assignments. It also makes Mr. Schlesinger the prime candidate for the new Cabinet-level energy department that Mr. Carter said he wants to create.

Records Praised

As usual, Mr. Carter said little about why he chose these particular men other than declaring his confidence in them and praising their record and their acceptance of his policy positions.

At the news conference, where all three were introduced, Mr. Sorensen drew most of the questions, including two asking him to explain his qualifications for the CIA post.

Mr. Sorensen, 48, said he did not ask for the job. But, "because this assignment is central to the maintenance of a secure peace in the world, I did not feel I could turn him down," he said.

In response to a question, Mr. Sorensen said the report of the Senate Select Committee on Intelligence Activities makes it clear that the CIA must retain its ability for covert activity.

Such activities, he said, "should be relied upon only under the most extraordinary circumstances, when the vital interests of the United States are truly at stake and when the activity is carried on in a manner that is accountable to Congress, and which has been approved by the president on the grounds that the chances of success are high, and that the cost of doing the same job in a public, overt manner would be too high."

Past Abuses

That, he said, would rule out assassinations, overthrow of governments, domestic surveillance and other past abuses of CIA authority.

Mr. Schlesinger delivered a warning on energy consumption similar to those that have been repeatedly voiced—but not heeded—by energy advisers in the Ford and Nixon administrations. The United States, he said, must reduce its dependence on foreign oil.

"We must as a nation face up to a responsibility which we had hoped would go away," he said.

Imports now comprise 42 per cent of total U.S. oil consumption, a sharp increase from 29 per cent in 1972.

Mr. Schlesinger said the Ford

● Profiles of the appointees are on Page 3.

administration will continu to make decisions on whether to deregulate gasoline prices until Jan. 20, Inauguration Day. Critics have charged that the Ford administration's deregulation proposal will add 8 to 9 cents a gallon to the retail price of gasoline late next month unless Congress acts to head off deregulation by Jan. 19.

Mr. Schlesinger said the issues of oil pricing "have not been addressed in detail" by himself or Mr. Carter.

He echoed Mr. Carter's call for a national energy policy, said the nation needs to slow the growth

Mrs. Gandhi Hits Red Party For Opposing Her Son's Plan

NEW DELHI, Dec. 23 (Reuters).—Prime Minister Indira Gandhi today made a major attack on her long-standing ally, the Communist party of India, and accused it of being opposed to her and her younger son, Sanjay.

She took strong exception to recent charges by the pro-Moscow Communists that reactionaries were taking over her Congress party and to their attacks on her son's five-point social reform program.

"They say that they support me, but there can be no greater insult," Mrs. Gandhi said, than to say that she could be influenced by reactionaries or anybody else. "If I am a person who is so influenced, I have no business to be the Prime Minister of this great country."

Her 100-minute speech before senior members of her party here was evidence of the growing rift between the Congress party and the Communists.

The Prime Minister also repeated, for the first time, a charge frequently made by her son that the Communists collaborated with the British against Indian independence 30 years ago.

Mrs. Gandhi said that she believed the Communist attacks were directed more against her than against Sanjay, 30, whom she described as "much too small a fry . . . because he is not going to be the prime minister or the president or anything like this."

The Communist party has become increasingly critical of Mrs. Gandhi's domestic policies in the last year and is bitterly opposed to Sanjay's growing national power.

Sanjay is now the effective head of the 5-million-member *Youth Congress and an increasingly influential figure in the* Congress party.

$1.5 Billion Causes Concern

Ford Aid Figure for Israel Is Much Less Than Sought

By Bernard Gwertzman

WASHINGTON, Dec. 23 (NYT).—Administration officials said yesterday that President Ford has decided to propose a $1.5-billion foreign aid package for Israel in the next fiscal year —$800 million less than Israel had requested and $300 million less than the State Department had recommended.

The President's action, taken before he departed for Vail, Colo., last Saturday, has caused concern among Israelis and they have requested that Mr. Ford reconsider his action before he submits his outgoing budget message to Congress next month.

Ambassador Simcha Dinitz of Israel raised the issue with Secretary of State Henry Kissinger yesterday morning and reportedly was told that the issue would again be reviewed by the administration.

As the result of this discussion, Israelis claimed that no final decision had been taken yet by the administration. But well-placed officials said that unless Mr. Ford decided to change his mind, the decision had been taken.

The issue has more than economic consequences for the Israelis. Because of the moves taken by Prime Minister Yitzhak Rabin to call for early parliamentary elections, the size of the U.S. aid package will inevitably have an impact on the Israeli political scene, officials of the two countries said.

Supporters Calm

Word of Mr. Ford's decision to propose the $1.5-billion figure recommended by the Office of Management and Budget has been quietly circulating in Washington but so far has not aroused very much concern among Israeli supporters on Capitol Hill.

The aid total for Israel has been a controversial item for the past few years.

In part because of Israel's eventual willingness to negotiate a second interim agreement with Egypt in September, 1975, the Ford administration proposed and Congress approved a $2.3-billion aid package for the fiscal year that ended June 30.

Of that total, $1.5 billion was for military credits—half of which do not have to be repaid —and the rest in economic aid. This was the largest aid request ever made for a single country in one year.

Fiscal Transition

For the fiscal year that ends Sept. 30, the administration only proposed $1.8 billion, of which $1 billion was in military credits. This $500 million "cut" upset Israel's supporters, who tried to retrieve it by seeking $500 million for the three-month period between June and October when the government went through a transition from the old July-to-July fiscal year to the new October-to-October one.

Originally, Mr. Ford had opposed any additional money for Israel during the transitional quarter, but eventually bowed to political pressure and approved a $300 million addition.

When planning began a few months ago for Israel's fiscal year 1978 aid, Israel submitted a request for $2.3 billion—similar to the peak fiscal year 1976 level. Of that total, $1.5 billion would have been for military credits.

The State Department, however, recommended only $1.8 billion, the level for fiscal year 1977.

The Office of Management and Budget, contending that Israel was not really entitled to the additional $300 million for the transitional quarter, proposed that the total be cut to $1.5 billion, of which $1 billion would be in military credits—half of which would not have to be repaid.

Party Paper Editorial

China Hints at Death Penalty for Miss Chiang, Followers

By Fox Butterfield

HONG KONG, Dec. 23 (NYT).—China today indicated that the wife of Mao Tse-tung, Chiang Ching, and three other disgraced members of the Chinese Communist Politburo may be subject to the death penalty and said no leniency should be shown them or their followers.

At the same time, analysts here were puzzled by the prolonged absence from public view of Wu Teh, the mayor of Peking and until recently a fast-rising official in the party. The analysts were reluctant to conclude that Wu had fallen victim to the widening campaign against Miss Chiang and her associates because earlier this month Mr. Wu delivered the keynote address at a meeting of the National People's Congress, China's nominal legislature.

The fact that his failure to appear at several important functions in recent weeks, including a plenary session of a national agriculture conference, at which virtually all China's ruling leaders were present, seemed to be a further sign of uncertainty in China. There have been continued reports of political turmoil and resistance in China's provinces as the campaign has unfolded there and some indications of a difficult debate among China's new leaders over how far to push the campaign.

Sharp Editorial

The hint that Miss Chiang and her three colleagues might be subject to execution was contained in a strongly worded editorial in the party paper, Jenmin Jih Pao. The editorial charged that the four were "active counter-revolutionaries" who had "sneaked into our revolutionary ranks."

In Chinese Communist practice, "active counter-revolutionaries" are criminals whose misdeeds deserve the death penalty. It was the first time the term has been applied to the four, now decided as "sham leftists," since they were arrested last Oct. 6.

In the view of some analysts, the use of such a tough term might be either a way of preparing China's 850 million persons for the group's sentencing, or it could be intended as a warning to local followers of the four who have not given themselves up.

The editorial was also significant because it appeared to mark a victory for those leaders who have been pushing for a thorough purge of the followers of the four. During the last few weeks, China's news media have given conflicting signals about how tough a stance to take, and there were some indications that army leaders favored a strong line while Hua Kuo-feng, the new party Chairman, preferred moderation.

No Leniency

Today's editorial insisted that "we definitely cannot be lenient" toward the "gang-of-four clique," a phrase that seemed to suggest both the four main figures and their local supporters.

The editorial appeared particularly harsh because for the first time it dropped references made in earlier editorials to Mao's formulas for moderating campaigns. These included the often used phrases, "narrow the target of attack" and "cure the sickness to save the patient."

Analysts here believe Mr. Hua's position as party Chairman is not in doubt. But there is mounting speculation about how much real power he exercises, and an increasing amount of authority seems to be passing to the armed forces, particularly Yeh Chien-ying, 78, the minister of defense, who is

Miki Quits as Leader

Fukuda Elected Party Head, Will Be Japanese Premier

By Andrew H. Malcolm

TOKYO, Dec. 23 (NYT).—Takeo Fukuda, 71, was elected president of the governing Liberal Democratic party today. He immediately urged the rejuvenation of his faltering conservative forces.

Mr. Fukuda's selection by acclamation, at a party caucus, virtually assured him of election tomorrow by parliament as the 13th postwar Japanese premier.

His elevation to leadership of the party that has ruled Japan for 21 years came only moments after the current Premier, Takeo Miki, resigned the party leadership because of the Liberal Democrats' heavy losses in the parliamentary lower house elections Dec. 5.

By law, Mr. Miki, 69, and his Cabinet will be required to resign tomorrow when parliament convenes. The political parties will then nominate their leaders for premier and the voting will follow.

But since the Liberal Democrats hold 260 of the powerful lower house's 511 seats, Mr. Fukuda's selection appeared certain. No major policy changes are expected.

Mr. Fukuda, who had twice before unsuccessfully sought his party's presidency, has already picked a new party secretary-general—a post considered helpful as a stepping stone to the premiership. The new secretary-general is Masayoshi Ohira, 66, a former finance minister whose backstage political support proved vital to Mr. Fukuda's leadership bid.

Masumi Esaki, 61, was named chairman of the party's executive council and Toshio Komoto, 55, will head the influential policy board.

Consultations on the composition of the 20-member Cabinet are continuing.

It is a dramatic measure of the change in parliamentary power that the Liberal Democrats no longer hold their accustomed firm grip on a majority and must at least consider the opposition.

Meeting With Parties

Mr. Fukuda said he would meet soon with the heads of the other parties—the Socialists, the Komeito, the Democratic Socialists, the Communists and the new Liberal Club.

"My political philosophy is cooperation," Mr. Fukuda said. "Actually, I am a flexible man."

He added, "I don't think the Japanese people want a transition from a free society to communism. What they want—and what we need to do—is to drastically reform our party."

He did not cite specific reform measures, except to suggest that it might be necessary to change the party's name.

At a news conference later, Mr. Fukuda vowed to continue the investigation of the Lockheed bribery scandal and to increase consultations with the growing number of younger party members, some of whom are less than half his age.

The party lost 16 seats in the balloting 18 days ago while every opposition party except the Communists gained seats. The Liberal Democratic party rebuilt its majority with the help of 11 conservative independents.

After resigning the top government post, Mr. Miki will take his place as a regular member of parliament, along with two other former premiers still in the lower house—Nobusuke Kishi and Kakuei Tanaka.

But Fear Tempers Hope

Beirut Has Lofty Vision Of Rising From Ashes

By Henry Tanner

BEIRUT, Dec. 23 (NYT).—Bankers and urban specialists have grandiose visions for the reconstruction of Beirut. Some of them propose to bulldoze the city's old commercial center, which is a heap of rubble now, push the mass of debris into the sea and build a new city center on the landfill.

Newspapers print maps with graceful designs of cloverleaf traffic exchanges and tree-studded recreation areas replacing once-crowded neighborhoods.

But expectations are more modest in the sections of the city where ordinary citizens are trying to pick up the pieces of their shattered lives. Hope is tempered by doubts about the future, by empty pockets and by continued fear.

The crazy-quilt economic and social patterns of Lebanon are reflected in the way the country is seeking a new life.

Shopkeepers are waiting with little conviction for the promised government subsidies to replenish their stock. They have hidden some merchandise in their cellars and in the villages in the mountains, and they borrow from brothers and cousins to get more.

A tailor is looking desperately for the clients who ordered the best suits he failed to finish before the war—19 months ago. He has found two out of 10 and says he needs three more to buy material and be back in business.

Many people talk of emigrating, to join relatives abroad.

More Lebanese are living abroad than in Lebanon and these relatives, rather than the government, are the source of capital that the average citizen is counting on.

Stolen goods worth millions of dollars are finding their way back into conventional trade channels.

The trading urge of the Lebanese is irrepressible and nearly everyone seems to be trading again. But, so far, it is commerce at subsistence level.

Nowhere are the material and emotional obstacles to the common citizen's transition to peacetime living more tangible than on Assaad el-Assaad Street, where the first shots of the war were fired.

The street connects the Moslem quarter of Shiyah in the southeastern part of the city with the Christian quarter of Ain el-Rummaneh. Both are crowded, modest middle-class suburbs.

On April 13 last year, a bus with 29 Palestinians drove down Assaad el-Assaad from the Moslem section. About 200 yards into the Christian neighborhood in front of a small apartment building that also houses a church, Christian militiamen opened fire on the bus, killing all passengers.

Intended to Attack

The Palestinians said it was murder. The rightist Christians said that the passengers were armed and had intended to attack. No weapons were found in the bus. The war was on.

Now on the Moslem side of the old battle line, the first families are moving back into the gutted apartment blocks. Signs of life are sprouting incongruously in the pockmarked ruins: A child peeks through a gaping hole in a wall high above the street. Bedding is aired on broken balconies. An old man carts rich black earth from a dismantled wartime barricade to an incredibly green little garden behind his flattened wreck of a house.

Abou Ali, who has 10 children, is the only man back in his apartment on the last block of the Moslem quarter just short of the dividing line.

He is a merchant. His store across the street is a gaping black hole in a collapsed building.

"Who did the looting?" he was asked. His answer was a shrug. There are things that are still too dangerous to know.

None Drive Straight

Helmeted Syrian soldiers are posted at the intersection just beyond the building. Cars driving along Assaad el-Assaad street swing left or right at the crossroads. None of them drive straight on from the Moslem to the Christian quarter or back.

Because the street crossed the battle line at a right angle, it was a shooting gallery for heavy artillery and snipers. No one could move on it.

Inside the buildings, therefore, on the lower floors, every single wall has a hole through which fighters and civilians moved backward and forward parallel to the street through living rooms, bedrooms, kitchens and stairwells.

The holes are jagged and often resemble a human figure with broad shoulders and a head, as if a man had burst through the wall.

Three hundred yards down the street, in Christian Ain el-Rummaneh, the walls have similar holes. And the human problems are similar, except that fewer people left during the war and more have returned because the political and religious organizations in the neighborhood are strong and active. The schools are open again.

Here too, the first shop that opened was that of a grocer. The grocer, who supported his family during the war by driving his small car as a cab in other, safer Christian neighborhoods, said that he had borrowed $300 from a cousin to put the first stocks on his shelf.

Last week, he painted his store. Did he get his paint from his neighbor, the Moslem paint merchant down the street, he is asked. "Oh, no," he answers, "I wouldn't go over there. And we don't want them over here."

Salary Paid

A bearded young man working at a butcher's bench said that his real calling was that of station chief in the national postal service. He hopes to return to his job the first of January. But his salary was paid all through the war, he said, adding that he was a fighter in the Phalangist militia force, the principal rightist military organization.

Across the street, an older man was hammering shelves into place in another one-room shop. He is waiting to see how things turn out. If the peace is still holding next month, he said, he will start repairing radio and TV sets again after having been closed for 19 months.

How did he feed his family during the fighting, he was asked. "I was a sergeant in the French Army before independence and they never missed a payment of my pension," he answered.

Over on the Moslem section of the street, a middle-aged man in overalls, who said he employed 250 workers before the war, was trying to coax an ancient cement-mixer into action.

In a typical feature of Lebanese reconstruction techniques, he was not repairing the existing apartment but adding new floors on top of two gutted and uninhabitable buildings.

Zoning regulations have been ignored for the last two years and landlords are now building quickly what they fear they will not be allowed to build in a few months.

The government has issued a declaration saying that all structures built without permission will be torn down.

But out near the airport, squatters driven from the city's slums during the fighting have built hundreds of one-story houses on land that does not belong to them. They are not worried about the government's threat. The government has not yet been able to remove scores of similar houses built nearby by earlier squatters during the seven-month period of civil strife in 1958.

Burned buildings line what was once one of the busiest streets in Beirut.

British Envoy to Explore New 'Structure'

U.S. Backs U.K. Bid to Alter Rhodesia Pla

By Murrey Marder

WASHINGTON, Dec. 23 (WP).—Britain's Ivor Richard said yesterday that he has U.S. support to explore "a different structure" than Secretary of State Henry Kissinger's original five-point plan for achieving black majority rule in Rhodesia.

Mr. Richard, who is chairman of the recessed Geneva conference on Rhodesia, said Britain is prepared to play "a balancing role" in transferring power from white to black rule. But Britain, he said at a news conference here, is "not going to be responsible for the day-to-day running of the country."

After Christmas, Mr. Richard will take soundings in Africa on a series of British initiatives to try to break the deadlock that tied up the Geneva talks for nearly eight weeks.

Sen. Dick Clark, D-Iowa, the chairman of the Senate Foreign Relations Subcommittee on Africa, said that Mr. Kissinger's formula succeeded "in getting all the parties to the bargaining table." But "the irony," Sen. Clark said, is that "the five points are just not the basis on which a settlement could be reached."

'Every Support'

Britain now should be given "every support" for its diplomacy, Sen. Clark said.

It was only after Mr. Kissinger—in September—obtained a commitment from Rhodesian Prime Minister Ian Smith to independence under black majority rule in Rhodesia within two years that Britain agreed—earlier this month—to take a direct role in the transition to majority government.

Mr. Smith contends that he accepted "a package deal" for apportioning power in a transition government which Britain, with U.S. support, is now trying to change fundamentally. Rhodesia's black nationalists insist on Britain resuming its legal responsibility over its former colony, distrusting Mr. Smith's commitment to surrender power.

Under the terms which Mr. Smith put into the Kissinger plan, and which the black nationalists rejected at Geneva, whites would retain control of the Ministries of Defense and Law and Order during the transition from white to black rule. The present target date for black majority rule is March 1, 1978.

Britain's current proposals would install a British commissioner in the transition government and would explore options for changing the control of the two ministries.

Mr. Richard said that the possible variations include: a British official in charge of the Ministries of Defense and Law and Order during the transition; a committee of Rhodesian blacks and whites with a British chairman for both ministries; assigning one ministry to a black, the other to a white, or giving both ministries to a white who is not a member of Mr. Smith's white-supremacist Rhodesian Front.

In addition, as previously reported, Britain is considering bringing in both black and white military officers from Commonwealth countries—notably Nigeria, Canada and India—to assure order in Rhodesia during the transition.

Mr. Richard, who conferred with Mr. Kissinger on Tuesday, said the secretary "expressed support" for the British initiatives, and Mr. Richard lauded Mr. Kissinger for "a massive achievement" in his diplomacy. At Geneva, however, Mr. Richard said, it became evident that "the amount of suspicion" between the Smith government and the Rhodesian black nationalists was so intense that it became advisable "to look at a different structure" for a solution.

"I think that the core of our problem at this stage," Mr. Richard said, "is to persuade the various parties that having a British presence is the way to square the circle."

This means convincing Mr. Smith, and also South African Prime Minister John Vorster, a central figure in Mr. Kissinger's Rhodesian diplomacy, that the transition formula must be changed to produce an agreement.

Mr. Richard, who is Britain's permanent representative to the United Nations, also has conferred with Secretary of State-designate Cyrus Vance and S. Clark.

Sen. Clark said that "the i is whether Smith will go alo with the British initiatives. he is sincere about majority he will go along with it," Clark said. "If he is only u the Kissinger five-point plan delay, then he won't go along

Security chiefs said here M that in the last 24 hours, reg forces soldier Derek Seymour, and black Cpl. Peter Sheredy have been slain.

Soviet Prisoners Must Fast For Rights, Bukovsky Asser

PARIS, Dec. 23 (UPI).—Exiled Soviet dissident Vladimir Bukovsky described conditions in Soviet prisons and labor camps in an interview published today and said inmates were forced to go on hunger strike for basic rights.

Mr. Bukovsky, 33, a dissident biologist released from Vladimir Prison near Moscow on Saturday and flown to Zurich in return for the release by Chilean authorities of Communist party leader Luis Corvalan, described his experiences in an interview with the leftist Paris daily Libération.

He described scenes of sickness, near riots raised by prisoners to get medical treatment, fistfights among prisoners in the labor camps and top-security prisons where he spent 10 of the last 13 years for "anti-Soviet activities."

"I bet that 30 of my former prison mates are on hunger strike right now," Mr. Bukovsky said. "Antomiuk had a heart attack. What will happen to him? If they are on strike, it may mean death.

"You have to call a doctor. You hammer and hammer on the door. The guards come: 'What is this noise?' they say. 'A doctor? All you have to do is stay quiet.'

"To get a doctor, you have to break in doors, tear out benches. When the guards finally get scared that the prisoners might break out of their cells, they'll send in a commando of guards and maybe a doctor along with them."

Stress and Tension

Mr. Bukovsky said, "The stress created by the prisons, the chiefs, the atmosphere, causes fights among the ordinary prisoners. We [the political prisoners] have our own culture; we accept no fights; we are eaten away in our stomachs.

"Seventy-five per cent of the intellectuals who are today on hunger strike have ulcers," Mr. Bukovsky said.

"There are even more serious cases," he went on. "There are those with tuberculosis, with heart conditions, with rheumatism."

A group of 30 prisoners in Vladimir Prison is on hunger strike at the moment for the right to read books, a right which was gradually taken away, Mr. Bukovsky said. Political prisoners are entitled by law to receive unlimited quantities of books; but first the number was cut down and then they were suppressed totally, Mr. Bukovsky said.

He said the organization of prison and, campwide hun strikes met with some opposit from the older prisoners inter after postwar purges.

"They [older prisoners] used to solving problems with shots," Mr. Bukovsky said, to speak to the authorities is them to recognize them. older prisoners still believe t are in a state of war agai them."

Blast at Beirut Paper Kills 2 As Premier Asks Full Powers

BEIRUT, Dec. 23 (UPI).—An anti-tank grenade exploded today outside the offices of the independent newspaper An Nahar, killing the man who carried it and a Syrian soldier. Three persons were wounded.

The blast coincided with the convening of parliament in its first postwar session, at which Premier Selim al-Hoss asked the lawmakers for special powers for his government to rule the country by decree for the next six months.

Syrian troops of the Arab peace-keeping force were stationed at the An Nahar building, which they occupied last week.

A Syrian officer on the scene said that the blast was caused by a Chinese-made anti-tank grenade and that the man who carried the device was killed.

"He blew himself up," the officer said. "He carried a forged identity card that said his name was Adnan Mohammed Ali, resident of Sidon."

Syrian soldiers said that a Syrian was also killed and two Syrian soldiers and a Lebanese civilian wounded in the blast.

The Syrians held two UPI journalists and four employees of a restaurant in the same building for three hours of interrogation after the explosion. UPI's offices in Beirut are located in the An Nahar building.

Syrian troops immediately sealed off the area while the blast was investigated.

It was the latest incident in a month of violence in Lebanon during which bombs were thrown at rightist leader Karim Pakradouni and leftist leader Kamal Jumblat and three assassination attempts were made on independent Christian leader Raymond Eddé.

Palestinians Clash

The bombing also follows two days of clashes in south Beirut between pro-Syrian Palestinian guerrillas and members of the Palestinian Rejection Front, that opposes Syria's intervention in Lebanon.

Earlier, the Premier submitted a bill asking for powers to rule by decree to 73 members of the 98-man Lebanese parliament, which had not met for three months.

The bill was included in a policy statement read by Mr. Hoss. The deputies will vote tomorrow on both the policy statement and the bill.

The session was held under heavy security. Troops of the Arab League peace-keeping force refused to allow civilians within three blocks of the area.

The special powers bill would give Mr. Hoss's Cabinet the ability to "amend or cancel existing laws or make new laws for reconstruction, development, organization, finance, the economy, social affairs, security, defense, information and education."

After the decree laws are issued, they will be referred to parliament for reference in preparation for the resumption of its normal legislative duties at the end of the six-month period.

Political sources said that Mr. Hoss had been reluctant to request a state of emergency, but that Syrian President Hafez al-Assad, with the apparent concurrence of President Elias Sarkis, had urged him to do so.

Lee's Party Wins 5th Consecutive Vote in Singapore

SINGAPORE, Dec. 23 (Reuters).—Prime Minister Lee Kuan Yew's Peoples' Action party won its fifth election victory today when it captured all 69 seats in Singapore's Parliament.

The opposition's hopes of breaking the PAP's parliamentary monopoly were dashed when each constituency reported convincing victories for the ruling party.

The landslide gave Mr. Lee another five-year mandate to govern this tiny city-state.

Mr. Lee, 53, campaigned on his party's 17-year record, during which the living standard of Singapore's 2.3 million inhabitants has been lifted to one of the highest in Asia.

His opponents branded the PAP as dictatorial and arrogant but they failed to make an impact on the electorate.

Thai Official Killed By Red Insurgents

BANGKOK, Dec. 23 (Reuters).—The deputy governor of Thailand's southern Surat Thani Province was killed yesterday when Communist insurgents opened fire on his helicopter, a government spokesman said.

The shooting took place as Thai troops were about to begin a major offensive against an estimated 1,500 Communist guerrillas in the jungle of Surat Thani on the Gulf of Thailand.

Polish Police Raid Group Of Dissidents

WARSAW, Dec. 23 (Reuters).—Polish security police today raided the homes of several members and supporters of the Workers Defense Committee (WDC) in a move reportedly aimed at foiling plans by the dissident group to issue a communiqué.

The police detained a 42-year-old woman writer, Anka Kowalska, who works closely with the committee, and searched her apartment before taking her to security headquarters.

The committee, set up in September to aid Poles jailed or dismissed from their jobs after food riots here last June, has its communiqués typed in the homes of sympathizers. The typists move around so as to evade police searches.

Today security men also raided the homes of two members of the WDC, Antoni Macierewicz and Piotr Naimski, who had previously been detained and questioned. The men were interrogated.

A WDC spokesman said he believed the homes of other committee members had been raided this morning and the members detained.

Observers said the police actions were probably designed to seize copies of a communiqué now under preparation. This had been the aim of previous raids in Warsaw.

The defense committee has attracted the support of a number of students at Warsaw University.

It has raised funds to cover medical and legal aid and to help families of the imprisoned workers.

Partly as a result of public opinion and the committee's work, some of the more severe prison sentences have been reduced and men serving lighter sentences have been freed on parole.

Police Seal Off Cape Town Areas

CAPE TOWN, Dec. 23 (AP).—An estimated 500 police moved into two African townships here today, sealed off the areas and launched a house-to-house search.

A police spokesman said the operation, after two days of unrest, was aimed at arsonists and their leaders. Mobs of youths attacked at least five houses in the townships of Guguletu and Nyanga, carried furniture into the street and burned it. No casualties were reported.

The police spokesman said the search operation was designed to prevent the outbreak of full-scale rioting. Most of South Africa's black and "colored" (mixed-race) townships have been calm since mid-October.

20 Hurt in Mass Crash

AVALLON, France, Dec. 23 (Reuters).—About 20 motorists were injured in a mass pile-up in thick fog on the superhighway linking Paris and southern France near here today. Police said 49 cars and 7 trucks were involved.

Peking Urges Harder Work, Hinting 1976 Was a Bad Year

By Fox Butterfield

HONG KONG, Dec. 23 (NYT).—Peking has called for better management, harder work and increased efficiency in China's factories amid indications that 1976 has generally been a poor year for the country's industry.

The call, contained in an editorial in the party paper, Jenmin Jih Pao, is part of the current effort by China's new leaders to put the country's economy back on its decade-long course of successful growth after a year of disruptive political strife.

"We must work hard" to build up modern industries throughout China, the editorial said. It added that China's 850 million people must also now "make up for the losses caused by interference and sabotage by the gang of four," the epithet applied to Chiang Ching, Mao Tse-tung's widow, and three other disgraced Politburo members now denounced as sham leftists.

Production Drop

After averaging growth of nearly 10 per cent a year over the last 15 years, China's industrial output declined to a 7-percent increase in the first half of the year. Peking has released little overall information since then, but analysts believe production dropped considerably further in the third quarter and that a number of factories may not reach their annual targets.

In addition, the beginning of China's fifth five-year plan from 1976 to 1980 has had to be delayed a year because of conflict over economic priorities earlier this year during the anti-rightist campaign.

The editorial pledged not to modify Mao's demanding economic policies, including presumably his opposition to wage raises and bonuses for workers, which have been largely frozen since the Cultural Revolution. But the editorial suggested that Hua Kuo-feng, the new chairman of the Chinese Communist party and a career party administrator, apparently hopes to restore production through better management. In the end, this may well amount to revising Mao's ideas, in practice if not in name.

Industry, Frugality

The editorial called for "strengthening the management of enterprises," restoring discipline over workers that broke down in the Cultural Revolution, raising productivity, "improving the quality of products, lowering the consumption of raw materials and production costs and running enterprises with industry and frugality."

Like several other recent articles, the editorial also urged China's factories to operate at a profit to increase the revenue they provide the state. "We must start doing this right now," the editorial insisted.

The editorial said that China's overall plan was now to achieve the ambitious program that the late Premier Chou En-lai outlined last year on modernizing China's industry, agriculture, defense and science and making it a "powerful modern Socialist country before the end of the century."

Botswana Urges UN Meet on Raid

UNITED NATIONS, N.Y., Dec. 23 (AP).—Botswana today asked for an urgent meeting of the Security Council to discuss "serious acts of aggression" by Rhodesia.

In a letter issued today, Botswana charged that "the illegal white minority regime in the British colony of Southern Rhodesia . . . has stepped up acts of subversion, murder, arson and kidnapping against Botswana under the pretext that Botswana was supporting and harboring freedom fighters."

It gave no details but claimed that the aggression took place last Friday and Saturday.

Peking Hints Death Penalty

(Continued from Page 1)

the only surviving vice-chairman of the party. Mr. Yeh's name is now frequently linked with Mr. Hua's for special mention before those of other party leaders in the press.

Major Targets

The campaign is clearly claiming some major targets. Among those who failed to show up at the plenary session of the farm conference in Peking earlier this week were Minister of Culture Yu Hui-yung; Minister of Public Health Lin Hsian-ping, and the minister in charge of the Physical Culture and Sports Commission, Chuang Tse-tung. All are thought to be under detention.

In Shanghai, once the stronghold of the group of four, the city's three former top-ranking permanent administrators also failed to appear at functions this week for a delegation from Romania and are said by diplomatic sources to be "under investigation."

According to the sources, the purge in Shanghai has spread to many factories where labor union leaders had risen to senior positions during the Cultural Revolution. Similar purges of labor leaders are also said to be under way in other industrial centers.

1st Election Detainees Released on Jamaica

KINGSTON, Jamaica, Dec. 23 (UPI).—The government of Prime Minister Michael Manley, which was elected to another five-year term last week, yesterday began releasing the more than 200 persons detained under the country's state-of-emergency legislation.

In the first group, 21 persons were released from the special detention camp in Kingston. A total of 209 others are still being held. Three of those released were placed under house arrest.

Uganda Regime Denies It Killed Woman Hostage

NAIROBI, Dec. 23 (AP).—A Ugandan government spokesman today denied a U.S. newspaper report (IHT, Dec. 23) accusing President Idi Amin's military regime of murdering hijacking hostage Dora Bloch after the Israeli raid on Entebbe Airport last July.

He described the Los Angeles Times story as "typically biased Western reporting."

The spokesman, reached from here by telephone, said a special commission set up by Marshal Amin to investigate Mrs. Bloch's mysterious disappearance from a hospital in Kampala had exonerated the government of any involvement in her disappearance or death.

The spokesman, who said he was a "senior military officer" and asked not to be identified, said the report accusing Marshal Amin of ordering Mrs. Bloch's death in reprisal for the Israeli raid was "a gross misrepresentation of the facts."

Killer Reported Known

LONDON, Dec. 23 (Reuters).—A British member of Parliament said today that relatives of Mrs. Bloch know the name of the person who murdered her after the Israeli raid on Entebbe Airport.

The MP, Greville Janner, a friend of the family, said they also know the exact location of her grave and the names of at least three persons who were at the burial.

Jewish Activists Reportedly Still Held in Moscow

MOSCOW, Dec. 23 (UPI).—A total of 17 Jewish activists remained under house arrest today in the wake of this week's Jewish cultural symposium and one of the symposium organizers was missing, according to Jewish sources.

The sources said that 12 of the 13 organizers of the symposium were among those under house arrest and the 13th organizer was missing.

They said that Benjamin Bogolmony had not been seen since Tuesday, when the symposium organizers were rounded up by KGB agents. The sources said they presumed that Mr. Bogolmony was being held in jail.

They added that the homes of six more Jewish activists have been searched in the last 24 hours in Moscow and that several whose homes were searched had been summoned for interrogation by the KGB.

President for Nauru

NAURU, Dec. 23 (Reuters).—Bernard Dowiyogo, a 30-year-old former law student, was sworn in this week as President of this tiny Pacific island republic.

Polio Vaccine Effor In Town in Englan

COWLEY, England, Dec. (UPI).—Hundreds of Brit children at home for the Ch mas holidays returned to l local schools today for em gency polio vaccinations.

The effort was ordered Cowley authorities after fighting that a 17-year-old stu fied the disease. More than 1 youths and 20 adults were as to report for vaccination.

Presidential Energy Adviser, HEW Secretary and CIA Director Are Designated

James Schlesinger

WASHINGTON, Dec. 23 (AP). Former Defense Secretary James Schlesinger, President-elect Jimmy Carter's new "energy czar," is an economist and defense expert whose experience in energy policy was mainly his 18 months as chairman of the Atomic Energy Commission.

Before there, Mr. Schlesinger's attention was directed largely to military issues—developing nuclear weapons for the United States and denying them to other nations.

But Mr. Schlesinger, 47, has a reputation as a brilliant analyst and a tough manager—a combination that helped him climb from economics professor to "think-tank" strategist and into government as a federal budget official, AEC chairman, CIA director and finally secretary of defense.

He also has a reputation for touring Congress on its responsibilities. As defense secretary, he disagreed with Secretary of State Henry Kissinger and even President Ford and that eventually cost him fired by Mr. Ford on Nov. 2 of last year.

Political Survivor

Now Mr. Schlesinger adds a reputation as political survivor: a rather conservative Republican, set out from a Republican administration, returning arm-in-arm with an incoming Democrat—President-elect.

Born Feb. 15, 1929, in New York City, the son of an accountant, Mr. James Schlesinger entered a Jewish upbringing. But he became a Lutheran in the early 20s.

Voted the "hardest worker" in his senior year at the Horace Mann School, Mr. Schlesinger got his bachelor's degree in economics from Harvard in 1950, graduating summa cum laude and with membership in Phi Beta Kappa.

After a year of European travel on a fellowship, he returned to Harvard for a master's degree in 1952 and a doctorate in 1956.

Mr. Schlesinger was assistant and then associate professor of economics at the University of Virginia from 1955 to 1963. He moved to the Rand Corp., a famous "think tank" of consultants to the federal government in Santa Monica, Calif.

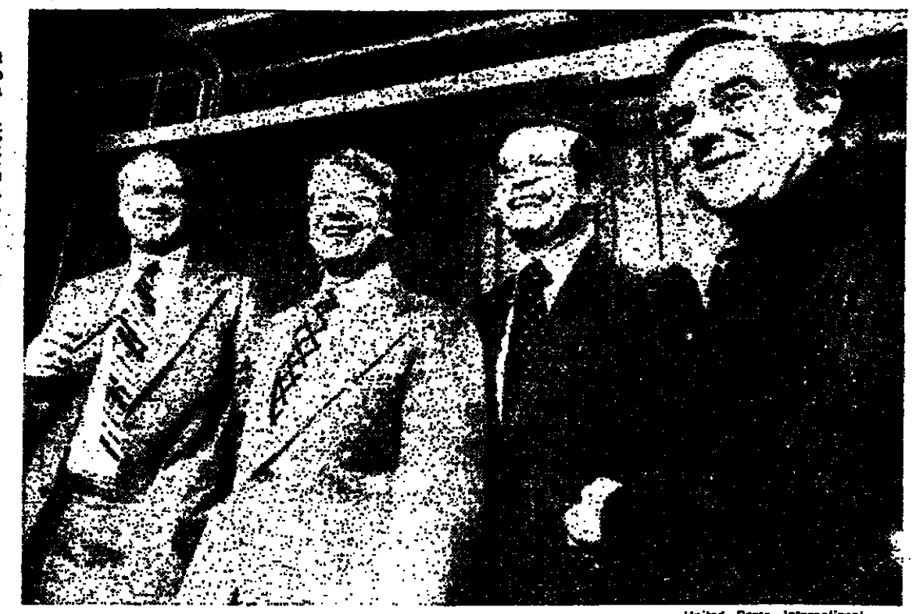
At Rand, he studied the difficult question of how to prevent the worldwide spread of nuclear weapons, then became director of strategic studies.

Mr. Schlesinger was recruited at the beginning of Richard Nixon's administration in 1969 as an assistant director of the Bureau of the Budget. He served as acting director of the bureau while Mr. Nixon converted it into the more comprehensive Office of Management and Budget.

While with OMB in 1971, Mr. Schlesinger headed an evaluation of U.S. intelligence-gathering activities, which led to a reorganization and set the stage for his later appointment to the CIA.

In August, 1971, Mr. Schlesinger became chairman of the Atomic Energy Commission, where he quickly gained attention by taking his wife and two of their eight children to remote Amchitka Island in the Aleutians for the controversial underground explosion of a nuclear warhead. It was his personal response to the protests of environmentalists who feared the test would be unsafe.

In January, 1973, Mr. Schlesinger was confirmed to head the CIA, then being buffeted by the Watergate scandal.



Secretary of Defense

Only five months later, Mr. Nixon nominated Mr. Schlesinger as secretary of defense to replace Elliot Richardson, who was moving into the attorney general's office vacated by John Mitchell.

There he remained, through the revelation that 33 defense officials took free entertainment at the Maryland hunting lodge of Northrop Corp., a major defense contractor, recurrent battles with a budget-cutting Congress, the resignation of Mr. Nixon and his replacement by Mr. Ford, the final collapse of South Vietnam, the military rescue of the U.S. freighter Mayaguez after its seizure by Cambodians and, for a while, through his demands for a tougher-than-Kissinger position on relations with the Soviet Union.

Mr. Schlesinger has led a relatively obscure academic life at the Johns Hopkins University Center for Advanced International Studies in Washington since Mr. Ford fired him.

But now, just over a year later, Mr. Ford is on his way out and Mr. Schlesinger is on his way back in.

United Press International.

James Schlesinger, Jimmy Carter, Theodore Sorensen and Joseph Califano jr. in Plains.

Theodore Sorensen

WASHINGTON, Dec. 23 (AP). —Theodore Sorensen, the man President-elect Jimmy Carter has chosen as director of the CIA, has observed the U.S. intelligence community in its finest and darkest hours.

As one of President John Kennedy's closest advisers, Mr. Sorensen sat in on the meetings of the "executive committee" of top administration officials during the October, 1962, Cuban missile crisis.

Mr. Sorensen's first exposure to the CIA had occurred more than a year earlier in the aftermath of the disastrous Bay of Pigs invasion.

"Ted was always there," recalls an intelligence official who participated in both events. "But he wasn't an activist. He was just a listener and made sure he had the facts right."

There are some who question whether that qualifies the 48-year-old Mr. Sorensen for his new role.

Qualifications Questioned

Kenneth O'Donnell, who was President Kennedy's appointments secretary, says Mr. Sorensen is "a terribly competent fellow" and "one of the most brilliant guys I know."

But Mr. O'Donnell adds, "I don't know what qualifications he has to head the CIA; that's not his bag."

A former high-ranking intelligence official who claims to know the feelings of many top CIA employees, said, "This man doesn't have any experience. He has no track record. He's just a lawyer and a speech writer."

Others counter that there are few training grounds for intelligence outside the CIA and that the most important asset the nation's chief intelligence officer can bring to the job is access to the president.

McCone and Bush

Neither John McCone, who headed the CIA during the Kennedy administration, nor George Bush, the current director, had any previous experience in the spy business. But both have received high marks from career CIA officers for their performance in office.

Mr. Sorensen had the ear of John Kennedy.

"Whenever anything became very big, very major, very important, President Kennedy wanted Ted in on it," recalls Lee White, a Washington lawyer who attended the University of Nebraska Law School with Mr. Sorensen and later worked under him at the White House.

In the Bay of Pigs operation, the CIA underestimated the support of the Cuban people for Fidel Castro.

Mr. Kennedy "was aghast at his own stupidity, angry at having been badly advised by some and let down by others and anxious, he said, that I start giving some time to foreign affairs," Mr. Sorensen wrote in a book about the Kennedy White House.

Brush With War

Mr. Sorensen's role of observer continued into the Cuban missile crisis, in which aerial reconnaissance photos and reports from a CIA agent inside Russia helped Mr. Kennedy face down the Russians in the world's closest brush with nuclear war.

Mr. Sorensen rarely spoke during the deliberations of the "executive committee" but he drafted the speech in which Mr. Kennedy first told the U.S. people about the impending confrontation with the Russians over the missiles in Cuba.

As a result of his role in the crisis, Mr. Sorensen testified last year before the Senate Intelligence Committee investigating CIA plots to kill Mr. Castro. Mr. Sorensen swore that the subject of murdering Mr. Castro never was mentioned in his presence.

Mr. Sorensen, who had worked for Mr. Kennedy since 1953, left government shortly after the president was killed in Dallas. After writing a book about the Kennedy years, he joined the New York law firm of Paul, Weiss, Rifkind, Wharton and Garrison.

Joseph Califano Jr.

WASHINGTON, Dec. 23 (AP). —Joseph Califano jr. is the kind of man who gets lost in a crowd. But Lyndon Johnson used to say, "When Joe speaks, that's my voice you hear."

Mr. Califano, 45 and still unassuming, but considered exceptionally talented at getting things done, was named by another Democrat, President-elect Jimmy Carter, to be secretary of health, education and welfare.

He brings broad domestic experience to the job.

During the Johnson years, Robert McNamara called him "the man who, next to the president, has contributed more than any other individual in our country to the conception, formulation and implementation of the program for the great society."

McNamara's Techniques

It was Mr. Califano who applied Mr. McNamara's Pentagon systems-analysis techniques to Mr. Johnson's domestic agencies. It was Mr. Califano who put together a National Security Council-type staff at the White House to coordinate domestic-agency efforts.

Mr. Califano also refereed anti-poverty disputes among cabinet members and prodded bureaucrats to get domestic programs moving.

Mr. Califano supervised the writing of Mr. Johnson's 1968 state of the union message. He worked out details of other presidential messages with various, often-competing agencies. He wrote some of the messages himself, edited others and briefed committee chairmen and reporters.

And he argued with Mr. Johnson—as much as anyone ever could argue with him—about the programs themselves.

Patrick Anderson, a student of White House advisers, credits Mr. Califano with putting tangible items, such as money for police training and equipment, into Mr. Johnson's anti-crime bill. But Mr. Anderson said that Mr. Califano lost to Mr. Johnson in his effort to get a federal programs coordinator appointed in every major city. Mr. Johnson decided a federal "mayor" in each city would be political dynamite.

Mr. Califano's title was presidential assistant and he followed in the footsteps of Tom Corcoran, Sherman Adams, Ted Sorensen and Bill Moyers.

Mr. Anderson calls him less aggressively charming than Mr. Corcoran, not as curt as Mr. Adams, less likely than Mr. Sorensen to appear on news magazine covers and not as philosophical as Mr. Moyers.

Mr. Anderson quotes one Califano friend as saying, "There aren't any stories about Joe: he just gets things done."

Mr. Anderson said Mr. Califano was a firm advocate of the Johnsonian thesis of "a hand up, not a handout."

A Brooklyn native without a Brooklyn accent, Mr. Califano got his bachelor of arts degree from Holy Cross College, Worcester, Mass., in 1952. He got his law degree, cum laude, at Harvard three years later.

He spent his next three years in Washington as a uniformed Navy lawyer. Then Mr. Califano joined the New York law firm of former Republican Gov. Thomas Dewey.

In 1961, he became special assistant to the Pentagon's general counsel. Catching the attention of higher-ups, Mr. Califano moved up to special assistant to the secretary of the Army, then general counsel for the Army and finally to Mr. McNamara's right hand.

Virtually every important Pentagon paper passed through his hands.

He was deeply involved in matters that concerned Vietnam, the Dominican Republic, use of Army troops in the Selma civil rights march and the 1964 riots in Panama. He also coordinated early stages of the program to build a supersonic airliner.

Since his White House days, Mr. Califano has been a partner of Edward Bennett Williams in the Washington law firm of Williams, Connolly and Califano.

Dutch Question Spurs Accused Nazi

AMSTERDAM, Dec. 23 (Reuter).—Two detectives today began questioning millionaire art dealer Pieter Menten about his alleged involvement in mass executions of Polish Jews in World War II.

Mr. Menten, 77, was taken to prison here last night after the Swiss government expelled him on condition that he would not be extradited later to a third country to face trial for alleged war crimes.

Mr. Menten has denied allegations that he was involved in the killings of Jews in 1941 in Poland. He will appear before a public prosecutor Monday.

Chad to Get Food

ROME, Dec. 23 (UPI).—The UN World Food Program said yesterday it will send $2.5 million worth of food aid to Chad.

Top Grain Firm Sued by U.S. for Shipping Fraud

WASHINGTON, Dec. 23 (WP). —The Justice Department, citing repeated instances of fraud in overseas grain shipments financed with government money, yesterday sued a major grain company for $23.1 million in damages and penalties in connection with the alleged cheating.

The 52-count complaint against Cook Industries, Inc., of Memphis was believed to be the largest civil fraud case against a grain-trading house on record.

One of the four government programs in which the cheating was alleged to have occurred was shipment of free food to relieve hunger and malnutrition abroad.

Documents submitted along with the suit charged that the company lied on government certificates about the quantities and quality of grain loaded aboard more than 150 vessels to about 25 countries from June, 1969, to March, 1974.

The company said that it intends to contest the claims.

Carter Names Schlesinger; Sorensen Receives CIA Post

(Continued from Page 1)

of total energy demands and added that the Carter administration would have to "define that challenge for the American people."

Mr. Carter said Mr. Schlesinger's first priority would be energy conservation to "reduce the dependence that presently exists on an overuse of oil and natural gas and shift toward enhanced uses of coal," with nuclear power making up the difference.

Mr. Schlesinger said he wanted more efficient auto engines and appliances, and less heat waste. He promised to "do something" about energy conservation, not just talk about it.

Mr. Carter was a bit ambiguous when asked his attitude toward HEW regulations that require federal funds be denied to school districts that do not comply with HEW's desegregation guidelines.

"Well, I would hope that the HEW guidelines would be compatible with the Supreme Court ruling and the laws of this country," he said at first, without indicating that he knew of any that were not.

"I would comply completely with those laws," he continued, and then he criticized HEW for issuing "ten times more regulations . . . than all the laws passed by Congress combined."

David Mathews, the present secretary of HEW, has made simplifying the agency's regulations one of his prime goals. Mr. Carter said Mr. Califano will have the chance to simplify the regulations even further. Then he added that he was sure Mr. Califano would "agree when he's questioned to make sure that we have a maximum attention given to the maintenance of civil rights and equality of opportunity for our people in the public schools and otherwise."

Mr. Carter also said he would give "the American people and the press corps a Christmas present" by not making any more public statements until after Christmas.

Carter Ready to Accept Brezhnev's Peace Overtures but Vows to Remain Alert

By Don Irwin

PLAINS, Ga., Dec. 23.—President-elect Jimmy Carter said yesterday that he is ready to give Kremlin's recent friendly gestures toward his administration a trial but that he will not be led into a false sense of security by them.

The question came up during conversation with reporters while Mr. Carter was flying back to his Georgia home after attending funeral services for Chicago Mayor Richard Daley.

A reporter asked if the President-elect gave full credit to assurances by Soviet Communist party leader Leonid Brezhnev that the Soviet Union would go out of its way in the early months of the Carter administration to avoid confrontations with the United States.

"I think I can say that I believe it," Mr. Carter replied. "But I'll be prepared if my belief is ill-founded... At this point, I believe what he says but I won't just be lulled into a sense of unnecessary security."

Mr. Carter said that he shared the concern expressed Tuesday by Harold Brown, his choice for defense secretary, about the long-range threat to U.S. security raised by the relative increase in Soviet military spending. He said that he expected to be briefed on the matter during a final pre-inauguration visit to Washington.

Mr. Carter also sketched some details of the expanded role he has in mind for Vice-President-elect Walter Mondale in the new administration.

He said that he would ask Mr. Mondale to assume "unprecedented responsibilities for a vice-president" and to "play a strong, active role, probably within the White House itself, on a full-time basis."

Asked if Mr. Mondale would be assigned an office in the White House instead of the nearby Executive Office Building, where modern vice-presidents have been based, Mr. Carter said that this was "our present plan."

Mr. Carter said that he would make sure Mr. Mondale is "as well briefed as I am" in all affairs bearing on presidential responsibilities. But the only specific assignment he mentioned for Mr. Mondale was to act as chairman of cabinet groups which will be organized to deal with large policy areas.

Mr. Carter qualified predictions by his aides that he would take no foreign trips during his first year in office.

"I reserve the right to take a foreign trip if I choose, but my plan is to stay close to home," he said. "The only trip that I would contemplate at this point would be some international meeting where several leaders meet together."

Asked if he might go to Japan, where an economic summit meeting is planned for the spring, Mr. Carter replied, "possibly."

© Los Angeles Times.

Special Help Needed

WASHINGTON, Dec. 23 (AP). —The top three members of Mr. Carter's economics team met yesterday and appeared to agree that the economy will fall short of the President-elect's goals next year unless it gets special help.

It was their first meeting since their nominations. They will meet with Mr. Carter in Plains tomorrow for additional discussions on the economy.

The three are Michael Blumenthal, nominated Treasury secretary; Bert Lance, named to be director of the Office of Management and Budget, and Charles Schultze, chosen as chairman of the Council of Economic Advisers.

CIA-ITT Collusion in '73 Senate Probe Reportedly Charged

By Seymour M. Hersh

NEW YORK, Dec. 23 (NYT).—A federal grand jury is hearing allegations that high officials of the CIA and the International Telephone & Telegraph Corp. were involved in a conspiracy to fabricate and coordinate the statements they made to a 1973 Senate inquiry into ITT's role in Chile, Justice Department sources said yesterday.

The sources, who have first-hand knowledge of the investigation, said that the grand jury was concentrating on the activities of Richard Helms, the former CIA director who recently resigned as ambassador to Iran, and two ITT officials, Harold Geneen, the corporation's president, and John McCone, a member of its board of directors who served as CIA chief from 1961 to 1965.

Mr. Helms was depicted by one high-level source as the current "primary target" of the jury, which is meeting in Washington and is not expected to complete its investigation before the Carter administration assumes office next month. A grand jury investigation is preliminary to any indictment and does not necessarily result in one.

Mr. Helms could not be reached yesterday. His attorney, Edward Bennett Williams of Washington, said he would have no comment. At the offices of Mr. Geneen and Mr. McCone, they were both said to be out of the country.

Appeared in November

An employee in Mr. McCone's Los Angeles business office acknowledged, however, that the former CIA chief had testified last month before the grand jury in connection with his Senate testimony.

Edward Gerrity, a senior ITT vice-president for corporate relations, said that the concern had agreed with the government prosecutors in the case "not to say anything if they won't say anything."

Officials said that the renewed Justice Department investigation has received specific statements and allegations about meetings at which participants from ITT and the CIA allegedly discussed and agreed upon testimony to be presented to the Multinational Corporations subcommittee of the Senate Foreign Relations Committee.

That subcommittee, headed by Sen. Frank Church, D-Idaho, held public hearings in March and April at which officials from the CIA and ITT repeatedly testified that there had been no exchanges of intelligence information or other covert contacts between the two about Chile.

Asked whether such testimony had been prearranged, a key government official said: "We have statements about it, but there's a lot to be corroborated."

"I think it's there," he said of the government's pending conspiracy case.

Issue of Contributions

In related testimony, Justice Department officials said, Mr. Geneen repeatedly told the Senate committee that ITT had not made any direct contributions to any politicians or political party before Chile's 1970 presidential elections.

The Senate Select Committee on Intelligence Activities reported late last year that it had learned that ITT, after receiving direct advice from the CIA on how to proceed, forwarded $350,000 in cash to a leading conservative candidate before the election. The Intelligence Committee has turned over its records to the Justice Department, sources said.

Mr. Geneen subsequently told a stockholders' meeting in May that the $350,000 "may have been sent to Chile" in 1970. He added that what he termed "this later information" was not consistent "with my previous knowledge."

Mr. McCone, asked a general question about corporate political contributions, declared: "I think multinational corporations, operating throughout the world, must be very, very careful not to involve themselves in the local politics of the host country, and that is the policy of ITT."

At the time of Multinational Corporations subcommittee hearings in 1973, it was not publicly known that the CIA had initiated a major secret operation of its own against the government of Chilean President Salvador Allende, spending more than $8 million to prop up Mr. Allende's opponents. Mr. Allende, a Marxist whose election in 1970 was bitterly opposed by the U.S. government and corporation, died during a coup d'état in September, 1973.

Mr. Helms, who will leave his ambassadorial post at the end of the year, has been under Justice Department investigation for two years because of his previous Senate testimony denying that the CIA had conducted domestic intelligence and also denying that the agency had financially supported the opponents of Mr. Allende.

The revitalized grand jury investigation was spurred, all sources agreed, by the decision of Harold Hendrix, former Miami newspaperman and ITT political operative, to cooperate with government prosecutors in return for being permitted to plead guilty to a misdemeanor charge stemming from his admittedly false testimony before the 1973 Senate hearing.

Hendrix reportedly told department investigators that he had lied about the extent of his and ITT's involvement with the CIA during the hearings.

He pleaded guilty Nov. 5 to the misdemeanor charge of "withholding information" from Congress and was sentenced on Nov. 30 by a federal court judge in Miami to a fine of $100 and three months of nonreporting probation.

Some details of the scope of the government's investigation inadvertently became known during Hendrix's hearing on sentencing because U.S. District Court Judge James King, who heard the case, insisted that the government prosecutors "go into more details," as a court source said, before he permitted the plea-bargaining arrangement to stand.

A transcript of that proceeding, made available to The New York Times, disclosed that Justice Department officials had been interrogating past and present CIA officials in recent months as well as collecting hundreds of cablegrams and reports dealing with the agency and ITT.

Along with testimony from Mr. McCone and Hendrix, the grand jury is known to have heard testimony in recent weeks from David Phillips, another former high-level CIA official who headed a specially assembled Chile task force in the agency in the early 1970s.

A Justice Department official cautioned that "I wouldn't want to get overly encouraged about this."

"The case has generally moved in a very professional way and we think there is a provable violation," he said. "On the other hand, there are a lot of hairy considerations in this. Demonstrating a violation to the grand jury and getting a courtroom conviction," he said, "are different matters."

Officials indicated that the government was seeking more witnesses.

Boy, 6, Abducted, Slain in Germany

AUGSBURG, West Germany, Dec. 23 (AP).—Eustachius Heil, a 6-year-old boy who was kidnapped Monday while on the way home from school, was found dead early today in a wood north of here.

Police said they were led to the body by an interior decorator who admitted the slaying. The suspect was identified as Karlheinz Kraemer, 33.

Shortly after the boy's disappearance, his parents received an anonymous telephone call demanding payment of 200,000 marks ($83,000) as ransom. Police suspected that the ransom demand was a ruse to cover up a crime which had already been committed for another motive. The boy's father is a truck driver of modest means.

Egypt Sentences 6 in Torture Case

CAIRO, Dec. 23 (UPI).—A military court today sentenced a former war minister, retired Gen. Mohammed Ahmed Sadek, to a one-year prison term at hard labor for involvement in the torture of military prisoners during a 1967 inquiry concerning an attempted coup.

The court, however, suspended the sentence in view of Gen. Sadek's "services to his country" when he was minister in 1971-72.

Five other military officers, two of them major generals on the retired list, were sentenced to prison terms ranging from 1 to 10 years at hard labor. The six were charged with torturing officers arrested in connection with an attempt to overthrow the regime of President Gamal Abdel Nasser.

Swiss Passes Closed

GENEVA, Dec. 23 (Reuters).—Snow today closed 14 Alpine road passes in Switzerland and blocked two more in the Jura Mountains, in the west of the country. Drivers need snow tires or chains to cross 10 other passes.

FBI Arrests an Ex-CIA Man; Bid to Contact KGB Alleged

By John M. Crewdson

WASHINGTON, Dec. 23 (NYT).—A retired employee of the CIA was arrested late yesterday and charged with violating the espionage laws after a package of classified government documents was left at a Soviet residence here with a note promising to supply more documents in exchange for a $200,000 payment.

A senior U.S. intelligence official said that the man, Edwin Moore, had left the CIA in 1973 and that he had never served during his career as a clandestine, or undercover, employee of the agency. Another official said only that Mr. Moore's work had concerned "logistics."

Mr. Moore, 56, was arraigned last night before a federal magistrate on charges of unauthorized possession of defense-related materials and theft of government property. His bail was fixed at $150,000.

Mysterious Package

In announcing the arrest, the FBI said that the investigation implicating the former CIA man had begun about 24 hours earlier when a mysterious package was discovered on the grounds of a Soviet "establishment" here.

Sources familiar with the investigation said that the establishment in question was an apartment complex in northwest Washington where a number of personnel attached to the Soviet Embassy here make their homes.

They said that the package which was believed by the Russians to contain a bomb, was surrendered unopened to officers of the Executive Protective Service, the uniformed branch of the Secret Service that is charged with guarding foreign diplomatic installations in the capital.

A source said that the package was addressed to "the Soviet resident," a term that the KGB uses to identify the chief officer in each of its overseas stations.

Unsigned Note

Inside were a number of U.S. government documents, some of them classified "secret," and a note offering additional materials in return for a $200,000 cash payment to be left at a point near Mr. Moore's Bethesda, Md., home. The note was unsigned, the sources said.

Asked about the sensitivity of the documents, a source said that the CIA was evaluating their contents and was considering the possibility that it would be unable to agree to their use as evidence in a public courtroom proceeding, which would present difficulties in prosecuting Mr. Moore.

FBI agents, the sources said, left a package at the "drop spot" designated in the anonymous note and, when Mr. Moore arrived to claim it, placed him under arrest.

The retired intelligence operative declined, the sources said, to allow agents to enter his house, but the FBI obtained a judicial warrant and returned to search it later in the evening.

8 Chile Leftists Reported Missing; May Be Arrested

SANTIAGO, Dec. 23 (AP).—Eight Chilean leftists have disappeared following a wave of political arrests this month, legal sources close to the Roman Catholic Church reported yesterday.

The missing include a former private secretary to Luis Corvalan, the recently exiled secretary-general of the outlawed Chilean Communist party. Lawyers have filed requests in the National Court of Appeals for access to all eight persons.

The habeas corpus petitions for seven of the eight say that they disappeared Dec. 15. The legal sources, who asked to remain anonymous to avoid any problems with the military government, said that most of the seven were seen being picked up that day by plainclothes security agents.

The sources said that Edras Pinto, 48, the eighth missing person and Mr. Corvalan's former secretary, was detained Monday before witnesses at his mother's home in Santiago.

President Augusto Pinochet said Saturday that former Communist Sen. Jorge Montes was the only Chilean still being held without formal charges, which is legal under provisions of the state of siege in force since Sept. 11, 1973, when the armed forces overthrew the late President Salvador Allende.

West Germany Sets 200-Mile Fishing Zone

BONN, Dec. 23 (UPI).—West Germany today proclaimed a 200-nautical-mile fishing zone in line with an agreement reached by the European Commission last month.

The fishing limit will go into effect Jan. 1, the government said.

The orang-utan of the Indonesian jungles is seriously endangered by hunters and the rapidly increasing destruction of its habitat. (Photo: [illegible])

Urgently needed: $10,000,000 to save the jungle and its wildlife

Monster tractors, tree pullers and tree crushers are ravaging the last remaining jungles—and 50 million years of evolution. If this wanton destruction continues, all the jungles in the world will vanish during your lifetime. Rare animals, like the orangutan and the aye-aye, inhabit the jungle, and will not survive its destruction.

No other environment contains so many species of plants and animals

On three acres of jungle, you can see more than two hundred different species of trees, and 410 different species of birds. You can see 12,250 species of flowering plants which are found nowhere else.

More than half the jungles of Africa have already been destroyed. In Latin America and S.E. Asia more than one third have fallen. The situation is even worse in India, Ceylon and Burma.

In some jungles, only one tree per acre has any commercial value. To get that single tree, timber companies can chew up 75 percent of the surrounding canopy.

The World Wildlife Fund cannot hope to save *all* the jungles which still remain. Most of them are doomed to disappear.

But we can—with your help—preserve enough of the jungle (perhaps in the form of national parks) to save its unique flora and fauna from extinction.

A vanishing storehouse of knowledge

The jungles offer insight into the processes of evolution. Their fragile cycles reveal them as the most complex environments on earth. They are gigantic laboratories and libraries of information—monuments more valuable than any created by man.

The jungle: who needs it?

More than ten percent of the world's known plant and animal species live in the jungle. Many are well-known, some have only been identified, and thousands more are still undiscovered.

Today, mechanization—powered by money from industrialized nations—is biting great chunks out of jungles that originally covered sixteen million square kilometers of the earth. Forty percent has already been destroyed and at the current rate of destruction (14 acres per minute) the rest will vanish in 25 years.

The richer jungles may only have ten years to live.

No one can forecast the consequence of destruction

Funds are urgently needed to sponsor research into the effect that destruction, partial or total, will have.

We need to determine the long-term effects on the world's climatic conditions; the dangers of increased flooding; the loss of natural resources. This is information that many Governments need to enact the legislation that can avert the total destruction of the jungle.

The World Wildlife Fund plans to save areas representative of all the different types of jungle. Only by doing this will the richness and variety be preserved, and the species saved from extinction.

If the jungles are to be used to best advantage, the highest levels of Government must be made aware of the need for protective management. Because once the jungle is destroyed, it can never be re-created.

Send us money

Money is needed urgently. We must persuade the corporations responsible to re-consider their ruthless exploitation of the jungle.

We must give aid to sympathetic Governments of developing nations. They cannot afford to mount expensive conservation programmes on their own—they need guidance and money. The World Wildlife Fund has to provide both.

Please help us collect the $10,000,000 we need to save the earth's jungles.

You can send your donation to the World Wildlife Fund, Headquarters, CH-1110 Morges, Switzerland.

We've only got 25 years to save the jungle.

U.S. Admiral Says Tanker Should Not Have Got Lost

From Wire Dispatches

WASHINGTON, Dec. 23.—A Coast Guard admiral has charged that the master of the Argo Merchant "should never have run aground" and "must have been asleep" when the oil tanker hit a shoal off Cape Cod a week ago.

Rear Adm. William Benkert, chief of the Office of Merchant Marine Safety, said the Liberian tanker had the benefit of "all kinds of aids" to prevent the accident, including echo sounding, radio beacons and the ability to take celestial fixes.

Meanwhile, oil from the tanker was drifting out to sea in a triangular slick more than 100 miles long today and scientists who flew over the area said its direction had shifted to the east toward Georges Bank, a rich fishing area.

"We just don't have the technology to clean it up, a scientist said.

Fishermen fear financial ruin from oil pollution and the State of Massachusetts has appealed for federal help to reduce its effect on the fishing and tourist industries.

Stern Stuck in Sand

Only the bow section of the 64-foot ship remained afloat over a shoal off Nantucket Island. It was settling into the sea and was expected to disappear some time today, according to a Coast Guard spokesman. The middle section was out of sight and the stern, firmly embedded in the sandy shoal, was barely visible above the waves.

The Coast Guard also disclosed that it had received a telephone call from a crewman of the Argo Merchant who said the vessel may have been deliberately run aground with the owners' knowledge because the tanker was "old and leaking."

A spokesman said the crew member, a citizen of Pakistan, added that he claimed that the master had ordered the crew not to cooperate with Coast Guard salvage teams last week.

Adm. Benkert, at a news conference in the Department of Transportation, said the Coast Guard had turned over the information received from the crewman to Capt. Alister Cromby, who represents Liberian government merchant marine interests in New York.

The admiral said the Coast Guard had no authority to investigate the charge because the grounding occurred in international waters.

He acknowledged that the Argo Merchant had had "some problems" in terms of compliance with U.S. regulations and had last been inspected by U.S. authorities in August, 1975. The vessel had been due for another inspection last week after docking at Salem, Mass.

Limited Authority

Adm. Benkert remarked that the only authority U.S. officials could exercise over ships like the Argo Merchant pertained to safety and anti-pollution regulations enforceable when they are in U.S. waters or ports—"unless we are asked by the flag state to investigate."

The National Weather Service predicted relatively calm seas in the area of the spill today. Winds were expected to shift slightly to the southwest and reach 15 to 20 knots. These conditions, the Coast Guard said, would keep the oil moving away from the beaches of Nantucket, Martha's Vineyard and Cape Cod and into the fishing grounds of Georges Bank.

The vessel, which broke in two amidships Tuesday in stormy seas, broke again yesterday, forward of the pilot house. The Argo Merchant ran onto a shoal 27 miles southeast of Nantucket 10 days ago en route from Venezuela to Salem.

Capt. George Papadopoulos gave a deposition behind closed doors yesterday on the circumstances of the grounding. He testified in two civil suits by Cape Cod fishermen who ask $120 million in damages they claim the spill will cause to fishing grounds.

Officials said no real damage has been done to Georges Bank yet because the oil has touched only its perimeter.

Sen. Warren Magnuson, D-Wash., chairman of the Senate Commerce Committee, said in Seattle that he will open hearings on oil-tanker safety measures as soon as Congress reconvenes.

President Ford said through aides that he was awaiting a damage report to see if he has cause to declare the Nantucket coast a disaster area. "I have directed federal agencies to do all that is possible to contain the slick, to limit environmental damage and to provide appropriate assistance . . .," Mr. Ford said in a statement yesterday.

Iraqis Purchase Submachine Guns In U.S.; Manage to Smuggle Out 30

WASHINGTON, Dec. 23 (NYT).—Ford administration officials said yesterday that Iraq, which does not have diplomatic relations with the United States, had arranged for the purchase of 100 submachine guns from a U.S. company and had managed to smuggle 30 of them out of the country through its mission at the United Nations.

The 70 others have been recovered, the officials said, after diplomatic intervention last week by Albert Sherer, deputy U.S. representative to the UN, with the Iraqi chief delegate, Abdul Karim al-Shaikhly.

According to U.S. officials at the UN, the purchase had apparently been arranged by Iraqi secret agents without Mr. Shaikhly's knowledge. U.S. authorities said the guns were of the type used by bodyguards of prominent persons but they speculated also that Iraq might have purchased them with the intention of turning them over to Arab terrorist organizations.

The purchase was discovered last month by agents of the Bureau of Alcohol, Tobacco and Firearms of the Department of the Treasury.

As a result, the agents were able to hold up a further shipment of 100 more of the submachine guns, designated M-10, which had been manufactured by a now defunct small-arms company.

Pakistan Adopts Policy to Counter A-Plant Pressure

KARACHI, Dec. 23 (UPI).—Pakistan said Tuesday that it would not let other countries interfere with its purchase of a nuclear fuel reprocessing plant from France.

Prime Minister Zulfikar Ali Bhutto said in two official publications of the ruling Pakistan People's party in Karachi that "if any country created any problem, then efforts would be made to successfully overcome it."

Last Thursday, France announced that it will stop bilateral sales of such plants to foreign nations. The decision amounted to compliance with U.S. efforts to block proliferation of facilities capable of producing basic material for atomic bombs.

Without referring directly to the United States, Mr. Bhutto said his government has adopted a policy of acting to insure that no foreign countries could interfere with the contracted purchase of the reprocessing plant.

Replying to a question, Mr. Bhutto said he did not think U.S. or Canadian pressure would influence France in any way concerning the contract. He said France has not changed its position on the contract so far and hoped that it would not do so.

U.S. Interests Seen Jeopardized

CIA Aide Said to Call Seoul Regime Unstable

By Richard Halloran

WASHINGTON, Dec. 23 (NYT).—The former chief of the U.S. CIA in South Korea, Donald Gregg, has asserted that the government of President Park Chung Hee is inherently unstable and therefore jeopardizes U.S. interests there.

According to sources who heard Mr. Gregg address a class in East Asian studies at the University of Texas last October, the CIA official said that Mr. Park's regime is repressive and that he found many aspects of it personally offensive.

Mr. Gregg, the sources said, contended that any such regime built on repression could not last long. But he was said not to have given any idea of how long Mr. Park's government might last or how the government might fall.

Mr. Gregg's remarks paralleled those of a senior State Department official who argued in a confidential report several years ago that the United States was working itself into a dangerous position by continuing to support the Park government and recommended that the United States slowly disengage itself.

Defense Treaty

The policy of the Nixon and Ford administrations, however, has been to continue full-fledged support of Mr. Park on the ground that any other course might undermine South Korean security and thus U.S. national interests in East Asia. The United States has a defense treaty with South Korea and 40,000 troops stationed there.

According to the Texas sources, Mr. Gregg also said that the CIA has a close working relationship with the Korean CIA in training and operations directed against North Korea. He was reported, however, to say that he did not like the implications of that close relationship.

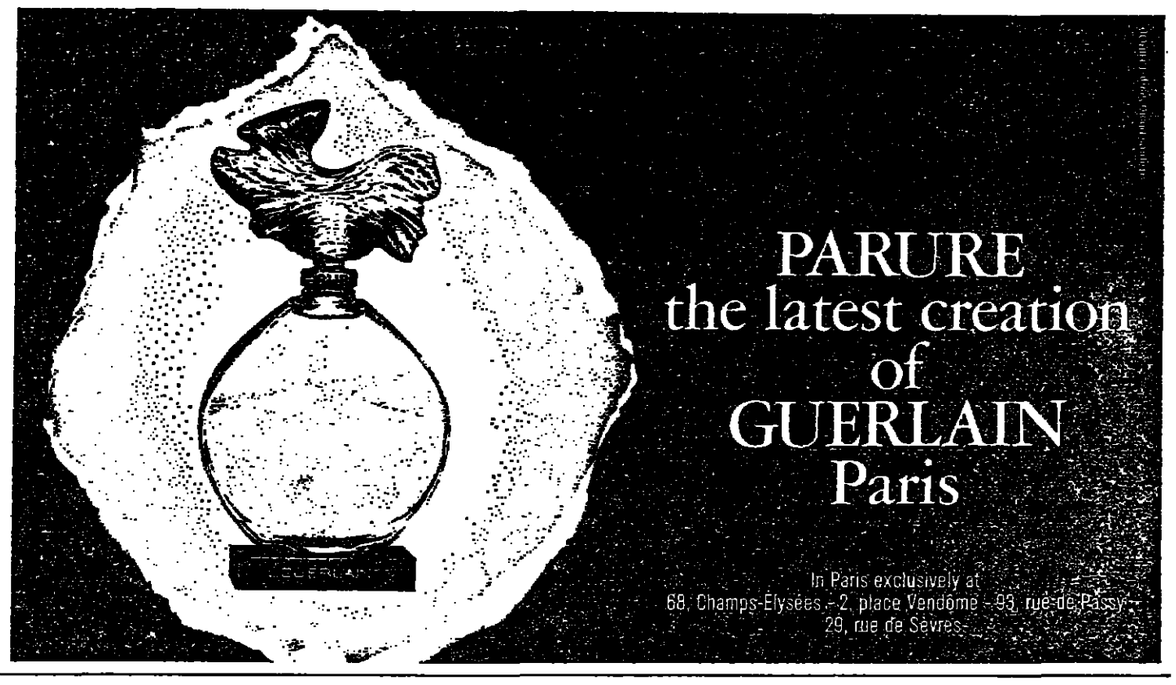
Mr. Gregg denied, in a brief telephone interview, that he knew of alleged KCIA operations in the United States but said that he was shocked by the ease with which South Korean largesse was accepted on Capitol Hill and then rationalized away.

Mr. Gregg declined, however, to repeat the substance of his remarks to the class in Texas. He said he saw no purpose in it and that he was under instructions by his agency not to repeat them. He also said there had been a lot of pressure from the South Korean government on the issue.

No spokesman at the South Korean Embassy here was available for comment.

Mr. Gregg was the CIA chief in Seoul from mid-1973 until earlier this year, through the period in which Mr. Park imposed an increasingly restrictive rule in South Korea. He is currently posted at the agency's headquarters outside Washington in recruiting and training.

Shaky Vienna Bridge Is Closed to Traffic



VIENNA, Dec. 23 (UPI).—The Vienna city administration today ordered the closure of the Floridsdorf Bridge across the Danube because of its shaky condition.

The Floridsdorf Bridge, connecting the left bank workers' district with the city, was one of three bridges left after the Reichsbrücke collapsed Aug. 1. The city administration said the Floridsdorf Bridge will remain closed "until further notice" to allow a thorough investigation.

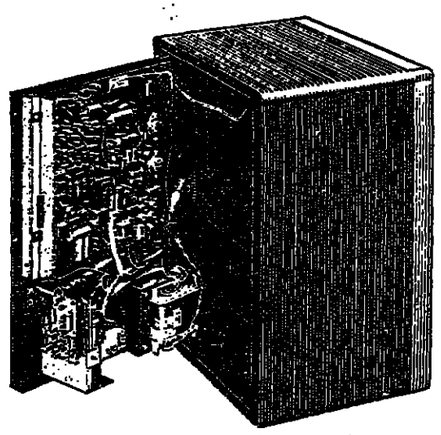
Eight Persons Killed In Tehran Gun Fight

TEHRAN, Dec. 23 (AP).—Security forces killed eight persons they said were Marxist guerrillas and captured 11 others in two gun battles here Tuesday, the government announced today.

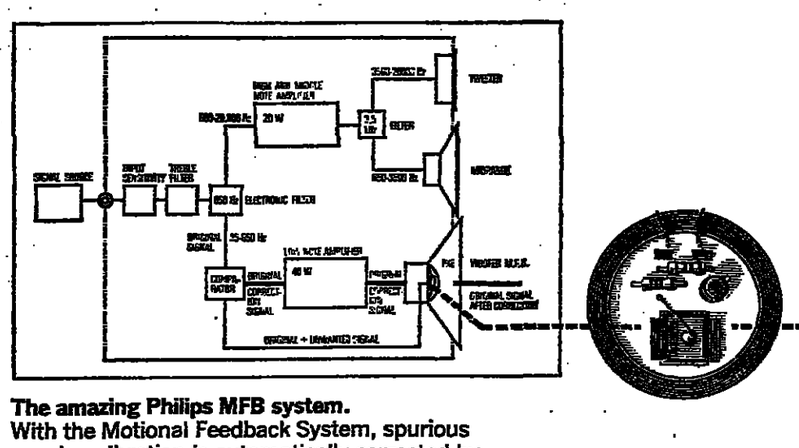
The announcement said that weapons, ammunition, hand grenades, explosives and a large amount of printed material were confiscated in the raids on the Marxists' hideouts.

LOOK

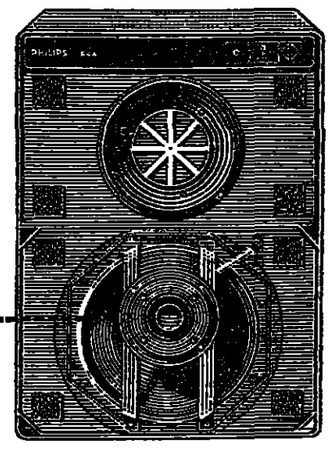
We think the Philips RH 544 is one of the best speakers you can buy today. And tomorrow.



PHILIPS



LISTEN



But maybe you're more interested in the opinion of the HiFi specialist press.

Two built-in amplifiers: 40 W + 20 W output power!
The Philips RH 544 loudspeaker system is based on the principle of professional studio monitor loudspeaker systems. Perfect sound reproduction with a high sound pressure level is achieved by means of the built-in amplifiers which are matched to the various loudspeakers.
In the authoritative American periodical AUDIO (February 1975) Bert Whyte reports on the remarkable reproduction quality of the MFB system: "In summing up the sound quality of the MFB, it impresses most with its exceptionally smooth overall response and neutral character."

The speaker unlimited.
The MFB loudspeaker offers you wide scope. A few examples: the RH 544 can be connected directly to preliminary and normal amplifiers. With this speaker you can easily increase the output power of your existing HiFi system.
In the American periodical HIFI STEREO BUYERS' GUIDE Martin Clifford says: "I've listened to these units in small rooms, in large rooms, and in what could be described as a fair-sized hall. I have listened to the Philips MFB speakers in my home. I would say that Philips has made a dramatic break-through in sound reproduction."

The amazing Philips MFB system.
With the Motional Feedback System, spurious speaker vibration is automatically corrected by means of an accelerometer in the bass speaker (see arrow) and by a special correction circuit. That's how the MFB system makes fuller bass note reproduction possible - from 30 Hz on.
The reviewer of the British journal GRAMOPHONE (April 1976) writes about this amazing system: "Technically, the Philips MFB speaker has performed very well and might therefore be judged by high standards on listening tests. Certainly its bass performance is all it is claimed to be: smooth, full and not too lightly damped.
Middle and treble responses are quite smooth."

The Argo Merchant Disaster

The "biggest oil spill disaster on the U.S. Atlantic Coast in our history" is the way Russell Train, administrator of the Environmental Protection Agency, has characterized the wreck of the tanker Argo Merchant on the Nantucket shoals. Train, who is not given to overstatement, was describing the impact of this wholly preventable catastrophe that threatens incalculable damage to the great fisheries on the Georges Bank and to New England's coastal environment.

As in the case of the famous Santa Barbara and Torrey Canyon spills of the sixties, this one, too, may serve a useful purpose if it galvanizes the public—and governmental authority—into action that will reduce the likelihood of such disasters in the years ahead. Unless strong action is taken, accidents are not only probable: they are virtually certain.

The Georges Bank, besides being one of the world's most important fishing grounds, is also the site of prospective leases on the outer continental shelf, from which it is estimated that some 180,000 barrels of oil a day will be extracted at maximum production. Under present plans, this oil is to be carried by tanker from the offshore wells —thus greatly increasing the tanker traffic in the area and, with it, the probability of similar wrecks—and spills.

The far safer method of removing the oil would be by pipeline running ashore from the wellheads. It is not a method that commends itself to the oil companies because the relatively low yield of oil expected might not economically warrant the additional cost. But if the site is considered that minimally productive, why drill there at all?

The affair of the Argo Merchant raises several other questions that need thorough study before offshore drilling in the Atlantic becomes a fixed procedure. The ship, which had an appalling history of previous accidents, was so far off course that knowing observers in the area wonder whether its skipper was not deliberately taking a short-cut in order to trim costs, a practice they suggest is not uncommon. If so, why has it been allowed? It is fair to ask, too, whether the Coast Guard is as powerless as it appears to be to contain oil spilled in the rough Atlantic. If it is, that is additional testimony against offshore drilling in those waters. In addition, the ship's record raises serious questions about the policing of all tanker operations, apart from the offshore drilling issue.

The fishermen of the Georges Bank will be fortunate if the spill from the Argo Merchant does not do long-term damage to the spawning grounds on which their industry depends. The people of the coastal area will be fortunate if a sudden shift in the tides does not bring disaster to their great resorts. Along the rest of the Atlantic Coast, residents will be fortunate if the lessons of the Argo Merchant are not lost on those who have the responsibility of deciding whether or not offshore oil is worth the possible price.

THE NEW YORK TIMES.

Action Against Nuclear Spread

International concern over the spread of nuclear weapons seems to be, well, spreading. The other day France announced a formal nuclear-export policy designed to prevent the sale of technology that would allow a buyer, if tempted, to move on from producing power to making a bomb. And on Monday West Germany indicated—granted, in an elliptical manner that requires clarification—that it was weighing a similar policy. The significance of these steps lies in the fact that, among nuclear suppliers, France and West Germany are the two governments under the heaviest commercial pressure to sell those components of the nuclear-fuel cycle that would permit the building of nuclear weapons. Other would-be suppliers, including the United States, have their commercial impulses under tighter control.

There is, however, a hitch. So far France has refused to cancel the sale of a reprocessing plant to Pakistan, and West Germany stands on its determination to sell a multi-billion-dollar soup-to-nuts nuclear industry to Brazil. As suppliers, they take the view that they don't wish to deprive friendly Third World states of the technology that the latter feel is essential to their development.

But not all is bleak. Pakistan wants to buy 110 U.S. A-7 light bombers in a three-quarter-billion-dollar deal that would be financed by Saudi Arabia. The U.S. position is that, if Pakistan bought the French reprocessing plant, it could not expect to acquire the A-7s. The plane deal has its own liabilities in terms of its effect on the balance of conventional forces in the Asian subcontinent. As it happens, Jimmy Carter has spoken out forcefully against large conventional-arms sales as well as against nuclear-technology sales that could encourage proliferation. It would help a great deal if France were to apply to Pakistan the nuclear-export considerations it intends to apply to others. France promises to guarantee a reliable fuel supply so that a buyer of its reactors will not feel compelled to acquire its own reprocessing or enrichment facilities. These last are what is subject to abuse.

Brazil has signed contracts with West Germany for a multi-billion-dollar package including uranium mining, eight reactors, a pilot enrichment plant and reprocessing facilities. The Brazilians regard themselves as destined to be the world's next great power, and they do not take kindly to suggestions that they practice nuclear restraint. We would not assume, nonetheless, that they cannot envisage alternative ways of demonstrating their capacity for world leadership, especially if the legitimate energy requirements were met by means that did not involve the proliferation risks involved in enrichment and reprocessing facilities. With a new administration coming to power in Washington, Brazil might well respond to an invitation to join in a nuclear-policy review.

THE WASHINGTON POST.

Peking's Iodine 131

It is unconscionable that China continues to muck up the international atmosphere with radioactive fallout from its nuclear bomb tests. Its last blast, on Nov. 17, ended up dusting some millions of Americans with a quantity of poisonous iodine 131. If that is not a hostile act—hostile in effect, if not intent—what is? Who do the Chinese think they are? France, the other big polluter of recent years? India, the poorest and therefore by its own logic the purest of the polluters?

China, when taxed with the matter, says it is only doing what the Americans and Russians did before they moved their tests underground: "breaking the nuclear monopoly of the superpowers," it's called in Peking. In the United States this argument sways the more guilt-ridden among us. It goes over even bigger among the double-standard crowd in the Third World. But the stark fact remains that Peking, still, today, regularly arrogates to itself a right to conduct a form of undeclared radiological warfare which, in theory at least, the international community condemns

One possible way out for the Chinese is to test underground. This poses a question. The Chinese first tested underground, at Lop Nor, in 1969. They did it again last year and, most recently, last October. Why don't they conduct all their tests underground? The Federation of American Scientists recently suggested that the State Department check to see if the United States, by selling drilling equipment or instrumentation, might obviate Peking's felt need to test in the atmosphere. The department replied that the practice "cannot be attributed to technological deficiencies, since they have already conducted three underground tests." But that sparse formulation hardly answers all the questions that might be raised.

To sell China technology facilitating underground tests, if it asked (it hasn't), would be not only to fight pollution but to become a kind of direct military partner. That's a large step. Russians would have one kind of anxiety. Japanese another. Californians a third. The Ford administration, though tempted by the thought that military-related sales might help keep Peking stiff against Moscow, got no further than approving the sale of a computer which conceivably could—but, the State Department says, won't—be used in a military application. The issue is obviously too big to be resolved within a pollution context alone. But pollution remains a legitimate American concern.

If the Nixon and Ford administrations, with other diplomatic fish to fry, did not find it feasible to push hard enough on testing to make a difference, then the new administration, led by a man of special nuclear sensibilities, can perhaps look for ways to make a fresh start. It might, for instance, consider some of SANE's recent proposals for involving Peking in future arms negotiations. No doubt there are other possibilities. The point is, Peking should not pollute.

In the International Edition

Seventy-Five Years Ago

December 24, 1901

PHILADELPHIA—"When more than a century ago, Thomas Jefferson was called upon, while Minister to France, to buy corsets for his Virginia neighbors, he little supposed the time would come when in Paris there would be some sort of revolution against this "improver" of the female figure. It is obvious that the modern woman still wants to be attractive, but she also wants to be comfortable too," says an editorial from yesterday's Inquirer.

Fifty Years Ago

December 24, 1926

NEW YORK—Miss Edna Purviance, American screen star who has for many years been the leading lady with Charlie Chaplin, will leave today for France where she will star in a French film production. Miss Purviance plans to remain in Paris indefinitely, although she is still under contract with Charlie Chaplin. She has been lent to the French firm for the production of this picture. Since 1915 she has appeared in every Chaplin film except the "Gold Rush."

'God Rest Ye Merry, Gentlemen'

Why Not the Best?

By Anthony Lewis

BOSTON.—These are hard times for people who believed that Jimmy Carter would give us a government of hope, of fresh ideas and humane concerns. He has chosen his Cabinet members and the list hardly inspires the exhilaration that some of us expected. The feeling, rather, is disappointment verging on dismay.

The disappointment lies in part in the unoriginal character of Carter's choices. There are good things to say about individuals. But the Cabinet as a whole is too conformist, too old, too tied to established interests. Not withstanding differences of race and sex, it is largely a Cabinet of yesterday's men.

Carter has articulated a curious standard in announcing his choices. Again and again he has spoken of an appointee as "a tough, competent manager"—as if he were picking a group of faceless technocrats. Competence is a good thing, but ideas matter more.

Consider an appointment that was widely cheered, of Rep. Brock Adams as secretary of transportation. Adams is a respected member of the House. But the big issue in transportation today is deregulation—an idea furiously resisted by airlines, truckers and others who like the cocoon of federal regulation. Where does Adams stand? His past relationships with the regulated do not exactly assure the independence and courage required to make economic sense of our transportation system.

Reasons for Dismay

Their more particular concern arises from Carter's choices in two areas: National security and justice. There are the reasons for dismay.

Who would have guessed that a new Democratic President would pick a national security team without one member who was a critic of the Vietnam war? Premature critics, like premature anti-fascists, are not universally popular. But as a matter of common sense, not to mention symbolism, Carter might have been expected to want near him one person who understood at the time what a disaster our intervention was.

Cyrus Vance is a fine, public-spirited lawyer with good diplomatic experience. He will bring to the office of secretary of state qualities of personal honor and humanity lacking for the last four years. As a negotiator starting in 1968, he did his best to end the Vietnam war; but he was no critic in his Pentagon service before that.

Harold Brown, the defense secretary-designate, transmitted as Air Force secretary in 1968 a proposal to allow bombing of North Vietnam "without the present scrupulous concern for collateral civilian damage and casualties." He says now that his role was merely as a transmitter, that he did not personally approve the proposal. Those who knew Brown at the time say that he evidenced no strong personal principles on Vietnam.

A Get-Together

Zbigniew Brzezinski, chosen to be Carter's assistant for national security affairs, was on the State Department's Policy Planning Council from 1966 to 1968. In 1967, he was one of a group of academics and intellectuals in government whom President Johnson invited for a get-together.

Johnson began by deploring the way people at Harvard and the like misunderstood his Vietnam policy. A little later, Brzezinski intervened to say that the President should pay no attention to those critics—because they really did not disagree with him on Vietnam, they just hated him because he was not a Kennedy.

On top of those appointments Carter has named James Schlesinger, President Nixon's secretary of defense, as energy overlord. The crucial issue of nuclear energy has profound implications for world security as well as the environment, and Schlesinger begins with a strong, known bias in favor of nuclear development —the very opposite of the position taken in the campaign by Carter, who said the nuclear alternative should come last.

The choice of Griffin Bell to be attorney general is disconcerting for different reasons. That he is an old friend of Carter's would not matter if he were notably qualified by character, breadth of mind or judgment. But he is not. His record suggests a man of limited vision and sensitivity who made a judge of no distinction.

Bell endorsed Harrold Carswell for the Supreme Court when informed people recognized the appointment as contemptuous.

The Right Track

Interviewed the other night by John Chancellor of NBC News, he praised the Burger court as "on the right track." That is just too simple: The present Supreme Court has done some things well and others very badly. A wise man makes distinctions or says nothing.

Another president would have surprised no one by making such appointments, and Jimmy Carter had in him the possibility of something better. What has happened? Is he, like John Kennedy, worrying too much about the opinion of people who voted against him? Is he losing the sense of inner confidence that many saw in this outsider as he made it to the top?

When President Johnson began the bombing of North Vietnam in 1965, Art Buchwald wrote that he had had a nightmare: Barry Goldwater had been elected, and we were bombing. The Carter Cabinet has something of the quality of a bad dream. Much of it could have been picked by Gerald Ford—or Dwight Eisenhower.

Mrs. Thatcher's Christmas Gift

By C. L. Sulzberger

LONDON.—Mrs. Margaret Thatcher's idea of an excellent Christmas gift for busted, badgered and bewildered Britain is a Conservative government in the year 1977. Whether, of course, she is afforded the chance to make this present will depend on what use the existing Labor incumbents make of their newest injection of foreign help and how successfully they can assure people they are moving toward recovery.

Whatever happens, the leader of the Tory opposition—which continues to breathe down Prime Minister Jim Callaghan's neck—is convinced that, regardless of possible economic parsimony in other fields, this country must maintain its strength in NATO, now being sapped. For her, it is not only a military question but a defense question.

"We must keep this up," she told me. "It is an absolute priority. Any nation that hasn't the will to defend itself demonstrates a lack of confidence in its own future and in its own way of life."

Britain hasn't had a woman run its government since Queen Anne, in the early 18th century, and the much more famous Elizabeth over a hundred years earlier. Victoria reigned without ruling. Queen Elizabeth II nowadays is chief of state but plays no guiding role in political affairs.

Yet, while aware that women have generally been confined to behind-the-scenes (although sometimes important) governing activity during recent generations, she is equally aware that they appear to be making a comeback. Golda Meir ran Israel in recent years with tough determination. Indira Gandhi dominates India with an iron fist only sometimes clothed in velvet. These two, like herself, have been relatively rightwing. The outstanding leftist, Madame Mao, is on the shelf.

Mrs. Thatcher seems to feel women have certain administrative advantages because they stick more to fundamental issues. She is persuaded they are less inclined than men to live indefinitely beyond their means. They recognize the need for good household management and making do within a fixed budget that cannot be exceeded. You can't borrow to live beyond your means forever. Maybe rightwing is human sense, money sense.

Moreover, for her, woman recognize the need to protect dependents while training them for responsibility by bringing out the best in them. It is folly for a good nurse to mother a sick patient excessively with protection; more important is spurring the patient to make an effort.

The Tory leader's approach to Britain's problems is based on a plain, housewifely view. She doesn't favor cutting the dole on which unemployed survive but she does favor reducing the administrators who supervise it.

Excesses

She sees a need for economies in the field of bureaucratic overmanning or excess staffing. To her it is obvious that if you can't, like a good household manager, live at the present rate of expenditures, they must be pared.

The crux of Britain's difficulty, she appears to reason, is that unemployment and inflation have increased together because expenditure has nearly doubled in three years as the Labor government keeps boosting public employment while private employment declines. This has become a built-in system rather than any temporary Keynesian *pump-priming*.

She seemingly reasons inflation can't be brought down if money supply is excessive. And funds must be made more equably available to both the public and private sectors. The latter, which is sharply disfavored now, must take the lead in increasing national production which is just flat. Such changes cannot be abruptly achieved but must come gradually.

It is hard to define Mrs. Thatcher's ideological philosophy in other than commonsensical terms. She admits to having been most profoundly influenced by her father and by former Conservative Prime Minister Harold Macmillan.

The former was a modest Methodist grocer who was largely self-educated and a voracious reader. He took part in all community activities and was even elected mayor. He always stressed to children that they must make up their minds, not follow the crowd, and put more into the community than they took out.

As for Macmillan, the public hero of the tough, ambitious but pretty and soft-voiced 51-year-old Conservative leader, she admires him as a man born of his own historical time and of the future. She feels he always sought to lead Britain toward responsible society in contemporary terms but also addressed to the future, this year, 2000. That is her own ambition—if she gets the chance.

The International Herald Tribune welcomes letters from readers. Short letters have a better chance of being published. All letters are subject to condensation, or space reasons. Anonymous letters will not be considered for publication. Writers may request that their letters be signed only with initials but preference will be given to those fully signed and bearing the writer's complete address.

Commission Paritaire No 31.965

Chris Matthews From Rome:

If the name of the game is to undermine the country's institutions then things are going very nicely, thank you.

ROME—Italians are celebrating this Christmas with all the traditional trimmings. The fruit-cake they call panettone. Eels, fresh and smoked. Spumante, the national answer to champagne. And bombs.

The season of peace and good-will somehow brings out the atrocious best in the bombers too. Their most spectacular achievement remains Dec. 12, 1969. That was when they blasted 16 people dead and maimed more than 80 in Milan's Piazza Fontana.

In keeping with the general climate of austerity, Dec. 14 this year was more downbeat. The toll was limited to a 60-year-old German language teacher dead and eight wounded in Brescia. But the bomb was more powerful than the one which reduced eight people to pulp and mutilated 100 in May, 1974. So maybe it wasn't for want of trying.

Italian bombs don't always all go off at Christmastime. But they do have this in common. Those responsible for the blasts are still mostly at large. And their precise motives remain unknown.

To seek a rational explanation for what induces people to plant a highly explosive device in a metal refuse bin in the middle of a square packed with demonstrators (Brescia, 1974), thus insuring that the maximum amount of metal connects with the maximum amount of flesh, may, in a sense, be academic. But even maniacs follow a logic of their own. What are the rules of this game, and who's playing it?

Seven years after Piazza Fontana, and maybe a month before the case finally comes to something resembling a trial, no one has found a satisfactory answer to those questions. In the absence of real answers, people talk in terms of an overall "strategy of tension" aimed, it seems, at filling ordinary citizens with such despair at the way things are going that, when the tanks finally ring the presidential palace and strong men step in to stop the rot, everyone will heave a sigh of relief and bring out the bunting.

The bombers are one component in this scenario. The urban guerrillas, who have left five dead so far this Christmas, are another.

Black and Red

Unlike the bombers, who make innocent bystanders their prime target, the guerrillas go for specific hits. These asphalt warriors fall into two distinct categories: The Red or leftist kind, who wage war on the rotten bourgeois state by murdering magistrates and policemen, and the black or Fascist kind, who wage war on the rotten bourgeois state by murdering magistrates and policemen. Investigators this week uncovered links between the Red kind and the black kind. Few people fell about with surprise. Think of the overhead saved.

Presented in terms of lash and backlash, the strategy of tension may have made a kind of sick sense in 1969, when, as an added bonus, the blame could still be pinned on the left. It made less sense in 1974 when a group from the north planned to poison Rome's water supply with radioactive material so as to create alarm and despondency on a scale sufficient to justify army intervention.

But what sort of sense can make today when, every time a car backfires, everyone assumes as a matter of course that it's the Fascists up to their old tricks again?

Paradoxically then, the strategy of tension is paying better dividends now than ever before. If the name of the game is to undermine the country's institutions then things are going very nicely, thank you. Though the lion's share of the credit here rests not with the bombers or the guerrillas themselves but with the custodians of the Moreasd institutions.

For the bombs and the submachine bushes represent, relatively, the lesser evil. The real damage, as that which causes deep despair and despondency, is done by the official lies, half-truths, smoke screens and coverup campaigns that invariably follow the bloodletting. It would be tedious to go into full details. But the Italian secret service, SID, a powerful but organized charter flights for key witnesses in the Piazza Fontana case could get out of the country. When they came for Giovanni Ventura, due to go on trial as one of the organizers of the 1969 bombing, and kindly offered to spring him from jail, he politely declined. For that kind of offer can be dangerous.

As Martino Zicchitella, a militiaman who got on the wrong side of the law, found out too late. He and six other dangerous criminals virtually walked out of a top security jail a few months ago. The warden tried to call the police but, alas, the number was engaged. Zicchitella was killed by his own accomplices after the gunned down a senior member of the Italian anti-terrorist squad last week. His body was left as a sort of visiting card.

These and similar episodes have convinced most Italians that, even if the Interior Ministry doesn't pay someone full time to organize political terror the authorities are, at best, benevolent onlookers where bombers and guerrillas are concerned. Maybe there are valid reasons for hiding the truth. But, however painful, only the truth, starting with Piazza Fontana, can now restore to Italy's institutions the sort of credit which any system needs to survive.

It goes against the grain, as was seen only a few weeks ago when the Christian Democrats tried to get proceedings dropped against former Premier Mariano Rumor in the Lockheed corruption case. Sure it would be *brutta figura* if he's found guilty. But infinitely *more damaging* if he never comes to trial. Apart from anything else, it's the sort of thing that sends people reaching for their Molotov cocktails. And maybe their bombs too.

AT MAYOR DALEY'S FUNERAL—Jimmy Carter, Vice-President Rockefeller and Sen. Edward Kennedy were among scores of politicians in Chicago on Wednesday.

Disappointed by North-South Talks

UN Assembly Ends Session With Regrets

UNITED NATIONS, N.Y., Dec. 23 (AP).—After three months of meetings dominated by developments in the Mideast, southern Africa and in Washington, the UN General Assembly ended its 1st session last night with a decision to meet again next year to review the results of the economic conference of rich-poor nations in Paris.

Assembly President Hamilton Amerasinghe suspended the session at 10:15 p.m., more than a day later than scheduled because of a backlog of budgetary items.

The suspension of the session, called by developing countries, spelled their disappointment that after a year of negotiations the North-South conference in Paris had made no progress toward meeting Third World demands for a "new international economic order."

The concluding session of the talks has been postponed until after the Carter administration takes office next month.

"This is a gloomy note to strike at the very commencement of my final statement," Mr. Amerasinghe, of Sri Lanka, told the 147-nation Assembly after announcing the suspension.

[The Assembly yesterday approved an elaborate plan to make Vienna, the site of a third UN headquarters, after New York and Geneva, UPI reported.

[Under the plan, the UN will take over an eight-story office tower specially built for it by Austria, and transfer secretariat units there beginning in 1978. After another five years, it is expected that more UN personnel will work in Vienna than in New York.

[The Austrian government and Vienna put up the office complex at a cost of nearly $1 billion after a UN promise that it would use all the office space. The space is being offered to the UN at a nominal rent.

[A major sector of the space will be used by the International Atomic Energy Agency and the UN Industrial Development Organization, which already have headquarters in Vienna.

[In addition, the Assembly authorized Secretary-General Kurt Waldheim to move secretariat units from New York and Geneva to the new Vienna center. These secretariats will include the Center for Social Development and Humanitarian Affairs in New York and the Social Affairs Division in Geneva.

Under current estimates, a total of 4,500 to 4,700 persons associated with the UN will be working in Vienna in 1983. At present, a total of 3,700 persons are working in the UN building in New York.

UN diplomats agreed that after three years of confrontations between Western democracies and a bloc of Communist and Third World nations, the 31st session was markedly tamer. But the two sides differed sharply on the reasons why.

"I think we are on the beginning of an 'upbeat' here at the UN," outgoing U.S. Ambassador William Scranton told a news conference. "... Even if we don't agree, there is a great deal more interchange of thinking and an attempt to hold down the excessive rhetoric."

Other Western delegates agreed, and they specifically pointed to West Germany's success in winning agreement to start writing a global treaty against the taking of hostages, a measure traditionally opposed by Arab and African opposition.

But in his closing statement, Mr. Amerasinghe said: "The real explanation [for the quiet session] appears to be that the United Nations is today suffering from severe moral fatigue caused by continuing frustration and the failure of its members to discharge their responsibilities."

Echoing Third World frustrations over the impotence of many of their resolutions despite lopsided votes, Mr. Amerasinghe said:

"In the absence of the power to enforce its decisions, a power which member nations possess, the United Nations may find itself drifting away from its ideals and allowing the provisions of the UN Charter to wither away."

Veto of Vietnam

The Assembly president specifically criticized the United States for its veto of Vietnam's membership in the UN. The United States had blocked Hanoi's admission because it felt Vietnam had failed to divulge the fates of Americans missing in Indochina.

"The veto that was meant to prevent the abuse of power should not be used as a punitive weapon," Mr. Amerasinghe said. "This organization must not be turned into a reformatory."

Mr. Scranton, exercising the traditional U.S. privilege of having the last word as host country, singled out the Assembly's failure in human rights for criticism, a field in which Western democracies have been steadily losing ground in the UN.

"Little has happened during this session to improve the protection of human rights where human rights most need protection," he said. His toughest speech as UN envoy, had been an attack on the Soviet Union for denying its citizens human rights and "manipulating" developing countries to do likewise.

Among its final actions yesterday, the Assembly:

• Increased Mr. Waldheim's base salary from $77,600 to $110,550.

• Urged that UN pension funds now invested in transnational corporations be transferred "to the greatest extent practicable" to developing countries.

• Increased the UN budget for 1976–77 by 5.1 per cent to $783.9 million.

New Paralysis Cases Listed In U.S. Swine Flu Program

By Thomas O'Toole and Victor Cohn

WASHINGTON, Dec. 23 (WP).—At least 36 new cases of [illegible] paralysis following swine flu shots were reported in the United States yesterday. The total is now 223.

Nine of the new cases of the paralytic condition known as Guillain-Barre syndrome are members of the U.S. armed forces or their dependent wives and children who became paralyzed some time after being vaccinated against the swine flu. The other 27 are newly discovered cases reported yesterday from around the country to the Center for Disease Control in Atlanta.

None of the 36 new cases succumbed to the paralysis, which is also known as French polio. Six of the cases reported so far have died, which is why the government Friday suspended the nationwide swine flu program after vaccinating nearly 40 million Americans.

Meanwhile, the CDC was investigating the possibility that one particular vaccine may be linked to the rising number of Guillain-Barre cases.

Of the first 38 cases of the paralytic syndrome "intensively investigated" by the CDC, no fewer than 20 were persons inoculated with vaccines provided by Merrell-National Laboratories of Cincinnati.

The nine cases reported by the military were considered most significant by doctors, who had wondered why there had been no cases of the paralysis among the 2.1 million Americans in uniform and their dependents.

Most of the uniformed military have already been vaccinated against swine flu, meaning they should have shown up in the Guillain-Barre statistics if there *is any connection* between the paralysis and the vaccine.

Five of the nine cases were reported by the Air Force, three by the Army and one by the Navy. Five of the nine were uniformed military and four were dependents.

The military services halted their swine flu vaccination program at the same time the civilian program was stopped. At least 90 per cent of the Air Force personnel had already been vaccinated. No figures were available yesterday on how far along the Army and Navy had come but they had vaccinated at least 75 per cent of their personnel.

Tanker Mishap Spills Oil Into Belgian River

ANTWERP, Belgium, Dec. 23 (AP).—Hundreds of tons of heavy oil spilled into the Scheldt River after a West German tanker crashed into a pier and severed several oil lines, port authorities said today. They reported no casualties.

Officials said the 1,600-ton Westfalia, owned by C.F. Ahren Kiel of Hamburg, plowed into the pier last night in a thick fog, breaking lines used to load tankers. Port authorities said they were having trouble stopping the spillage.

amuel Cavert Dead, Pioneer U.S. Ecumenist

NEW YORK, Dec. 23 (AP).—e Rev. Dr. Samuel McCrea vert, 88, a pioneer of the ecuical movement and the first ministrative head of the Nal Council of Churches, died sday after a lengthy illness. though only a few Protestant ominations were involved when first took a leadership role in e ecumenical movement in the 00s, it has since expanded to clude most of the world's ristians.

Participating bodies now inde most of Protestantism, stern Orthodoxy and Roman tholicism.

Dr. Cavert was the first genl secretary of the National uncil of Churches, holding the e from 1950 to 1954. Later, served as executive secretary the New York office of the ld Council of Churches, retirin 1958.

Mrs. Olive Diefenbaker

OTTAWA, Dec. 23 (UPI).—Olive Diefenbaker, 73, wife of former nadian Prime Minister John Diefenbaker, died at her home re yesterday.

Mrs. Diefenbaker had been in awa Civic Hospital for three eks with a heart ailment.

Lydik S. Jacobsen

PALO ALTO, Calif., Dec. 23 P).—Lydik S. Jacobsen, 79, a neer scholar on earthquake mage to buildings, died yester- following a stroke, Stanford iversity announced.

He was an emeritus professor Stanford, where he headed its rthquake Research Laboratory 33 years. During World War II, served aboard 200 Navy ships, ncing noise and vibration tectable by submarines.

Cecil Roberts

ROME, Dec. 23 (Reuters).—cil Roberts, 84, British journal- author, poet and traveler, has d in Rome's Salvator Mundi spital, hospital officials said day.

Mr. Roberts published more an 50 books during his career was an inveterate traveler. had lived in Italy for 25 years.

THE ART MARKET

The Erotic 'Paintings' Of a Japanese Master

By Souren Melikian

PARIS (IHT).—The season's gag? Or an artistic faux pas? One wonders about the 24 works, advertised as paintings by Hokusai, now on view at the Espace Cardin in Paris. Katsushika Hokusai (1760–1849) is the famous Japanese woodblock maker and draftsman.

After paying the 25-franc entrance fee, you are handed a flashlight. This is to allow you to see the "paintings"—prolonged exposure to normal lighting could damage them, you are told in hushed tones.

It takes a few minutes to adjust to the eerie dimness. The walls are black and so is the carpeting. A single ray of green light focuses on a chrome-plate post in the middle of the room. It turns out to be not a contemporary black-magic totem but a blameless ashtray. Along the walls, in a single row, are the pictures, glassed over and deeply set within slanting, black plywood frames.

At first, you notice the reflections in the glass and from the four shiny metal rivets pressing the frames firmly onto the wall. A rope keeps you at safe distance (about 50 centimeters) from the art as you walk around, flashing your light across the works. Lost in artistic contemplation, I had a couple of close shaves with posts holding up the rope.

As you take a look at the first work on the left, you are struck by the rather obvious eroticism with its crudely anatomical precision that tends to overshadow an unquestionable graphic elegance and concision typical of Hokusai. It is not easy to take it all in as you must flash your light across the surface several times. You may note the somewhat primitive coloring.

By the time you get to the second work, you are used to the lighting. And there you begin to ask yourself questions.

In the left-hand corner of the composition is a wicker basket with chevron-like stylization in light black and gray hues, with the fine, ashy texture so typical of Japanese woodblock engraving. You think that dim, out-of-this-world lighting is distorting things until you reach item No. 3 from the left. This shows an enterprising little fellow who is climbing over a woman leaning on her elbows on the floor. She is fully dressed except for one little negligence which the man finds helpful. But the point is the dress not the negligence: It has a wavy pattern with the ashy splotchy appearance of woodblock prints. As you go on, you simply cannot shake off that funny feeling of being confronted with prints that have been daubed over. No attempt was made to cover the geometric patterns of textiles and the outlines of the compositions.

Checking your facts, you discover "Namichidori," the Japanese word in parentheses below the French title, "Le Silence de l'Amour." It refers to a well-known set of 12 woodblocks by Hokusai and means "waves and plovers." "Plovers," not "lovers." The set was first published under the title "Fukujuso" ("Adonis Flower") with a text printed above the figures. The second edition, without text but with a mica ground, was called "Namichidori."

The photograph released by Espace Cardin during its "Le Silence de l'Amour" show.

An Expert

Apparently, it is a set of woodblocks from this second edition that was overpainted at some stage. Some uncertainty surrounds the remaining woodblocks which must be from some other erotic set of 12. It was usual for Japanese sets of this kind to include 12 compositions—not 24. The inference seems to be that the "Namichidori" set and the unidentified set of erotic woodblocks, both by Hokusai, were overpainted at some undetermined date. To call these "paintings" without further qualification is stretching it a bit.

Nor does it seem wholly justified to bill this as a world premiere, as Espace Cardin has done. Jack Hillier, the author of the two current reference works on Hokusai, has seen both the Cardin exhibition and another show held in 1969 at the Goto Bijutsukan (Tokyo's museum of fine arts) under the title "Nikuhitsu Katsushika Hokusai Ten" ("Exhibition of Paintings by Katsushika Hokusai"). The latter included 24 "paintings" which were overpainted woodblocks.

The critics who discussed the Tokyo show apparently did not detect the overpainting. Mr. Hillier notes "the very close similarity and possibly identity of the two sets."

Unfortunately only details of the Tokyo overpainted woodblocks were reproduced in the catalogue and the Paris works are not illustrated at all, ruling out conclusive comparison. Curiously enough, the only black and white photograph released to the press in Paris was not made from the work in the Paris show but is a photograph of a plate published in a book. In short, there might conceivably be two sets of overpainted prints.

Asked if the overpainting of the Paris set could be the work of Hokusai, Mr. Hillier said, "I would think not. Possible but unlikely." He is rather inclined to date the overpainting to the late 19th century.

The Espace Cardin is publishing a limited edition of 300 sets of lithographs. It will be interesting to compare the Cardin lithographs with the original Hokusai prints.

The Childless Couples in a Child-Oriented World

By Susan Heller Anderson

LONDON (IHT).—Christmas is for children. But the people who feel this most intensely are those who cannot have them.

Childless couples are the victims of a child-focused culture, in which ignorance about fertility, adoption red tape, commercialization of motherhood and not-so-subtle social pressures add heavy burdens to relationships already tense from trying too hard.

Peter Houghton, a Birmingham sociologist, and his wife tried for seven years to have a child. Mr. Houghton, 38, was found to be infertile, probably the effect of 17 years of once-a-week kidney dialysis. Their anger and frustration led the Houghtons to form a support group with some childless friends. From this grew the National Association for the Childless, whose aims are more and better information and research on fertility and acceptance by society of childlessness.

Director of the Birmingham Settlement, a social service agency trying to find new ways of solving community problems, Mr. Houghton placed an ad about the association early this year and was staggered by the response. The group now claims more than 300 paid memberships and inquiries from all over Europe, with about 1,000 people in England alone requesting help. Hard pressed for funds, the association manages to publish information on adoption and fertility, plus a lively newsletter that includes articles by doctors, personal-experience stories and provocative editorials by Mr. Houghton.

One couple in every six is infertile in this country. Yet one-sixth of the National Health Service budget is not spent on fertility and Mr. Houghton is indignant.

"If there's abortion on demand, there should also be artificial insemination on demand," he insists. He adds that there are few sperm banks in England and these are very expensive.

But artificial insemination works only if the male is infertile. Female sterility accounts for nearly one-half of the problem. Fertility is one of medicine's more neglected areas, a multi-disciplinary branch including urology, gynecology, endocrinology and psychiatry. According to Mr. Houghton, the causes of about 40 per cent of infertility cases are unknown.

While campaigning for better medical help, the association also works with adoption agencies, trying to lessen the bureaucratic snafus. There is a scarcity of "desirable" babies here, partly because of a 25-per-cent birth-rate decrease in the past 10 years, partly because of social pressures against interracial adoptions. For couples bent on the child-rearing experience, fostering is possible but always clouded by the specter of the child's eventual removal by the real parent.

Confusion

Yet childlessness is a cause-and-effect situation. And for all the obvious need to do something about the former, perhaps the association's more immediate impact will be on the latter.

Lack of children puts internal and external pressures on couples. Confusion between virility and sterility, male-female roles and just plain guilt can strain the healthiest relationship. From society, the childless couple also gets, according to Mr. Houghton, slightly less status, pressure from family and friends, a patronizing attitude from people with children and a reproachful one from the older generation which views not procreating as some form of hedonistic selfishness.

Speaking freely about his own marriage, Mr. Houghton talks about accepting, finally, the fact that he simply could not have children. "My wife and I have decided we must make the transition between being childless and being childfree." The association itself is making that distinction, having added "and Childfree" to its already cumbersome moniker.

Despite state-supported abortion, the pill and swinging London, Mr. Houghton says England is not reconciled to the idea that not having children can be a choice. "Women now have alternatives to motherhood," he notes.

The Houghtons have made a swap with their alternatives. At the moment, he is the breadwinner and she has returned to school. "When she's got her PhD, then I'll go back for three years and get mine while she supports me."

The luxury of being able to accomplish this is due, in part, to not having children. "We have a different set of values and needs. And we have freedom."

While building a marriage internally, based on independence and friendship, Mr. Houghton resents the ever-present external pressures. "Religion is anti-childlessness. Advertising is child-oriented. Babies are an industry."

Childless couples do not feel overt hostility or discrimination. "There's pity, and that's worse." Mr. Houghton sighs. He admits he dislikes this time of the year. "It's difficult to *always* be alone on holidays. And it's worst at Christmas."

BARCELONA:

Spain's Theaters Are Tuning Up

By Thomas Quinn Curtiss

BARCELONA (IHT).—It is tuning-up time theatrically in post-Franco Spain. After 40 years of restrictions that stunted ambition and growth the theater is waking up. The Barcelona scene reminds one of Berlin in 1945.

Fifteen theaters are open. Several long-forbidden films, directed by Luis Buñuel and others, are now showing. Nightclubs, flamenco taverns (a visit to ones in the Chinatown section is recommended), topless clubs, discothèques, dance halls, all-hours bars are going full blast. The best show in town is at the Scala, a luxurious supper cabaret which presents—twice each evening—a stunning dinner-spectacle of international flavor, a revue on the order of those of the Paris Lido and the Mikado of Tokyo.

Young Impresarios

Two youthful impresarios, Ramon and Antonio Riba, are behind the Scala. The sons of a leading film distributor, they studied aboard and returned to take over a defunct cinema and turn it into a regal banquet hall, seating 1,000.

"Esta Noche . . . Scala," the current revue, is a blend of the foreign and the native, attractively accomplished. Some of the ingredients are familiar, but they are novelties in Spain. Thus, there is a detachment of Bluebell Girls, a high-hatted preface and farewell, a jungle expedition, a sailors-on-leave knockabout and Gershwin and Cole Porter melodies, with Spanish folklore and a gypsy festival. The specialty numbers are impeccable. Herta Frankel's adaptation of the Czech black-theater trickery is of enquisite artistry, both in its manipulation of the Liza Minnelli marionette and in the surrealistic fantasy of an accordion's adventures. Don Sannders, an inventive Englishman, is in the hilarious line of Harry Tate, cutting up magnificently in his monoplane against a moving-picture screen, skimming treetops, automobilists and bicycle riders on his mad flight. And there is Gino Donati of the Milan Scala, whose vocalizing is rudely interrupted by a noisy busboy.

Musical Stage

The Ribas, having introduced cosmopolitanism into the local cabaret, are about to bring the Spanish musical stage into the modern world. For Madrid production, they are preparing a version of the Roman Teatro Sistana operetta, "After Me the Deluge" on the Noah's ark theme, which Joaquin Gaza, Raquel Meller's director, will guide.

Meanwhile, the Spanish theater is discovering what has been happening in the outside world since 1936. When I asked an eminent critic and poet, silenced under Franco, to jot down the names of the popular playwrights, he headed his list with Arthur Miller. Miller's "Death of a Salesman," first played in 1948, has just reached the peninsula boards.

At the moment Peter Shaffer's "Equus" and Mart Crowley's "Boys in the Band" ("Los Chicos de la Banda") are Barcelona hits. The Shaffer piece, with its pat exposition of psychoanalytic procedure, ventures into formerly tabooed territory and the Crowley play, treating of homosexuality, is regarded as audacious, though elsewhere the boys have taken on the air of Pinero heroines confessing their shady pasts.

A Tendency

Among the young directors there is a tendency to improvise classics and semi-classics. An ingenious Madrid actor-director, Miles Merlo, is disporting himself as the heroine of Federico Garcia Lorca's "House of Bernarda Alba."

The avant-garde El Borne indulges in Brecht, many of whose plays hitherto were not permitted staging, and there is a drawing on the established authors of the pre-1936 times. Angel Guimera, the Catalan dramatist of peasant plays, author of "Terra Baixa," known in English as "Martha of the Lowlands" and the libretto for the Albert opera "Tiefland," is respectfully revived. So, too, are the plays of the great eccentric, Valle-Inclan.

ENTERTAINMENT IN NEW YORK

NEW YORK, Dec. 23 (IHT).—This is how New York Times critics rate new films and stage productions:

Plays

"Sly Fox," a comedy by Larry Gelbart, is based on Jonson's "Volpone." Clive Barnes says, "Be warned, a man might die laughing." Gelbart "is very funny. The details of his humor are sometimes cheap and easy, but the craftsmanship of the play is subtle." George C. Scott plays the con man who feigns imminent death and persuades rich dupes to give him gifts in the hope of being named in his will. The time has been moved up to the 18th century and the place is now San Francisco. Arthur Penn, as the director, "points up the finer points with finesse, he exaggerates the characters until they become caricatures of caricatures." Scott is Foxwell J. Sly, "and rarely have two people deserved each other more. This is a virtuoso performance and Scott dances with it." The rest of the cast, John Heffernan, Jack Gilford, Bob Dishy and Gretchen Wyler, "are all fools, but delightful fools. We have not had many comedies on Broadway, and certainly few as stylish as this."

"The Balcony," by Jean Genet, "is particularly interesting," according to Clive Barnes, because of the English translation (from French) by Barbara Wright and Terry Hands. "It incorporates scenes from the original with quite a lot of additional material. It is far more sexually and scatologically explicit than would have been permissible when the play was new" 20 years ago. It is set in a whorehouse outside which a revolution is in full swing, but inside "all is sado-masochistic fantasy." Barnes calls it "a world of savage perceptions and topsy-turvy logic." The staging by Christopher Martin and the design by Harry Lines "were admirable." Produced by the Classic Stage Company, "the acting had a beautiful ensemble feel to it."

"Ashes," by David Rudkin, about two people trying to conceive a child, "shows in vivid detail the humiliations—psychological as well as physical—that each is forced to suffer in the quest for parenthood." Mel Gussow calls it "a dissection, as moving as it is comic, of a marriage that is under extreme stress." Brian Murray and Roberta Maxwell, as the stars, try to adopt a child but are refused when he admits his homosexual past and she admits her acceptance of it. "It is unflinching in its honesty and frankness. It makes emotional demands on the audience and the actors." But the marriage survives. Murray "touches us with his helplessness," while Maxwell "keeps the wife single-minded without making her astringent." Lynne Meadow directed what Gussow calls "a searingly personal, disturbing play."

Films

"The Pink Panther Strikes Again" is the fourth Inspector Clouseau comedy with Peter Sellers as the star and Blake Edwards directing, producing and writing. Vincent Canby says there are no signs that anyone's spirits "are flagging or that sanity is in any way imminent. Ineptitude again triumphs—gloriously."

"King Kong," Dino De Laurentiis's $25-million remake of the 1933 classic about a giant ape in New York City, "is inoffensive, uncomplicated fun when played as straight adventure fantasy." Vincent Canby says. The problems are an embarrassing script "that attempts to disarm all criticism by kidding itself," and the substitution of the World Trade Center for the original, more interesting, Empire State Building. But "John Guillermin, the director, and Lorenzo Semple jr., the writer, display real affection for old-time movie magic and nonsense." Canby especially liked the opening scenes that lay out, "with a respectful gravity that is truly comic," the reasons why Kong is in New York. It's Jessica Lange. The gorilla has been disturbed in his South Pacific nest by a team of oil hunters and fallen for Miss Lange—he's followed her home. "It's a series of big, foolish but entertaining spectacle scenes."

SHARPS & FLATS

LONDON.—Georges Melly and John Chilton's Feetwarmers are appearing nightly at Ronnie Scott's. Salena Jones comes in on Jan. 3 to start off the New Year. Some of the other artists scheduled to appear in early 1977 include Dexter Gordon, Kenny Burrell, Joe Pass, Sarah Vaughan and Milt Jackson.

* * *

Gladys Knight and The Pips, after playing London in January, will tour Asia for two months, with stopovers in Australia, the Philippines, Singapore, Hong Kong and Japan.

* * *

PARIS.—Rika Zarai opens at the Palais des Congrès on Dec. 30 for 10 days. Rhoda Scott and Bill Elliot are appearing nightly at the Club St. Germain.

* * *

Stride pianist Joe Turner, long-time Paris resident, will return for a second time to the Cookery in New York for a two-month engagement, starting Jan. 5.

* * *

This week's top single in the United States is "You Make Me Feel Like Dancing," by Leo Sayer, and in England, "When a Child Is Born," a seasonal ballad by Johnny Mathis, who will open for one week at the Paris Olympia on Jan. 27.

—FRANK VAN BRAKLE.

To Ward Off Grim 1977

ECD Urges 3 States to Expand

By Carl Gewirtz

Dec. 23 (IHT).—The ...tion for Economic Coop... and Development's yule-...ing this year is a piece ...in the Christmas stock-...the industrialized world. ...emi-annual outlook, pub-...today, paints a grim pic-...r 1977 unless the United ... Japan and West Germany ...apidly to boost economic ...y in their countries.

...e three among the 24 ...r nations of the OECD are ...nly leading industrialized ...ies in a position to take ...—inflation is low relative ...er countries and their bal-...f payments is healthy, and ...case of West Germany ...assingly large.

...unless they take new mea-...to stimulate domestic de-...their rate of economic ...on will be slowing mark-...y late next year from an ...disappointingly low rate ...th this year and in the ...alf of 1977.

OECD economists make no ...t to guess what measures ...ree industrial giants are ...to take. The report says ...that "recent announce-...ment at some possible eas-...g policies" but offers no ...about what the revised ...should be.

...it the report does spell out ...eak new year if they fail ...t with unemployment by ...nd of 1977 exceeding the ...set in October, 1975, when an estimated 15.3 million people were out of work throughout the OECD area.

The report refrains from sounding an alarm about slipping back into a recession, presumably because the OECD is convinced that the leading economic powers will take steps to avoid that.

Most is Europe

The bulk of this jobless horde would be in Europe and the hardest hit would be Spain, Portugal, Greece and Turkey. The report does not touch on the political difficulties likely to arise in such an event.

The situation in Europe would be worse than in 1975 because unemployment in the United States then totaled 8.5 per cent of the domestic labor force. By contrast, on the basis of present policies, U.S. unemployment by the end of next year is expected to be around 7.3 per cent.

The report does warn that unless the strong countries take measures to stimulate domestic demand—*sucking in imports and* thereby creating jobs elsewhere—the weaker countries will be under increasing pressure to take protectionist measures to save jobs in their own country and to reduce balance-of-payments deficits which otherwise would be increasingly difficult to finance.

"We can't neglect the fact that [trade] restraints are beginning to rear their ugly heads," John Fay, head of the OECD economics department, told a press conference. "Appeals [such as those to Japan] to restrict exports are the same thing," he noted.

One of the major problems that the OECD states have yet to come to grips with is the unequal distribution of balance-of-payments deficits among countries.

Caused by Oil Price

The deficits are almost exclusively the result of higher oil import prices. Eight OECD countries—the United States, Japan, West Germany, Canada, Belgium, the Netherlands, Norway and Switzerland—have run payments surpluses since 1974, while the other OECD states continue in deficit.

This year, the eight are expected to have a combined surplus of $4.5 billion compared with a deficit of $27 billion spread among the other 16 members. Next year the situation is expected to improve a bit, with the eight running a surplus of $2.5 billion and the others a deficit of $20.5 billion.

The OECD's view is that the economically strong countries should be running deficits to enable the weaker countries to solve their problems through export-led growth.

One of the biggest export markets is the oil-producing states. But only six OECD countries have increased their sales there during the first half of this year—the United States, West Germany, Britain, Norway, Sweden and Switzerland. Together, they account for 54 per cent of OECD exports to the area and of this, the United States has the biggest share with 34.4 per cent of the total.

According to the OECD forecast, the U.S. gross national product will grow only 4.5 per cent next year, down from 6.3 per cent this year, unless the Carter administration stimulates the economy. This does appear to be the new administration's goal and the OECD economists think this could be stepped up to a 5-per-cent rate of growth next year without causing inflationary pressures.

Differing Opinions

However, there does appear to be a serious dispute with West Germany about the outlook. The OECD sees GNP there slowing to a 3.5-per-cent annual rate of growth from 5.8 per cent this year while the government is forecasting that present policies will result in a gain of 4.5 per cent.

The OECD sees Germany as the only major country increasing its trade surplus next year, to the equivalent of $19.2 billion from $16.6 billion this year. By contrast, the United States is seen widening its deficit to $10.5 billion from this year's $8.4 billion and the Japanese surplus is seen falling to $7.5 billion from $10.2 billion.

OECD officials say the Germans have indicated that if the lower OECD forecast proves correct they will take stimulative measures.

Left unclear, however, is how much time the major countries have to take such action and still see an effect in 1977. The delay between policy change and impact on the economy can be lengthy, although one OECD official noted that the last U.S. tax cut had an almost immediate impact on the economy.

About the only bright spot in the OECD report is the outlook for inflation, which is seen declining modestly in most countries.

Cash Lending

...s borrowing in the bond ... and Eurocurrency loans, ...gan Guaranty report said ...nks in certain industrial ...s are thought to have ...d their domestic cur-... rency loans to foreigners by at least $12 billion net this year.

Banks in the United States account for an estimated $5 billion, German banks for $4 billion, and banks in Britain, the Netherlands and Switzerland are also sizable lenders.

Besides deficits, a second important factor in boosting demands for credit in international markets this year "was the need for new funds to refinance maturing external debt, a source of demand that is expected to be increasingly significant in coming years," the bank noted.

Sony Profit Soars By 82.8 Per Cent To Yearly Mark

TOKYO, Dec. 23 (AP-DJ).—Sony Corp. announced today its consolidated net income for the fiscal year ended Oct. 31 rose 82.8 per cent to 30.69 billion yen ($104 million) from 16.79 billion yen the previous year—a new record earnings for the electronics concern.

Sales in the fiscal year rose 13.2 per cent to 463.5 billion yen from 409.6 billion yen in fiscal 1975, also an all-time high.

In light of the favorable results, the company decided to raise the dividend on the parent company's shares to 12.50 yen a share from 7.50 yen in the prior year.

Overseas sales for the Sony group totaled 272.46 billion yen, or 58.8 per cent of total sales, a 21.5-per-cent gain from the prior year when overseas sales accounted for 54.7 per cent of all sales.

Domestic sales rose 3.1 per cent from the previous year to total 191.07 billion yen.

Noboru Yoshii, a senior managing director of Sony, said that the company expects earnings to increase about 20 per cent during the current fiscal year ending next October, while sales are projected to rise by 15 per cent.

He said Sony planned to increase its investment overseas to about 30 billion yen in 1977, compared with about 16 billion yen during 1976. The investment will be concentrated in already established facilities abroad.

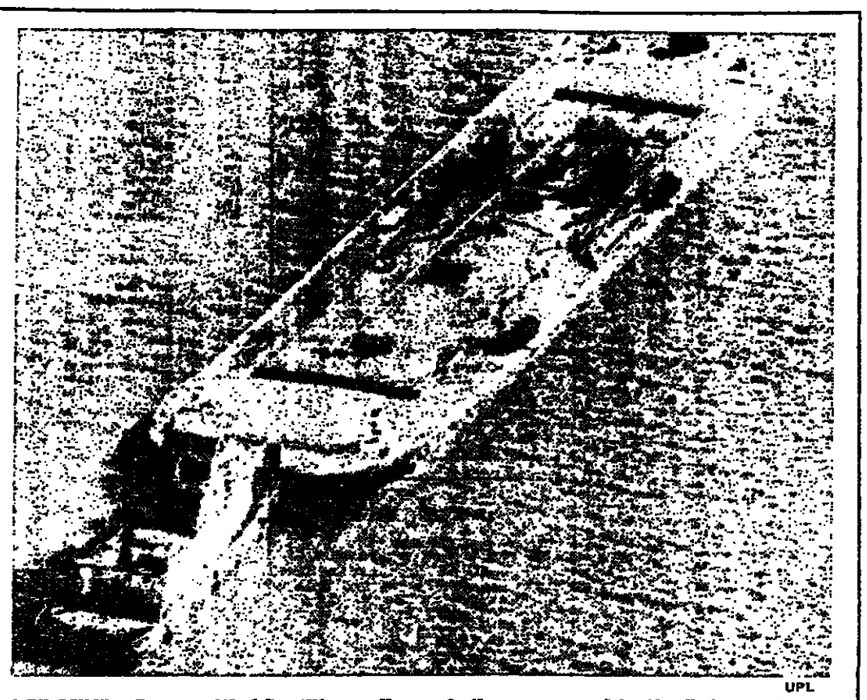
Mixed Outlook Seen for France

PARIS, Dec. 23 (AP-DJ).—A moderately optimistic outlook for the French economy next year, with inflation slowing and an improved foreign trade position, is seen by the official National Statistics Institute in its annual end-of-year report.

On the minus side, however, industrial production is expected to stagnate or decline slightly in the next few months, resulting in an increase of only 0.5 per cent in the creation of new jobs, which would be insufficient to absorb newcomers on the labor market and reduce the current record unemployment.

The institute said it does not foresee any upturn in industrial investment until corporate operating profits show some improvement. Despite an expected slowdown in wage increases, this is not predicted to have an impact before mid-1977, given the anticipated stagnation of activity, the report says.

4 Steel Firms Set Joint Policy



BRUSSELS, Dec. 23 (AP-DJ).—Four Belgian steel companies, Cockerill Metallurgique Hainaut-Sambre, Forges de Thy-Marcinelle & Monceau and Laminoirs de Ruau, announced yesterday they have signed an accord on close cooperation.

The companies pledged to regularly exchange all information and jointly consult on all matters of common interest, coordinate their policy and develop a common action program concerning supplies and transportation of their steel products.

The four also agreed to coordinate their capital spending programs and to jointly define production methods with the aim of improving them the best way possible, a communiqué stated.

Japan Steel Output Cut

TOKYO, Dec. 23 (AP-DJ).—Japan's crude steel production in the fourth quarter of fiscal 1976 ending March 31 is estimated to fall 2.28 million metric tons from th. previous quarter to 26.4 million metric tons, the government announced.

UPI

AGROUND—Barge with 1.7 million gallons of oil ran aground in the Potomac River near Dahlgren, Va., Thursday. No spillage and no comment from tugboat pilot.

Also Confesses to Wrongdoing

Ex-Head of Pertamina Accuses Associate

HONG KONG, Dec. 23 (AP-DJ).—Pertamina's former president-director, Lt. Gen. Ibnu Sutowo, has bitterly accused a former key associate of trying to defraud Indonesia's troubled state oil company and, at the same time, has admitted to serious wrongdoings himself while head of Pertamina.

The accusations, against Geneva shipping tycoon Bruce Rappaport and other former associates, were made in an effort to help Indonesia extricate itself from massive commitments in the international tanker market. The attacks and personal confession represent Lt. Gen. Sutowo's first statement to become public since he was fired from Pertamina earlier this year.

The development is the most important, and startling, to date in a dispute that is being closely watched in international financial circles. Indonesia, among the developing nations most deeply in debt, faces tanker contracts totaling more than $2 billion over a decade.

As a result of court cases with foreign shipowners, bankers have ruled the nation might be technically in default on major foreign bank loans totaling at least $850 million.

Gen. Sutowo's statement came in an affidavit filed in a NewYork state court yesterday in connection with a dispute between Pertamina and a Panamanian company that claims it is owed money on several tanker charter agreements with Pertamina.

Although the statement was filed only in the one lawsuit, it appears to have broader implications for Indonesia's defense against a number of shipping claims.

Based in Geneva

The Panamanian company, Martropico Compania Naviera SA, is part of the Inter Maritime group of Geneva, which played a major role in putting together a fleet of about two dozen ocean-going tankers for Pertamina. Mr. Rappaport, Inter Maritime's chairman, was closely involved in arranging a number of charters for Pertamina.

In his affidavit, Lt. Gen. Sutowo:

- Described how he signed "approximately 1,600" promissory notes, without reading them, to provide collateral that Mr. Rappaport could use in staving off worried business associates. About 480 of the notes in favor of Martropico, Lt. Gen. Sutowo said, had a face value of $364.2 million.
- Confessed he asked Mr. Rappaport for a $2.5-million loan, put the money in his personal bank account and never repaid it.
- Said he failed to seek legally required approvals from a state supervisory board before signing documents "binding the assets" of Pertamina.
- Admitted he violated Indonesian laws against conflict of interest by serving on the advisory board of Inter Maritime Bank of Geneva, in which Mr. Rappaport holds a substantial interest.

Lt. Gen. Sutowo's statement caused an angry reaction at the Rappaport headquarters in Geneva. Even before the document was filed with the New York state court, Inter Maritime issued a blunt statement saying the affidavit "has many of the inconsistencies and inaccuracies familiar in statements extracted under pressure."

In a telephone interview, a lawyer at Mr. Rappaport's Geneva office suggested the Indonesian government had compelled Lt. Gen. Sutowo to sign the affidavit and called it an "extracted banana republic confession."

IMF Group May Seek Mideast Funds

PARIS, Dec. 22 (AP-DJ).—Although the Group of Ten industrialized countries managed to find several billion dollars to cover an International Monetary Fund loan for Britain, they raised doubts about how long they can cope without a direct role by a Middle East oil state.

If close links can be worked out with an oil-rich country such as Saudi Arabia, it would immensely ease Western financial problems, planners reason. But it would also mean giving the oil exporters direct influence over the economic policies of Western borrowers.

The group's decision to cover the loan leaves only formalities remaining before Britain can start drawing its nearly $3.9-billion loan from the IMF next month.

The 129-country IMF is itself so short of hard-currency cash that it had to turn to the group for the equivalent of $2.97 billion in loans. Switzerland offered a further $347.7 million.

The Group of Ten's loans to the IMF will almost halve the $6-billion reserve that was created in 1962 by 10 IMF members, thus giving rise to the Group of Ten and its role as the inner-circle forum for major Western financial powers.

With the likelihood of the IMF approaching the industrialized nations for help with an expected Italian borrowing request, and perhaps a sizable one from Portugal as well, what originally seemed to be an impressive backstop for the IMF is coming to look dangerously meager.

That is what is making more urgent the idea of inviting a few of the richest members of the Organization of Petroleum Exporting Countries into the deliberations of the Group of Ten, explains one Western source.

No thought is being given to outright membership, insiders make clear, but a precedent for close association in the group's secretive meetings exists in the present role of Switzerland, which is not an IMF member.

So far, the idea of a "consultative" role for oil states has been a matter of corridor conversation rather than a formal agenda item among the treasury officials and central bankers who regularly take part in Group of Ten meetings.

The Saudis have not been consulted, it is understood, but some aides contend that the idea might well be appealing to the Saudis, both because their surplus cash would help preserve the soundness of economies in which they have an investment and oil-sales stake and because it would allow them to help shape anti-inflationary policies as a condition of taking part in Group of Ten lending.

W. German Car Sales

FLENSBURG, West Germany, Dec. 23 (AP-DJ).—Registrations of new passenger vehicles in West Germany totaled 177,100 in November, up 14.5 per cent from 154,700 in the year-earlier period, the Federal Motor Vehicle Office reported.

N.Y. Prices See-Saw In Pre-Holiday Session

NEW YORK, Dec. 23 (IHT).—After an early rise, New York Stock Exchange prices today ran into the usual seasonal influences and then followed a mixed path in active trading.

With the New York Stock Exchange closed tomorrow for the Christmas holiday, analysts said many large institutional investors appeared to be solely concerned with rearranging their portfolios before the three-day weekend.

Aerospace shares were among the widest movers as a result of special news. And apart from some price swings of a point or so in certain glamours and blue chips, movement generally was confined to fractions.

The Dow Jones industrial average closed up 0.64 at 985.62. At 3 o'clock it was down 0.66.

Volume totaled 24.56 million shares, compared with 26.97 million yesterday. Advances outnumbered declines by about 780 to about 720.

Heavily traded Southern dipped 1/8 to 16 on 489,600 NYSE shares, big-block trading accounting for most of the activity.

Technicare, also active, climbed 2 to 37. It said its earnings for the second fiscal quarter ending Dec. 31 should increase significantly over the 50 cents a share earned in the same period last year.

United Technologies rose 1 1/8 to 38. The Army selected the firm's Sikorsky aircraft division for the production of a new troop transport helicopter. It reportedly has a potential worth of more than $3 billion over the next eight years.

Boeing, which also had been in the running for the Army contract, fell 1 3/8 to 44.

Sony eased 1/8 to 9 1/2. It reported higher earnings for the year and predicted further increases.

Trans World Airlines fell 1 1/2 to 11. A published report outlined numerous problems confronting the air carrier.

Du Pont lost 2 3/8 to 136 1/2, while U.S. Steel surrendered 3/4 to 50 1/4 after having been down more than a point.

Prices on the American Stock Exchange were mostly higher in active trading. The Amex index rose 0.64 to 105.90.

A wave of buying forced shorts to cover positions and soybean futures advanced 6 cents a bushel in the closing minutes of the Chicago Board of Trade.

The activity in soybeans strongly influenced a turnaround in price levels in several other pits. Wheat futures closed nearly 4 cents higher while corn was up 1 1/4 and oats 2 1/2, except for one depressed option. Soybean meal advanced $2.50 a ton, and soybean oil rose 1/2 cent a pound.

U.K., Oil Firms In Agreement on N. Sea Oil Output

LONDON, Dec. 23 (AP-DJ).—Britain has reached a basic agreement with two of the largest foreign-owned oil companies operating in the North Sea to extend the government's participation in offshore oil development and to ultimately give the government control of almost half of the total crude output.

Anthony Benn, Secretary of State for Energy, told the House of Commons today that British National Oil Corp. (BNOC) has reached "an understanding on the principles" of an agreement with Shell (U.K.) Ltd. and Esso Petroleum Co. to allow state participation in their North Sea oil operations.

Although details of the accord will not be announced until Jan. 5, when a memorandum of principles will be signed with each company, it is believed that the arrangement will give the state-run BNOC the option to buy up to 51 per cent of the crude production, at market prices, from the companies' North Sea operations.

Shell and Esso, units of the Royal Dutch Shell Group and Exxon Corp. of the United States, operate in some of the richest known fields in the North Sea, including Brent, Auk, Cormorant and Dunlin.

The negotiations with the government, which grew more intense over the past three months, had been stalled over the issue of how extensive BNOC's role would be in the operations of Shell and Esso.

It is thought that the companies stressed a desire for an arrangement under which they could retain control of most, and possibly all, the oil produced from their fields.

Part of the reason for the breakthrough in the talks stemmed from remarks by Mr. Benn that the companies had to reach an agreement with the government if they wished to be considered in the next round of licensing expected next month.

Adjustment of the Notice of Redemption published on Wednesday, 22nd December, 1976 on Page 10:

Japan, French Banks Plan Unit in Britain

TOKYO, Dec. 23 (Reuters).—Daiichi Kangyo Bank plans to establish a securities underwriting company in London jointly with Banque de Paris et des Pays-Bas, subject to approval by the British and Japanese governments, a bank spokesman said today.

Under the present plan, 60 per cent of the capital will be put up by the Japanese bank and 40 per cent by the French bank.

Federal Deposit Insurance Corporation, as Receiver

In the Matter of American Bank & Trust Company

NOTICE Pursuant to Section 620 of the New York Banking Law

WHEREAS, on September 15, 1976, the Superintendent of Banks of the State of New York took possession of the business and property of AMERICAN BANK & TRUST COMPANY, pursuant to Section 606 of the New York Banking Law and appointed the FEDERAL DEPOSIT INSURANCE CORPORATION as Receiver of the Bank, pursuant to Section 634 of the New York Banking Law, for the purpose of liquidating the affairs of the Bank.

WHEREAS, pursuant to a Purchase and Assumption Agreement dated September 15, 1976, between the FEDERAL DEPOSIT INSURANCE CORPORATION, as Receiver, and Bank Leumi Trust Company of New York, all demand, time and savings deposits as and to the extent shown on the books of AMERICAN BANK & TRUST COMPANY at September 15, 1976, have been assumed by Bank Leumi Trust Company of New York and said assuming bank undertook to pay, perform, fulfill and discharge all such liabilities.

NOTICE is hereby given to all persons who may have claims against AMERICAN BANK & TRUST COMPANY, with its main office at 645 Fifth Avenue, New York, New York, and branch offices in the counties of New York, Kings and Bronx, to present such claims to the FEDERAL DEPOSIT INSURANCE CORPORATION, as Receiver, and make proper proof thereof, by filing a proof of claim, on the required form, with:

Federal Deposit Insurance Corporation,
as Receiver of American Bank & Trust Company
P. O. Box 5032
F.D.R. Station
New York, New York 10022.

Copies of the required form of proof of claim can be obtained upon written request therefor sent to the Federal Deposit Insurance Corporation, as Receiver, at the address specified above or, after November 15, 1976, at the office of the Federal Deposit Insurance Corporation, as Receiver, 430 Park Avenue, New York, New York. All written requests for the form of proof of claim must be received no later than February 28, 1977.

All claims must be presented, and proof thereof made, no later than March 31, 1977. No claim presented after such date can be accepted. Failure to timely present a claim and make proof thereof may result in waiver of the claim and forfeiture of the right to assert same.

All persons having claims for priority of payment shall make demand in writing for priority in the proof of their claims. Failure to so demand shall be deemed a waiver and abandonment of any right to such priority of payment.

Dated: October 28, 1976.

FEDERAL DEPOSIT INSURANCE CORPORATION, as Receiver of AMERICAN BANK & TRUST COMPANY
By: R. H. Hoffman, Liquidator-in-Charge.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or pid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

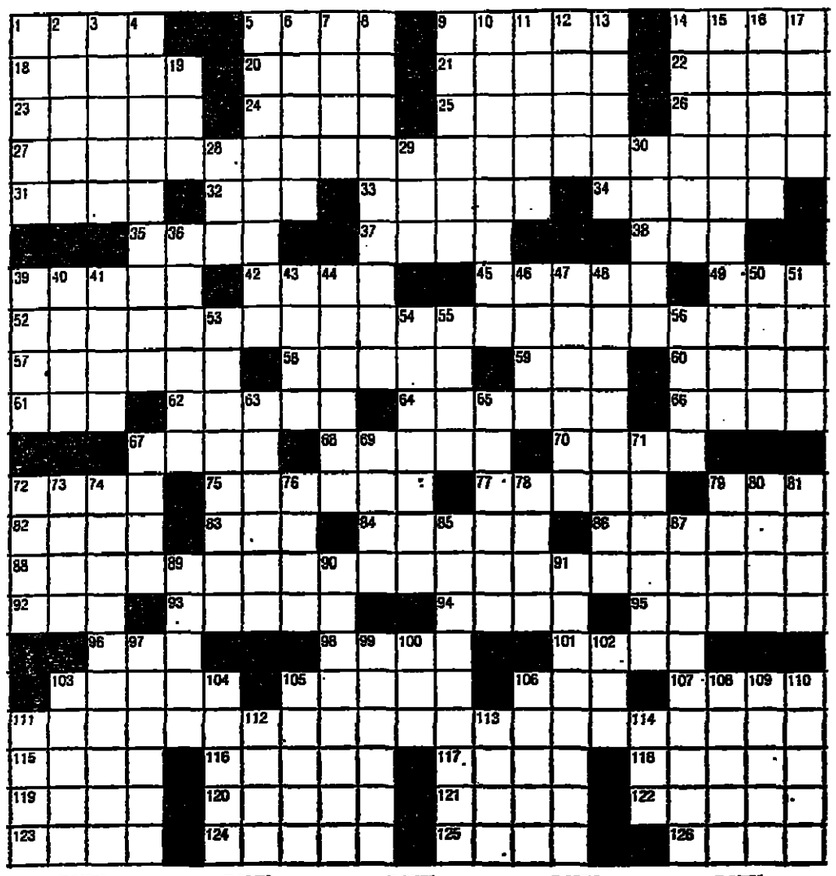
cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only ... paid in preceding 12 months plus stock dividend. t—Paid

SENIOR EXECUTIVE JOB GUIDE



Published at the end of the week, this is a compilation of senior level job opportunities from selected publications. Senior level jobs published by the International Herald Tribune through Tuesday automatically appear in this feature.
To place an advertisement in "INTERNATIONAL EXECUTIVE OPPORTUNITIES," contact our office in your country (listed on back page). Any questions or comments concerning this feature can be directed to Mr. Max Ferrero in the Paris office.

BOOKS

TALKING WOMAN

By Shana Alexander. Delacorte. 271 pp. $8.95.

Reviewed by Anatole Broyard

"ONE major difference between men and women in my generation," writes Shana Alexander, "is that women have to be more people than men, or to play more roles... some of mine are Herr Doktor Alexander (eminent shrink); Granny Alexander (folksy wisdom); Miz Shana (gossip, as in Miz Rona); Pollyanna; Funny Lady (wryly self-critical); Ms. Alexander; Cassandra; Sob Sister; Kid Sister; The Wife of Bath (very difficult) and a few others." "Interested readers can readily find and identify them here," she adds, referring to "Talking Woman," a collection of her essays, interviews, and assorted pieces, as well as her post-mortem comments on them. Most of these pieces have been taken from Life magazine and Newsweek, where she was a regular columnist and a few are from McCall's, which she edited for a short period.

Miss Alexander is one of those rare writers who can be witty without ever being cruel: who can be deeply personal without making you feel you opened the wrong door; profound without sounding portentous; emotional without sentimentality. She is a sensible, well-balanced woman raised to the nth power. She has a stunning sense of discretion. I also think that, in some way which I am rather wary of trying to define, she is a very feminine writer. This remark rests on the assumption that there are, as she says, significant differences between the men and women of her generation, and she has made a virtue of them.

The pieces in "Talking Woman" range from an interview with Marlon Brando that took seven years to write, to the birth of a baby elephant in Portland, Ore. They vary in length from a few paragraphs to several thousand words. And while some of them were written early in the 1960s, these are not dated because Miss Alexander usually reaches beyond the topical. She tells us that she majored in anthropology in college, and it seems to me that her journalism, like all the best of this genre, is anthropological. Who are these creatures with the bizarre customs and what is their mythology that makes them behave as they do? Speaking of her column, "The Feminine Eye," Miss Alexander observes that "...at the age of 39, I learned to use a new word. I learned to write T for the first time..." Then she adds: "The distance from third person to first is the longest throw in journalism."

Everybody with a typewriter seems to have written about Judy Garland. (It is not true: It only feels that way.) But Miss Alexander has this to say about her: "She is part bluebird, part phoenix." Watching her perform, "one gets the feeling that Miss Garland may be about to cut a vein." The singer is quoted as saying that sometimes the ordeal of performing made her feel nauseated or dizzy. "You are never so alone as when you are ill on stage. The most nightmarish feeling in the world is to suddenly feel like throwing up in front of 4,000 people." I think that everyone who writes for a deadline, including Miss Alexander, is familiar with this illness.

I particularly liked the author's description of "the stricken smile" on the face of the presidential candidate's wife. "There's a lot of Irene Dunne in the look: a gallant lift of chin, a mute, appealing desire to please." Then, if the candidate makes it, his wife is propelled into the awesome ambiguity of the "First Ladyship (which) has no rules... it is as if we hand her hammer and nails, gold leaf and a bit of bunting, and say, 'Here. Build the thing yourself.'"

"The Fine Art of Marital Fighting" is my favorite piece in "Talking Woman." It is a fairly long article about George R. Bach, PhD, a clinical psychologist who has "professionally analyzed 23,000 marital fights." His aim, Miss Alexander writes, is "to teach couples to have shorter, more constructive fights." What dismays the doctor is "the native cowardice and abysmal crudity" of most such fights, in which both persons generally "hit below the belt." Everybody, says Bach, is always to some degree angry and we must learn to "program" the resultant aggression, for "real intimacy demands that there be fighting." When both fighters "win," the reward is "an increased area of relatedness."

Bach's various stages of intimacy have the ring of inevitability. My favorites are "the courtship stage" in which couples "sit on eggs" and indulge in "date talk"; "the honeymoon," which is like the morning after, when husband and wife first realize what marriage is: and "freedom —or—the void," that time when the children are grown, the passion spent, and each partner wonders what holds them together besides habit. In this same vein, in a different article, Miss Alexander quotes the Swedish actress Liv Ullmann: "Sometimes it is less hard to wake up feeling lonely when you are alone than wake up feeling lonely when you are with someone."

The author's seven-year interview with Marlon Brando is a near defeat, through no fault of her own because, as she puts it, if Brando were to talk about acting, he would be able to do it only in a way which would amount to psychological, or at least creative, suicide. Not that there aren't fine lines in the piece, such as Brando saying that to act, "You have to upset yourself... and there comes a time in one's life when you don't want to do it anymore." I was interested in his remarks about what actors learn from watching people: "Knowing how much spit you've got in your mouth, and where the weight of your elbows is."

Here's the end of the author's interview with James Cagney: "We shook hands in the doorway in the dusk, and suddenly he tapped out an intricate step, a tiny ruffle and flourish of feet on polished floor. 'Before you go off you do a little something extra, so they'll remember you,' he said." Miss Alexander did not need the lesson in her own field.

Anatole Broyard is a book reviewer for The New York Times.

Minnesota and Pittsburgh Are Favored in NFL Conference Playoff Finals

By William N. Wallace

NEW YORK, Dec. 23 (NYT).—Now there are four and on day night there will be two as the National Football ue's version of musical chairs continues.

The four surviving playoff teams will play for the National American Conference championships on Sunday, Los les and Minnesota at Bloomington, Minn., followed by land and Pittsburgh at Oakland. The winners qualify for Super Bowl at Pasadena, Calif., on Jan. 9.

The games come in the wake of the controversial division offs last weekend. The controversy centered on some ramble officiating that worked against Dallas and New land and some weak telecasting as to camera alertness and mentary that worked against the public interest.

The following matchups and previews were accomplished the help of Bud Goode, the noted sports computer analyst. e, working with the Univac statistical systems, is a con- nt to half a dozen NFL teams, including the Rams, the kins and the Cardinals. He is also a long-time Ram nd in reference to that team he uses the personal pronoun,

"We," with ease and conviction. The regular-season won-lost-tied records are in parentheses.

National Conference

Los Angeles (10-3-1) at Minnesota (11-2-1)—"The numbers coming out of the computer indicate another tie game," said Goode. "There's almost zero difference between these teams." They played to a 10-10 tie in overtime in the second game of the season. In the fifth period a Tom Dempsey middle-range field-goal attempt for the Rams was blocked and later a first-down pass from the Ram 11, badly thrown by Fran Tarkenton, was intercepted by Rick Kay, a linebacker.

They cannot play to a tie this time because it is a playoff game and the overtime periods will go on as long as necessary. The longest game? Miami's 27-24 victory over Kansas City in the eighth minute of the second overtime on Christmas Day, 1971.

Goode suspects that the game will be won, or lost, on the little things like fumbles, out-of-bounds punts, blocked kicks, penalties—elements that defy forecasting.

The Rams know what they have to do—run the ball. They are good at it, 10th best in the league at 4.1 yards per attempt and better than the Vikings, in 23d place at 3.7. The Rams are also good at defending against the run, No. 3 in the NFL with 3.6 yards allowed per rush while Minnesota is 21st at 4.3.

"This is where our best chance lies," said Goode from his headquarters in Los Angeles. "We don't want Tarkenton on the field. And the best way to keep him off is for us to run the ball."

The Rams have no Tarkenton. Few do. "Tarkenton," said Goode, "with his golden arm is by far the most efficient quarterback in the game. Look at his percent of interceptions to pass attempts—only 1.9."

In the tie game the Rams, in five periods, ran a phenomenal 65 rushing plays at the Vikings, 19 in the first half at Carl Eller, the Minnesota left end who was playing with a broken thumb.

Goode sees the game as even and the favorite is Minnesota by 5 points.

American Conference

Pittsburgh (10-4-0) at Oakland (13-1-0)—The Raiders' advantage—maybe their only one—is the Ken Stabler-to-Cliff Branch passing combination. Branch averages 25 yards a reception against a league average of 12 for wide receivers. Furthermore, the Raiders led the league by far in touchdown passes with 33, or 20 more than their defense gave up.

But the Steelers are ahead in most other statistical areas. The vital one, which proved so essential in the victory over Baltimore, was in the rushing game. The Steelers have been running the ball 23 more times a game than the opposition. A championship team averages 10 more rushes and Oakland's figure is 9.7 more. So 23 means an iron grip on ball control and a devouring of the playing time on the clock.

"If the Stabler-Branch combination doesn't work," said Goode, "if it doesn't get them at least two touchdowns, they are out of it. Stabler's arm will be working all the time from a catch-up posture."

The betting points favor the Steelers by 5 1 2 and Goode agrees. "My figures like Pittsburgh outside the betting line," he said.

In the spotlight is the aggressive play of the Raiders, who were third in the NFL for most yards penalized this season and first last year. Pittsburgh is good in that category, too, ranking ninth. "A Super Bowl team over the years," Goode said, "has averaged five penalties in its games. The league average is six. Oakland's average is 7.6 for 68 yards a game. That quality could really hurt the Raiders in a game like this but I don't suppose they care."

In Pro Basketball

Lucas, Murphy Pace Rockets

HOUSTON, Dec. 23 (UPI).—The arrival of hotshot rookie guard John Lucas alarmed veteran Calvin Murphy because it was Murphy's spot in the Houston Rockets' starting lineup which Lucas was after. Or so it appeared as this NBA season began.

But after 27 games, the 5-9 Murphy still has his job. So does the 6-3 Lucas.

The dissimilar pair started last night and will do it more often if coach Tom Nissalke thinks he can get similar results. Each scored 18 points and led the Rockets to an easy 111-90 victory over the Washington Bullets.

"I thought Murphy and Lucas did an excellent job of keeping things under control," Nissalke said. The coach denied that the presence of Lucas, the former Maryland star, made Rockets' veterans uneasy to start this season.

"I think the veteran players felt like this was a morgue for so long that they were happy to have someone like Lucas around," Nissalke said.

Each guard scored his points on nine field goals, but Lucas had the more outstanding game by hitting his first nine shots and only missing once on a driving layup which 6-9 Elvin Hayes got a hand on.

"It wasn't a shot," Lucas contended. "It was a pass."

Houston, which has beaten Washington in both meetings this season, outrebounded Washington 48 to 32. The 6-10 Moses Malone came down with 18 rebounds.

Hayes suffered a frustrating night but collected 22 points and 9 rebounds.

Nets 127, Jazz 93

At Uniondale, N.Y., Al Skinner and John Williamson combined to score 43 points and render New Orleans' Pete Maravich ineffective on offense to snap the New York Nets' seven-game losing streak at home with a 127-93 victory.

Skinner finished with 22 points and Williamson 21, but their chief contribution was a defensive performance against Maravich, the NBA's leading scorer. Although Maravich finished with a team-high 22 points, he shot less than 40 per cent from the floor.

Pistons 107, Hawks 94

At Detroit, Bob Lanier's 30 points and Kevin Porter's 14 points and 14 assists paced the Pistons to their eighth victory in the last 10 contests in a 107-94 victory over injury-riddled Atlanta.

The Hawks, playing without Geoff Petrie, Steve Hawes and leading scorer John Drew, fell quickly behind, 30-20, after the first period and 55-43 at halftime.

Bullets, Sonics Trade

WASHINGTON, Dec. 23 (WP).—The Washington Bullets have traded disgruntled forward Nick Weatherspoon to the Seattle SuperSonics for forward Leonard Gray. Both players were unhappy in their old settings and were ecstatic over the deal.

It Was a Year of Revolution for Sports World

By Red Smith

NEW YORK, Dec. 23 (NYT).—It was the most unquiet year. In professional game sports, it was a time of revolt against the feudal structure of baseball, football, basketball and hockey. The revolution was fought mostly in the courts, and it won for athletes some voice in their own future.

If it was a time of turmoil for the pros, it was not exactly an interval of dreamy tranquility for amateurs. The games of the XXI Olympiad in Montreal were distinguished by the usual splendid athletic performances, the usual amount of cheating, discord, charges of biased or incompetent officiating—and the first mass walkout of nations. The five interlocking wings on the Olympic emblem are supposed to represent the five continents joined in friendly strife, but the defection of black African and some Arab nations virtually eliminated one continent from the carnival.

In the whole 12 months there was never a dull moment.

Baseball's year began in the law courts and that is where it is ending, with Charles Finley, the unhibited owner of the Oakland A's, brightening Bowie Kuhn's Christmas with a multi-million-dollar damage suit.

Two days before last Christmas, Peter Seitz, impartial chairman of baseball's arbitration panel, ruled that Andy Messersmith and Dave McNally, pitchers who had refused to sign 1975 contracts with the Los Angeles Dodgers and the Montreal Expos, had fulfilled their contractual obligations and were free agents.

Option After Option

The standard contract bound the player for one year and gave his employer an option on his services for the next year. The rules provided that if a player refused to sign a new contract—which would include the built-in option for still another year—the employer could renew the old one with all its terms for "a period of one year." The club owners argued that the terms renewed included another option that could be exercised a year later and still another option and so on throughout the player's career.

Seitz decreed that "a period of one year" meant 12 months, not eternity. On the panel, Marvin Miller, executive director of the Players Association, concurred and John Gaherin, representing the owners, naturally dissented.

The owners had gone to court in an unsuccessful effort to keep the Messersmith-McNally case out of arbitration. Now as the new year began, they went back to ask Judge John W. Oliver to overturn the arbitration award. Oliver upheld Seitz. The owners appealed, and lost again. Now any player who didn't sign a 1976 contract could work out the option and be free at the end of the World Series.

"Let's negotiate," said the owners, who had insisted that the reserve system was not negotiable. To encourage a spirit of cooperation, they locked the players out of training camp.

His Money's Worth

The players did cooperate. They conceded that when an owner invested heavily in the development of new talent, he should have a chance to get his money's worth out of the talent before losing it. On the other hand, they could not, as a union, bargain away the freedom individual players had won through Messersmith-McNally.

So they compromised: For 1976 and 1977, anyone could play out his option and be free; after that, players would need six years of major league service before applying for free agency.

Contrary to predictions, only 24 of the 600 players in the majors played out their option. Eight of these were employees of the lovable Finley, whose attempt to salvage something from the wreck of his team had been stymied by Kuhn. Facing the prospect of losing his stars with nothing in return, Finley had traded Reggie Jackson, outfielder, and Ken Holtzman, pitcher, to Baltimore early in the season, then had sold another outfielder and another pitcher, Joe Rudi and Rollie Fingers, to Boston for $1 million each and still another pitcher, Vida Blue, to the Yankees for $1.5 million.

Scandalized by the prices, Kuhn vetoed the sales and Finley responded with the damage suit now in court.

Livelier than anything that happened on the field during the season and livelier by far than the frost-bitten World Series with four straight Cincinnati victories over the Yankees, was the frenzied bidding for the best of the free agents. Player after player sold himself for $1 million or more, usually in a package that included a bonus, salary, deferred payments, agent's fee and other benefits over a period of years.

The Yankees invested close to $5 million in Reggie Jackson and Cincinnati's Don Gullett. Rudi's price went to $2 million and Finger's passed $1.5 million, but none went to Finley.

Other Sports

Meanwhile, the reserve system was under attack in other games, which do not share baseball's exemption from anti-trust law. In 1975, Judge Robert L. Carter had said of pro basketball: "It is difficult for me to conceive of any theory or set of circumstances pursuant to which the college draft, blacklisting, boycotts and refusals to deal could be saved from Sherman Act condemnation. The life of these restrictions, therefore, seems to be all but over."

This year bore him out. Under agreement reached when the National Basketball Association absorbed the American Basketball Association, a player now signs for one, three or five years and is free at the end of that time. On a one-year contract he must get the league's minimum salary or more. If he signs for three years, his pay must average $90,000; for five years, the average must be $100,000. Starting in 1981, a team gets no compensation for a free agent hired by another club, but it can keep the player by matching his best offer.

As long as the World Hockey Association bids for talent against the National Hockey League, players don't worry about the reserve system, but they have reserved the right to reopen this matter if the leagues ever merge.

Pro football is a can of worms. "We will have three candles on our birthday cake at the Super Bowl," says Ed Garvey, executive director of the Players Association, meaning that the season now coming to an end was the third without a contract between the union and the National Football League.

Nuggets, Braves Trade

DENVER, Dec. 23 (UPI).—The Denver Nuggets have announced the trade of former starting guard Chuck Williams and forward Gus Gerard to the Buffalo Braves for 6-foot-3 guard Jim Price, a five-year player who began the season with the Milwaukee Bucks.

Scientific Study Sparks East German Prowess

Here Is the Last Part of a Series On East German Sports Success

By Craig R. Whitney

LEIPZIG, East Germany (NYT)—"Behind every Olympic gold medal," said an East German doctor who was standing figuratively behind 40 of them from last summer's games in Montreal, "there is an entire collective of doctors, technicians and coaches—just like Mission Control when an astronaut is sent up into space."

The doctor was Prof. Kurt Tittel, head of the Division of Sports Medicine at the German Sports Institute here. Many envious sportsmen attributed East German sports success to advances in medicine, since nothing else seemed adequate to explain the scope of the Olympic triumphs by a country of only 17 million people.

The East Germans, who recently invited a group of Western journalists to a week of visits around the country, react defensively to the suggestion that they have turned their athletes into bionic men and women.

"When I was in Quebec and Montreal last summer," Tittel said, "naturally I was asked what kind of tricks do we use."

East Germany's sports doctors—there are 360 practicing in the country now, and 360 more will be trained by 1981—are less than candid in their answers to the question.

The East German women's swimming team, for example, had some women who were physically built like men, with massive shoulders and tapering waists instead of Botticelli curves. Swimmers like Ulrike Richter, who is 17 years old, and track and field champions like Christine Brehmer, 18, and Doris Maletzki, 24, have deep voices that could stem from injections of anabolic steroid drugs taken to build their muscles.

Do they take such drugs, which are not permitted by international Olympic rules?

Studying Legality

"There has never been a case of doping in competition by the German Democratic Republic," Tittel said. "We believe sportsmen should win medals with their own bodily endowments." But then he added that the legality of using steroids was still under study. We don't need them, he was saying without denying that they may have used them.

In fact, according to Dr. Alois Marder, an East German sports specialist who took refuge in West Germany two years ago, use of steroids is probably rare.

"You imagine that a doctor comes and gives an athlete a magic shot that makes him swim faster," he said. "That doesn't exist. I know that in my time in the East German system they had begun experimenting with steroids—helping bodily development with shots where they could help. But the doctor has to know all the other factors before steroids can do any good."

What the East Germans have perfected is not so much magic pills or shots as truly scientific training programs in sports from swimming to rowing to the shot-put event.

Every coach who graduates from the Leipzig Institute—and there are more than 7,000 of them in schools and sports clubs around the country—has been through a five-semester sports medicine course that begins with chemistry and physics, goes on to biomechanics and ends with an introduction to practical sports medicine.

Marder began a study of lactic acid levels in the blood of championship athletes while he was in East Germany, and Tittel acknowledged that this research had continued at Leipzig in the two years after he left. It is a method that can be used to protect the maximum performance attainable by an athlete by analyzing blood samples taken at various points during a workout.

Marder worked in the elite sports club in Halle where Kornelia Ender trained before winning four Olympic gold medals. He took a sample of blood from her earlobe in 1973 and knew she could swim the 100-meter freestyle in 56 seconds, as she did in Montreal last summer.

"Lactic acid builds up in the bloodstream as the muscles work hard," Marder explained at the West German Sports Institute in Cologne, where he is trying to do the same kind of research he did in the country from which he came.

"It builds up to a certain level and then exhaustion sets in. If you measure the levels in a swimmer's bloodstream at a constant speed after 1, 2, 5 and 10 minutes, you can draw a line on a graph and predict accurately how fast he can swim—and then train him up to that level." Some athletes' metabolisms, he claims, make it impossible for them to work their bodies as hard as Ender could.

The method has been used as a training aid in both parts of Germany. "It had just started in East Germany when I was there," he said, "and it's certainly been pushed farther—but the results are kept secret. Sports is practically a military security area there."

Analog Computer

For reasons of security, officials did not open the sports research department of the Leipzig Institute to a recent visit by a group from the foreign press. It has an analog computer, Marder says, on which everything from rowing to swimming meets can be simulated.

"There is a special club for crews in Grunau," he said, "where they simulate crew races. Then they can program the optimal strategy for a real crew race—what stroke to begin with, when to accelerate it, and how to finish—and rehearse it in a dry run."

"You're tested medically before you are taken into a championship sports club to see what your physical capacities are," said Siegfried Brietzke, a 24-year-old member of the Leipzig Institute's Sports Club since 1968. He rowed for the 1972 and 1976 East German Olympic crews and is now a student at the institute.

"Our students are anything but machines," said Dr. Walter Renner, deputy director of student affairs at the institute. "They are human beings, with good and bad qualities. They're not robots."

Roswitha Krause, a 27-year-old student in East Berlin who swam the 100-meter freestyle in 1 minute 2.04 seconds in Mexico City in 1968, noted that things had changed. "Science has so changed our training methods," she said, "that today I might just be able to finish in a meet of 12-year-olds."

Banked Passion

By Russell Baker

NEW YORK—The banks of New York are famous for their seductive advertising. One after another they appear on television undulating suggestively with hints of the delights in store once you surrender to them.

I was intoxicated with them when I first arrived in New York. In other cities I knew, banks were simply places that held your spare cash until you need it, then lent it to you at 12-per-cent interest. They were quite frankly in the money-grubbing business and made few bones about it. They did not promise to treat you like a prince in the seraglio or to make your bills a garden of delights. They simply agreed to be civil so long as your income met their standards of decency.

Baker

Naturally, once exposed to the sybaritic possibilities of banking in New York, I shopped very carefully for the one bank most likely to satisfy my peculiar tastes. I finally settled on a bank whose television commercials promised precisely what I had always dreamed of.

That has been a while ago. Since then, things have not really worked out between me and my bank. The truth is that I dislike my bank intensely and, if it doesn't exactly dislike me in return, it seldom loses an opportunity to let me know it can get along very well without me.

This is a case of affection alienated by overselling. In choosing my bank, for example, I had been charmed by the promise that as soon as I entered the door, the bank president or someone looking very much like him would dash up to inquire how he could be helpful. I still see my bank's commercials on television and this fawning bank-president figure is still extending full courtesies every time somebody walks in.

When I walk into his bank, however, he never appears. He may be hiding under his desk, since the bank invariably greets my arrival as if I were Clyde Barrow. The bank dick gives me the constabulary eye. A large sign displayed just inside the door cautions me that bank robbery is a federal offense for which I may do a long stretch. Little cameras mounted on walls rotate and blink at me, presumably taking mug shots to be pasted up in post offices.

In a word, my New York bank greets me just like banks every place else greet me, which would be all right except that it had promised something quite different. It had promised a teller of surpassing feminine loveliness. After stepping through the door and being hailed like a Mellon by the bank president, it had promised, I would immediately find myself confronting this creature of infinite beauty.

I have been looking in vain for this woman for two years now. After stepping through the door, being cased by the bank dick and being photographed for wanted posters, I do not proceed immediately to a beautiful teller. Instead, I stand at the end of a long queue of customers which winds back and forth through a rope maze.

* * *

We stand there 15, 20, 25 minutes and as we slowly shuffle ahead and the tellers begin to appear over the horizon, we see that the beautiful woman with sweet news about interest rates and new checking-account miracles is not among them. They are just like bank tellers all over the world—bored, underpaid, quick to look pained at anyone who wants to withdraw money, quicker to look suspicious if the withdrawal is larger than $7.50.

In my bank's commercial, the bank dick often joins me and the bank president at the beautiful teller's window and gets off a bit of good-natured, homespun humor before dancing me back to the door. Outside my bank's commercial, this never happens.

The teller and I are left to go it alone. He studies my request for a small share of my funds, studies my face for telltale signs of criminality, studies the camera to make sure I am being thoroughly photographed, then scurries off into the bowels of the bank, possibly to check whether my account contains the $7.50 I wish to withdraw, possibly to ask the bank president whether to clap me in chains.

The bank dick never sends me out with a little joke and a waltz step. Instead, I exit fighting the temptation to make a running break for it. If I do, it will almost certainly produce a hail of gunfire.

Banks of New York, you false lovers! Why do you promise so much, deliver so nothing?

Mary Blume

Hitting the Frenchman Where It Counts

PARIS (IHT).—It may be the season to be jolly, but watch out in Paris, where the Christmas-New Year holidays bring out an ill-humor remarkable even to connoisseurs of French *grouchérie* (a word that admittedly does not exist but that might serve to translate Gallic grumpiness). The reason is probably quite simple: The holidays hit the Frenchman in his tenderest spots—his pocketbook and his liver.

Is Christmas a family holiday filled with shining children's faces? Yes, and that's just what's wrong with it snarls an intellectual quarterly called Autrement. "There is an analysis to be made," says Autrement, happily failing to make one, "of the psychological function of Christmas and the role of the child as a pretext to permit *the adult to rediscover puerile pleasures.*"

Christmas, according to the magazine's study, marks a renunciation of adulthood. New Year's, on the other hand, is a reaffirmation of the adult role, a resurrection of extra-familial relations. This is symbolized by all that horn-honking that goes on at midnight.

On a more popular level, the weekly Paris-Match has a long piece on food, the main reason for the holidays which, in France, consist of two *réveillons*, or midnight suppers, separated by large doses of Alka-Seltzer.

Match has lots of good advice on how much caviar to buy and what kind, how to choose your foie gras, and whether or not it should be truffled. More important—for there can be no pleasure without suffering—the magazine devotes an entire page on how to train for the holidays.

For at least four days before Christmas Eve, *the night of the first réveillon* (the second is on Dec. 31) eat nothing but grilled meats and raw vegetables; cut out coffee and booze. "Eat two artichokes during this period," Match advises. "They will aid your liver and gall bladder."

You must also devote 10 minutes each morning to physical culture, take a little walk after luncheon and make an appointment for some oxygen therapy.

The night of *réveillon* arrives and you are, understandably, hungry. But the question of whether you should have a nosh before your midnight supper is a hard one to answer. A proper meal would *be an error; on the other hand 11 hours* of emptiness would strain the digestive system which is in any case about to be severely tested. Best solution: Appease your stomach with a little light vegetable soup and two quarters (two quarters, mind you, not one half) of an apple.

Inevitably, the question arises of whether it is wise to eat turkey stuffed with chestnuts at midnight (the French don't like turkey but eating it and complaining about it is part of the *réveillon* tradition). The answer is yes and no. Arthritics will benefit from a bit of turkey, those with lazy intestines will not. Chestnuts stimulate the urinary tract (good) but are starchy (bad). Best solution: If you must eat chestnuts, hold them in your mouth a long time; your saliva will make them more digestible.

Oysters are OK, says Match, even for children as they have the same chemical composition as milk with iodine *en plus*. A good Bordeaux battles cholesterol so successfully that it might even be thought of as a medicine.

If you have drunk too much medicine, take a herbal infusion, two aspirins and a pinch of bicarbonate of soda before you retire.

And for heaven's sake be careful next morning. After swallowing the juice of *two lemons in lightly sweetened water*, lie down at once on your right side, right arm raised. Your liver will feel a whole lot better. If it doesn't, massage it with a hot water bottle, making a sweeping but gentle right to left movement. (And if you don't know where your liver is, you have no business spending the holidays in France.)

If the obsession with the problems posed by the holidays is old, the emphasis on health, as seen in the Paris-Match article, is fairly new. On the Rue de la Paix, just a truffle's throw from Fauchon (where truffles are fetching $240 a kilo this year) is a shop representing a successful reducing spa, the Institut Christian Cambuzat in Crans-sur-Sierre in Switzerland.

The shop sells prettily labeled creams and unguents made by Mr. Cambuzat from plants grown at such high altitude that they have vim and vigor to spare and to pass on to the lucky user. Cambuzat, a former journalist whose family runs to fat after 40, has worked out a reducing diet that has brought to his spa not only the usual crowd but also *nouvelle cuisine* restaurateurs and a group described by the institute's press attaché as *"le show business opulent."*

According to the press attaché, Marie-Andrée Duclos, people may be fat but they are in fact eating less these days: "They spend more money on plane tickets than on food, they need escape more than nourishment." Life in Paris, or in any *big city, is in itself a cause of overweight*, she says. "Money and worry about it is a source of extra kilos. As the bank account swells, so does the stomach."

Since Mr. Cambuzat's prices are quoted in Swiss francs, the list of fees alone should make any prospective client's stomach shrink. But so that people can swell under a more favorable rate of exchange, he is planning to open a branch just over the French border, in Evian, this spring.

Mr. Cambuzat obviously knows his Frenchmen: His institute closes over the holidays when no one is likely to give up the delicious torments of the *réveillon*, but is open for penance from Jan. 5.

The Worker-Priests and Their Double Lives

By James F. Clarity

BOBIGNY, France (NYT).—For 40 hours a week René Santraine sells windows and doors, hustling around the Paris suburbs and earning $175 a week.

Some nights he works as a member of the cultural committee of this Communist-administered town of 50,000 in the industrial "red belt" around the capital. And six nights a week, the 48-year-old salesman celebrates mass, usually alone, in the quiet of the externally shabby Gothic church of St. André de Bobigny, of which he is the pastor.

Father Santraine, who has not worn clerical clothes for 12 years, leads a double life because he is one of 900 priests who, as volunteers in the worker-priest movement, feel that they are the vanguard of the new Roman Catholic Church in France. The movement, suppressed by the Vatican because of its leftist orientation in 1954 and permitted to resume its unorthodox missionary work in France in 1965, is growing steadily now that it is not being harassed by Rome or by the church hierarchy in this country, where the number of practicing Catholics has been declining for decades.

The movement is an attempt by a minority of the 35,000 priests in France to bring Christianity, but not necessarily traditionally Christian ritual, back to the millions, many of them industrial workers influenced by the Communist party, who for generations have despised or ignored the church.

Most of the priests, like Father Santraine, work in areas dominated by the Communists and by labor unions closely affiliated with the Communist or Socialist parties. Some, unlike Father *Santraine, are political leftists*, even Communists, in every aspect of their lives except religion. Interviews with a number of them indicated that their goal is the same: to show their companions on the job that a priest can be a decent human being, willing to live a worker's life without preaching or attempting to attract people back to the formal church.

In recent years, an increasing number of volunteers in the movement, which has been enlisting 50 men a year, are, like Father Santraine, working in other fields. Perhaps a quarter are in local civil service or small private companies.

Looking at the peeling, cracked walls of the church, Father *Santraine said that the elected* Communist administration of the town, which owns the property the church is on, was considering demolishing it, and that he favored this. He said he felt that he could persuade the town to build him a new church that would blend with the modern buildings. "The objective," he said, "is to show that the church is not a stranger here."

Outsiders Join in Analysis

IA Believes Russia eeking Arms Lead

By David Binder

ASHINGTON, Dec. 26 (NYT).—President-elect Jimmy Carter eceive an intelligence estimate of long-range Soviet strategic tions next month that raises the question whether the Russians hifting their objectives from rough parity with U.S. military to superiority.

reporting this, high-ranking officials of the CIA said their al so-called national estimate of Soviet strategic objectives for ext 10 years, just completed, was more somber than any in more than a decade. A top-level military intelligence officer who has seen the estimate commented: "It was more than somber—it was very grim. It flatly states the judgment that the Soviet Union is seeking superiority over U.S. forces. The flat judgment that that is the aim of the Soviet Union is a majority view in the estimate. The questions begin on when they will achieve it."

Previous national estimates of Soviet aims—the supreme products of the intelligence community since 1950—had concluded that the objective was rough parity with U.S. strategic capabilities.

'Worrisome Signs'

"There are some worrisome signs," George Bush, director of Central Intelligence, said in an interview in characterizing the latest estimate, "and the viewpoints, interpretations and comments on these will be adequately reflected in the estimate."

He said the shift in assessment developed from evidence gathered in the last year and from new interpretations of older evidence that had resulted from "a competitive analysis" in which, for the first time, a team of outsiders analyzed and challenged estimates prepared by the regular intelligence community. As a result, some of the governmental analysts changed their assessments.

While Mr. Bush declined to discuss the substance of the estimate, it can be authoritatively reported that the worrisome signs included newly developed guided missiles, a vast program of underground shelters and a continuing buildup of air defenses.

A source acknowledged that this year's estimate had been prepared amid controversy in the intelligence community, partly induced by the deliberate introduction of the team of outsiders, who were supplied with the same raw material as the estimate team headed by Howard Stoertz, the CIA's national intelligence officer on the Soviet Union.

Mr. Bush, who said the final estimate contained "a full exposition of the views of the principals," asserted that he had promised to uphold the right of dissent at the outset of his tenure 11 months ago. "I feel I have made good on that," he added.

A Small Minority

There have always been officials in the intelligence community who took a grim view of Soviet strategic objectives but, until this year, according to insiders, they constituted a small minority. In the interview, Mr. Bush spoke of changed perceptions. Another high-ranking CIA

tonomous Region' ffered by Marcos

NILA, Dec. 26 (UPI).—Pres- Ferdinand Marcos today ced plans to hold a plebin 13 rebellion-torn provin the southern Philippines termine whether they want part of an "autonomous m region."

government announcement ted that the plebiscite was of an agreement reached in ple during negotiations in between a government and leaders of the sepa- Moro National Liberation

state-run Libyan radio, in adcast monitored in Cyprus, Friday that a cease-fire ment signed in Tripoli, included provisions for the zation of self-rule for Mosin the southern Philippines the context of the coun- national unity."

lipino officials have not disd details of the agreement Tripoli beyond the cease-fire, holding of a new round of s within three months that work out details of a formal ement and its signing in illa in the presence of Libya's r. Col. Moamer Qadhafi.

r. Marcos said plans are unstudy for the creation of onomous regional administions as early as possible," ting in the south.

e said, "It would be necessary hold a plebiscite in the 13 inces mentioned in the curtalks in Tripoli ... to determe which of them want to be of an autonomous, Moslem in within the realm of the reignty and territorial inrity of the Republic of the ippines."

e Moro front is the domirebel force that has waged cessionist campaign in the danao-Sulu region, 500 miles of Manila, since shortly Mr. Marcos proclaimed ial law in the Philippines years ago. More than 5,000 ons have been killed in the ting.

e provinces involved comse a third of the Philippine ublic, with a population of million persons. The Moslems ther 3.5 million in this preinantly Roman Catholic na- of 42 million.

day's announcement said the nomous Moslem region would e a regional assembly which ld nominate an executive ncil to be appointed by Mr. os.

Feared Dead Old-Age Home ire in Canada

T. JOHN'S, Newfoundland, . 26 (AP).—A fire in a wooden age home near here early tokilled up to 30 persons, most them elderly women.

firemen recovered 19 bodies were searching for more ng the ashes of the two- frame structure, police and officials said. Three staff bers of the home reportedly ped the fire without serious ury. The home normally tains 40 elderly persons.

Assistant Fire Chief Leroy er sa that all elderly resits inside the building at the of the fire were killed. The ct number of fatalities would determined when officials ck the number of regular dents away visiting relatives the holidays, he said.

e described the building as "ball of flames," fanned by winds when firemen arved about 15 minutes after the e began. The cause of the e was not immediately known.

United Press International.

Pope Paul VI blesses Christmas Day throng from St. Peter's Basilica.

Pope's Christmas Message Urges Humanism

VATICAN CITY, Dec. 26 (NYT).—Pope Paul VI urged the people of the world on Christmas Day to honor Christian humanism and the value of life and implicitly reaffirmed his opposition to birth control and abortion.

The Pope delivered his annual Christmas Day message, "Urbi et Orbi," from the loggia over the entrance to St. Peter's Basilica. In a clear voice, the Pontiff addressed a large, international crowd in Italian and delivered the benediction in Latin. He ended by extending Christmas greetings in 11 languages.

The 79-year-old Pontiff, who is suffering from arthritis, chose humanism as his theme. He rejected the modern form of humanism, "which motivates many of our time, who are inebriated with the illusion of being able to produce a humanism that springs only from scientific progress and social evolution."

"This humanism," he said, forgets "the innate insufficiency of man to be perfect in himself and the inextinguishable thirst that destines him to find in God that infinite satisfaction of which he is constitutionally in need."

In an apparent reaffirmation of his opposition to birth control and abortion, the Pope urged the people of the world "to honor in the birth of Christ the incipient life of man" and stated that "human life is a creature of God . . . marked with his image and likeness brought forth for the joy of the world."

In January, the Italian Parliament is expected to vote for a liberal abortion bill that would, in effect, allow abortion on demand. The bill is expected to pass over the objections of the ruling Christian Democratic party.

Rites in Bethlehem

BETHLEHEM, Israeli-Occupied Jordan, Dec. 26 (UPI).—Record Christmas crowds of people from all over the world celebrated the birth of Jesus in this small Arab town yesterday under the eyes of Israeli troops.

The pilgrims prayed in church, walked through the narrow, cobblestoned streets and mingled with residents in the gaily decorated Manger Square, an asphalt plaza flanking the Basilica of the Nativity, the focal point of Christmas celebrations in the Holy Land.

The Most Rev. Giacomo Beltritti, the Latin patriarch of the Holy Land, celebrated midnight mass at St. Catherine's Church, the Roman Catholic section of the hulking 4th-century Greek Orthodox basilica.

Mideast Talks Role for PLO

Syrians Reassure Arafat, Get Cooperation Pledge

By Henry Tanner

BEIRUT, Dec. 26 (NYT).—Syria, in a switch of policy, has assured Yassir Arafat and other leaders of el-Fatah, the major Palestinian guerrilla group, that it has no intention of ousting them from the leadership of the Palestine Liberation Organization.

Syrian President Hafez al-Assad, also told the middle-of-the-road Palestinians that Syria will let Fatah have adequate military strength in the refugee camps and in certain areas of southern Lebanon, according to informed Arab sources.

In return, Mr. Arafat assured both Syria and Egypt that the PLO will cooperate with them in next year's proposed negotiations for a Middle East settlement and that it will be flexible on the issue of negotiating tactics.

The exchange of promises took place in a five-hour meeting which Mr. Assad had in Damascus 10 days ago with Mr. Arafat and a small group of other Palestinian leaders. Mr. Assad was then making preparations for his visit to Cairo, which led to the proclamation of a "united political leadership" by Syria and Egypt.

Coordinated Strategy

Egypt and Syria, backed by Saudi Arabia, have called for the start of negotiations in Geneva by March. They are trying to put a coordinated Arab strategy together before then and they are seeking to convince officials of the future U.S. administration and Western public opinion that the Arabs are ready for peace.

The most difficult problem before them is to bring the Palestinians into the negotiating process.

An internal debate is going on within the PLO. Mr. Arafat is known to be willing to go further in meeting the wishes of the Arab governments than some of the younger members of the leadership, both within Fatah and in other groups belonging to the PLO. Mr. Arafat is head of both the PLO and Fatah.

He is understood to have pleaded with the Saudis, the Egyptians and the Syrians to give him enough time to win over his recalcitrant colleagues.

The main groups that can influence the PLO are Fatah, as-Saiqa and the so-called Rejection Front, which opposes any negotiations with Israel.

Fatah was the main fighting force against the Syrians. Unlike the smaller guerrilla groups, it has no precise ideology other than Palestinian nationalism. It includes leftist and rightist, moderate and hard-line tendencies.

During the fighting, a personal bitterness built up between the Syrian leadership and Fatah and between Syria and the Democratic front for the Liberation of Palestine, Fatah's closest ally in the PLO. The Democratic Front, headed by Nayef Hawatmeh, favors negotiations for a Mideast settlement.

As-Saiqa, the Syrian-controlled guerrilla group, fought on the Syrian side. In sharp battles with Fatah, it was driven out of its positions in the camps in Beirut and southern Lebanon. Now it is back.

The Rejection Front was split during the fighting when one of its leading members, Ahmed Jebril, a Syrian officer and friend of Mr. Assad, sided with the Syrians. This left the rejectionists seriously weakened, with George Habash's Marxist Popular Front for the Liberation of Palestine their only mainstay.

After the cease-fire, the Syrians were intent on punishing Fatah and started to use as-Saiqa for this purpose.

Syrian suggestions that all Fatah leaders should be purged and that the camps should be almost completely demilitarized led to the possibilty that younger Fatah members would be driven to join the rejectionists in spite of Mr. Arafat's appeals for moderation.

This would have split the movement and made a bloody showdown in the camps inevitable.

Insiders say that apart from the hard-core rejectionists, there is no real opposition in the movement to acceptance of a Palestinian state of the West Bank of the Jordan and in the Gaza strip.

The PLO's Central Committee meeting in Damascus endorsed a Palestinian state without naming its boundaries. The Syrian-Egyptian declaration in Cairo also called for such a state.

Crucial Issue

As Fatah officials describe it, the crucial issue on which they are holding their ground against the Syrians is the independence of the proposed state. They reject a federation with Jordan for a larger confederation with Jordan, Syria and perhaps Lebanon. They count on Egyptian and Saudi support on this issue.

This, in turn, has influenced discussions about a single Arab

Lebanese Cabinet Gets 6-Month Decree Rule

BEIRUT, Dec. 26 (NYT).—Members of parliament gave the Cabinet of Premier Selim al-Hoss a unanimous vote of confidence Friday and granted it the power to rule by decree for the next six months.

All 72 deputies attending the session of the 99-seat unicameral parliament endorsed the proposal that Mr. Hoss submitted Thursday. For that period, the Cabinet will be exercising both executive and legislative powers and parliament thus has given itself a virtual six-month leave of absence.

The Cabinet, which is the first under the new regime of President Elias Sarkis, can also enact new laws and amend or rescind old ones in various fields such as national security and defense, reconstruction, economy and finance.

A number of deputies and top rightist Christian leaders had tried but failed to get Mr. Hoss to separate his demand for special powers from his policy statement.

Sarkis Adamant

Pierre Gemayel, the head of the principal rightist group, the Phalange party, paid a quick visit to Mr. Sarkis on Thursday to tell him of rightist reservations about the Cabinet having the authority to revise the electoral law. The reservations were dropped after Mr Sarkis reportedly made it clear that all requested powers must be endorsed as a package.

Informed press quarters said the rightists were not as worried about the election system being changed as giving the Cabinet political powers which the parliamentarians regard as their own specialty.

Mr. Gemayel, on the other hand, said that if the government is to be effective it must have the authority to carry out its responsibilities. "Strengthening law and order must be given top priority," he added.

Mr. Gemayel's newspaper, Al Amal, commented Friday that "the security situation leaves a lot to be desired."

Rival guerrilla factions have been clashing daily in Palestinian camps in Beirut's southern suburbs.

Guerrilla Leader Slain

BEIRUT, Dec. 26 (UPI).—Unidentified gunmen yesterday assassinated a leader of the radical Popular Front for the Liberation of Palestine and his wife.

Palestinian sources said the gunmen entered the home of Abdel Wahab al-Tayeb and shot him and his wife. The motive for the killing and the identity of the assassins were unknown.

Mr. Tayeb's wife was the sister of Leila Khaled, a prominent PFLP figure who has participated in a number of plane hijack operations. Mr. Tayeb was a member of the PFLP central committee.

The incident followed a week of violence in Beirut, marked by interfactional fighting among Palestinians and a bombing that killed two persons and wounded three at the office of the independent newspaper An Nahar in uptown Beirut. At least 50 persons have died in the last month as pro-Syrian guerrillas and members of the so-called Rejection Front, which includes the PFLP, clashed in Beirut and the northern city of Tripoli.

Until Carrillo Is Released

Spanish Reds Pledge to Continue Protests

From Wire Dispatches

MADRID, Dec. 26.—Spain's outlawed Communist party said today that new street demonstrations would be organized if Santiago Carrillo and seven other Communist leaders were not released in the next 24 hours.

Mr. Carrillo, 62, the Communist party's general secretary and seven members of the party's Central Committee were arrested in Madrid Wednesday on charges of illegal association. They are now in Carabanchel Prison.

The arrests sparked a series of Communist-inspired demonstrations in Madrid and a number of other cities. About 1,000 demonstrators at the prison were dispersed by the police Friday night.

Mr. Carrillo's lawyers said they planned to appeal tomorrow the charges of illegal association as well as the judge's denial of the possibility of bail.

Communist labor leader Marcelino Camacho said that there would be assemblies beginning tomorrow—"actions, something new every day, every day bigger until Santiago is out."

The government has taken the stand that Mr. Carrillo's case is now in the hands of the courts and thus must run its normal legal course.

The government Thursday abandoned the idea of deporting Mr. Carrillo and instead decided to submit his legally ambiguous case to the courts.

At the same time, reacting to signs of indiscipline in the police, Premier Adolfo Suarez announced a major shake-up in the paramilitary Civil Guard and the national police. The hard-line commander of the Civil Guard, Gen. Angel Campano Lopez, was dismissed and replaced by another general known to be loyal to King Juan Carlos.

The arrest of Mr. Carrillo, according to government sources, was carried out by secret police acting without approval by Interior Minister Rodolfo Martin Villa.

Only after the arrest, according to the sources, was the interior minister informed. Standing orders had been that, if found, the controversial Communist leader should be swiftly deported to Paris, where he had lived in exile for years. Mr. Carrillo had lived in Spain clandestinely for 10 months.

The secret police forced the government's hand by taking their prominent detainee to central headquarters in downtown Madrid. The government informed the French Embassy that Mr. Carrillo would be deported to Paris but overnight changed its mind.

The Carrillo imbroglio added to a spreading atmosphere of malaise in official circles—and underscored persisting doubts about the government's control over the police. To counteract this impression, Mr. Suarez moved decisively, replacing the rightist Gen. Campano with Maj. Gen. Antonio Ibanez Freire, 63.

The Cabinet also announced that Mariano Nicolas Garcia, civil governor of Valencia, would take overall charge of security services, and Gen. Jose Timon Lara would be the new head of the national police.

In the shake-up, the most important move was the dismissal of Gen. Campano, who considered the 65,000-man Civil Guard his fief and acted with great autonomy. The general is known to have angered certain ministers

Extreme Rightist Unit Claims Murder of French Politician

PARIS, Dec. 26 (UPI).—Police investigating the shooting of Prince Jean de Broglie, a prominent political figure, released without comment today a West German witness they had been questioning since the killing Friday.

Police refused to identify the witness beyond saying that he was a West German businessman in his 50s who was staying in an apartment owned by a friend of the prince near the spot where Mr. de Broglie, 55, was shot on a Paris street.

According to witnesses, Mr. de Broglie was in the company of a man in his early 20s who suddenly pulled a gun and shot him in the neck and chest before running off.

Anonymous Call

Agence France-Presse received an anonymous phone call in which the assassination was claimed by the Club Charles Martel, an extreme rightist anti-black and anti-Arab organization. Mr. de Broglie played a prominent role in the Evian accords of 1962, which ended the French-Algerian war and gave Algeria its independence. He also handled African relations in the 1960s in the government of Prime Minister Georges Pompidou.

The anonymous caller said that Mr. de Broglie was killed as a man "coresponsible for the occupation of France by African scum." This was an apparent reference to the fact that more than half of the 2.5 million foreign workers in this country are North African Arabs or blacks.

A ranking police official said that it was too early in the investigation to accurately assess the Charles Martel Club's claim. He acknowledged, however, that the police knew about the organization, which it holds responsible for a number of attacks earlier in the year on Algerian consulates and other establishments in the south of France. Charles Martel was the Frankish leader who beat off an Arab invasion at the battle of Poitiers in the year 732.

Civil Servant

Born in Paris in 1921, Mr. de Broglie fought in the Resistance during World War II and later studied law and political science before embarking on a career as a civil servant.

He entered politics in 1958, winning a seat in the National Assembly as a conservative member. Four years later, he retained that seat defeating the liberal former Premier Pierre Mendès-France, and he was still holding it at the time of his death.

In 1961, he entered the government as state secretary for the French Sahara and assumed a major role in the Algerian independence negotiations.

For six years, Mr. de Broglie remained a member of the Cabinet as No. 2 man for international affairs. Later, from 1969 to 1973, he headed the National Assembly Committee on Foreign Affairs, representing Valéry Giscard d'Estaing's Independent Republican party.

Mr. de Broglie supported European unity and had been a member of the European Parliament at Strasbourg since 1961.

$15 Million Reportedly Paid for Fake Materiel

France Probes Alleged Fraud Against Libya

PARIS, Dec. 26 (AP).—French authorities are investigating a complex international swindle by a group of men who allegedly sold fake U.S. military equipment worth more than $15 million to the Libyan government, officials reported today.

The group allegedly had another deal in the works involving the fictitious delivery to Libya of U.S.-designed 155-mm and 175-mm cannons worth $151 million.

No formal charges have been filed pending completion of the investigation. Several French-based arms dealers and their Libyan contacts are suspected of a conspiracy to defraud the government of Col. Moamer Qadhafi, the sources said.

The affair began in 1974, when the group successfully circumvented U.S. export controls by delivering 110 Startron night-vision binoculars, manufactured by the Smith and Wesson Corp., to Libya at a cost of $7,000 each.

The Startron, which operates through the magnification of light, was developed for the Vietnam war and used by the Israeli Army in the 1973 war.

Not Under Ban

The initial delivery of the 110 binoculars to Libya through France was possible because at the time the Startron was not regarded by the French authorities as military equipment banned for re-export, the sources said.

Mr. Qadhafi's officers were so enthusiastic over the initial shipment that Libya promptly ordered 3,000 more of the instruments. A contract was signed with the dealers for payment of $15,282,000 into a Swiss bank account. The money was to be released after Libyan officials in Madrid had verified the shipment in transit there.

Meanwhile, however, the French government—presumably on U.S. insistence—had placed the Startron on its list of banned military exports.

Faced with the prospect of the deal falling through, the sources said, the arms merchants contacted a small Paris optical-goods manufacturer and arranged for the production of 3,000 cheap binoculars, labeled and packaged like Startrons, for a total cost of $96,000.

Fakes Inspected

French customs inspectors got wind of the operation and visited the factory, but cleared the fake Startrons for export because they visibly were not the sophisticated instruments described in the export ban.

Libyan officials, possibly in collusion with the dealers, certified the shipment in Madrid and gave the go-ahead for the payment to be released, the sources reported.

In an attempt to prevent discovery of the fraud, the binoculars were then flown back to Paris, where the dealers complained to the manufacturer that his Startrons were "not in conformity with specifications." The affair came to light when the manufacturer, who apparently knew nothing about the conspiracy, sued for payment of his $96,000. A Paris court has scheduled a hearing Jan. 20 to decide whether to bring criminal charges against the dealers.

Names Cabinet

Fukuda Is Narrowly Elected Premier by Japan Parliament

By Andrew H. Malcolm

TOKYO, Dec. 26 (NYT).—Takeo Fukuda has been elected Premier of Japan in a narrow parliamentary vote that presaged a new era of tough legislative politics for the chief U.S. ally in Asia.

Mr. Fukuda, a 71-year-old expert on economics and the leader of the conservative Liberal-Democrats, became postwar Japan's 13th Premier on the first ballot Friday with a two-vote margin in the House of Councilors, the upper house. With 508 of the more powerful lower house's 511 members voting, he received 256 votes, which means that he did not win the support of all the Liberal-Democrats, an unusual development that underlines the party's internal divisions as well as its thin parliamentary majority.

UPI.

Takeo Fukuda

Nonetheless, the Premier plunged ahead to form a 20-member Cabinet—a delicate process of balancing the political demands, power and debts of the governing party's numerous factions. As he did so, the comings and goings of the new leaders were chronicled nonstop on nationwide television.

Mr. Fukuda, a former official in the powerful Ministry of Finance, also was emphasizing economic expertise in his selections. Ichiro Hatoyama, 53-year-old son of the late premier of the same name, was named foreign minister. Now a member of the upper house, he also is a former Finance Ministry official who will carry considerable economic experience into his diplomatic dealings.

Hideo Bo, 72, a close friend of Mr. Fukuda and a former deputy minister of finance, will be the finance minister. Hajime Fukuda, 74, will head the Justice Ministry, where he will preside over the investigation of the Lockheed bribery scandal. Asao Jihara, 67, was chosen to head the Self-Defense Agency, and Tatsuo Tanaka, 66, will run the Ministry of International Trade and Industry.

Masayoshi Ohira, 66, had already been picked as the party's secretary-general, a good place to build support for a bid to become premier. Kiichi Miyazawa, the foreign minister under outgoing Premier Takeo Miki, received no portfolio.

Unity Bid Seen

The careful balancing of factions was apparent despite Mr. Fukuda's repeated vows to abolish them. He awarded four posts to Mr. Ohira's followers, three to those of Yasuhiro Asone, two to the followers of another former premier, Kakuei Tanaka, and—in an apparent unity bid—two to supporters of Mr. Miki.

The new balance was reflected in parliament, where Shigeru Hori, 75, a staunch conservative who helped lead the drive to oust Mr. Miki, was chosen as speaker of the house. For the first time in more than 15 years the deputy speakership went to a member of the opposition, Shoichi Miyake, a 76-year-old Socialist.

The composition of the lower house's 16 standing committees, where the real parliamentary work is done, also was changed drastically. The Liberal-Democrats lost their majorities in seven and the chairmanships of four were given to opposition parties.

Dozens Missing After Fire Sinks Ship in Red Sea

CAIRO, Dec. 26 (Reuters).—Dozens of passengers were still missing today after the Egyptian vessel Patra caught fire and sank in the Red Sea.

There was still no official announcement on the number of passengers who were aboard the 3,920-ton vessel, which went down Friday about 50 miles north of Jiddah. The figure varied between 305 and 471.

There also were conflicting accounts of the number rescued by a Greek ship and two Soviet ships which were in the area and by Saudi helicopters. But about 45 persons were believed still missing. Most of the passengers were Moslems returning from a pilgrimage to Saudi Arabia.

The newspaper Al Ahram reported that, according to Jiddah Harbor sources, the fire was caused by a portable stove carried by a passenger. But the paper also quoted some survivors as saying that the fire broke out in the engine room.

Spanish Reds Vow Protests

(Continued from Page 1)

by returning to a hunting trip after the Cabinet had mobilized following the kidnapping Dec. 11 of Antonio Maria de Oriol y Urquijo, the rightist president of the advisory Council of State.

Moreover, Mr. Martin Villa is known recently to have had a heated argument with Gen. Felix Alvarez-Arenas, the conservative army minister, complaining that second-rate officers were being seconded to the Civil Guard and the national police. The general's powers seem destined to be checked by another decision announced by the Cabinet Wednesday—the creation of a special commission "to resolve the principal organic and administrative problems in the armed forces and the police."

This seemed to be an important step toward the creation of a department of defense—a move that the late Gen. Franco resisted, fearing it would concentrate too much power in one place.

It was two weeks ago yesterday that Mr. Oriol was kidnapped by the "Anti-Fascist Resistance Group Oct. 1."

The last communication from the kidnappers was received Thursday night. In it, the kidnappers repeated their demand that the government free Spain's estimated 200 remaining political prisoners in return for the 63-year-old Mr. Oriol's life.

It was earlier thought that the King, in his Christmas message Friday night, might make some reference to a possible widening of his limited amnesty of July 30. But he did not.

False Hijacking Alert

TEL AVIV, Dec. 26 (AP).—Israeli police and troops went on alert briefly today at Ben-Gurion Airport following a rumor that a Turkish Airlines flight had been hijacked. The report proved false.

Thais sift wreckage of Egyptian airliner and factory it hit on Christmas Day.

Airliner Slams Into Factory at Bangkok; 70 Die

BANGKOK, Dec. 26 (UPI).—Egyptian officials arrived here today to help sift through the wreckage of the Egyptair Boeing 707 that crashed into a textile factory near Don Muang Airport yesterday morning, killing all 52 aboard the plane and at least 18 persons on the ground.

"Everything is clear," radioed the pilot of the plane as it approached the airport. "We are landing. I can see the runway." Two minutes later, at 3:30 a.m., the jet sheared off treetops, tore away the roof of a workers' housing complex and crashed into a textile factory two miles short of the runway.

The crash killed all 43 passengers and 9 crewmembers on the plane and at least 18 others on the ground. Bangkok Police Maj. Gen. Chalit Boonsuwan said, after inspecting the disaster site, "There are probably 20 more there," possibly raising the death toll to 100.

The control tower had warned veteran Egyptair Capt. Amin Shahad of ground fog. Thai officials blamed pilot error for the crash. "He saw the runway and it was his responsibility to land the plane," the civil aviation director, Maj. Gen. Surayuth Nivasabutr, said.

In addition to the 70 confirmed deaths, 29 persons were injured and 18 were known to be missing and presumed dead. The flight originated in Rome and would have continued on to Tokyo.

Israeli President Meets Politicians On Cabinet Crisis

JERUSALEM, Dec. 26 (Reuters).—President Ephraim Katzir today consulted leaders of the country's two biggest political parties on whether a new government should be formed to replace the Cabinet of Prime Minister Yitzhak Rabin.

Mr. Rabin resigned last week after a dispute within his coalition government left his Labor party without a majority in the 120-seat Knesset.

Labor party spokesmen said that their party leaders told Mr. Katzir today that they wanted general elections to be held in May.

But a spokesman for the Likud, the major opposition party, said that its leaders had suggested that the President call on Likud leader Menahem Begin to form a new government. Likud controls 38 of the Knesset seats.

Although Mr. Katzir is to meet later this week with leaders of other parties in the Knesset, political observers believe that he will ask the House shortly to dissolve itself and set a date for new elections.

Dutch SS Probers To Visit Ukraine

THE HAGUE, Dec. 26 (AP).—The Soviet Union has authorised a 20-day visit by a Dutch inquiry team looking into war-crime charges against Dutch millionaire art collector Pieter Menten, the Justice Ministry has announced.

A spokesman said that the team will visit an area of the Ukraine where Menten, 77, is alleged to have participated in the massacre of Polish Jews in 1941. The area, close to the town of Lvov (formerly Lemberg), was part of Poland at that time.

Menten, who served with the Nazi SS during the war, was expelled by Switzerland last week and is now under police interrogation at a prison in Amsterdam. He had fled to Switzerland last month just before detectives arrived at his villa near Amsterdam to arrest him.

Remittances From the Gulf Fuel Jordan Economic Boom

By H.D.S. Greenway

AMMAN, Dec. 26 (WP).—Two years ago, at the age of 38, Salem Shawiesh left his wife and six children behind in Amman and went down to Kuwait to seek his fortune on the oil-rich shores of the Gulf.

The fortune has proved elusive but he does have a job in a bank that pays him three times what he was making as a clerk in Amman. Every month he sends some of his savings home.

Jordan has no oil of its own under its 37,000 square miles of territory. But the export of middle-level technicians, teachers and office workers has helped Jordan to cash in vicariously on the oil bonanza.

Of a total population of around 2 million, there are 200,000 Jordanians, by conservative estimate, working in the Gulf and in Saudi Arabia. The money they send home has helped fuel an unprecedented economic boom here during the last two years—a boom that is only now beginning to taper off.

Remittances from Jordanian workers abroad have become the second most important source of foreign exchange, after foreign aid and grants.

In 1972, Jordanians abroad sent back $23.7 million through the banking system in Amman, according to central bank statistics. The figure has nearly doubled every year since. During the first six months of this year, remittances amounted to $178 million, $7 million more than the entire amount last year, and the central bank estimates that it may exceed $300 million for the year.

"And that's only the remittance money that comes into the banking system," an economist pointed out. "The figures don't include the amount coming back in suitcases and through money changers, which might be twice as much."

Salem Shawiesh, like most of the Jordanian citizens working in the Gulf, is a Palestinian. He was born in Jerusalem and came here after the 1967 war, when Israel took over east Jerusalem and the West Bank. With their comparatively urban background, their superior education as well as ambition and ability, the Palestinians have become a major source of skilled workers in the desert sheikhdoms to the south. About half of all Jordanian citizens are Palestinians.

A few years ago the remittances were merely to support families left at home. But in recent years, as the Jordanian workers became richer in the oil bonanza, money has been coming back for investment purposes. Jordan's efficient banking system and political stability, as well as the strength of the Jordanian dinar, have all combined to make Amman an attractive place for savings and investments.

Much of the money sent home in recent years has gone into land speculation. The price of land in Amman has risen many times with plots being bought and sold, in some cases without the owners ever having seen them. Recently land values have stabilized but there is still a construction boom here, with new buildings spreading out over the bare hills.

The collapse of Beirut as a banking center may have helped the boom in Amman as well, but there is always a possibility that money will be diverted to Beirut if stability returns to Lebanon. But bankers here are confident that they will continue to receive most of the remittances coming up from the Gulf.

Labor Shortage

The negative side of the picture is that the lure of the Gulf and high paying jobs has become so strong that there is a shortage of skilled labor in Jordan itself. The story is told of a crash program to train crane operators for the port of Aqaba, which is also experiencing a boom of its own. No sooner were the operators trained than they left for Saudi Arabia, where the salaries are higher.

The remittances have also added to inflationary pressures—the inflation rate here is now about 20 per cent annually. But according to officials of the central bank, the benefits of the remittances far outweigh the disadvantages and the incoming money more than balances Jordan's chronic imbalance in trade.

Today, economists say, the economic boom in Jordan has just about peaked and the number of Jordanian workers in the Gulf is nearing the saturation point. Nobody expects the remittance money to double again next year, as it has every year for the last four. If the total figure reaches $400 million, Jordan will consider itself fortunate. The forecasts are for continued and steady growth for, as a banker put it, "as long as there is oil money to be spent in Saudi Arabia and the Gulf there will be Jordanians down there helping them spend it."

Rhodesian Guerrillas To Discuss Reunifying

DAR ES SALAAM, Dec. 26 (Reuters).—Two Rhodesian nationalist groups plan to discuss the reunification of their guerrilla forces, nationalist leader Robert Mugabe said today.

In an interview with the official Radio Tanzania, Mr. Mugabe said that leaders of the Zimbabwe African National Union and the Zimbabwe African Peoples Union would use the current recess in the Geneva conference on Rhodesia to talk about again forming a united guerrilla army.

Sands Are Moving 8 Miles a Year

Advancing Desert Perils Egypt's Farmland

By Stuart Auerbach

CAIRO (WP).—Egypt's Western Desert is pushing toward the Nile Delta like a relentless sea, threatening the rich farmland there that supplies most of the food for this country, an Egyptian-born U.S. geologist has found.

A series of photographs of the Western Desert taken during the last 10 years from space clearly shows the advance of the sands in a way that cannot be seen from the ground, said Dr. Farouk Bas, research director of the Smithsonian Institution's National Air and Space Museum in Washington.

The sands are moving toward the farmland by as much as eight miles a year, said Mr. Bas, who predicted the sands will encroach on the Nile Delta and the fertile growing areas of the Sudan to the south, which is the breadbasket of Africa.

"It is a massive, enormously fast-moving sand sea. The areas that are not desert now will be taken over within 20 years unless we do something," said Mr. Bas, who taught geology to the astronauts who explored the moon.

'Food Bowl'

"It is going to cover an enormous area of good land along the Nile and in the Sudan. If you cover the Sudan, you cover the food bowl of Africa."

Mr. Bas was a principal investigator for earth-orbit photography during the joint U.S.-Soviet space flight 17 months ago that provided the latest pictures of the encroachment of the desert on some of Egypt's farming land.

WP.

Mr. Bas led a six-day trek into the Western Desert recently to check what the space photos showed and to collect samples of desert sand for laboratory analysis.

While the movement of desert sand because of winds has been known to the Bedouin for centuries, its threat to farmlands has been generally unnoticed.

But John Parker, a U.S. Department of Agriculture expert here, said the shifting sands are thwarting Egypt's plans to reclaim desert land for farming.

"It's a problem they are faced with," he said. "It seems to be a real struggle for Egypt to any cropland."

Egypt is a poor country w food supply barely keeps with its population growth. spite ambitious national reck tion programs, it has unable to increase the sm of farmland to much more 6 million acres.

Now, Mr. Bas said, some this land is threatened by desert sands.

The United Nations has h to recognize the growing pro in North Africa, and has the first "desertification" ference for Nairobi next under the auspices of its watch" team there.

Changing Patterns

Algeria, also faced with croaching desert sands en farmland, has begun plan trees in its Northern Desert change wind patterns so are not deposited on fertile Mr. Bas said that Algeria is to plant 20 billion trees years to create a "great bar to protect its farmland.

The trees cannot block wind but can divert its co into a circular pattern so th deposits the sand in the area it came from.

Special trees that can in the deserts are needed. Parker recommended plan hedgerows of African pine which have strength near ground. These trees must planted near the fertile land they can be irrigated from same water supply used for crops.

On a follow-up expedition Egypt, Mr. Bas will use 35 photographs of the Western Desert taken during the joint Soviet space mission in July last year.

These photos, he said, show desert sands in a series of ov over an area that cannot be from the ground. The changes from a light, almo white color near the Medi ranean on the northern edge the desert to deep red hues to southeast.

The light-colored sand, Bas said, has been freshly covered by wind coming from north and pushing the sand to southeast, cutting diagon across the country.

In flat, duneless areas of desert, Mr. Bas said, he search out land mines planted German and British troops dur World War II. The locations depths of the mines are mapp he said, and comparing their rent depths with the depths which they were buried m than 30 years ago will show the sands have shifted.

The Siwa Oasis is the only for settlement in the desert about 5,000 persons living a clear blue pond in the The water is used to irrigate desert for growing dates olives.

Syrian Reassurance to Arafat For Pledge of Cooperation

(Continued from Page 1)

delegation to the Geneva conference.

The Arab governments are in favor of such a delegation but the Palestinians still oppose it for fear, they say, that it would make it impossible for them to block a last-minute move to impose a federation on the proposed state.

In spite of the continuing controversy, Arab diplomats predict that a single Arab delegation will eventually be inevitable because of U.S. and Israeli opposition to an independent Palestinian delegation.

Weapons Issue

The most immediate issue on which Syrians and Palestinians take opposing views involves the weapons that the guerrillas have in the camps.

But the Syrian position is said to have softened. Mr. Assad is reported to have assured Fatah that Egypt and Syria have agreed on a joint program for military training, upgrading of equipment and joint planning in which they want the Palestinians to take part.

This is seen as a Syrian-Egyptian concession to the Palestinian view that unless the Arabs combine negotiations with military pressure on Israel, they will have no chance of reaching their negotiating objectives.

Palestinian sources say that Fatah has agreed with Syria that Palestinian attacks against Israel from southern Lebanon have become politically impossible and that the Palestinians instead must help anti-Israeli militants creating unrest on the West Bank as a means of keeping Israel under pressure.

Madagascar Riots Over, Aides Say

TANANARIVE, Madagascar, Dec. 26 (UPI).—Authorities have reported a return to calm and the start of negotiations between rival Comorian and Malagasy factions in the Majunga area of Madagascar, the scene last Tuesday of race riots which left 121 dead and 239 injured.

Unofficial sources said that the number of injured requiring treatment in Majunga hospitals was still rising, although street violence, which raged Tuesday and Wednesday and in which numerous homes were burned, had died down.

Some Majunga shops and offices reopened Thursday and citizens returned to their homes after the street battles that broke out after a fight between two children. The children, one a Malagasy and the other an immigrant from the Comoro Islands, were quickly joined in the fight by their parents.

Drinking Denied By Turkish Pilots

ANKARA, Dec. 26 (Reuters).—Pilots of Turkish Airlines went on strike for more than 10 hours yesterday after an allegation that some of them had been drinking, the state radio reported.

The pilots said that they would not fly any domestic or international routes until they had been given alcohol tests. They later passed such tests at a hospital in Istanbul, the radio added.

A complaint against some of the pilots was reported to have been made to the Istanbul Flight Control Center.

Rome Collects on Debt, Gets Its Own Property

ROME, Dec. 26 (UPI).—City bailiffs who seized furniture Friday from a school because garbage-removal bills were unpaid have found that the furniture belonged to the city.

The school council issued a statement saying: "What is so absurd is that, not only does the furniture belong to Rome, but so does the school. If things go through to their illogical conclusion, the city will now auction the furniture, taking a hefty loss, to recover an amount which has not been paid because the city has not supplied the school with the money to pay it."

Indian State Returned To Local Politicians

NEW DELHI, Dec. 26 (AP).—The state of Gujarat, ruled by the federal government for the last nine months, has been turned over to a new state administration formed by India's ruling Congress party.

The new state ministers were sworn in Friday at the capital of Ahmadabad. Prime Minister Indira Gandhi's government took control of Gujarat, on India's northwestern coast, March 12 when an elected coalition of non-Communist opposition parties lost its majority in the state assembly after months of political infighting.

CIA Analysts, Outsiders Join in Finding Moscow Seeks Arms Superiority Over U.S.

(Continued from Page 1)

official who participated in the latest estimate asserted that pessimistic assessments were being heard even from analysts who have taken a rosier attitude toward Soviet goals.

"The consensus is breaking up," a source said. "Maybe it will be a different consensus next year. A great many analysts are disturbed increasingly by what they see on the Soviet side—more and more Soviet weapons programs. The Soviets are developing across the board. That is bothering people. ICBMs everywhere you look; a continual steady program."

The long-range estimate provides guidance for the size and shape of the U.S. defense budget, the government's policy approach to East-West relations, including strategic arms negotiations, civil-defense planning and, ultimately, the entire concept of strategic deterrence, based for two decades on nuclear-tipped intercontinental missiles and anti-missile defenses. The estimate also influences the annual "secret posture statement" sent to Congress by the secretary of defense as guidance for the protection of the United States.

Months of research, collation of photo-reconnaissance, monitoring of signals and of Soviet documents underlie the estimate. It is summarized, dissented against and reviewed at ever-higher levels and is finally argued out before the President's Foreign Intelligence Advisory Board, comprising the heads of the intelligence agencies and intelligence-oriented departments.

'Eye of Controversy'

The more somber view represented developed in an unusual fashion, according to a number of participants. They said it came about primarily through continuing dissents by a long-term maverick in the intelligence community, Maj. Gen. George Keegan jr., whose voice was strengthened this year by like-minded outsiders. Gen. Keegan, who is retiring Jan. 1 as Air Force chief of intelligence, describes himself as "the eye of controversy" in the intelligence community and has been contesting the estimates of Soviet intentions for 22 years.

On the basis of photo-reconnaissance of construction of underground shelters for protection against nuclear attack and new missile systems, Gen. Keegan became convinced that the Soviet Union was preparing for offensive war against the United States. This prompted him to oppose a 1972 treaty with the Russians restricting anti-ballistic-missile programs and another 1972 treaty curbing offensive nuclear weapons.

In 1974, his dissents to the national estimate relating to the significance of the Soviet civil-defense program and new guided missiles provoked such a storm that he was called to the White House to make his case before the Advisory Board. Out of those dissents and others a belief grew among members of the board that the annual estimates of Soviet capacities and aims might be too soft.

Normally the president is screened from debates on intelligence estimates, which often develop into impassioned and even furious exchanges. The dissents of Gen. Keegan and like-minded officials raised doubts about such critical questions as the level of Soviet defense spending, so that the 16-member Advisory Board began suggesting several years ago that the estimate of Soviet intentions include the views of outsiders. This year President Ford accepted the proposal by the board, which is empowered to review and evaluate foreign intelligence.

In June, Mr. Bush and William Hyland, Mr. Ford's deputy assistant for national security, selected a panel of seven outsiders to join, experimentally, in drafting the next long-range estimate. The conditions were that the outsiders be mutually agreeable to the Advisory Board and to Mr. Bush and that they hold more pessimistic views of Soviet plans than those entertained by the advocates of the rough parity thesis.

Those selected were Richard Pipes, professor of Russian history at Harvard; Thomas Wolfe of the Rand Corp.; Lt. Gen. Daniel Graham, ret., former head of the Defense Intelligence Agency; Paul Wolfowitz of the Arms Control and Disarmament Agency; Paul Nitze, former deputy secretary of defense; John Vogt, a retired Air Force general, and Prof. William van Cleve of the University of Southern California, formerly a delegate to the strategic arms talks.

The two groups, which began work late in August, were assigned three topics: the accuracy of Soviet guided missiles, the penetrability of Soviet air defense by low-level bombers and overall Soviet strategic capabilities and objectives. There was a debate on whether to do estimates on Soviet capabilities in anti-submarine warfare but the issue was dropped because of violent opposition by the Navy on security grounds.

As related by participants in both the team headed by Prof. Pipes and the team headed by Mr. Stoertz, controversy boiled up immediately, not only on interpretation of less easily defined strategic objectives but also with regard to missile accuracy.

"Sometimes we left them speechless," one of the outsiders remarked. "We had men of great prestige, some of them with memories going back 25 years or more, and they made devastating critiques of the agency estimates."

A CIA estimator described the work as "a rather unfair setup" in which the outsiders felt they had a somewhat broader mandate, and used it.

Another intelligence officer spoke of "absolutely bloody discussions" during which the outsiders accused the CIA of dealing in faulty assumptions, faulty analysis, faulty use of intelligence and faulty exploitation of available intelligence. "It was an absolute disaster for the CIA," this official added in an authorized interview. Acknowledging that there were more points of difference than in most years, he said: "There was disagreement beyond the facts."

There is a prospect that the Carter administration might look further into the somber side of the estimates because Zbigniew Brzezinski, the President-elect's

Belgium Will Ease Anti-Inflation Curbs

BRUSSELS, Dec. 26 (Reuters).—The Belgian Senate last week approved the government's anti-inflation program for next year so that it can take effect next month.

The program, already approved by the lower house of parliament, eases the current freeze on dividends and rents and the curb on wage increases. Dividends and rents will be allowed to rise by up to 8.5 per cent and the automatic index-linking of wages to the cost of living will no longer be restricted to that part of pay below 44,000 francs (about $1,200) a month.

Soviet Rocket Tests

MOSCOW, Dec. 26 (Reuters).—The Soviet Union has announced that it will test-fire rockets into the Barents Sea this week in its fourth series of practice launchings in the area this year.

Media Tend to Ignore Him

The Allure of Following Ford Fades With His Presidency

By Lou Cannon

VAIL, Colo., Dec. 26 (WP).—White House staff members are now being charged rent for skis which last year they borrowed without cost. There are no press briefings. And only three daily newspapers are bothering to staff Mr. Ford's final trip as President to this winter holiday resort, where news is as scarce as snowflakes.

Those are signs of the special time in U.S. politics when a president is on the threshold of losing the enormous power invested in his office.

That anticipated power loss is less apparent in Vail than in Washington, where interest is centered on the incoming administration. Jimmy Carter's name is rarely heard in Vail, a wealthy resort community where the Fords have spent their last nine Christmases.

Mr. Ford is valued here, and probably always will be, because he invested in a condominium a decade ago and because his identification with the community has been good for business. While it is Mr. Ford's winter skiing trips here that have been highly publicized, local businessmen say that his identification with the town has meant most in summer, when Vail has difficulty competing with better-known Colorado resorts.

The citizens of Vail showed their appreciation on Nov. 2 when the town's two precincts gave Mr. Ford 1,220 votes to 251 for Mr. Carter and 32 for Eugene McCarthy.

An old Vail friend of Mr. Ford, after chatting with him at a party last week, said that Mr. Ford seemed "tired and lacking some of the zip and vitality he used to have." Mr. Ford, 62, had every right to be tired after his first day of skiing here. But it was not the sort of remark that the friend would have made a year ago.

The President's change of status next month is most apparent in the news coverage of his coming and going. A year ago, his activities in Vail were minutely reported by a dozen newspapers and Colorado television stations. Now Mr. Ford gets token coverage from the networks, the wire services, three newspapers (the Chicago Tribune, The Washington Post and The New York Times) and a Denver TV station. Photographers complain that not even the Colorado papers use pictures of the President skiing.

A year ago photographers swarmed over the mountain, hoping for a picture of Mr. Ford falling. They got their wish on two occasions, reinforcing the image of a clumsy president, although Mr. Ford was in fact skiing with a high degree of skill.

White House officials, blending official duties with frequent rounds of skiing, seem to have accepted with good grace their forthcoming loss of authority. They seem sensitive on only one subject, the cost of Mr. Ford's holiday trip.

Compiling the Cost

Officials said that it will take a few days for them to compile the cost of the two-week holiday, including that of sending Air Force One and a backup plane on a 3,500-mile round trip from Andrews Air Force Base, Md., to Grand Junction, Colo., with a stopoff at Ann Arbor, Mich., where Mrs. Ford received an honorary degree from the University of Michigan. A commercial airline official estimated the transportation costs at nearly $20,000.

But Mr. Ford is paying his family's transportation costs. He also is paying for his own ski-lift tickets here and the $110-a-day difference it costs him to exchange houses with Texas oilman Richard Bass. Mr. Ford pays $300-a-day rental for the Bass home on a secluded, well-guarded street and rents his condominium to Mr. Bass for $190 a day.

"From his perspective as a citizen, he [Mr. Ford] could get on United Airlines and fly out here and he would pay exactly what he is paying now," said the White House chief of staff, Richard Cheney. "All the other costs are incurred in his capacity as President and commander in chief and would apply wherever he or any other president goes."

Eastern Bloc Is Seeking Aid From Moscow

By Paul Hofmann

VIENNA, Dec. 26 (NYT).—East European officials are shuttling between their capitals and Moscow to obtain economic concessions and additional assistance for their countries from the Soviet Union, according to information available here.

The pressing economic problems of the Soviet Union's European allies are believed to have been discussed also on high Communist party levels when East European leaders gathered recently in Moscow for the 70th birthday of Soviet party chief Leonid Brezhnev.

The present phase in Eastern Europe, an analyst here commented, "is marked by a clear trend of the Soviet Union getting stronger and its allies weaker in their mutual relations."

This increasing imbalance is reflected in the indebtedness of East European countries to the Soviet Union. The Institute for International Economic Comparisons in Vienna estimates that the combined deficits of East European nations in their trade with the Soviet Union was $735 million last year.

The Soviet-bloc countries' commercial debts with Moscow are believed to have risen considerably this year. They are likely to go up further next year since the Soviet Union has already served notice to its allies that its deliveries of crude oil and earth gas will be more expensive.

Bumper Harvest

East Germany, Poland and Czechoslovakia, hit by severe droughts last summer, had to buy large amounts of grain from the Soviet Union, which reported a bumper harvest.

The Soviet Union's East European allies also are handicapped by the very structure of the Council for Mutual Economic Assistance, the organization that links their economies with that of the Soviet Union.

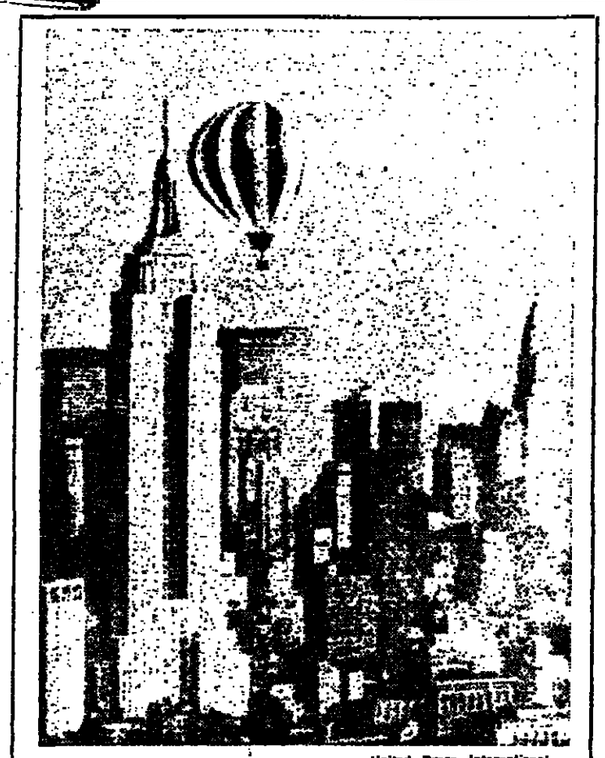
Criticisms of the Comecon system are never voiced publicly in Eastern Europe. However, Western businessmen and government representatives who frequently visit East European capitals say that local officials in private conversations are quite outspoken and occasionally bitter in their comments on economic relations with Moscow.

From many reports, it appears that Moscow's allies would generally like to keep more of the machine tools, appliances, clothing and other manufactured goods they turn out for their own domestic markets—and especially to be able to sell them to hard-currency nations.

CORE Endorses Bell as Carter's Attorney General

NEW YORK, Dec. 26 (AP).—The Congress of Racial Equality, breaking with what it called the "civil rights aristocracy," has endorsed President-elect Jimmy Carter's choice of Griffin Bell as attorney general.

"We have found him fair. We found that he was open to alternative ways of dealing with school desegregation problems," Roy Innis, the national director of CORE, told a news conference Friday.



He said that Mr. Bell's civil rights record, together with his promised resignation from whites-only clubs in which he holds membership, meant that CORE could support the nomination.

Mr. Innis said that Mr. Bell has repeatedly demonstrated the ability to recognize different points of view coming from the black community rather than taking the normal approach of "alleged liberal legislators and judges who recognize only one philosophy of desegregation."

He said that scrutiny of Mr. Bell's civil rights record as a federal appeals court judge showed he has "consistently taken into account the harsh realities of the segregated and integrated South."

Pakistan Celebration

ISLAMABAD, Pakistan, Dec. 26 (Reuters).—Pakistan yesterday celebrated the centenary of the birth of its founding father, Mohammed Ali Jinnah.

United Press International.

OVER MANHATTAN—A hot-air balloon, piloted by an unemployed draftsman who "just wanted to give New Yorkers a chance to see a balloon in flight," sails past the Empire State Building on its way to Queens from Staten Island. The pilot landed safely but was promptly presented by the police with two summonses.

Before 1970 Elections

Firms Said to Have Offered To Aid U.S. in Barring Allende

By Seymour Hersh

NEW YORK, Dec. 26 (NYT).—The Anaconda Co. and other concerns active in Latin America secretly offered to funnel at least $500,000 through the State Department to a conservative candidate in the 1970 Chilean elections, State Department documents show.

The 1970 offer of financial aid, made to Charles Meyer, a former assistant secretary of state for Latin America, was rejected at the time, the documents show. There is no evidence that the offer involved anything illegal.

The documents, provided to The New York Times by Edward Korry, former ambassador to Chile, and independently verified by The Times, show that Jay Parkinson, former chairman of the board of Anaconda, who is also the president of the prestigious Council for Latin America, met on April 10, 1970, with high State Department officials to urge that the U.S. government actively intervene to prevent the election of Salvador Allende.

No Recollection

Mr. Parkinson said that he had "no recollection" of any offers of financial aid.

He did recall, he said, attending the State Department meeting in question but said that the thrust of the presentation had been made by Jose Decubas, who was then president of the Council for Latin America. "I simply went along," Mr. Parkinson said.

Mr. Decubas said that the council had "never offered any cash. I don't know whether council members did it or not," he added. "We have 200 members who do what they want."

The Korry documents show, however, that some members of the council offered to help provide the political funds as part of a joint operation it was urging on the U.S. government.

The Council for Latin America, now known as the Council of the Americas, was organized in 1963 at the request of President John Kennedy, who was then seeking more support for his Latin American policies. Its member companies control 85 per cent of U.S. private investments in Latin America and have wide influence in Washington.

Secretly Active

The documents provide the first published evidence that the council has ever been secretly active on behalf of politicians in Latin America. Such political activity has repeatedly been denied by council members.

The documents also raise additional questions about the testimony by officials of the International Telephone & Telegraph Corp. during 1973 hearings into ITT's involvement in Chile. The hearings were by the Multinational Corporations subcommittee of the Senate Foreign Relations Committee.

The New York Times reported Thursday that a federal grand jury in Washington was hearing allegations that high officials of the CIA and ITT had been involved in a conspiracy to fabricate and coordinate testimony before the Multinational subcommittee.

ITT Offer in 1970

A key area of dispute that arose during those hearings centered on ITT's offer in September, 1970—about five months after the council's offer—to provide $1 million to the government.

Officials of the company, including Harold Geneen, its president, testified then that to the best of their recollection the funds were to be used for a constructive purpose such as housing to show goodwill toward the Allende government.

Report to House Says Ray Had a Europe Contact

WASHINGTON, Dec. 26 (WP).—The House Committee on Assassinations says it has received an uncorroborated report that James Earl Ray received "instructions" from a secret contact in Europe following the April, 1968, murder of the Rev. Dr. Martin Luther King jr.

Walter Fauntroy, the nonvoting Democratic delegate from the District of Columbia and chairman of the subcommittee investigating the King assassination, said the contact was supposed to have taken place in Portugal, one of several countries to which Ray fled before he was arrested at London Heathrow Airport on June 8, 1968.

Mr. Fauntroy said the report came from someone he regards as "a reliable source" who has spoken with Ray. Ray is serving a 99-year prison term in Tennessee for Dr. King's murder.

The committee said it had been told that "Ray contacted another person from whom he received further instructions to aid in his continuing flight out of the United States."

Mr. Fauntroy declined to add any more details but committee investigators have reportedly been told that Ray was supposed to have gotten instructions for getting money to continue his trip from Portugal to Belgium.

Watergate Figure Guilty of Fraud

NEW YORK, Dec. 26 (AP).—Watergate courier Anthony Ulasewicz was convicted Thursday of failing to report on time to the Internal Revenue Service the $41,000 he was paid for delivering more than $200,000 to the Watergate burglars.

The burglars were the men who did the breaking and entering in the Watergate case which eventually forced President Richard Nixon out of office.

The former New York City policeman faces a possible sentence of six years in jail and a $10,000 fine. A jury spokesman said that the panel felt Ulasewicz "had no adequate explanation why he didn't file." He said that, although there was considerable discussion, no juror ever suggested acquittal.

U.S. Army Orders New Helicopter

WASHINGTON, Dec. 26 (AP).—The Army has approved the start of production on an advanced troop-carrier assault helicopter that could cost $3.4 billion.

The Army said it has awarded the contract for the aircraft to the Sikorsky Aircraft Division of United Technologies Corp.

Army plans call for an eventual purchase of 1,107 of the twin-engine helicopters, designed to replace the UH-1 "Huey" helicopter.

The new helicopter will be designed to carry a full squad of 11 soldiers along with arms and equipment. The Army says it will be capable of surviving on battlefields of the 1980s and beyond when aircraft missiles and other weapons are expected to be more lethal.

Court-Martial Set For Black Marine In Racial Attack

CAMP PENDLETON, Calif., Dec. 26 (AP).—The first of 14 black marines accused of a commando attack on whites they believed were members of the Ku Klux Klan was ordered court-martialed Thursday on six counts of conspiracy and assault.

The special court-martial of Cpl. E.F. Henry, 20, will begin Wednesday, a base spokesman said. No decision has been announced on whether charges against the 13 other blacks will be dropped or pressed because pretrial investigations are still in progress.

Some civil rights groups have expressed concern for the blacks, who claim they mistakenly thought they were breaking up a meeting of the KKK when they invaded a barracks room with clubs and screwdrivers on Nov. 13. The Klan's meeting room was two doors away, the Marine Corps later disclosed.

A list of 16 Klan members at Camp Pendleton was found in the barracks at which the attack occurred, a base spokesman said.

Of the 16, a dozen were later transferred to other bases, mainly in the East. Another is listed as a deserter and another is on medical leave. Two, who are still here, are described as only "half-hearted" Klansmen.

Worker Is Attacked At Ga. Rape Center

ATLANTA, Dec. 26 (AP).—The Rape Crisis Center at Grady Memorial Hospital has been moved to a more secure location after an employee of the center was raped, a hospital spokesman said.

Police said that the employee was tied to a bed and raped on Nov. 27. The Rape Crisis Center provides psychological treatment and advice to rape victims.

News Analysis

No 'New Generation' in Carter's Cabinet

By David S. Broder

WASHINGTON, Dec. 26 (WP).—Along with the still-to-be-named senior White House staff members, 17 persons will form the inner core of the Carter administration—the Cabinet.

What kind of a group are they and what do they say about the character of the new government? When that question was put to members of Congress, officials of the Carter transition team and students of government, the answers were as varied as the individuals asked. But some points were frequently repeated.

The Carter appointees are long on credentials and short on constituency loyalties. They are high in intellect and low in ideology. They are moderate, middle-aged men and women whose talents made them attractive to previous presidents—and who would have caught the eye of any Democrat assembling a government in the winter of 1976.

They are a lot like their predecessors, not only those in past Democratic administrations but also those who took office with Richard Nixon eight years ago. One of them—energy czar James Schlesinger—was, in fact, a prominent official of the Nixon administration. And fewer than half the 17 are partisan enough to list their Democratic affiliations—if they have them—in their official biographies.

The Carterites are not outsiders or examples of "a new generation of leaders," which is fine with many students of government—but not what Mr. Carter had predicted in advance.

In an interview in July, the President-elect said, "I can't say I would never use somebody who had served in a previous administration. Obviously, I will use some. But my inclination would be to go to a new generation."

Previous Experience

As it has turned out, Mr. Carter's "new generation" has accumulated 88 years of previous experience in appointive government office—most of it at high levels of responsibility—and an additional 34 years in elective office. Only two of the 17—Mrs. Juanita Kreps in the Department of Commerce and Ray Marshall in the Department of Labor—are newcomers to governmental responsibilities.

The other Carter team members have the experience—and the scars—of previous service in such demanding jobs as secretary of defense, under secretary of defense, secretary of the Air Force, director of the Bureau of the Budget, domestic assistant to the president, special counsel to the president, ambassador and lesser offices.

In a real sense, the Carter team represents much less of a break from the past than is normally the case when there is a change of both presidents and parties.

John Kennedy and Richard Nixon each began their administrations with only two veterans of past governments in their Cabinets. Mr. Carter gave 5 of the 11 cabinet chairs to veterans of previous administrations.

Mr. Carter's 17 appointees average 49.5 years of age—four years younger than their counterparts at the start of the Nixon administration but about a year older than the original Kennedy team.

The age range is narrow. The youngest, the nominee as ambassador to the United Nations Andrew Young, is 44—eight years younger than Mr. Carter. The oldest, the nominee as secretary of state, Cyrus Vance, is seven years older than his president. Ten of the 17 were, like Mr. Carter himself, born in the 1920s.

Mr. Carter said that they represent "a wide diversity of background and opinion, even political philosophy." But that is not clear to students of government, who tend to see the new administration as a cautiously chosen assemblage, picked by a man who is acutely conscious of the tenuous character of his own electoral mandate.

Nelson Polsby, a University of California political scientist, noted that Mr. Carter's choices are, for the most part, "very tenuously linked to the interest groups that are the clients of their agencies."

The farmers got a farmer, Rep. Bob Bergland of Minnesota, for agriculture, but Rep. Bergland also had support from consumer groups.

Organized labor did not get its first choice for labor secretary from Mr. Carter any more than it did from Mr. Nixon—even though it thought it had much more influence with Mr. Carter. Both men picked 48-year-old academic economists and labor can only hope at this point that it comes to like Ray Marshall as well as it liked George Shultz.

The mayors failed with Mr. Carter, as they had with Mr. Nixon, to establish the principle that the position of secretary of housing and urban development is a job for someone with professional roots in the cities.

The mayors seem no happier with Mrs. Patricia Harris, Mr. Carter's choice, than they were with George Romney, Mr. Nixon's nominee.

Business, which fared well in the Nixon Cabinet, is being kept at a greater distance by Mr. Carter. Michael Blumenthal, the Treasury secretary, is something of a maverick on the Business Council, and Mrs. Kreps, the commerce secretary, is an academic, not a businesswoman, who spoke of her main mission as encouraging business not to increase its profit but "to improve human welfare."

Despite Mr. Carter's effort to construct a team "very resistant" to special-interest pressures, as Mr. Polsby put it, most of the criticism has come from liberals who might be expected to welcome such an approach.

Civil rights groups have assailed the choice of Griffin Bell at the Justice Department, citing his past membership in clubs that have no black or Jewish members and his coolness on the bench to busing decrees. Liberal New York Times columnist Anthony Lewis, an ardent Carter backer, lamented the fact that his hero had picked "a national security team without one member who was a critic of the Vietnam war."

Mr. Carter himself had not been such a critic. But liberals like Mr. Lewis had hoped for sweeping change. In campaign speeches, Mr. Carter had criticized past administrations in which, he said, decisions on war and peace, on employment and the economy, were not made by those "who suffer the consequences of those decisions themselves."

By that criterion, the liberals perhaps have reason for disappointment. Although Mr. Carter's 17 appointees include two women and two blacks—with Mrs. Harris comprising half of each category—they really represent the same aristocracy of educated professionals that has dominated previous administrations.

Higher Education

Among them, the 17 appointees have 37 earned degrees. Seven of them are PhDs, six are lawyers and only Rep. Bergland and Cecil Andrus, the nominee as interior secretary, left college without graduating.

If Mr. Carter did not treat these key appointments as normal political patronage—and he clearly did not—what criteria did he use? The descriptions he gave of his nominees offer perhaps the best clues.

Almost half of them he called "good managers or superb managers."

As many were called "very close friends or close advisers." Those who did not fit one category or the other were credited with having a "superb background or superb credentials."

Participants in the screening process said that the personal interviews with Mr. Carter and Vice-President-elect Walter Mondale were, in most prospects, the most important determinants of their chances of being appointed.

Aides said that several prospects with strong paper credentials were eliminated because Mr. Carter got "bad vibes" from the interviews. Others, like the appointee as CIA director, Theodore Sorensen, are in their jobs largely because Mr. Carter himself put a high value on their judgment—and their way of giving it.

If there is any one thread that holds the Carterites together it is their understanding that they serve at the pleasure of a president who intends, as Mr. Carter said last week, that he himself will "be the primary focal point for the evolution of policy for the next administration."

A Year Later, Self-Reliance Is Goal

Laos' Revolution Becomes Humble Affair

By Brian Eads

VIENTIANE, Laos, Dec. 26 (WP).—At lunchtime, they spread newspapers on the floor and tip out large heaps of purple-skinned sweet potatoes behind the peeling stucco walls of the Foreign Ministry. The sweet potatoes are the produce of the ministry's cooperative; in the Lao People's Democratic Republic, revolution is a humble affair.

The scene is the same all over town. In the grounds of the general post office and the courtyards of Buddhist temples, lettuces are sprouting. In private gardens and schoolyards chickens and ducks scurry about; on every piece of waste land, holes are being dug for fish ponds.

When Thailand closed the frontier after shooting incidents in October last year, landlocked Laos was confronted with some harsh realities. Soviet airlifts and Vietnamese convoys could not continue indefinitely. Even now, with two points open, at Nong Khai and Muktahan, barges require sea-going papers and a doctor's certificate before they can cross the 100 yards of muddy Mekong River from Thailand.

Last Rice Imports

Next year, the market garden city will have to import 120,000 tons of rice, 20 per cent of national consumption. But most Laotians insist that it will be the last time.

Self-respect and self-reliance are the watchwords. "The Americans helped us to rely on them," said a former Vientiane official now working with the Pathet Lao. "The Socialist world is helping us rely on ourselves."

The shuttered shops, silent saw mills and empty workshops do not necessarily portend a future of poverty and deprivation. Rather, they testify to the fact that most of the 100,000 Laotians who have crossed into Thailand since the Communist take-over were the skilled and the educated, the traders and the entrepreneurs.

But while the avalanche of U.S. dollars has ended, this country, with a population of less than 3 million, is rich in tropical hardwoods, iron ore, coal, potash, gold, precious stones and hydro-electric potential.

Asian Development Bank (ADB) experts, who have just completed a six-week study of national resources and infrastructure complain that government officials are "will of the wisps." The fluctuations of the kip, valued officially at 200 to the dollar, and at 1,400 on a flourishing black market, make development budget estimates almost impossible.

"Right now, communications are horribly inadequate," said an ADB expert, "but their resources are like oil—leave it in the ground and it just gains in value," he said. "They've all the time in the world."

At 11 a.m., the former Banque de l'Indochine has closed for the day. "On Seminar," reads the sign outside its door and it does much to explain the halting progress made so far. For those aged 15 or more weekly seminars are compulsory. Many are bored and confused by attempts to raise their political consciousness. But if a person does not show up, the local cadres want to know why, so most people go.

Recently, foreign embassies were instructed that their Laotian employees would be required to attend 6 1/2 hours of political re-education a week.

"The Pathet Lao are high on politics but low on administrative and technical expertise," a United Nations official said. "The skills that won the war don't necessarily win the peace. Warehouses are full of medicines but there is none in the hospitals. New deliveries of rice have to be stored 30 miles outside Vientiane. Previously, officials used to steal it. Now, they don't know how to administer international aid," he said.

The solution is for a former Vientiane official to attach himself to a trusted Pathet Lao cadre. "Everyone's ends are met," the UN official said. "The cadre learns the ropes and the former Vientiane man feeds his family."

That he is able to feed them with little more than rice, fish sauce, chilies and an occasional piece of fish or meat, in spite of government shops selling at controlled prices, is a harsh economic reality.

"We'd like to pay our people a decent wage," said a foreign businessman, "but they'd be getting more than the prime minister."

Case of Nationalism

Many former Vientiane officials have joined the new administration in what seems more a case of nationalism than instant Marxism-Leninism.

"This is not Cambodia or Vietnam," said a young official who returned from overseas after the take-over. "Our war ended to the sound of the drum and the khene [a traditional bamboo flute], not rockets or mortars. My friends who've crossed the river will always be refugees but this is my home."

It is often a dangerous choice. In the buildup to the anniversary celebrations, several hundred persons were arrested including a U.S. Embassy employee and a respected intellectual who had been teaching Lao to British Embassy staff members. "It seems they were spending too much time with Westerners," a diplomat said.

Unofficial figures put the number of former royalist officers and administrators currently undergoing re-education in the far north of the country at about 6,000. "They can't be allowed to pollute others," said a former Vientiane official, himself the veteran of 18 months' re-education. "It depends on their rank and their attitude. Some will stay for 18 months, others as long as five years," he said.

Wives and children are being encouraged to move north and, when their husbands are released, create new farming lands from the forests. Few have accepted the offer and the handful of officers known to have been freed have been quick to cross into Thailand.

"The Pathet Lao really won by default," said a Western diplomat, "The aristocrats and businessmen were over the river before you could say boo. They didn't have the confidence to stay."

Continuing Resentment

The victors are the little men in baggy bottle-green uniforms and one look does much to explain continuing apprehensions and resentment. Most are small, stocky with craggy Sino-Tibetan features and the dark skin of the hill tribesman. The lowland Lao of the "newly liberated areas," with their fair skin and soft features, their Buddhism and their French manners, have long viewed them with contempt. That the Lao should be suffering physical hardships does not impress the Pathet Lao, after years of meager rations and chilling nights in their mountain strongholds.

But the four vice-presidential posts have been allotted respectively to a Lao, a Thai Dam, a Lao Theung and a Lao Sung—thus catering for all prejudices. And the two weeks of raucous celebrations earlier this month surrounding the first anniversary of Pathet Lao power has done more to break the ice.

There has been no such thaw between Russians and Chinese. The Chinese say that Laos has traded in one bunch of imperialists for another. The Russians ask why the Chinese are planning a road from their border south to Vientiane, when Lao's future lies to the east.

The Russians say they have 300 persons in the country, from embassy personnel to pilots, engineers, teachers and economists. Next year, there will be more.

"But they have not," said a relief worker, "set up a parallel administration, imported tens of thousands of East Germans or Poles as the Americans imported Thais and Filipinos, or hired thousands of local staff."

Anyone's aid is welcome provided there are no strings. Two U.S. Quakers and two U.S. Mennonites are still operating their missions and wherever Lao officials talk, they profess friendship toward the U.S. people and urge them to pressure the government "to heal the wounds of war."

6 Killed in South Africa

CAPE TOWN, Dec. 26 (Reuters).—Six blacks were killed today and 25 seriously injured in fighting between rival black groups in townships here, the South African Broadcasting Co. reported tonight.

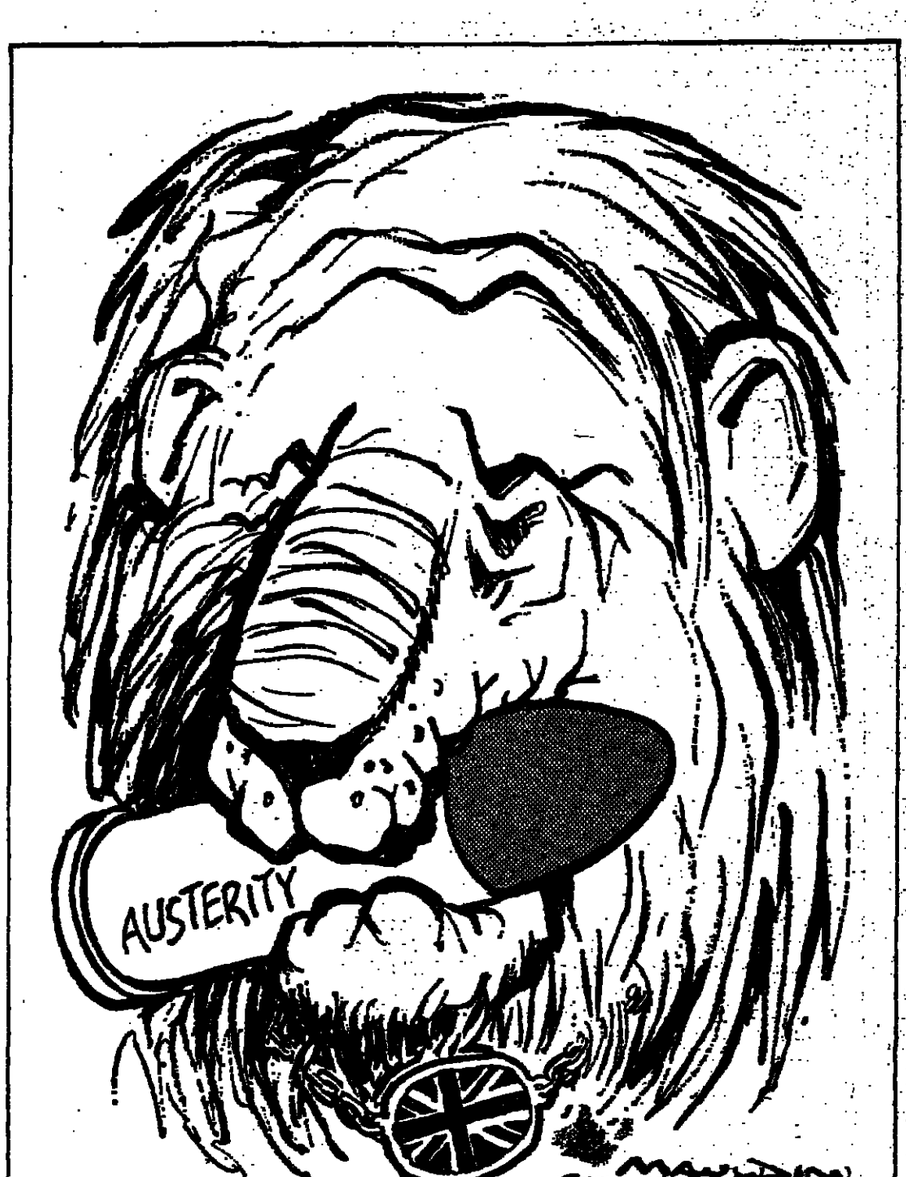
Moscow and the Olympics

The quarrel over television coverage of the 1980 Olympic Games in Moscow is advancing briskly, well ahead of schedule. But it is only the overture, you might say, to four long years of controversy over the next games. Sports are now a force in the world's politics, and the Soviet government is determined to ensure that the Moscow Olympics reflect the approved official version of socialist reality. The Russians want to guarantee that the television cameras deliver their message—and no other.

It is not hard to see what worries the Russians. Generally they do not allow foreign camera crews into their country at all. If an American television network wants to take film, it has to hire Soviet equipment and Soviet cameramen. The Russians decline to film certain subjects. You are not likely to see documentaries, for example, on housing conditions in the Soviet Union or on the care of the elderly. American correspondents in Moscow are permitted to write about those things and to talk about them on radio. But the Russians have a special respect for the impact of the picture on the screen.

There have been exceptions to their rule, of course. When President Nixon visited Moscow, he insisted on having U.S. television along. On the first trip the cameramen were cautious. But on the second, in 1974, they began filming interviews with political dissidents. As they began to relay the interviews to the United States through Soviet transmitters, the Russians hastily threw the switches and cut off the pictures. When the American commentators in Moscow began to explain what had happened, the Soviets cut them off as well.

The Olympics have become a great sounding board for political statements of every sort. It is the very intensity of the television coverage that invites it. There were the American athletes' black power salutes in Mexico City in 1968. There was the boycott of the Montreal games this year by most of the African countries, to express hostility toward South Africa. Worse, there was the Canadian government's attempt to ingratiate itself with the Peking Chinese by barring the Taiwan Chinese. Most spectacular and gruesome of all, there was the Palestine terrorists' attack on the Israelis at Munich in 1972. American television considered all those things news, along with a hundred disputes over referees, scoring and arrangements. But that kind of coverage is not what the Russians have in mind.



For the Russians, the current television dispute probably comes down to a choice between revenue and political control. By dealing with the big American networks, they can make more money. A price of $100 million for American rights has been under discussion—compared with the $25 million that ABC paid for the same rights this year at Montreal. But the networks want to use their own crews, with no censorship. Alternatively, the Russians could film the games with their own cameramen and offer a U.S. distributor a daily schedule to relay around the country. The commentator could be a pollyanna with a Russian accent—technically informative, perhaps, but highly selective.

There would certainly be less of the intolerably dull chitchat and vapid interviewing that ABC inflicted on Americans last summer. But you might also begin to notice that certain countries' athletes, and victories, were on the screen more frequently than others'. Perhaps the Russians had something of that sort in mind when they signed a highly tentative agreement last week with Satra, a New York firm. It is worth noting that Satra has had no previous experience in television. Its specialty is in dealing with the Russians, with whom its good relations have evidently been highly profitable.

The Olympic Games, as an institution and a tradition, are now in danger. They are not likely to survive the inordinate amount of manipulation and exploitation that looms ahead in Moscow. The television negotiations are only a part of the issue, but they accurately indicate the nature of the threat.

This experience strengthens the case for choosing one permanent location for the games in a country with a strong commitment to neutrality in this kind of political jockeying—for example, one of the Scandinavian nations. Another possibility is to rotate the games among several permanent sites on different continents. The scale and cost of the games have now arrived at a point at which only the richest and biggest can afford them, if the full facility is to be used only once. Even those countries are increasingly inclined to squeeze every last political advantage from an opportunity that, after all, comes only once in a lifetime.

Gumming the Bullet.

Ulster's Peace People Take on Paramilitary

By Jonathan Power

BELFAST—The peace people of Northern Ireland have now been around for four months. After a series of highly successful rallies which have been held all over Ulster, mainland Britain and the Irish Republic, they are changing their tactics. Their plan, according to their three leaders, Mairead Corrigan, Betty Williams and Ciaran McKeown, is to build up neighborhood groups in the ghettos of Belfast and Londonderry. They are determined to out-organize the paramilitary groups right in the area where the support for violence as a solution is strongest. But a word first on the peace movement's history.

It began in August when Mairead Corrigan's sister's children were mown down and killed by an out of control car, driven by a Provisional IRA gunman. She was interviewed on the BBC and with a burning passion she denounced the violence and death that had now caught up with her own family and pledged herself to do everything she could to end it.

"Then I heard," continues Miss Corrigan, "that this lady, Betty Williams, had started collecting signatures and was going to organize a peace rally for the Saturday (Aug. 14). I phoned to thank her and met her on Friday, the 13th just before the funerals of Joanne, John and Baby Andrew.

10,000 Demonstrate

"The next day was the occasion of the first rally, with 10,000 or more joining to demonstrate for peace, with banners from Twinbrook and buses from the Shankill.

"Then on Sunday, Aug. 15, we began to get inundated with requests from TV and radio, and reporters from all over the world."

This promising start was built on sensibly and quickly: First there was an emotional march of 10,000 working-class Catholic and Protestant women into Catholic Andersonstown and Falls Road. Outside St. John the Baptist School where the three children were crushed to death, the women prayed and sang hymns while a group of IRA youths on a garage roof jeered. Later things with gasoline bombs tried to burn down the house of Betty Williams. They were chased off by local men. This was followed the next weekend by a march of 25,000 persons in Ormeau Park.

The weekend after that about the same number marched through the loyalist working class neighborhood, the Shankill. Protestants poured out of their houses and embraced the marchers. Church bells rang. But on the way to the march 200 howling women and youths, sympathetic to the Provisionals, had attacked some of the peace women. Several were kicked and pushed to the ground. Three youths dragged one young girl around a corner and urinated on her.

In early October, the peace women were again back in the news with a meeting in Catholic Turf Lodge. The meeting had been called by residents because a 13-year-old boy had been killed by a plastic bullet fired by the army. Mairead Corrigan and Betty Williams had gone to the meeting in an attempt to calm it down and rechannel the high emotions. Although there was probably a majority in the audience sympathetic to what they had to say, the press reports focused on the anger of a group of Republican women in the front rows. When Mairead Corrigan tried to speak she was shouted down. Betty Williams was hit on the head and fainted. They had to take refuge in the sacris of a church for two hours befo they could escape.

Many have criticized their dec sion to hold this kind of mee ing, saying it stirs up the hornet nest. Personally I think t women are right. Confrontat is both good press relations, a good psychology. It shows t tough rank and file of P Protestant and Catholic ghett that the peace women are a softies. They will probably nev touch the real "hard men" "hard women" but there is no doubt that in time this kind tactic will work to undermine self-confidence of those who "go along."

Besides these well publici confrontations there have been whole series of rallies that h been held uneventfully with l numbers participating.

The hard question now Where do they go next, for the rally stage after a l month run—is for all intents purposes over. How do they in the public eye?

Most political observers I t ed to in Belfast and Dublin London consider that it is evitable that the peace p will fizzle. It will be impos they say, to sustain momen now that the initial period high emotion and marching over.

My view is less gloomy. I th the peace people have made right decision. They are turni the direction of their moveme into the building and streng ening of local groups trying get peace groups to form a the divide and working at elementary level of a cup of a chat and "What can we in our neighborhood?"

Moreover, the peace people aware that there are a num of clearly defined local issues that they can use to continue dramatize their cause. There the so-called "peace lines" barbed-wire fence 20-feet h in Belfast that divides Protestant ghettos from the Cat olic ones. Erected by the ar at the time of the mass riots it is a grim permanent reminde of the state of Ulster. The pea movement is talking about ta ing down the peace line neighborhoods where they ha strong peace groups on eith side of the line.

Inevitably such a step wou provoke the hostility of both paramilitaries and the army. T paramilitaries want it preserve because it serves the cause heightening tension. And t army wants it kept intact because their job is to maintain security. So it will be no eas job to get away with taking down. But take it down the should, at least in the parts where their neighborhood groups are strong, for nothing else would more effectively dramatize the the movement is a going concern at the ghetto roots where peace will in the long run be made o unmade.

Another well-defined target the unblocking of the walled-u abandoned houses on "The Inter face"—the streets that face eac other across the peace line. Th peace movement has already en couraged some local groups to this: bridging back into n perfectly adequate houses, tha were abandoned when fire-bomb ing by the opposing side made them too dangerous to inhabit. If they can resettle them with mixed populations that are pre pared to sit tight, even if th intimidated, they will have struc a major blow against the brutalit of the terrorist organizations.

Local Issues

There, then, are some of th directions the peace people a going or could easily go. Inde there is no shortage of local i sues that can be used to fo attention, keep themselves in th public eye, and develop the com mitment of their supporters. Th must never forget that they a in the midst of a psychologica war as much as a military one. The longer they can sustain the momentum, the more people they can keep committed and active, the more they confront us the real issues on which the para militaries thrive, the greater the chance there is of the paramilitary sympathizers withdrawing their support.

The more the paramilitaries feel they are threatened in this way the more likely they are to make mistakes which could lead into the peace people's hands. And the more they can convince public opinion that they are the initiative, the more likely the are to be able to undermine, or compel, the politicians to come to a political formula that will give everyone a fair slice of the cake.

A Tale of Two Presidents

By C. L. Sulzberger

PARIS.—French President Valéry Giscard d'Estaing has just written President-elect Jimmy Carter strongly endorsing the idea of a Western summit meeting of chiefs of government and suggesting that, under the rotation system of such conferences, the next should be held in Europe and as soon as can conveniently be arranged following the U.S. inauguration.

To assist in coordination of advance planning and also as a personal courtesy the French President also wrote President Ford informing him of the contents of his letter to Carter. The latter is actually the second exchange with the President-elect. The first was a congratulatory message after the Democratic victory and a polite acknowledgment from the winner.

Apart from this projected summit, already endorsed by the principal industrialized countries but whose site and date have not yet been set, nothing is foreseen here concerning a bilateral meeting between the French President and either Carter or Cyrus Vance, his designated secretary of state. Nevertheless, it is hoped—given existing world economic conditions, the change of administration in Washington and other current problems—that exchanges of views at the top will be encouraged as soon as possible.

Good Relations

Essentially, relations between the United States and France are good and it is confidently assumed they will continue so. If anything, there has been improved mutual understanding on the subject of nuclear nonproliferation although Giscard d'Estaing seems to feel this topic has been seriously misunderstood or misrepresented in the media.

For him it is not at all—and never was—a bilateral matter but one concerning all nations engaged in either military or peaceful atomic manufacture: the United States and France, indeed; but also the Soviet Union, West Germany, etc.

Full agreement does not yet exist but, although some aspects remain at issue, this year has seen increasing parallelism between the views of Washington and Paris. There had been a special difference over France's project to sell a reprocessing plant to Pakistan as part of an overall nuclear deal. That project seems to be fading away.

Dangerous Risk

This, like West Germany's similar proposed sale of such a plant to Brazil, is only an aspect of the general and increasingly dangerous risk of proliferation, and the whole question of how the cycle of re-treating nuclear waste or used reactor cores is what is truly at stake.

France in no way wishes to abet proliferation; but it does want to insure that its own technology is on a fully equal basis with those of other manufacturers in permitted world markets. Giscard d'Estaing appears to feel recent modifications in French policy have achieved that aim.

Early in 1976 there was a certain difference in the approach of France and the United States to African affairs. Paris felt Washington was more or less paralyzed in approaching that area. But since then Secretary of State Henry Kissinger started his southern African initiative, seeking a peaceful settlement of the Rhodesian and Namibian crises.

Western Action

The second aspect of Africa's problem is that it is a poor continent, receiving substantial arms shipments from the Soviet bloc although its economy is in great difficulty. Giscard d'Estaing intends to tell Carter the first time they meet that here must be concerted Western action on this dangerous situation.

As for U.S. European policy, France does not favor any new American initiatives with respect to the European community. Europe itself must settle its own problems; meanwhile, Paris hopes to proceed with direct elections of community assembly representatives.

The only serious bilateral irritant to Franco-American relationships could develop over the supersonic Concorde aircraft, now permitted to fly only to Washington. If the plane is not eventually allowed to land in New York—or, even worse, if there is a move to ban it totally—there would be keen resentment by French public opinion and a suspicion that the United States was seeking to inhibit French technological competition.

Giscard d'Estaing appears to recognize the need to maintain global strategic equilibrium but he cautioned against premature assumptions that the Soviet bloc has achieved military superiority over the West. For him it is wise to remember the weak economic base on which the Communist arms pile is built.

One should avoid too hasty a judgment minimizing the West's own strength; nevertheless, France has increased its military contribution to the North Atlantic alliance. However, it sees no need for revision of the existing NATO setup, despite the fact that French forces are kept outside the allied peacetime command structure.

Two Cheers for the Cabinet

By James Reston

WASHINGTON.—Jimmy Carter's Cabinet has been given what Damon Runyon used to call sort of a "medium hello" in this part of the country. We are told he's going into the playoffs with his second or third team and that they are a collection of competent retreads who are about as inviting as an open grave. Herewith a dissent:

Carter won the election by a very narrow margin, which reflected the doubts of a nation that sensed the need of change but was vaguely anxious about changing to a comparatively unfamiliar candidate. This was Carter's first problem: he had captured the presidency but had not won the confidence of the nation, not even of many of those who voted for him.

He is accused of disappointing his followers and reassuring his opponents by selecting a team of dim but efficient mechanics: not Eisenhower's "nine millionaires and a plumber," but nine plumbers and a millionaire.

Short on 'Newcomers'

There is, of course, something in this charge, but not much. At least, not yet. It is true that he promised more "newcomers" than he picked, and picked a lot of experienced Washington types he denounced in the campaign, but if he had drafted a Cabinet that satisfied the labor and black constituencies that undoubtedly helped him win the presidency, it would not have been a very merry Christmas in America.

The people are still wondering where the United States is going in the last years of the seventies. There are almost eight million unemployed, and when the Christmas bills come in, nobody is likely to think inflation has been licked. In short, it is rather odd that Carter should be condemned for picking a Cabinet of efficiency experts and experienced problem solvers.

Maybe the country needs a collection of brilliant young innovators, with a different vision of the coming age—you could make a good argument for it—but Carter's critics have not come up with so many new brilliant draft-choices, and the country is obviously looking at the moment for reassurance more than anything else.

Good Balance

Therefore, the question is not whether this is the ideal Cabinet, but compared to what?. Given Carter's problem of having to govern the whole country rather than pay off his excessive promises, he has kept a fairly good balance.

Compared to the Ford White House staff and Cabinet—forgetting Nixon for Christmas—Carter's choices to head most of the major departments compare favorably with their predecessors, and the men who will be with him in the main staff jobs around the Oval Office—Jody Powell, Hamilton Jordan, Stewart Eizenstadt, Jack Watson, etc., are not the sort you would hand your hat to by mistake, and may indeed be the best assistant coaches around here since Roosevelt came to town.

There is another point about this Cabinet that may be important. Carter seems to have the original idea that they should be judged, not merely as individuals, but collectively as an executive committee or council of presidential advisers that will work together to get this federal bureaucracy under control.

Carter has paid some attention to fundamentals, to the backing and tackling of this problem, which is a hard, dreary, and often vicious business, not usually done by spectacular prima donnas.

So maybe the test of his Cabinet is not how new or innovative the members look, but what he does with them after he is in a position to call the signals.

Meanwhile, he has a lot more appointments to make, and he still has time to put a little shine and poetry into this new collection of rather dim and solemn efficiency computers. He needs some speechwriters, who have a sense of humor and a sense of history, to help him reduce all the diversity and complexity of our time to some kind of identity the people can understand.

The Carter Cabinet

In putting together his Cabinet, President-elect Carter had a choice to make. He could have symbolized the overthrow of the old Eastern establishments—the law firms, foundations, banking houses and universities of the Boston-to-Washington corridor—by assembling a group without connections to those institutions. He could have looked for outsiders, new to power and unfamiliar with existing networks of influence, men and women with an eagerness for innovation.

If Carter had been a populist from the red clay country and nothing more, he might have shaken up the centers of established power in that fashion. But although there is a populist strain in his political philosophy, two other strands are dominant. One is respect for competent performance, the zeal for efficiency of an engineer and former Navy officer.

Sophisticated critics may scoff, but Carter takes seriously his pledge to reorganize the government, trim its fat and make it more responsive. For this purpose, he apparently feels a greater need for practiced hands than for new faces. He clearly looked for men and women who know how government works. This is undoubtedly why nine of his 17 Cabinet-level appointees saw service in previous administrations and another three are politically sophisticated members of the House of Representatives.

A second major factor is Carter's view of himself as a liberal. He seems to be a Southern liberal in the tradition of Estes Kefauver of Tennessee, Lister Hill of Alabama, and Frank Graham of North Carolina. So often defeated in its own region, Southern liberalism has never had a modern exemplar in the White House with the partial exceptions of Woodrow Wilson and Lyndon Johnson. Carter has given one-quarter of his appointments to Southern liberals—Juanita Kreps (Commerce) of North Carolina, Ray Marshall (Labor) of Texas, Andrew Young (United Nations) and Bert Lance (Management and Budget), both of Georgia.

Most of his other domestic appointments have also gone to liberals, with the two striking and disconcerting exceptions of attorney general-designate Griffin Bell and prospective secretary of energy, James Schlesinger. If the President-elect meant half of all he said concerning energy and the environment over the last two years, this relationship with Schlesinger is sure to be prickly at best.

Bell's judicial record, his general views on civil rights and his close political association with Carter raise serious questions about his qualifications to lead the Justice Department. He was clearly not the most distinguished contender for the crucial post of attorney general—a post that calls for determined and enthusiastic leadership in many areas basic to the fate of social justice.

In the realm of foreign affairs and defense, Carter's appointees are conspicuously able. However, the principals in these areas—Cyrus Vance, Harold Brown and Zbigniew Brzezinski—were all participants in the Kennedy administration's policy-making in its cold war phase, and the Johnson administration's early Vietnam policy as well. Men's judgments change, and it would be folly to rule out these distinguished former public servants because of views they held a decade ago.

But especially because foreign policy is the area in which Carter is least experienced, the advice given him by his new foreign affairs team will be of crucial importance. It thus is particularly important, too, for these men, as a team, to shun some of the earlier orthodoxies of U.S. foreign policy.

On the whole, the President-elect has assembled a strong Cabinet, its members well-versed in the nation's problems and able to start work effectively on Jan. 20.

—THE NEW YORK TIMES.

International Opinion

Mideast Pace Quickens

The pace of events in the Middle East, which had already accelerated in the past few weeks, has quickened yet again with the resignation of Yitzhak Rabin, the Israeli Premier, and the strong possibility that the Israeli general election will now take place in the first rather than the second half of the year. At the very least, the bringing forward of the election date should remove the Israeli excuse that the country can make no substantive response to Arab or U.S. diplomacy for the best part of 12 months on the grounds that public opinion must first be consulted. Public opinion is now likely to be consulted in the spring rather than the autumn, which is time enough to fit in with the diplomacy already under way. Coupled with the events that have already taken place, the early election should also help to concentrate Israeli minds on the issues at stake. . .

—From the Financial Times (London).

Private Enterprise Revived

Peru's New Regime Is Ending Era of Socialist Experiment

By Juan de Onis

LIMA, Dec. 26 (NYT).—The Peruvian military government, disillusioned with its experiment in Third-World socialism, is reviving private enterprise in much of the economy.

President Francisco Morales Bermudez, leader of the moderates who displaced an influential left-wing group in the armed forces in July, has recently spoken of holding municipal elections, which would mean the beginning of the end of an eight-year military monopoly over political affairs.

These liberalizing tendencies by the military dictatorship are taking shape under the stress of an economic crisis and against the active resistance of Marxist groups that previously held influential positions in government agencies and unions.

Repressive measures by security forces against leftist activists have been severe, although not as violent as in Chile, Argentina or Uruguay.

Gen. Luis Cisneros, the minister of interior, said in an interview that in early December 240 persons were being held under the emergency powers imposed in July. About 20 more have been expelled, including several journalists, and several others have taken asylum in embassies.

Union Delegates Out

Labor and Roman Catholic Church sources said that private employers, as well as some state enterprises, such as the naval shipyards in Callao, have been dropping union delegates and labor representatives from company management boards. In the past, such actions would not have been tolerated by the Ministry of Labor, where the leftist Confederation of Peruvian Revolutionary Workers had influence.

The government says that its policies are neither anti-labor nor pro-capital, that they represent a practical approach to restore production and investment without abandoning the goals of social reform and worker participation in company profits.

But Peruvian socialism, as it was conceived by the Marxists who have been displaced from influential positions, is being redefined by actions that point toward a form of capitalism based on small enterprises and cooperatives, with big ventures under state control.

The first sign of this has been the return to private operators of the anchovy fishing fleet that supplies the state-owned fishmeal plants, Peru's largest single industry.

Under the former president, Juan Velasco Alvarado, a radical who led the military coup of 1968, the entire fishmeal industry was nationalized in 1972, and the fleet's 100,000 fishermen became state employees.

With a declining catch and rising costs, the state was losing $100 million a year in the fishmeal industry when Gen. Morales Bermudez and the high command of the armed forces toppled Gen. Velasco.

Large Catches

President Morales Bermudez announced that the boats would be sold to small private fishing enterprises, formed by the fishermen with up to three boats each. Despite violence from union leftists, countered by arrests, fishermen in groups and cooperatives bought 430 of the state's 529 boats. They have been bringing in large catches since fishing was resumed in October.

"We are all making more money, the owners and the workers," said Eduardo Eyzaguirre, a fishing captain who with other captains and friends bought three boats that employ 40 workers. "Those who didn't get in on this opportunity blew the chance of a lifetime."

Another basic change has been announced in the Industrial Community Law. Under it workers were given not only a share in the profits of all private enterprises, but a progressive ownership of the shares until achieving a 50-50 parity with the capital shares.

Equity Shareholders

In practice, labor's share of ownership never passed 30 per cent, entitling workers to a minority on company boards. Now, labor shares will be distributed to individual workers, who will receive dividends, as well as profit-sharing up to 10 per cent of the earnings. This will make thousands of workers equity shareholders but management will remain with the capital investors.

All the shifts from doctrinaire socialism are conditioned by the economic crisis that precipitated the fall of Gen. Velasco. President Morales Bermudez, a former minister of economy, has brought some order into the budget after a 60-per-cent devaluation in June. Balance-of-payments difficulties have been eased by loans from foreign banks and with new copper and petroleum exports expected next year, the government expects an increase in available foreign exchange.

Dom Duarte, 69, The Portuguese Pretender, Dies

LISBON, Dec. 26 (UPI).—Dom Duarte Nuno, 69, the Duke of Braganza, pretender to the throne of Portugal and titular head of the nation's small Monarchist party, died Friday in a hospital. The cause of death was not announced.

The duke became the pretender when his cousin, Manuel II, the last reigning king, died in exile in 1932 without a male heir. The Portuguese monarchy was overthrown in 1910.

He is survived by his oldest son, Dom Duarte, prince of Beira, and two other sons.

After being named pretender, the duke was allowed to return to Portugal by the rightist regime and lived quietly on an estate near Oporto. He became politically active after the military ousted the rightists in 1974 and accepted an invitation to become titular head of the Monarchist party, which polled 0.52 per cent in last spring's legislative elections.

Viktor Stanitsyn

MOSCOW, Dec. 26 (UPI).—Viktor Stanitsyn, 79, protégé of Stanislavsky who for four decades was a leading actor, producer and art director of the Moscow Arts Theater, has died, it was announced.

Albert Z. Manfred

MOSCOW, Dec. 26 (UPI).—Prof. Albert Z. Manfred, 70, a specialist in modern French history and the history of French-Russian relations, has died, the government newspaper Izvestia said.

Grigoriy A. Melnik

MOSCOW, Dec. 26 (UPI).—Provincial newspapers have reported the death of Grigory A. Melnik, 67, retired Kazakhstan Communist party official.

Dino Olivetti

IVREA, Italy, Dec. 26 (UPI).—Adriano Olivetti, 64, former general manager of the business machine and typewriter industry founded by his father, died today, the family said. Mr. Olivetti was general manager of the company between 1946 and 1950. In 1950, he founded the Olivetti Corp. of America and served as its president and manager.

Jewish Activists Freed in Moscow

MOSCOW, Dec. 26 (UPI).—Soviet authorities released during the weekend all 18 Jewish activists held under house arrest and at least 30 more detained for questioning in the wake of a banned symposium on Jewish culture in the Soviet Union, dissident sources said yesterday.

The sources said the exact number of those detained for questioning was not known because the telephones of many Jews had been cut off.

Lev Ulanovsky, a scientist seeking permission to emigrate to Israel, said that he and a number of others among the 30 or more are picked up for questioning today were accused of parasitism. Soviet law provides that able-bodied men must be employed and failure to work for 10 months can lead to trial on the parasitism charge.

Air Controller Blamed in Crash Over Yugoslavia

BELGRADE, Dec. 26 (AP).—An air traffic controller's mistake was largely responsible for the worst in-flight aircraft collision in history, killing 176 persons aboard British and Yugoslav airliners, according to a three-nation investigating panel.

The Yugoslav-British-West German commission, announcing its findings in the Sept. 10 collision over Zagreb, Yugoslavia, said:

"The catastrophe was a consequence of certain shortcomings of the district flight control, Zagreb, of the flight controller and a coincidence of a number of other circumstances which contributed to the collision."

It noted that there was "great visibility" at the time of the late-morning collision at 33,000 feet involving a DC-9 of the Yugoslav Inex Adria Aviopromet company, bound for Germany, and a British Airways Trident. The commission said the Yugoslav plane's pilot got permission to climb to a higher altitude, but that the altitude change was ignored by an air controller who was busy "following other airplanes in his charge." Owing to this, the air controller "failed to implement the regulation procedure for the separation of aircraft," the panel said.

Egypt A-Scientist Missing in Prague

CAIRO, Dec. 26 (UPI).—An Egyptian atomic scientist has disappeared during a mission to Prague, the weekly newspaper Akhbar al Yom said in yesterday's editions.

It identified him as Nabil el-Kalfini, 37, a professor at Ein Shams University in Cairo. It said he had been sent to Czechoslovakia "on a scientific mission for the university."

The newspaper said Egypt asked Interpol, the international police organization, to help in the search for Mr. Kalfini after the Prague government reported through its Cairo embassy that all its efforts to locate him had failed.

In Underground Complexes

Total Indoor Living Provides Weather Escape in Montreal

By Henry Giniger

MONTREAL, Dec. 26 (NYT).—It has been minus-15 degrees centigrade in Montreal for days, but on the sidewalk terrace of the Salammbo Café one can drink comfortably in shirtsleeves.

The café is on a Parisian "street" that has just opened here indoors as the latest manifestation of the weather-protected way of life that this northern city has pioneered and continues to build into an ever-widening network.

There are two ways that Montrealers can escape bitter cold, ice, snow and slush. They can go to Barbados or some other warm spot, and many do. Or they can live virtually underground—or at least inside glass and concrete—while doing the things that make up daily living: sleeping, eating, working, shopping and being entertained.

For 14 years, ever since the city's first underground complex in the Place Ville Marie opened to a skeptical public, Montreal has gradually gone underground, or at least indoors, and urban planners from throughout the world have been drawn here to see this demonstration of how a city adapts to a rigorous climate.

Weather Survival

There are four miles of underground walkways, all lined with shops, restaurants, snack bars and theaters, and the network is expected to grow to six miles in the next 10 years. But that tells only part of the story. No new building, whether for apartments or offices, goes up in Montreal without some services that provide for survival in harsh weather.

There are Montrealers who can get through the winter without an overcoat. In posh Westmount Square, tenants in new high-rise buildings have only to take an elevator to find a supermarket, a bookstore, a bank, a movie theater, a bar and restaurant, and some expensive specialty shops such as Givenchy and Pierre Cardin. If the tenants feel more adventurous they can take the subway to a concert at the Arts Center several miles away without going outside.

At the beginning, there was another idea behind the underground network. Vincent Ponte, a 57-year-old Bostonian who became Montreal's best-known urban planner, saw a multilayer plan as a way of avoiding congestion in the center of the city. Cars on one level, pedestrians on another, trains and trucks still further below, was his way of avoiding the tangle and pollution that afflict most city centers. The fact that people were also protected against the elements was a bonus.

Leonardo's Concept

"It was not my idea," Mr. Ponte said. "It goes back to Leonardo da Vinci, who was designing multilevel cities, with pedestrians on one level and carts on another, back in the 15th century."

Mr. Ponte got his chance to put the idea into practice when the Canadian National Railway finally decided in the early 1950s to do something about a big hole it had created in the 1920s. The company, which owned the property, had excavated to lay tracks and build a station but most of the desolation remained because first a depression, then a war made money scarce.

William Zeckendorf, the late New York developer, offered a development plan and, in 1962, the first high-rise buildings with underground galleries were completed in what was called Place Ville Marie.

Store rentals were cheap because few merchants at the time were attracted by the idea of plying their goods underground. But the public took to it so well that store locations are now at a premium and rents are among the highest in the city.

The Bonaventure Complex near Ville Marie opened in 1967 and the two are linked by the Central Railway Station to form an underground network that covers 22 acres. At least a quarter of a million people enter and leave it every day.

Divided City

Those who are able to spend their entire day in this complex look relaxed in suits, shirtsleeves and blouses.

Montreal is an economically and ethnically divided city. The ethnic French outnumber the English-speakers by 2 to 1, but almost all of the weather-protected system has been built in the English-dominated section because that is where most of the money is.

Government and semipublic companies have had to step in to help development in the less affluent eastern part. In 1962, the Arts Center, with a concert hall and theaters, was built, and last year a huge complex of office towers and an enclosed multilevel shopping mall was opened. In the mall, children can watch a puppet show while their parents are shopping.

This area, known as the Desjardins Complex—which will soon be linked underground to the Arts Center—was financed partly by publicly run savings institutions. Now the French can keep warm, too.

Britain Reduces Its Lending Rate

LONDON, Dec. 26 (Reuters).—Britain cut its base interest rate from 14.5 to 14.25 per cent. Friday, reflecting a better recent performance by the pound.

In October, the Bank of England had set the minimum lending rate, which sets the trend for all interest charges, at an all-time high of 15 per cent to help the declining pound.

Since then the pound has climbed back from levels well below $1.60. When London's foreign exchange market closed for Christmas at noon Friday, the pound stood at just below $1.69.

French Suicide Couple Is Run Over by Train

VALENCIENNES, France, Dec. 26 (UPI).—Two young lovers committed suicide Christmas Eve by lying down on a railroad track and embracing as a train ran them over, the police reported.

They said the couple lay down on the track and were run over by a freight train between Raismes and Beuvrages, in northern France. The driver, who was unable to stop his train before it hit them, said later that all he saw was a kiss exchanged by the couple before they were crushed by the wheels.

Matching Mind and Body

Transsexuals: Caught in Web Of Medical and Social Issues

By Betty Liddick

LOS ANGELES, Dec. 26.—In the beginning she hated going out in public. She would hole up in the apartment and let the phone ring and live on raisins for days. When she did go out, she hid her hands. They were suitable hands for a football player perhaps but broad and thick for a woman. She would pile on more makeup than a prostitute and slouch along, trying to look shorter than 5 feet 7 inches. She was tormented. Could anybody "read her"—find her out?

These days Canary Conn strides along Hollywood's Sunset Strip full of confidence, blonde hair flying, face unmade-up and tilted toward the sun.

Eight years ago, she had tried to kill herself. She had stepped in front of a car but the car stopped.

It was then that Canary Conn, who was then Danny O'Connor—an 18-year-old husband, father, winner of the best male vocalist award in a national talent contest—decided life was worth living—as a woman. She had surgery to change male genitalia to female.

After the final operation, when she nearly bled to death in a Tijuana hospital, she stopped caring what others thought about her. She realized she had changed her sex for herself, not the world.

"I'm happier than I was before," Miss Conn says, "but I won't really be happy until social pressures stop, until people start to realize transsexuals are human beings."

Career Stalled

Miss Conn's singing career is stalled. She has been unable to get a recording contract, as she did as a man. Her sisters hold her responsible for the "murder" of Danny. Romantic love eludes her. "Men just don't understand this trip," she said, about the sex change. "It just freaks them out, justifiably so. It's not an easy life."

And if it is difficult for Miss Conn, who has feminine features, a measure of talent and self-assurance, it must be anguish for others—those who go public and risk ridicule and those who submerge themselves in happy obscurity, praying no errant Army record or job reference will surface to betray them.

Wendy Hall, a transsexual who runs a music service for composers and songwriters, says: "Sometimes you hear the dumb remark that you have the best of both worlds. More often than not, you have the worst."

Although many insist they have no regrets, only one out of five transsexuals makes a happy adjustment, according to estimates from the Erickson Educational Foundation, an informational clearing house on the subject. Female-to-male transsexuals seem to have an easier time because, even with slight builds, they blend into society.

Causes Uncertain

It is estimated that there may be as many as 20,000 transsexuals in the United States, but no one can say for sure. Nor can experts agree on the cause. One theory holds that transsexualism may be the result of prenatal hormonal influences. Another blames mothers who keep children close to their bodies. The mothers may be latent homosexuals, a researcher believes, and the male infants never do develop a sense of masculinity. The data is not conclusive, however.

Generally, transsexuals are defined as men or women whose mental representations of themselves are in conflict with their anatomies.

Transsexuals differ from homosexuals who, if they are men, know they are and want to have sex with another man. Transsexuals know they have a male body but regard themselves as women.

Transvestites are also different. They derive sexual satisfaction from dressing in the clothes of the opposite sex. Transsexuals do so only to feel more comfortable.

Transsexualism is not a new phenomenon. It has existed in mythology, Greek and Roman history and the tribal culture of North American Indians.

However, it was Renee Richards who brought the subject to national consciousness.

Miss Richards, who had male-to-female surgery, insisted in August on her right to play tournament tennis with women. She ignited a controversy among athlete and nonathlete alike.

Such cases present a tangle of medical, legal and social issues and, almost inevitably, stir moral repugnance.

"Especially disturbing—and not to the religious alone—is the body mutilation and destruction of fertility that must accompany sex-transformation procedures," psychiatrist Robert Stoller wrote in his book "Sex and Gender."

"We don't know how many transsexuals committed suicide because of their inability to get along in a hostile world," says Zelda Suplee, director of the Erickson foundation.

Some specialists, such as Dr. John Money of Johns Hopkins University and Hospital, suggest that transsexualism forces an examination of the similarities between the sexes.

It is precisely this reason, Canary Conn believes, that many people are unable to accept them. "Transsexualism brings the whole dark secret out of the closet: There are varying degrees of male and female in all of us.

"People have always believed there was black and white and now they're seeing gray. A transsexual is a walking, living definition of the differences between a man and woman."

Surgical Problems

Despite the supposed blurring of sex roles these days, transsexuals say they could not feel complete without the surgery to match mind and body.

Although cosmetically remarkable, surgical results are far from physically perfect. The Stanford University Gender Dysphoria Program in 1974 reported 18 of 38 patients had postoperative complications.

More than a dozen university hospitals and private clinics in the United States offer the operations.

Reputable centers require psychiatric evaluation, a period of living in the new role and hormonal treatment. Surgical techniques vary but the usual male-to-female procedure is to remove the penis and testes and use the penile tissue to form a vagina. Cosmetic surgery may follow, including breast augmentation.

A hysterectomy and mastectomy are performed in female-to-male patients. Artificial testicles are implanted and a penis is constructed from skin grafts. In one common procedure two prostheses are fitted postoperatively, one that provides sufficient rigidity for penetration during intercourse, another that serves as a urinary conduit.

The legitimacy of surgery for true transsexuals is not open to question, especially since there is no psychiatric treatment for them, said Dr. Charles Stone, psychiatrist at the University of California at Los Angeles. "These people are not freaks. They are not delusional. They have a dilemma."

Too Many Cases

But at the same time Dr. Stone, other specialists and a growing number of transsexuals fighting for their civil rights contend that there are an excessive number of surgeries today. Too many are being done on the wrong people and too few cases are adequately followed up, they say.

Irresponsible sex-change surgery may doom some individuals to social suicide, transsexuals said. They cited the men who simply do not pass as women.

"They should have just tried to live the way they were because they were at least more successful that way," one transsexual said. "Unless they shut the door and never look in the mirror, they are going to be detected every time.

"They have to go to the gas station, the drugstore, the grocery, and they're going to be called 'sir' in all those places. That's the horror story.

"There are a lot of transsexuals who are mistakes."

One who says he is not, Jude Patton, 36, is co-owner of a California store that distributes sex education books and materials. The member of a small self-help group for transsexuals, he is a husky, bearded man who four years ago underwent sex reassignment at a cost of $6,500.

"I frankly never have been happier in my life. My only regret is that I didn't have surgery sooner. I had conflicts in childhood, yes, but girls have an easier time as a tomboy. You're respected. You can play sports.

"I did know I was different. I assumed I was gay. And although I was accepted as gay, I still felt different. I hated my body. I hated my breasts. I hated my hips. I always wanted to have long sideburns. My heroes were Roy Rogers and Robin Hood.

"After high school I wore a crew cut and levis. I couldn't get a job. I came to California from St. Louis and the first day in the promised land I got a job, working for a vet.

"I heard about the program at Stanford and once the door opened, it opened all the way—a miracle. Hormones made my voice drop and my fat changed from my hips to above the waist. Muscles started to form. I felt whole."

Britons Put Off Day of Reckoning By Making Their Holidays Stretch

LONDON, Dec. 26 (NYT).—Nobody disputes the fact that Britain is faced with the formidable task of working itself out of a serious economic situation. But such things are not being dwelt upon for the next seven days, the longest Christmas holiday in memory here.

With Christmas falling on a Saturday—and Boxing Day, another traditional day off for the British, falling on a Sunday—tomorrow and Tuesday have become public holidays.

Since Friday evening, little or no public transportation has been running. It resumes tomorrow. Newspapers, which last appeared Friday, do not return until Tuesday.

Furthermore, car factories, mines, construction sites and thousands of other businesses large and small decided to start the holiday Thursday. Thus by Wednesday, office parties were under way.

New Year's Day is an official holiday, too, so most businesses have tidied up the situation and named Tuesday, Jan. 2, as the day to be back at the mill.

Civil servants can make the break last even longer. A spokesman for the Civil Service Department said that "staff are entitled to days off instead of the weekend holiday days, which are normally bank holidays; plus one day, which most of them are taking on Wednesday." What he means is that, except for those disbursing welfare, most government employees will be off duty for about six days.

UN Orders Special Session In 1978 on Disarmament Issue

By Kathleen Teltsch

UNITED NATIONS, N.Y., Dec. 26 (NYT).—At the insistence of the smaller countries of Asia, Africa and Latin America, the General Assembly has agreed to the calling of a special session on disarmament in 1978 and set up a 54-member preparatory committee to meet here in March.

The decision satisfies the long-sought demands of Third-World countries hoping to use a large public forum to put pressure on the big powers for a reduction in their nuclear arsenals.

The selection of the preparatory panel was left unfinished by the departing diplomats when the 31st session was suspended Wednesday night, leaving the Assembly president to announce its members later.

The committee will include the Soviet Union, which supported the Third-World initiative, and the United States, which has agreed to serve but has expressed misgivings that the complex disarmament issue is to be handled as a public debate by participants from 147 countries possibly lacking expert knowledge.

China Keeps Aloof

China has served notice that it would not take part in the preparations. Delegates say that Peking still could decide to attend the Assembly, if not its preparations. It is pointed out that China generally has kept aloof of disarmament negotiations and the impression is left that Peking will continue to avoid any involvement until it develops a nuclear deterrent capability.

Meanwhile, it has used the debates here mainly to accuse the United States, but particularly the Soviet Union, of accelerating the nuclear arms race while preaching détente to lull world public opinion.

Third World sponsors say that the timetable allows the Soviet Union and the new U.S. administration to resume bilateral negotiations.

The five-week disarmament debate in the Assembly just concluded reflected growing frustration among the nonnuclear countries with the slow progress of the Soviet-U.S. talks to limit and subsequently reduce the number of strategic nuclear weapons.

Absence of Results

This mood was reflected in a series of resolutions, including one that "regretted" the absence of positive results during the last three years and expressed concern about the very high ceilings of nuclear arms set for themselves by both powers.

The Third-World group also pushed for Assembly approval of resolutions to press the two major powers to agree to extend the 1963 limited nuclear test ban to include underground tests and to obtain an accord for a treaty prohibiting the production and stockpiling of chemical weapons.

During the 31st session, the Assembly approved a new convention prohibiting military or other hostile use of environment modification techniques, a treaty based on a Soviet-U.S. draft and hailed by both as a major accomplishment. Disagreeing, a number of other countries have been saying the treaty is of value but is on a peripheral disarmament topic and not of major consequence.

Albania Embassy Target

PARIS, Dec. 26 (AP).—A bomb apparently thrown from a car exploded in front of the Albanian Embassy early today, breaking windows in the building. No one was hurt and there was little damage.

Warsaw's Critics Resist Oppression Or Appeasement

By Peter Osnos

WARSAW (WP).—Nearing the end of a year that saw its declarations of economic success turn to admissions of failure, Poland's Communist leadership faces an array of increasingly outspoken internal critics that the regime seems unable to appease or oppress—although it has been trying to do both.

Popular discontent that could be parried or dismissed in boom economic periods—such as the one this decade that ended with widespread worker protests here last June—now confronts the leadership with a depth of opposition sentiment that is easily the most significant in Eastern Europe.

"We can certainly not complain that our peoples' moods and sentiments are lukewarm and insipid," wrote Mieczyslaw Rakowski, a Central Committee member who is editor of the leading weekly Politkya. "The Poles of 1976 are engaging in vehement and sometimes ferocious discussions which are in most cases creative, socially positive and beneficial to socialism."

The exception to that positive assessment of dissent, however, is a major one: The country's powerful Catholic hierarchy, always the party's most influential adversary, and a small but eloquent group of intellectual freethinkers have found important common ground in defense of workers jailed or fired from their jobs because of their roles in the outburst over food-price rises that the regime then hastily withdrew.

Keystone.

Edward Gierek

Human Rights

To the obvious discomfort of the leadership, Stefan Cardinal Wyszynski of Poland has called repeatedly from his pulpit for an amnesty and for greater official respect of human rights. Meanwhile, distinguished Polish economist Edward Lipinski has traveled in the United States in recent weeks, raising money for the workers' cause. So formidable an alliance on any issue cannot be ignored in Poland—and it has not been.

Most of the arrested workers have been released from prison—according to a reliable but unconfirmed estimate about 35 are still being held—and many of them have even been rehired by their former factories. Yet efforts at intimidation are also continuing: an appeal signed by about 1,200 workers at the Ursus tractor factory near Warsaw prompted threats from security police against the signers and their families.

These contradictory trends reflect the regime's confusion over how to proceed. Some of the younger, little-known supporters of the Workers Defense Committee, on which Mr. Lipinski has been a prime mover, have been harassed by police or dismissed from their jobs. At the same time, Jerzy Andrzejewski, a writer who is a key figure in the group, still writes weekly columns in literary journals and his books are published. There have been no arrests.

Finally acknowledging the committee's existence last week, the party's official newspaper, Trybuna Ludu, derided it as a "circle of opponents of the socialist system and social construction . . . harmful for the interests of our state and society." Privately, however, senior party publicists concede that the fate of the workers and the organizing that has gone on in their behalf has come to symbolize the ferment of Poland today.

'Deep Furrows'

"We must be quite frank," Mr. Rakowski wrote in a remarkably forthright article recently, "about the fact that we were astonished by the reaction to the proposal [to boost prices of foodstuffs by an average of about 70 per cent] on the part of some sections of the working class and that this reaction has driven deep furrows in our thinking."

The paradox of assailing opposition and encouraging it is in keeping with Poland's current spirit. The leadership's best hope for restoring the authority lost in the prices fiasco is to fashion the debate and seek to control its limits rather than merely drowning it out. Candor is essential.

"Our work," said Trybuna Ludu, "is not easy and nobody says that it is free . . . of sometimes subjective errors and mistakes. Poland has been created not by robots, but by human beings [who] . . . sometimes want to achieve their beautiful social and personal life goals more quickly than calculated caution indicates. . ."

Polish Communist party chief Edward Gierek and his colleagues plainly want the focus of the controversy to be economic, a search for ways to get around the acute shortcomings in agriculture and consumer industries that the prices upheaval revealed anew. If the problems are economic, they reason, so too should be the solutions.

At a recent Central Committee plenum, Mr. Gierek attributed the current tensions to "the high rate of social and economic changes" during his six years as party leader. "The price of stagnation and backwardness, as we know from the past, would have been much higher." But rather than tackle fundamental matters such as productivity, the measures enacted so far seem designed primarily to assuage the public.

Most of Poland's private farmers have been assured that collectivization will not be forced on them and they are being encouraged to will their land to their children. The country's thousands of small businessmen—proprietors of little factories and shops—have been assured greater access to modern machinery, social benefits and other forms of official support.

In short, Poland is strengthening its private sector—already the best established in Eastern Europe—because that is what the population seems to want.

With the help of substantial new economic assistance from the Soviet Union and continuing loans from Western bankers whose interest in a stable Poland stems from the billions of dollars in credits already extended to the Gierek regime, the leadership is trying to preserve the advances of recent years. Imports of meat and other items in great demand and short supply have been maintained despite the burden of costs. For the moment, as Catholic Poland celebrates the Christmas season, the shortages of several months ago have eased.

Sensitive Question

The more sensitive question for the government is how to deal with the demands for what is known here as "democratization," including the revived campaign by the church for greater tolerance of worship and the underlying theme of human liberty behind the movement in defense of aggrieved workers. "There is no doubt," a prominent Polish Communist said, "that our government has shown a very liberal attitude toward such protests."

But that moderation seems to reflect nothing more than the realities of popular will in the country. Cardinal Wyszynski's dramatic pastoral letter of Nov. 28, accusing the regime of conducting an "odious, brutal" campaign against religion, was clearly a calculated move to test the leadership's forbearance as well as a show of strength by the bishops. Serious reprisals against the church, Mr. Gierek must recognize, could have disastrous consequences.

Some party leaders appear now to favor specific steps to improve political morale in the country, although how that might be achieved is not clear. "A growing number of our people are well educated," said a Communist theoretician. "Perhaps the party's leading role should be modified to reflect that. We give dissidents—those who are outright opponents of our socialism—more ammunition if we resist democratization that is inevitable."

But as with economic reforms, the only moves thus far have been essentially cosmetic—removal of a few senior party officials, including the hard-line secretary of the Warsaw Pact. The promotion of Foreign Minister Stefan Olszowski to the top rung of the party secretariat could turn out to be significant.

Mr. Gierek's own position in the current uncertainty is considered secure because whatever the discontent now, the alternative—and on this the whole spectrum of Polish opinion seems agreed—could be chaos and the ultimate catastrophe of Soviet intervention.

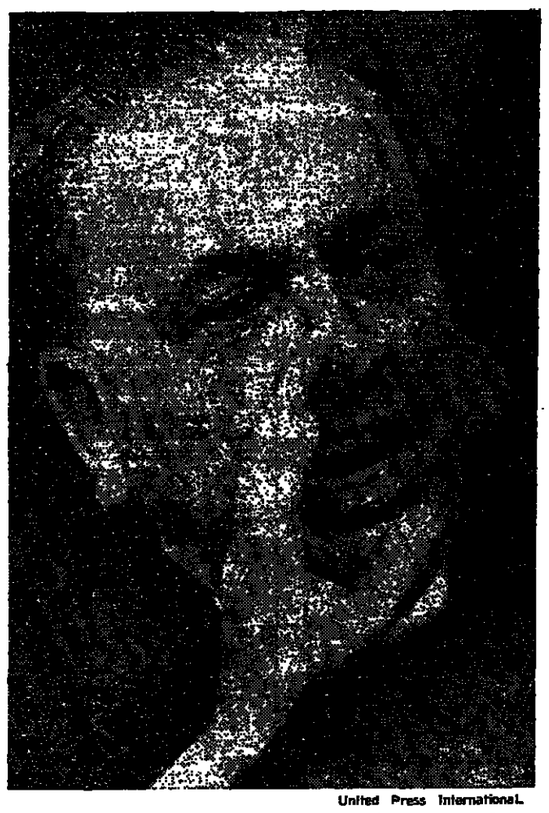
Inquiry Urged

WARSAW, Dec. 26 (Reuters).—A group of 28 influential Polish professors have demanded a full public inquiry by a parliamentary commission into the riots and demonstrations which erupted last June to protest food-price increases.

They said in the letter to the Sejm (parliament) that the Polish public had a right to know all the facts.

Richard J. Daley

The Last of the Big-City Bosses



By John Kifner

NEW YORK (NYT).—Mayor Richard J. Daley, who died last week at the age of 74, was the last of a breed, the last of the big-city bosses. For better or worse, he ruled Chicago with almost total control for 22 years.

Presidential aspirants courted his approval and the votes that he could deliver, the mayors of other cities looked on his power with awe and longing, and the businessmen and builders of Chicago rallied to his support. But his later years were marked, too, with controversy, beginning with the bloody, tear gas-filled skirmishes between Chicago policemen and anti-war demonstrators during the 1968 Democratic National Convention.

Mr. Daley's power came from his dual positions as mayor and chairman of the Cook County Democratic Committee, the "machine," or, as he preferred to call it, "the organization."

The Chicago municipal government and the Democratic party were totally intertwined: The city government provided jobs for the legions of precinct workers and the city services that bound the loyalty of the voters. And the precinct workers' city jobs rested on their performances on Election Day.

United Press International.

Mayor Daley at the 1968 Democratic convention.

The Pressure for Votes

At the height of his power, the relationships went around and around: A shopkeeper who displayed the poster of a rival candidate would be visited by the building inspectors; a developer who was a big party contributor would get a substantial tax break.

Mr. Daley grew up in the modest Bridgeport neighborhood, in the Back of the Yards section. He lived there all his life, in the 11th Ward, in a plain brick house on a street where the windows were festooned with Democratic posters on Election Day.

His neighbors became city officials, party functionaries, judges. He went to mass at the Church of the Nativity around the corner. On a nearby street, huge lettering on an auto repair yard proclaimed that Chicago had "the best mayor and the best police force" anywhere, a memento of 1968.

Secure in his power, Mr. Daley disdained reporters and opinions from outside Chicago.

St. Patrick's Day Events

On St. Patrick's Day, the Chicago River would be dyed green, and the mayor, wearing a green derby and carrying a blackthorn cane, would lead a huge parade down State Street. It was a spectacle that called to mind some civic equivalent of May Day in Red Square as the loyal lines of street cleaners and other city employees cheered and shouted as they marched past the mayor on the reviewing stand.

The bankers and the merchants, restive after a brief bout of "reform" in efficiency under his predecessor, were happy with Mr. Daley for he delivered on his deals and helped them prosper. Every four years, the city's financial leaders—suburban residents and Republicans—took out full-page ads in his favor. In the city's wards, the organization reached into every nook and cranny and turned out the votes.

There were scandals in the newspapers, to be sure. Although the scandals never reached to the mayor himself, the newspapers wrote that the pockets of many of the other public servants bulged with ill-gotten gains. Even the police at one point, according to the testimony of a witness who became known as "the babbling burglar," were in a robbery ring. But in Chicago, people laughed and shrugged and voted for the organization.

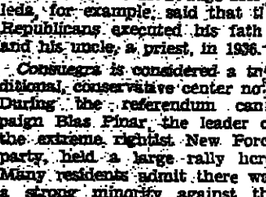
The city's motto, Mike Royko, a newspaper columnist and persistent antagonist of the mayor, liked to say, was "Where's mine?"

Blacks Drop Support

There were difficulties and these, too, stemmed from Mr. Daley's total power. In the spring of 1968, blacks rioted and burned on the West Side and the mayor ordered the police to "shoot to kill." At the convention, the Democratic party split as police clubs swung in front of the Conrad Hilton Hotel and millions watched the mayor's anger on television.

Blacks, long a crucial segment of the vote, turned away, angered over the controversial 1969 police slaying of a Black Panther. With the Republicans in the White House, an aggressive prosecutor, James Thompson, was appointed U.S. Attorney and put many of the mayor's associates, including his right-hand man, Alderman Thomas Keane, in jail on corruption charges.

Still, Mr. Daley brushed aside the challenges of the reformers and critics. When he walked out of his bungalow on Lowe Avenue to the corner firehouse on Election Day morning, the neighbors and the party workers came out to greet him and he pulled the voting machine lever with a single, solid organization clang.



At the end, the presidential aspirant courted him again, but this time he was not able to carry the state for the Democrats. Now, the Boss is dead and his like will not be seen again.

Spanish Town's 'No' On Reform Ballo[t] Starts an Uproar

By Stanley Meisler

CONSUEGRA, Spain.—This quaint town of windmills and a[n] in La Mancha has a distinction that many citizens insist [it] do not want—it is the only constituency in Spain that rej[ected] democratic reform in the national referendum.

The official results have angered many residents. They [have] filed petitions of protest, demonstrated and scrawled slogans [like] "Hang the Mayor" and "We Voted Yes" on public buildings. [They] are sure that officials doctored the returns. But Judge Angel Mora[les] Sotomayor, who certified the returns, defends them. Sitting in front of a dusty portrait of the late dictator Francisco Franco, the judge said that the people have turned against the results only because they were frightened by the outside reaction against them.

He said that there were reports that hospitals were refusing entry to residents of Consuegra, that restaurants and gas stations were refusing to serve anyone from Consuegra, that merchants elsewhere would not sell fruit and bread to the town, that the social security administration was halting pensions.

"These reports were false rumors" said Judge Moraleda, speaking slowly in a thick whisper. "These rumors were the real poison. But the people made a mistake and thought the voting results were the poison and turned against them. I believe that is the truth."

So Different

This explanation, however, is derided by many people in town. They cannot believe that Consuegra could be so different from the rest of Spain, which approved the program of democratic reform by 94 per cent of those voting. Across the nation, only 2.5 per cent voted no. In Consuegra, according to the official returns, 52 per cent dropped negative ballots into the urns.

Antonio Lopez Portillo, a pharmacist, filed an official protest against the returns. "Everyone I talked to said they voted yes," he said. "I have no doubt that the returns were falsified. And I think officials did it because the wounds of our civil war have not healed yet."

The government has accepted Mr. Lopez Portillo's petition [and], on a technicality, nullified the returns. It is doubtful, however, that Consuegra will be allowed to vote again. The nullification does not end the matter. The government has promised to investigate exactly what happened. Residents still seem angry, and the mayor, after offering his resignation, has disappeared.

Consuegra is an agricultural town of 10,000 inhabitants about 75 miles south of Madrid in the heart of the country used by Miguel de Cervantes as the setting of his adventures of Don Quixote. It nestles against a hill that breaks the skyline with a 12th-century castle and an enormous white windmills.

Most men in town wear navy blue berets, gray smocks and light blue trousers. The women dress in black. The farms produce olives, grapes and cereals. Young men who do not farm or serve in the town work on construction jobs in Madrid or Toledo.

The town was held by the Republicans for most of the Spanish Civil War. The memories of the war are still bitter. Judge Moraleda, for example, said that the Republicans executed his father and his uncle, a priest, in 1936.

Consuegra is considered a traditional, conservative center now. During the referendum campaign Blas Pinar, the leader of the extreme rightist New Force party, held a large rally here. Many residents admit there was a strong minority against the referendum until the eve of the Dec. 15 voting. But Premier Adolfo Suarez made a television speech that night and told Spaniards that the King wanted them to approve the reforms, which would allow Spain its first free election in 40 years. That speech, according to many residents, persuaded most of them to vote in favor of the referendum.

After the polls closed at 8 p.m., the voters could not find out what the results were. Election officials refused to let anyone watch the counting in four of the six polling stations. Officials also failed to post the returns on the doors of all the stations. This failure, a violation of the law, was the technicality used by the government to nullify the returns later.

Residents did not find out that Consuegra had voted until the next day when the Madrid newspapers reached them. They discovered that Consuegra had voted the way no other town in Spain had—2,809 against the reforms, 2,361 in favor, with 74 ballots blank or spoiled.

Demonstration

By late afternoon, several thousand residents jammed into the plaza in front of city hall. Workers left their jobs, shopkeepers closed their stores and protesters, demonstrating until the dawn of the next day, called for the resignation of the mayor, Dr. Pedro Albacete, a physician.

There is still mixed sentiment about this. Several residents believe that the counters [were] by Judge Moraleda were [responsible], not the mayor. One restaurant owner seemed to speak for the majority when he said, "The father of a house is always the person responsible."

Mayor Albacete disappeared three days later. Some Consuegra residents believe that he is hiding in his home. But his daughter said he was not there. He had left Consuegra on a trip, she said the mayor had resigned, but that the governor of the province of Toledo had refused to accept the resignation. Instead, the daughter said, the governor had granted him a leave of absence.

Some residents of Consuegra are philosophical about the referendum. A Latin American salesman, who has lived in Spain for five years said, "In the long run, the town will benefit. In 40 years, the people have seen everything that the dictators and local bosses have done to them. They were a docile, peaceful people. Now, the people angry at the politicians and [what] they have [done], while the election turns [out] to be the people's [victory]."

Unrest and Discontent Spreading on Sri Lanka

By Kasturi Rangan

KANDY, Sri Lanka (NYT).—The Red Cross Hall in this picturesque tourist town usually serves as an auditorium for the performing arts. But for the last several days, a large audience of students, police officials, teachers, parents and politicians has been witnessing a different spectacle.

A judicial commission, appointed by Prime Minister Sirimavo Bandaranaike, is conducting a public inquiry into an incident at the university at Peradeniya last month, when the police fired on demonstrating students, killing one and injuring 50.

The incident has sparked nationwide student protest, led to the indefinite closing of all six Sri Lanka university campuses and raised questions about the future of Mrs. Bandaranaike's governing party in elections scheduled next spring.

The students were demonstrating against the head of the university for his handling of a dispute that led to a strike of staff members and the closing of student living quarters. More than 4,000 students were left to fend for themselves for food and told to go home until the campus reopened.

On Nov. 12, after the campus president was confined to his office by a nightlong vigil of thousands of students, the police fired when tear gas and a baton charge failed to disperse the students. The demonstrators stoned buses and the police.

Traffic Stopped

The strike spread into schools and colleges. High-school students walked out. In Colombo, youngsters from 8 to 18 wrote slogans against the government and stopped traffic.

Mrs. Bandaranaike, who was in Japan at the time of the incident, accused the opposition parties of inciting and exploiting students. Nevertheless, she removed the Peradeniya campus president and ordered an inquiry into the incident to improve the image of her government, which was damaged considerably by the protest.

A professor at Peradeniya said that the incident was a culmination of a long record of the governing party's interference in university affairs, maladministration at the school and growing student frustration over lack of employment opportunities.

"Our president should have been dismissed a long time ago but he had the protection of the Prime Minister's family because he is a friend of theirs," the professor said.

Sarath Liyanage, chairman of the student council, said students resented frequent closings of the university. In the last six months there had been classes for only six weeks, he said. The university had been declared closed three times.

Exams Delayed

"I should have passed five months ago," said Lalith Chandrasiri, an engineering student, "but the examinations have been postponed again and again, and we don't know when we will finish."

The general resentment of the student community against the authorities has been seized by opposition parties, with elections just five months away.

The last elections were in 1974, when Mrs. Bandaranaike's Sri Lanka Freedom party and its coalition allies—the Trotskyist Lanka Sama Samaj party and the Communist party—were voted into power largely with student support.

But within a year, leftists and students revolted against the government in an uprising that was put down ruthlessly. More than 1,200 persons were killed and several thousand student leaders and politicians were jailed. The government took over some of the newspapers that had been critical. Mrs. Bandaranaike amended the constitution, extending the life of her government by two years.

Since then, growing unemployment and a difficult economic situation have gradually eroded the popularity of the governing party. It is estimated that 20 per cent of the work force is now unemployed and barely one in 10 university graduates finds a job.

Rice Imported

Half of the rice needed to feed the nation of 14 million inhabitants has to be imported and the government is committed to supply free rice—a pound a week—to the bulk of the population, causing a drain on the budget.

Politically, the ruling party had already lost considerable ground. Mrs. Bandaranaike's party has 96 seats in the 157-seat National Assembly. The Communist party, which has seven seats, may withdraw from the coalition if the students' resentment against the government continues.

"We have our main support among the students," a Communist leader said. "It is important we respect their sentiments."

Last year the Trotskyists, whose oratorical talent helped in the last election, broke away from the governing party, leaving it two seats short of the two-thirds majority needed to amend the Constitution to postpone elections.

Washington Post.

Sirimavo Bandaranaike

NYT.

A new headache for the government is the growing influence of the Tamil secessionists. The party representing the nearly 3 million members of that ethnic group concentrated in the northern districts has joined with other Tamil groups to form a united opposition, the Tamil United Liberation Front. Charging that Tamils were being discriminated against in job and educational opportunities they are demanding a separate state for themselves.

In past elections, the Tamils have been able to tilt the balance of power. After the next elections, under threat of secession, they hope to improve their status in relation to the Sinhalese majority.

Past elections have always gone against the party in power, and the opposition parties, even without joining together, expect to defeat Mrs. Bandaranaike. The rightist United National party, which had governed the country until 1970, is expected to emerge the victor. J.R. Jayawardene, the 70-year-old Colombo lawyer who heads the party, says confidently:

"There is going to be a change of government after the elections. We have our programs ready."

Africa Looks to Carter To Alter U.S. Policy

By John Darnton

LAGOS (NYT).—Even though President-elect Jimmy Carter is virtually unknown to black Africa, his election has been widely applauded here and has raised hopes for a new chapter in U.S.-African relations.

The main problem Mr. Carter's administration will face, in the view of diplomats and analysts here, is living up to a level of expectations that might be unrealistically high.

"There are expectations of great changes that are really based on nothing other than the fact that blacks in America contributed substantially to his victory," a Western ambassador commented. Rep. Andrew Young, D-Ga., speaking at an African-American Institute meeting in Lesotho recently, felt compelled to warn black representatives not to expect radical shifts in U.S. policy.

While much of black Africa welcomed as long overdue the surge of interest in African affairs shown by the State Department after the Angolan civil war, skepticism about motives has run high. The U.S. intent, it was said, was not so much to promote majority rule in Rhodesia (which the blacks call Zimbabwe) South Africa, (Azania) and South-West Africa (Namibia) as it was to contain Soviet influences. Now is hope that the interest will remain but that the motive will change.

One Standard

Government officials and editorial writers in Nigeria, Ghana and elsewhere have made it clear that they will judge the new administration by one standard only—its policy on the problems of southern Africa. Said the Daily Times, the mass-circulation government-owned newspaper in Nigeria: "The real test of the correctness and relevance of the Carter administration's policy toward Africa would be judged over their stand on the current liberation struggle in Zimbabwe, Namibia and definitely in that fortress of white racism—[Prime Minister John] Vorster's regime in Azania."

Except for the so-called front-line states—those closest to the three white-dominated territories—no African government feels as passionately about what is termed the liberation struggle as Nigeria, which has shifted to an anti-U.S. position in its foreign policy statements.

Secretary of State Henry Kissinger has tried to come here three times since April and was rebuffed. Nigerians make no effort to mask their glee that Mr. Kissinger will soon be out of office. "Personally, I can't say that I'm too unhappy," said a high official, an attitude that is taken as a sign, if a left-handed one, of willingness to see an improvement in relations.

When the Ford administration chose not to veto the admission of Angola to the United Nations, the stand was interpreted by the newspapers here as a more realistic view on the part of the transition administration. "The recent change in policy is welcome as it indicates that when Mr. Jimmy Carter is firmly in the saddle as U.S. president, he would not allow his administration to be hamstrung by the cold war prejudices of previous American administrations, which have led them to bungle their relationship with African countries," an editorial said.

Because the problems of southern Africa overshadow all other concerns on the international level, countries such as Nigeria will undoubtedly press the Carter administration to move forcefully on that front rather than on issues that more directly affect their own futures. They will expect repeal of the provision permitting imports of chrome from Rhodesia. They will expect pressure on U.S. companies in South Africa to improve working conditions for blacks. There will probably be calls for withdrawal of investment from South Africa and for changes in the tax laws that give credit to U.S. companies in South-West Africa for taxes paid to South Africa. Any easing of Export-Import Bank restrictions on loans to the South Africans would be strongly opposed.

On economic matters, black Africa can be expected to push for higher and more stable prices for primary commodities, tariff concessions for tropical products, easing of debt-repayment schedules, readier access to capital markets and increased financial institutions.

Marchers Back Mrs. Gandhi, Son

NEW DELHI, Dec. 26 (UPI).—An estimated 50,000 persons, mostly workers led by labor leaders, marched in columns to the residence of Prime Minister Indira Gandhi Friday to support her anti-Communist statements.

Speaking at a function of her ruling Congress party Thursday, Mrs. Gandhi said that the Communist party's attack on her son, Sanjay, "is a personal attack on me," and that the Communists were "insulting" her by saying that "reactionaries are taking over" her party.

Friday, Mrs. Gandhi appeared before the crowd and told the demonstrators, "If the [Communists] attacked us, we are prepared to give them a reply."

Market Is Catching Its Breath After Record-Shattering Year

By Carl Gewirtz

PARIS, Dec. 26 (IHT).—The urobond market has just completed a record-shattering year d bankers are braced for 1977 ming at a torrid pace.

For all of this year, $13.41 billion worth of issues was floated the market, almost double previous record of $7.1 billion 1975. Issues denominated in dollars accounted for 61.9 cent of the total and the tsche mark took 22.44 per cent the market.

At present, however, not a gle issue is on offer as most ividual investors are presumto be otherwise occupied over holiday period and profesnal investors are busy prepar- their year-end reports.

But the evidence from the conued hectic trading in the ondary market bears witness the fact that there has been le slack in the demand for per. Dealers profess to be azed at the rush to buy.

With the new-issue market on iday, money has nowhere to but into older issues. It uld appear that professional ders were caught by surprise d many, who had been running rt positions on the expectan prices would drop, have n forced into the market to er themselves as prices conue to climb.

Scarcity Value

The Dow Chemical 8s of 1986, example, issued at par a nth ago, are now quoted at 3 4 bid-104 1/2 asked—an eftive yield of 7.42 per cent. This lects not only the scarcity ne of U.S. corporate names this market, but also, presumy, the anticipation that cous of the new issues to come on offer will be lower than comparable paper a few weeks ago.

While the low level of short-term Eurodollar rates might support such a view, it is very uncertain how the market will react when faced with the glut of issues that is rumored to be coming in January.

The buying is by no means confined to American names. The Ericsson 8 1/2s of 1983, quoted at 103 a week ago, ended last week at 103 3/8-103 7/8 for a yield at the mid price of 7.81 per cent. Ontario Hydro 8 1/4s of 1983 finished at 103-103 1/2, up from 102 3/4 a week earlier.

Among the latest rumors of issues about to be launched are a $40-million loan for Statsforetag, the Swedish state holding company, and a floating-rate note for a Brazilian bank.

Japanese List

Sumitomo Heavy Industries will lead off a long list of Japanese borrowers who have received Ministry of Finance approval to tap the international market during the first quarter. Other borrowers coming in the dollar sector include Kumagi Gumi, Y.S. Line, Hitachi Shipbuilding, Toyo Canetsu, Mitsui Petroleum and IHI. Asahi Optical will float a $10-million convertible.

Only two Japanese issues are set for the DM market—Sanko and Nippon Paint. The latter will be a 30-million-DM convertible.

Also scheduled are share offerings for Akita Electric, Kubota, Tokyo Sanyo and Murata Manufacturing.

As market participants await the arrival of the new issues, the major area of interest is studying the "league tables"—the listings of which banks did how much business during the year. The tables presented here were compiled by the IHT and include all issues whose payment dates fell in 1976.

The table of lead managers gives credit to only the manager of each issue while the second table gives full credit to both managers and co-managers. Thus, in a $100-million loan managed by five banks, each of the five would be credited with $100 million.

There was little change in the table of lead managers from the nine-month table published Nov. 8. The only notable shift involved Westdeutsche Landesbank (up to fifth place) and Union Bank of Switzerland (down to sixth). In the final quarter, Deutsche Bank was in first place

(Continued on Page 9, col. 4)

U.S. Commodities

CHICAGO, Dec. 26 (AP).—Farm commodity futures advanced in price on the major U.S. exchanges last week despite sharply lighter volume and a lack of favorable trading information.

Trade ended at noon Thursday, permitting an extended Christmas holiday. December options expired earlier in the week.

When trade had ended on Thursday, soybean futures were 15 to 18 1/2 cents a bushel higher, January 6.93; wheat was 7 3/4 to 9 1/4 higher, March 2.71 1/4; corn was 3 1/4 to 4 higher, March 2.51 3/4; oats were 1 3/4 to 3 3/4 higher, March 1.66 1/2; soybean oil was 33 to 85 points (nearly 1 cent a pound) higher, January 21.07; soybean meal was 3.20 to 4.50 (dollars per ton) higher, January 199.40; and iced broilers were 20 to 120 points higher (about 1 1/4 cents a pound higher), January 37.30.

Live hog futures prices rose as much as $2.52 per hundredweight while live cattle futures advanced slightly more than $1 per hundredweight. Pork belly futures rose 180 points higher.

Trade was mixed on the opening bell each day, but the pace then slowed as commercial interests and commission house orders (for the public) tapered off. Most dealings until the closing minutes were then among local speculators, or professional traders.

The government, however, did estimate that soybean meal prices next year might rise because of a continuing demand worldwide. The Agriculture Department also estimated that winter wheat sown this fall covered some 3 per cent fewer acres than the 1976 crop and there probably will be 8 per cent less winter wheat harvested from the current seedlings in 1977 than in 1976.

Also, the government estimated the pig population at 11 per cent above last year at this time, and that there were fewer broiler chick sets last week than a week earlier.

Live cattle futures gains were linked to a steady carcass beef market and to the possibility of less pork available next year.

Shell egg prices generally bore out the thinking of traders, who preferred to wait for a supply and demand report as trade held at a low rate. There was some selling, however, because of a report the military paid less for eggs.

The range of farm commodity futures prices last week on the Chicago Board of Trade was:

Less wheat availability next year brought buyers into forward futures; more pigs brought sellers into feed grains, soybeans and meal; possibly fewer broilers chicks four months from now could mean higher prices and forward broilers futures were bought.

The U.S. Economic Scene

1976—A Truly Bustling, Schizophrenic Period

By Thomas E. Mullaney

NEW YORK, Dec. 26 (NYT).—In what was certainly a gross understatement, one of the nation's top industrialists last week described 1976 as a "mixed-up year" for the U.S. economy. That was an accurate assessment up to a point, but it does not delve deeply enough.

Economic events and political developments of the last 12 months have made 1976 even more dramatic and traumatic than such a relatively mild characterization suggests. In many ways, the year now ending has been a truly bustling and schizophrenic period.

Contrary to the expectations of most forecasters last December, the year's economic scenario followed an up-and-down pattern both here and abroad, instead of the steady growth trend generally envisioned.

The analysts were right on target in foreseeing the year's real growth in the neighborhood of 6 per cent, but that was achieved only because the first quarter had been so robust with its 9.2-per-cent gain. Few economists anticipated the steady erosion of the advance in the subsequent three quarters—a vital development responsible for much of the recent concern about the current state of the economy, its prospects and how best to deal with the attendant problems.

Forecasters Wrong

The forecasters were wrong, too, in their pessimistic evaluation of the inflation outlook, when most of them were looking for an inflation rate in the area of 6 per cent or more. By virtue of the moderating trend in wage settlements and the decline in food prices, the year's overall price level has increased around 5 per cent—much greater progress in that area than everyone predicted or hoped, though hardly a reason for any great elation.

Those were the principal developments that made 1976 such an unusual year. They were supplemented by unforeseen political upheavals, currency turmoil and international confrontations of various sorts as the world continued the search for new directions in the pursuit of an elusive prosperity and stability.

Like all years, 1976 contained a full quota of excitement and surprises, concluding with the baffling two-tiered pricing increase decided by the oil-producing nations a week ago and with the Cabinet choices just announced by President-elect Jimmy Carter.

Before that, the outstanding development of the last year was the sudden and significant slowing of the economies of the United States and the major Western nations. That reality changed the economic complexion internally and externally for many nations and it will no doubt exert a profound influence on future economic policies of many lands.

Noteworthy Developments

Other noteworthy developments of the last year included:

- The widespread corporate bribery and payoff scandals that toppled business managements and created tensions in several foreign governments.
- The pricing controversy in the domestic steel business.
- The huge loan problems of many large banks.
- The big boom in the auto business and the late-year resurgence in housing activity.
- The delay in business capital-spending programs.
- Some major labor strikes in rubber, autos and farm equipment.
- The great crop harvest in the United States, the Soviet Union and some other countries.
- New York City's moratorium on $1 billion of debt and the subsequent court finding that it was unconstitutional.
- The banner year for the financial markets of the United States.
- The election of new governments in the United States and such other nations as Japan, Australia, Sweden, Italy, Spain, Mexico and Finland.

In the international area, the year's major developments involved changes in currency values in several leading nations

(Continued on Page 9, Col. 4)

New York Stock Market

NEW YORK, Dec. 26 (NYT).—A surge of optimism about the inflation outlook enabled the stock market last week to post a modest advance.

The Dow Jones industrial average moved ahead 6.56 points to 985.62 at Thursday's close in advance of the Christmas holiday. As in the preceding week, when the Dow rose 5.91 points, few issues made large moves, with price changes limited to less than a point.

The market began to firm on Tuesday after the Labor Department reported that consumer prices rose only 0.3 per cent last month, continuing October's moderate rate of increase. Some analysts had been excepting an upturn in this important measure of inflationary trends.

Another favorable factor was the prime interest rate reduction by two major banks, Chase Manhattan and the First National of Chicago. Their cuts followed an earlier reduction by the Morgan Guaranty Trust Co. and confirmed the general downward trend in borrowing costs.

Analysts also noted that an easing of year-end tax selling and profit-taking helped the market to advance. The best performers were some of the blue chip and glamour stocks which scored gains of a point or more, apparently in response to increased institutional buying.

Many of the blue chip and glamour stocks had been more or less neglected recently as investors concentrated their buying mostly on the secondary issues that had been leading the market for most of the month.

Turnover on the New York Stock Exchange amounted to 96.61 million shares in the abbreviated week, compared with 126.07 million shares the week before. The stock market was closed Friday in observance of Christmas Eve.

In the credit markets, bond prices ended practically unchanged in the light trading that is characteristic of the final two weeks of the year.

Over-Counter Market

NEW YORK (AP) — Weekly Over the Counter stocks giving the high, low and last bid prices for the week with the change from the previous week's last bid prices. All quotations supplied by the National Association of Securities Dealers Inc. are not actual transactions but are representative interdealer prices at which these securities could have been sold. Prices do not include retail markup, markdown or commission.

19. To expedite a delivery.

(An international call means business.)

Long Distance is the next best thing to being there.

EUROPE ALLIED AGAINST CANCER

$10 from you.

Is that too much to ask?

We are asking every one who reads this issue of the Herald Tribune to send us $10. This is to help fight cancer by co-ordinating, in 10 countries, research on its treatment. EORTC — European Organisation for Research on Treatment of Cancer — is the only pan-European body to co-ordinate such research.

Please send a donation of any amount in any currency to the EORTC Foundation at one of the banks listed below.

Belgium: Société Générale de Banque, Montagne du Parc 3, 1000 Bruxelles.
Denmark: Den Danske Landmansbank, 12 Holmens Kanal, 1092 København.
France: Banque de Paris et des Pays Bas, 3 rue d'Antin, Paris 2.
German Fed. Republic: Dresdner Bank AG, Gallusanlage 7-8, 6000 Frankfurt/M.
Holland: Bank Mees & Hope, Kneuterdijk 13, 's-Gravenhage.
Italy: Credito Italiano, Piazza Cordusio 2, Milano.
Ireland: Messrs Guinness & Mahon, 17 College Green, Dublin 2.
Luxembourg: Banque Generale du Luxembourg, 14 rue Aldringen, Luxembourg.
Switzerland: Julius Bär & Co., Bahnhofstrasse 36, Zürich.
United Kingdom: Messrs Coutts & Co., 16 Cavendish Square, London W1.

EORTC Foundation.
Institut Bordet, 1 rue Héger-Bordet, Bruxelles 1000.
President: HRH Prince Philip Duke of Edinburgh, KG, KT.

This space is donated by International Herald Tribune.

The U.S. Economic Scene

(Continued From Page 7)

as they went through adjustments related to internal inflationary conditions, the impact of high oil prices and their adverse trade performance.

The British pound was thus in the spotlight throughout the year as it fell from the $2 level to a point below $1.60. The Italian lira was also weak; the Canadian dollar fell below parity with the U.S. dollar for the first time in years; the Mexican peso was devalued by almost 50 per cent and was allowed to float for the first time in 20 years and, conversely, the German mark and the Japanese yen remained strong.

Even though many nations turned more restrictive in their trade policies, world trade grew sharply—by 10 per cent — to a new record of more than $1 trillion. The United States, however, slipped back into a deficit of about $5 billion as its oil import bill rose substantially, while its huge surplus from agricultural trade diminished somewhat.

The U.S. economic picture, of course, was affected in various ways by the trade and currency problems of its partners, as well as by the more pronounced slowing of so many Western economies.

Despite the well-publicized "pause" last summer and fall in the U.S. economy, total business activity increased for the year to a degree—6 per cent in real terms—that by historical standards was highly impressive. About 3 million new jobs were created and yet unemployment rose to 8.1 per cent by year-end as the labor force continued its substantial growth.

Even though personal income advanced sharply to new peaks and corporate profits jumped by about 30 per cent to a new record of $85 billion after taxes, there prevailed a highly cautious mood among the U.S. public and in the business world. The profit performance was mixed among companies and industries, however.

Big Year for Bonds

Although bank lending suffered in the process, 1976 was a big year for the stock and bond markets. It was a record year for private debt financing and a peak for municipal borrowing, too. Except for a six-week period in the spring, when inflation briefly flared up strongly, the bond market performed well all year.

And the New York Stock Exchange, though erratic in its price movement, chalked up a record volume, with trading exceeding 5 billion shares for the first time. Amex and over-the-counter activity also increased sharply above 1975 levels. And yet, many brokerage houses failed to participate in the prosperity because of rising costs and the impact of negotiated commission rates.

The sharp decline in business activity was clearly a nightmare of the past as 1976 moved along, and yet, in a recent poll, a high percentage of the respondents indicated they still believed the United States was mired in a recession. At the same time, it was reported that the number of poor persons in the country had increased by 2.5 million in 1975, when the current recovery was starting.

The highly erratic course of events over the last 12 months emphasized again the difficulties of the forecasters, but a U.S. analyst who was right a year ago was Walter Hoadley, senior economist for the Bank of America, when he commented:

"The year 1976 promises to satisfy few people in the United States or around the world. Recovery from the deep global recession will be real—but too slow to solve the most pressing economic problems."

That is exactly the kind of year that 1976 has been. Its saving grace is the fact that it is ending on an upbeat that promises to grow stronger as its own economic momentum builds. The promise of some pump-priming from the new Carter administration should add to the momentum.

Euromarket

(Continued from Page 7.)

with the equivalent of $353.5 million, Warburg was second with $339.02 million, Crédit Suisse White Weld was third with $329 million, Morgan was fourth with $251.58 million and Westdeutsche Landesbank was fifth with $247 million.

Kidder Peabody, First Boston, Hambros, Dresdner, Orion and Wood Gundy completed the top-10 list for the quarter.

But there was considerable change in the manager and co-managers table, where Crédit Suisse White Weld displaced Deutsche Bank for the top spot reported in November. Deutsche Bank slipped to third place, after Swiss Bank Corp.

Kredietbank Luxembourgeoise also dropped sharply, falling from fifth place in November to No. 8 for the full year. For its part, Kredietbank notes that its placing power has not diminished—it is credited with $2.99 billion this year compared with $2.68 billion a year ago (which put it at the top of the list). What has happened, the bank says, is that its placing power has not grown apace with the market itself.

The only shift from November was Amsterdam-Rotterdam Bank and Paribas shifting places.

Warburg continues in 10th place and remains the only bank to make the list which has no link with a commercial bank.

Baseball's Six Players Still in Search of Team

By Dave Anderson

NEW YORK, Dec. 26 (NYT). —They're not destitute. They weren't on line at the Salvation Army for Christmas dinner. But they are the six baseball free agents still out in the cold today, still unsigned and unemployed—Dick Allen, Willie McCovey, Nate Colbert, Tito Fuentes, Paul Dade and Billy Smith.

And for Dade, a 25-year-old third baseman who led the Pacific Coast League with a .363 batting average last season, Scrooge exists. Scrooge, alias Charles O. Finley of the Oakland A's, selected negotiation rights to Dade in the free agent draft early last month. So did the Cleveland Indians, who at least contacted him. But the A's, meaning Finley, have not bothered to contact Dade or Jeff Meacham, his agent. Under baseball law if only one team had selected Dade, he would have been free to negotiate with any of the 26 major league clubs, including the expansion Seattle Mariners in his hometown, the club he would prefer to join. But because of Scrooge's disinterest, Dade has been trapped until the Feb. 15 reselection of unsigned free agents. The Indians apparently don't want him. Scrooge doesn't want to talk to him, and the other teams are not allowed to talk to him.

"It's a sorry Christmas," Dade was saying over the telephone, "for my wife and two kids."

After two letters to Scrooge, including one by registered mail, without a response, Marvin Miller, the executive director of the Major League Baseball Players Association, communicated with Lee MacPhail, the American League president. Miller requested MacPhail to inquire if Scrooge wished to withdraw his claim on Dade.

"That was more than a week ago," Miller says. "MacPhail has even been in the same courtroom in Chicago with Finley and testified on his behalf against Bowie Kuhn, but I haven't heard from him. No interest, no response—it's outrageous. This phony bid by Finley cut Paul Dade from dealing with 26 teams to two."

Dade was one of three players unsigned by the California Angels.

"The Angels," he said, "didn't make too much of an effort to sign me."

That's what other baseball people suspect. By losing three free agents (Dade, Billy Smith and Tim Nordbrook), the Angels were permitted to sign three (Joe Rudi, Don Baylor and Bobby Grich) while other teams were limited to signing two.

"I'm running out of money," Dade said. "I didn't play winter ball because I didn't want to take a chance on getting hurt. But when I tried to get a job, nobody wants me because they know I'll be going to spring training soon."

Of the six free agents, Dade and Billy Smith, an infielder at Salt Lake City last season, are the least known.

"The A's also selected me," Smith said from his San Antonio, Texas, apartment. "But they never contacted me. So far the Orioles have shown the most interest in me and the Red Sox have shown some. I think I'll be all right."

Dick Allen, the individualist, is on his Perkasie, Pa., farm near Philadelphia.

"He doesn't even have a phone," Marvin Miller says. "I haven't heard from him."

The most popular theory is that Allen, now nearly 35, but once the American League's Most Valuable Player with the Chicago White Sox when Chuck Tanner was the manager, will rejoin Tanner, now the Pittsburgh Pirates' manager. McCovey, who will be 39 next month, is living in a San Mateo, Calif., motel. Perhaps he'll return to the San Francisco Giants, for whom he hit most of his 465 home runs. Colbert, the big first baseman who averaged nearly 30 homers and 85 runs batted in for five seasons with the San Diego Padres before two bad years with the Detroit Tigers and the Montreal Expos, is thinking about an offer from the Toronto Blue Jays, the other expansion team.

"It's not definite," Colbert said, "but I hope to make a decision after the first of the year."

A Little Bitterness

McCovey and Colbert each finished last season with the A's, each without having signed a contract.

"Finley told me I couldn't hit a fastball any more," Colbert said from his Encinitas, Calif., home. "How would he know? I only got up five times in a month—four on Sept. 1 and once the end of the season. I'm only 30 but I'm at the bottom right now. I'm happy for all the guys who got million-dollar contracts as free agents, but in most cases they didn't have any better years than I had when I had my good years."

Fuentes, an infielder with the Padres for the last two seasons after eight years with the Giants, will be 33 soon.

"It doesn't look too good," he said from Foster City, Calif., where he lives with his wife and six children. "But it's a little bit my own fault. I went to Cuba after 14 years to see my family when the draft happen. My wife tell me the White Sox want me, but they couldn't wait for me to return in case I say no, they get stuck. So they sign another infielder. The Giants call me a couple times and the Pirates call me three or four times, but no more. It's early but it's getting late, too. I gonna go to Japan if they come up with an offer, but I rather stay in the big leagues."

Fuentes earned $75,000 from the Padres in 1975, but when he exercised his option clause last season, the 20 per cent cut dropped him to $60,000.

"But for Christmas," he said, "I'm not going to penalize our six kids. They still going to get the same kind of holiday for what I got in my contract."

Thursday's Games

San Antonio 118, Washington 116 (Kenon 26, Bristow 19; Hayes 32, Bing 24).

Denver 123, Seattle 95 (Thompson 38, Issel 21; Burleson 17, Norwood 16).

Phoenix 107, Buffalo 92 (Sobers 28, Westphal 22; Shumate 26, Dantley 16).

Indiana 96, NY Nets 94 (Knight 32, Hillman 19; Williamson 26, Jones 17). Billy Knight converts three-point play with 28 seconds left to win for Pacers.

Chicago 105, Atlanta 95 (Johnson 26, Gilmore 22; Hudson 22, Charles 19).

Milwaukee 112, Golden State 103 (Dandridge 22, Winters 16; Williams 26, Barry 16). Bucks win their third straight, scoring last eight points of the game.

Saturday's Games

Washington 117, Cleveland 99 (Robinson 28, Hayes 20; Chones 15, Smith, Snyder 12).

Philadelphia 105, NY Knicks 104 (Free 30, McGinnis 20; McAdoo 24, Monroe 22). George McGinnis' 15-foot jump shot with one second left wins game.

Buffalo 115, Detroit 106 (Dantley 30, Smith 24; Carr 23, Simpson 22).

Chicago 96, Kansas City 91 (Holland 22, May 18; Lacey 21, Washington 20).

Phoenix 113, Los Angeles 96 (Westphal 25, Heard 21; Russell 22, Abdul-Jabbar 22).

Portland 110, Seattle 95 (Walton 26, Lucas 24; Oleynick 19, Norwood 18). Blazers up home won-lost record to 18-1.

Australians Win Tennis Challenge

MELBOURNE, Dec. 26 (AP).—Australia swept its tennis challenge match against the Americas with victories today in the final singles matches.

John Alexander beat American Arthur Ashe, 6-3, 6-7, 6-3, 3-6, 6-1, in 3 hours and Ken Rosewall outplayed Argentinian Guillermo Vilas, 6-2, 6-2, 6-0, to make the final tally 4-0 for Australia.

Alexander continued with the good form he showed in his first match against Vilas, which he won in five sets.

WRITERS AT WORK

The Paris Review Interviews

Fourth series. Edited by George Plimpton. Introdu[ction by] Wilfrid Sheed. Viking. 459 pp. $14.95.

Reviewed by Christopher Lehmann-Haupt

REMEMBER the Paris Review interview, which has been the mainstay of George Plimpton's literary quarterly ever since he founded it 67 issues ago? In the old days—when the subjects of interviews were the likes of Forster, Faulkner, Frost and Eliot, and they were collected in volumes called "Writers at Work," with introductions by such eminences as Malcolm Crowley, Van Wyck Brooks and Alfred Kazin—we used to read them to learn how good literary work was done. Do you typewrite in the nude? we sought to know, like movie fans trying to identify with their idols. Perhaps there was a knack to screwing the pencil into the fingers, and if we only knew it our genius would be tapped and refined like so much maple syrup.

Well, the Paris Review interview is still alive and thriving. This is evident in the current issue, No. 67, in which John Cheever speaks more like himself than he has ever spoken before and in which John Hall Wheelock reveals that the Scribner's editor Maxwell Perkins used to work with his hat on so that he could always say, "I'm sorry, but I was just going out," any time his beseechers got too much for him. It is also evident in the newly published fourth volume of "Writers at Work," edited by Plimpton and introduced by Wilfrid Sheed, which contains 16 new interviews with novelists and poets, among them Dos Passos, Nabokov, Isherwood, Auden and Updike.

But no longer is it tips on the craft of writing that make these question-and-answer sessions seem so unusual. One may be diverted to learn that Isak Dinesen started "with a tingle, a kind of feeling of the story I will write . . ." or that Conrad Aiken "preferred yellow paper because it's not so responsible looking . . ." or that Dos Passos tended "to start chapters in

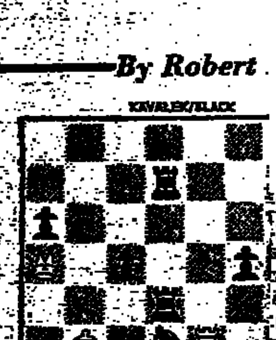
Solution to Friday's Puzzle

CHESS — By Robert

While a bishop will prove superior to a knight nine times out of 10 on an open board where there are no obstructing center pawns, it is useful to know about the exceptional 10th time, when the knight comes into its own.

This can happen if the knight can take up a center outpost on the sixth rank, thus blocking one file and controlling key first-rank squares on each adjacent file. In such a case, the enemy rooks may be seriously disabled.

A necessary condition for entrenching a knight in an exposed center outpost in the absence of supporting pawns is a rapid development of pieces to protect the knight.



Lubomir Kavalek, playing Board 2 for the United States team, gave a beautiful demonstration of knight power in his encounter with Werner Hug of Switzerland in the 11th round of the World Chess Olympiad in Haifa, Israel.

To illustrate the danger of accepting the gambit 5 O-O by 5 . . . NxP, "Chess Informant, Volume 21" gives the game Boncev-Nicevski, Sofia, 1976, which continued 6 Q-K2, N-B3; 7 PxP, PxP; 8 B-N5, P-QR3; 9 BxNch, BxB; 10 R-Q1, Q-B3; 11 N-K5, B-B3; 12 N-QB3, P-K3; 13 B-B4, Q-B1; 14 N-B4, P-QN4; 16 N-N6, winning the exchange.

Hug's intention with 9 P-B5, opening the position, and the exchanges of minor pieces at moves 11-13, must have been to drive the black knight out of play after 14 Q-N3, but Kavalek resisted the attempt with his sharp counter 14 . . . N-N5!, after which 15 R-K1 could have been answered powerfully by 15 . . . Q-Q5; 16 Q-N3, P-B3!

After 16 . . . NxP; 17 QxP, B-B3, Hug had indeed split the black queenside pawns, but that was not compensation for Kavalek's superior piece mobilization. Kavalek could not have gained anything by 19 . . . NxNP; 20 B-Q5, KR-B1; 21 NxBch, QxN; 22 BxP!, but his positional 19 . . . QR-Q1; 20 NxBch, QxN gave him

Raiders End Steelers' Reign on Passing Of Stabler; to Face Vikings in Super Bowl

KLAND, Calif., Dec. 26 (UPI).—Ken Stabler, whose pass- was the key to success in regular season, threw two ng strikes today in a bitter gle to lead the Oakland ers to a 24-7 victory over the burgh Steelers in the Ameri- Football Conference cham- ship game and a spot in the Super Bowl for the first time in nine years.

Stabler threw a four-yard touchdown pass to second string tight-end Warren Bankston and a five-yarder to reserve running back Pete Banaszak as Oakland rolled to victory over the two-time defending Super Bowl champion Steelers.

The Raiders will face the National Conference champion Minnesota Vikings, 24-13 victors over Los Angeles today, in the Super Bowl at Pasadena, Calif., on Jan. 9.

The Steelers, who three times in the last four years prevented the Raiders from advancing to the National Football League championship game, played without running backs Franco Harris and Rocky Bleier because of injuries suffered a week ago in a runaway playoff triumph over Baltimore. Each had gained more than 1,000 yards rushing during the regular season.

The victory was the 12th straight for the Raiders as Oakland had the best regular-season record in the NFL at 13-1.

The Steelers had won 10 straight entering the AFC championship, but were no match for the Raiders without Harris and Bleier.

The Raiders completely dominated first-half play as they took a 17-7 lead. They cashed in on a short punt, an interception and put together a 13-play, 6-minute drive at the end of the first half while the Steelers almost were completely shut off.

The Raiders made gaping holes in the vaunted Steeler defense as Mark Van Eeghen, Mike Garrett and Pete Banaszak ground out more than 100 yards.

Stabler, mixing his plays with finesse, picked the Steeler secondary apart, throwing a five-yard TD pass to tight end Warren Bankston and seemingly picking up first down yardage whenever needed.

The Steelers put together their only sustained effort midway through the second period, taking a kickoff on their 25 and marching 75 yards to score.

Running back Reggie Harrison took the ball in from the four after Steeler quarterback Terry Bradshaw had completed passes of 11, 12 and 30 yards, the big gainer going to flanker Lynn Swann who took the ball to the Oakland seven.

During the first half Oakland ran off 40 plays to Pittsburgh's 23 and more than doubled the Steelers' offensive output.

The Raiders scored first on a 39-yard field goal by Errol Mann after a 19-yard punt gave Oakland the ball on the Steelers' 38.

The Raiders made the score 10-0 after Willie Hall intercepted a Bradshaw pass and took it to the Steelers' goal line. Running back Clarence Davis took it in three plays later.

After the Steelers scored to make it 10-7, the Raiders mounted a 13-play drive ending with a TD pass Stabler to Bankston to end the scoring for the first half.

7 Familiar Faces

NEW YORK, Dec. 26 (NYT).—Seven of the 24 players selected to the All-Pro National Football League squad by the Professional Football Writers of America gained the honor for the third time. They were Ron Yary, Jim Langer, O. J. Simpson, Jack Youngblood, Jack Ham, Ken Houston and Ray Guy.

The American and National Conferences placed 12 players apiece. On a team basis, the Oakland Raiders and the Buffalo Bills each had two players on the offensive unit while the Pittsburgh Steelers and the Los Angeles Rams led the defensive teams with two selections each.

The offensive team was made up of Bert Jones of Baltimore at quarterback, Simpson of Buffalo and Walter Payton of Chicago at running backs, Dave Casper of Oakland at tight end, Clifford Branch of Oakland and Drew Pearson of Dallas at wide receivers, Yary of Minnesota and Dan Dierdorf of St. Louis at tackles, Joe Delamielleure of Buffalo and John Hannah of New England at guards, Langer of Miami at center and Jim Bakken of St. Louis at placekicker.

Named to the defensive team were Youngblood of Los Angeles and Tommy Hart of San Francisco at ends, Wally Chambers of Chicago and Jerry Sherk of Cleveland at tackles, Jack Lambert of Pittsburgh at middle linebacker, Ham of Pittsburgh and Robert Brazile of Houston at outside linebackers, Monte Jackson of Los Angeles and Roger Wehrli of St. Louis at cornerbacks, Cliff Harris of Dallas and Houston of Washington at safeties and Guy of Oakland as punter.

man raced 62 yards, his t run of the year, on the play of the second half be- eing ripped by Rod Perry e Rams' two. Two plays Foreman burst over the goal rom the one and Cox con- the extra point for a 17-0

n the dormant Rams of- came to life, capitalizing on two big turnovers. With the Vikings on the march, Tarkenton's pass from the Rams' 16 was picked off in the endzone by NFL interception leader Monte Jackson.

Haden, scrambling back and forth across the field, then hit Harold Jackson with a 40-yard pass and, then again running madly while looking for a receiver, hit McCutcheon with a 14-yard pass to the Vikings' 10.

McCutcheon drove up the middle on the next play for the touchdown, but Dempsey missed the extra-point attempt to cut Minnesota's lead to 17-6.

On Minnesota's next series, Tarkenton was looking to pass from his 22 when Fred Dryer rocked him from behind, causing a fumble. Jack Youngblood scooped up the ball for Los Angeles and returned it eight yards to the Vikings' eight. Three plays later, Haden passed to Jackson for the touchdown and Dempsey's extra point cut the lead to 17-13.

The Rams moved into Viking territory twice in the last period, but Hilgenberg dropped Haden for a 10-yard loss on third-and-nine at the Minnesota 33, forcing the Rams to punt.

And with just under three minutes left in the game, Jim Marshall pressured Haden into an incompletion and then Bryant made his key interception.

When the game was over Minnesota fans stormed the field and tore down both goal posts. For Los Angeles fans, it had been a frustrating day.

After Bryant's 90-yard run, the Rams again churned out huge chunks of yardage. They moved from their 30 to the Vikings' 21 in just five plays, but Cappelletti fumbled and Matt Blair made his sixth fumble recovery of the season to halt the drive.

Another key turnover was the blocked punt. Rams' punter Rusty Jackson dropped the snap from center, picked it up and then had his punt blocked. White recovered on the Los Angeles eight and, after the Vikings were unable to move, Cox kicked his field goal.

After Bryant's late-game interception, Tarkenton tossed a short pass over the middle to Foreman, who carried it 57 yards to the Rams' 14. Johnson, who came in when Foreman was shaken up on the big gain, barrelled into the endzone from 12 yards out to clinch the victory.

Tarkenton finished the game 12 for 27 for 143 yards.

Jones Honored

NEW YORK, Dec. 26 (UPI).—Bert Jones, who teamed with Roger Carr this season to form one of the most feared passing combinations in the National Football League, has been named United Press International's Player of the Year in the American Football Conference.

The talented young quarterback became Baltimore's team leader when he stood up for his fired coach Ted Marchibroda last summer and solidified the Colts into a title contender. He went on to lead Baltimore to an 11-3 record and the Eastern Division title.

Jones had an outstanding year. He finished the regular season with 207 completions in 343 attempts, good for a 60.3 percentage. He passed for a league high 3,104 yards and his 24 touchdown passes were second only to Oakland's Ken Stabler. Carr, also a Louisianan, caught 43 passes for 1,112 yards, the highest figure in the league, and 11 touchdowns.

Jones was named on 28 of the 42 ballots cast by UPI's panel of 42 pro football writers, three from each conference city. Stabler was the runner-up with six votes and New England quarterback Steve Grogan and Baltimore running back Lydell Mitchell tied for third with three votes each. Cincinnati quarterback Ken Anderson and Buffalo running back O. J. Simpson rounded out the balloting with one vote each.

Padres' Jones Shows Modesty

From Wire Dispatches

SAN DIEGO, Dec. 26.—Randy Jones, who doesn't believe he's worth a $2-million contract, has signed with the San Diego Padres. No terms of the multiyear pact were disclosed, but it was believed the star left-hander would be paid at least twice last year's salary of $87,500.

Jones, the National League Cy Young Award-winner for 1976 after posting a 22-14 won-lost record, decided the other day to bring in the noted player agent, Jerry Kapstein, to conduct the negotiations, and Kapstein apparently didn't waste time.

Stockton, Tanner Gain in Australia

SYDNEY, Dec. 26 (AP).—Americans Dick Stockton and Roscoe Tanner scored first-round victories today on the opening day of the New South Wales Open tennis championships.

Stockton beat fellow American Tom Gorman, 7-6, 6-3. Tanner won 6-3, 6-4 against Bob Hewitt, a former Australian and now a South African resident. Australian Ross Case overcame his first hurdle in his fight to retain the New South Wales title with a 7-6, 6-3 victory over local player Terry Rocavert.

Soviet Juniors Lead Ice Hockey

BANSKA BYSTRICA, Dec. 26 (Reuters).—Unbeaten, untied Soviet Union consolidated its lead in the world junior ice hockey championships here today with a 4-2 victory over Sweden.

The Saint Catherine Fincups, representing Canada, beat Finland, 6-4, to move into second place in the championships, a point behind Russia.

Poland, the underdog of the championships, gained its first point with an unexpected 2-2 draw with the United States, while Czechoslovakia moved up in the placings with an 8-2 triumph over West Germany.

$2 Bettors Now Believe In Santa Claus

NEW ORLEANS, Dec. 26 (AP).—A 10-year-old horse named Santa Claus won the third race at the Fair Grounds on Christmas Eve, delivering a $7.10 present to dozens of giggling, holiday-spirited $2 bettors.

It was no surprise to Santa's handlers, who brought their horse to the paddock with his tail wrapped in red and white ribbons and a red stocking cap on his head.

When Santa took the lead in the stretch of the mile and a sixteenth race, the track announcer broke off his usual clipped listing of the positions: "Here comes Santa Claus, here comes Santa Claus," he sang, "down the long stretch.

"Here comes Santa Claus, here comes Santa Claus, all by himself. . ."

The crowd went wild. One observer said it was the most cheering he's ever heard at the track.

Finley Tells of His Efforts, Plots of Others

CHICAGO, Dec. 26 (AP).—Charles O. Finley has testified that six of his players were told by their agent, Jerry Kapstein, in June not to sign contracts with the Oakland A's. The Oakland owner also said that Don Baylor had rejected his offer of $635,000 over three years.

Finley was testifying in Federal District Court, where he is suing commissioner Bowie Kuhn because the czar voided the $3.5-million sales of three players last June. The case was recessed until Jan. 3, when Kuhn's lawyers will question Finley.

Finley said he believed baseball's Major League Agreement didn't give the commissioner power to void legal trades in the game, but allowed him only to "make sure there is no gambling—and nothing immoral going on."

The Oakland owner also testified that he had offered Joe Rudi a contract that would have paid Rudi $160,000 in 1978. But, Finley said, Rudi rejected the offer and Finley later tried to sell him to the Boston Red Sox for $1 million.

Kuhn Steps In

Kuhn voided that June 15 sale of Rudi and Rollie Fingers to the Boston Red Sox for $1 million each, and one of Vida Blue to the New York Yankees for $1.5 million. Rudi and Fingers subsequently were picked up in last month's free-agent draft. Blue again signed with Oakland.

Kuhn, citing a phrase in the Major League Agreement, said the sales by Finley were "not in the best interests of baseball" and would tend to upset "competitive balance" in the American League by making New York and Boston too strong and weakening Oakland.

Finley, attempting to show his efforts to sign or trade six free agents before he resorted to the cash-only transaction, also testified that he had met for 9 1/2 hours with Baylor in a futile effort to reach a contract agreement for the 1976 season. Baylor had been acquired from Baltimore in a deal involving Reggie Jackson, another Oakland star playing out his option.

"During that time, I made a very substantial offer and Don Baylor suggested to me that he would like to discuss this with his attorney in Austin [Texas]," Finley testified.

No Deal With Baylor

Finley said he met the next day with Baylor's lawyer and accountant, but the pair rejected a contract offer of $635,000 over three years after about 30 minutes in conference. Baylor was signed as a free agent by the California Angels last month.

Finley also testified that Kapstein, agent for six unsigned Oakland players including Rudi and Fingers, had said the players would wait to see what offers came in from other teams before considering another year's contract with Oakland. Finley testified that Kapstein said he would then give Finley a chance to match the offers.

Finley was on the stand for the first time in the six-day trial. During both days, he sought to give the impression that his sales were a business decision brought on by pressure from players, poor attendance at Oakland home games and high operating costs.

As an example of high expenses, Finley said it took up to $1.2 million to operate the system of farm clubs, and 90 per cent of the players picked for the system never made it to the major leagues.

U.S. Olympians Get Central Site For Training

SQUAW VALLEY, Calif., Dec. 26 (UPI).—The United States Olympic Committee has signed a lease to use the site here of the 1960 Winter Olympics as a permanent year-round training base for its athletes.

A 12-year lease signed by the USOC converts part of the Lake Tahoe resort in the prime High Sierra Nevada ski country into a facility for both Winter and Summer Games.

Officials said other plans are under way to set up additional training sites at Colorado Springs and Lake Placid, N.Y.—site of the 1980 Winter Olympics—but neither area will be ready for at least a year.

"We expect the additional construction to be minimal," said Alex Cushing, chairman of the Squaw Valley Ski Corporation.

"The facilities are essentially complete—especially for the winter sports—and the Olympic village will accommodate all the athletes. We're ready to go immediately. Now, if we could just get some snow . . .

"We expect to be the center of the Olympic movement for the next four years."

Col. Donald Miller, USOC executive director, was optimistic about the move to concentrate athletes and coaches in one place rather than scattering them around the nation in borrowed college campus facilities.

Wenzel Beats Morerod

EBNAT-KAPPEL, Switz., Dec. 26 (Reuters).—Liechtenstein's Hanni Wenzel outsped Swiss star Lise-Marie Morerod by almost three seconds to win an international women's giant slalom race here today. Wenzel, 20, swerved through 59 gates staked out on a tough 1,080-meter course in 1 minute 35.55 seconds.

Oklahoma Has a Fiesta Against Wyoming

TEMPE, Ariz., Dec. 26 (UPI).—Oklahoma, capitalizing on early scoring opportunities, routed Wyoming, 41-7, in the Fiesta Bowl yesterday.

Elvis Peacock scored two touchdowns and Uwe Von Schamann kicked field goals of 32 and 50 yards to lead the Big Eight Conference Sooners, who never punted in the game.

Oklahoma, ranked 13th, put together touchdown drives of 80, 53, 82 and 81 yards and coach Barry Switzer substituted freely after a 27-0 lead midway in the third quarter. Sixteen backs carried the ball for Oklahoma.

Wyoming's score came with 24 seconds left in the game when Robbie Wright went over from the one to climax a 92-yard drive.

Oklahoma took the opening kickoff and marched 80 yards in 14 plays, taking six minutes, with Peacock going over from the three for the touchdown.

Wyoming, which finished the regular season as co-champion of the Western Athletic Conference and beat co-champion Brigham Young to earn the right to play in the Fiesta Bowl, managed only three yards after taking the ensuing kick at the 13, and the Sooners took over at their 47. Horace Ivory went over from the four 10 plays later for Oklahoma's second score with 3:31 remaining in the first quarter and the rout was on.

Oklahoma finished the regular season as one of three co-champions in the Big Eight, but lost a chance to go to the Orange Bowl because of its loss to Colorado.

The Sooners, finishing the season with a 9-2-1 record, had 438 yards total offense to 204 for the Cowboys, who ended with an 8-4 mark.

Gray 31, Blue 10

MONTGOMERY, Ala., Dec. 26 (AP).—All-American quarterback Tommy Kramer of Rice passed for three touchdowns and Sidney Thornton of Northwest Louisiana rushed for a record 151 yards Friday as the Gray downed the Blue, 31-10, in their post-season college all-star game.

The victory ended the South's three-year losing streak.

Two of Kramer's touchdown tosses were to wide receiver Johnny Perkins of Abilene Christian, for 28 and 10 yards. Kenneth Roy, Kramer's teammate at Rice, hauled in a five-yard scoring pass.

English Soccer: A Financial Crisis

By Clay Harris

LONDON, Dec. 26 (WP).—English soccer is facing a financial crisis so grave that the head of its league says he wouldn't be surprised if several clubs folded at the end of the current season.

One recent report said only five of the league's 92 clubs were in the black and estimated that the other 87 owed a total of more than $23 million.

Since the season began in August, two financially strapped clubs have issued desperate appeals to their fans and financial supporters that said if certain sums were not raised before a given deadline, the clubs would go bankrupt and quit playing. In both cases, the money to ease the immediate crisis was found, and now the clubs—and several others like them—survive only from week to week, fearful of bad attendances or matches canceled by bad weather.

But their escape might be shortlived.

"There are four or five clubs in a very serious financial position," said Football League secretary Alan Hardaker. "There are three or four at the crisis stage. They could possibly finish the end of the season and that's about all."

The existence of even some clubs in the First Division is threatened, according to Hardaker. He thinks $23 million is an overestimate for the total debt, but some journalists have suggested it may be an underestimate, mentioning $28 million as a likelier figure.

Soccer's troubles in its birthplace result from many factors.

"I have a feeling that football, being the national game, reflects the state of the country as a whole," Hardaker said.

Some top clubs went heavily in debt by paying more and more money for star players who didn't draw sufficiently more spectators. Others undertook expensive renovations of their grounds, and then were relegated to lower divisions after finishing in the bottom three. In the lower levels of the four-division league, clubs often can't even cover their weekly wages and transportation bills. The tax man is a leading creditor of some clubs who are behind on payment of taxes withheld from their players' wages or local property taxes.

Through one or more of these ways, most clubs ran up large overdrafts with their banks, and now the banks are clamping down.

Another problem, according to Hardaker, is that new laws such as one taxing capital transfers have reduced the amount of money available from clubs' traditional financial backers—local businessmen. Even Everton, a First Division Liverpool club backed by the richest person in Britain after Queen Elizabeth, is in the red.

In the short run, most clubs' only course is to minimize expenses. In the long run, Hardaker said, English soccer will have to be nationalized.

The proposal most often suggested is reorganization of the bottom two divisions into two or three regional divisions. This would remove the need for long journeys for matches that often only draw a couple of thousand spectators and neither cover the expenses of the home side nor the visitors.

It is also likely that the lower divisions will eventually revert to using part-time players, who will hold other jobs as well.

Solutions like these are viewed as probably inevitable in some form, but it may take a bankruptcy or two to force the issue among the clubs.

Much more controversial are suggestions that the clubs be allowed to seek sponsors whose names, or advertising slogans, the players would wear on their shirts. It is a fairly common practice in Europe, but resisted strongly by people like Hardaker who think it would be an affront to the dignity of the game.

But clubs are already allowed to wear a sponsor's name on their warm-up suits. Orient, a Second Division club in East London, advertises a catering firm in this manner, and representatives of three of the clubs in deepest trouble said they would have no qualms about wearing a company name in return for financial backing.

The cases of these three clubs illustrate the way the crisis is hitting at all levels of the English Soccer League.

Chelsea is by far the biggest debtor in English soccer, owing $5.6 million according to a recent estimate. Last July, Chelsea's creditors approved a 12-month moratorium on the clubs' debts to allow it a chance to make some headway.

Chelsea's main difficulty is its new $3.3-million grandstand, which seats 11,000 along one side of its London ground and is by far the grandest stand in English soccer. However, it was started in the midst of a financial boom and got caught by inflation and work delays that doubled its originally projected cost.

Then Chelsea, accustomed to playing in the First Division, had a bad year and was relegated to second, where attendances were lower and shares of the gate smaller, at both home and away matches. This season Chelsea leads the Second Division by a comfortable margin and is heavily favored to be one of the three clubs to be promoted back to the top division.

With success on the field, the crowds have come back, and Chelsea's financial situation is at least not getting any worse.

Burroughs Decides To Play With Braves

ATLANTA, Dec. 26 (UPI).—Texas Ranger slugger Jeff Burroughs, who had balked at being traded to Atlanta, apparently will join the Braves next season and drop his contention that he had a no-trade contract with the Rangers.

A Braves spokesman said that Burroughs, Atlanta owner Ted Turner, Rangers owner Brad Corbett and general manager Eddie Robinson, Burroughs and his attorney, Marvin Demoff, had a conference telephone call to straighten out one of the most confused baseball deals of the year.

Italian Fighter Held In Shooting of Official

ROME, Dec. 26 (Reuters).—Police today detained former European light-heavyweight boxing champion Domenico Adinolfi following the shooting last night of the European Boxing Union secretary-general Piero Pini. Pini was wounded in the legs by two gunmen who entered his office in central Rome.

Adinolfi's lawyer told reporters he believed the boxer would soon be released. "There are 10 people who can testify to seeing Adinolfi last night in Ceccano. Adinolfi will clear everything up and will soon be free again," he said. Ceccano is a small town about 90 kilometers south of Rome.

23. Keep in touch with the office.

(An international call means business.)

Long Distance is the next best thing to being there.

Art Buchwald

TV Comes of Age

WASHINGTON—Nobody seems to know it but the father of television was a German named Paul Nipkow who received a patent on his invention in 1884. He was followed in the development of the system by J.L. Baird of Scotland and C.F. Jenkins and V.K. Zworykin of the United States, who in the 1920s all worked on ways of bringing TV signals into a machine.

Buchwald

By the end of World War II, television sets were ready to be marketed.

The big problem at that time was nobody knew what to put on them. The invention was there but it had no useful purpose.

One of the manufacturers, Sid Magnavox, said, "Look, why don't we put on plays and movies and quiz shows and sports events until we think up a purpose for TV."

The other manufacturers, who had tremendous amounts of money invested in their sets, agreed. They went to radio networks, the motion picture companies and sports promoters, the game show packagers and the news agencies and said, "We have this thing called television, but we can't think of any reason why people should buy it. Let's make a deal. We will purchase films and shows and football games and newsreels on a temporary basis until our research people figure out what TV can be used for."

The entertainment companies were reluctant to get involved in something on such a short-term basis, but they finally agreed to provide a product for TV at least until the TV manufacturers could come up with something that would make the purchase of a set worthwhile.

In no time at all shows were produced, sports events were covered, press conferences were held and pictures were provided of news events. There were panel shows and documentaries and children's cartoons.

The screens had something for people to look at. They bought the sets and an entire industry took off.

But all the time the TV manufacturers fretted and stewed because they knew that the American people would sit just so long before their sets watching entertainment until they lost interest in the fad.

They pressed their research people hard. "You have to find a real reason for people to own TV," they said, "or we'll all go down the drain. How long can we keep Americans glued to pictures? They're not idiots and if you fill their screens with police shows and situation comedies and talk programs they'll throw their sets out the window."

For 30 years, scientists worked on the problem and then one day an MIT graduate named Abner Blamesworthy, working in a TV research laboratory, saw a dot on his screen. He accidentally touched a wire. The dot bounced from one side of the screen to the other and his assistant, a Miss Bonnie Wilby, playfully hit the dot back to him. He hit it back to her and each time they touched a wire the hit went "pong."

Blamesworthy was incredulous: "I think we've got it!"

"What have we got?" asked Miss Wilby.

"A real reason for television. It's a game. Two people can play tennis or basketball just by hitting a dot back and forth across the screen."

"Why didn't we think of it before?" Miss Wilby said, clutching Abner close to her warm body.

"This invention will change the leisure habits of the American people. No longer will they have to sit in their chairs as spectators. They can be participants. TV is a *participant sport*."

"What will they do with all the TV programs they now put on the air?"

"Scrap them," Abner said. "There's no need for them any more. TV has finally come of age."

The rest is history. This year over 3 million TV screen games were sold at Christmas. Next year the manufacturers expect to sell 40 million. By 1979 every *U.S. home will be equipped with* games you can play on your TV screen and as each family buys a game adaptor another television program will fade from the air. It took a long time in coming, but it was worth the wait. Who wants to watch Kojak when by twisting a dial you can go "pong, pong, pong" all night long.

Japanese Teacher 'Suspends' 14 Boys

MATSUMOTO, Japan, Dec. 26 (AP).—A schoolteacher dangled 14 schoolboys by their feet from a second-floor classroom window because they did not do their homework, authorities said.

The 40-year-old teacher, not identified, reportedly tied the ankles of the boys to window-sills "for safety" and then ordered them to dangle outside for about 10 seconds, school officials said. None of the boys was injured.

'Fish migrate through the Nantucket shoals and some of them are spawning there now... All that oil rolling around is going to spread a lot of poison.'

Oil and Weatherproof People of Nantucket

By Christopher Lydon

NANTUCKET, Mass. (NYT).—The miracle of Nantucket was always that it survived at all. For all the summertime splendor of Main Street's mansions and shops, for all the pristine perfection of nearly 1,000 townhouses of the whaling era and before, the island still looks from the air like a wisp of sand dunes.

Herman Melville called it an "anthill in the sea" in Chapter 14 of "Moby-Dick" and marveled: "Look at it—a mere hillock, an elbow of sand; all beach, without a background. There is more sand there than you would use in 20 years as a substitute for blotting paper. Some gamesome wights will tell that you have to plant weeds there, they don't grow naturally; that they import Canada thistles; that they have to send beyond seas for a spile to stop a leak in an oil cask."

As the worst oil leak ever in American waters moved tentatively away from Nantucket's beaches, the temptation among islanders here was to be cavalier. "We're used to these natural disasters," said Robert Mooney, the town prosecutor, turning puckish. "Maybe we'd better send an emergency message to Plains, Ga., and ask for more reporters up here."

Proud Isolation

Nantucket in the wintertime is a proudly isolated town of some 5,000 weatherproof souls who voted last spring to start construction of an airport motel designed to service oil and drilling workers on fish-rich Georges Bank off the Nantucket coast; at the same time Nantucketers were voting by a margin of 3 to 2 against the so-called Kennedy bill that would have put land and wildlife protection into the powerful hands of the federal government.

The islanders' view has long been that they, and perhaps only they, understand the fragility of this "land far out to sea," as the Indians named it, because they have lived with the immense power of wind and water 30 miles out in the North *Atlantic. Accordingly visitors inquiring about the Argo* Merchant oil emergency are sometimes treated to amused disdain. "Remember that two reporters in one day is at least one too many for most Nantucketers," Mooney said. "We're not used to being followed around by 'The Boys on the Bus.'"

"I'm not that upset," said Walter Glidden, Nantucket's busiest fish dealer, "because I'm a guy that takes one day at a time. I've never seen anything like this before. What are you going to do?"

The most piercing scorn is reserved for the oil company spokesman who only two weeks ago asserted at a public hearing in Boston that he learned in the Gulf of Mexico all that is needed to be known about cleaning up possible oil spills in the Georges Bank. One plan for getting oil from Georges Bank to the mainland was through the use of tankers such as the Argo Merchant. In the current crisis, all the authorities have said that they are helpless to do anything about the tanker that split on the Nantucket shoals.

Dun Gifford, a Boston real estate man and president of the Nantucket Defense Fund, a conservation group, observed the other day: "It all brings back to me the seaman's prayer: 'Oh God, Thy sea is so great, and my boat is so small.'"

The lesson here, though islanders doubt that outsiders and especially the oil industry will learn it, involves humility before the natural elements.

"It's probably our good fortune," said Bob Dennis, a sport fisherman and activist member of the Nantucket Land Council, "to be shown the impact of an oil spill. But what kind of good fortune is that? I don't think if they'd drilled off Georges for 20 years they would have spilled the 7 million gallons that were in that tanker."

The Nantucket whaleman that Melville celebrated is extinct. Melville wrote, "Two-thirds of this terraqueous globe are the Nantucketer's. For the sea is his; he owns it as emperors own empires."

But commercial fishing has been resurgent here, and the gravest concern about the oil damage (much more than for tourism) was being expressed by fishermen, not only for their balance sheets but for the natural balance of marine life.

Bill Blount, a red-bearded 31-year-old, originally from Newport, R.I., is one of numerous young men, mostly college-educated entrepreneurs, sons of the middle class, who have undertaken the rugged fishing business of Nantucket. They have done well in it. An aggressive fisherman with an agile boat can net between $50,000 and $100,000 a year.

And they had hoped to do better with the new 200-mile limit protecting coastal fishing grounds from foreign intruders. Last Wednesday on Straight Wharf, waiting for the morning's stiff wind to calm, Blount worried about long-range effects of the spill. "If it gets down to the bottom," he said, "it will still be bubbling up 10 years from now. It will never be gone.

"It's going to cut out a big fishing area that I might have worked on," Blount said. "You see, fish migrate through the Nantucket shoals, and some of them are spawning there now. Codfish, yellowtails, flounders, daylights, sand dabs and sea dabs, haddock, grey sole and lemon sole—all your winter fish spawn up and down this coast from December into the spring, and all that oil rolling around is going to spread a lot of poison over the eggs and young fish."

Moving Toward Shore

NANTUCKET, Mass., Dec. 26 (AP).—Winds in the area of the wrecked tanker Argo Merchant changed direction today and, for the first time, began pushing the big oil spill toward the Massachusetts shore, the Coast Guard said.

"Some of that oil is going to be moving in with those winds," Coast Guard spokesman John Bablitch said.

However, the winds were expected to shift again tonight, blowing from the north and pushing the oil back away from shore.

The floating mass of oil, now covering an area about 30 miles by 100 miles, had been drifting generally eastward, away from land but toward the Georges Bank fishing grounds, since the tanker ran aground off Nantucket.

PEOPLE: *3d Set of Fraternal Twin Defies the Odds in Oma*

Beating odds of 512,000 to 1, Margaret Murphy of Omaha has done it again. She's had her third set of fraternal twins. "I guess my reaction was I really wasn't too surprised since it happened before. At least I wasn't as surprised as I was with the other sets," she said last week after the twin boys were born. Mrs. Murphy, 36, said her doctor hadn't expected the third set. "I guess he walked out into the hall, threw up his hands and told Jim he'd done it again," she said. "Jim is just in seventh heaven," she said of her husband, an electrical lineman.

The Murphys, who have two other children, Jim, 7, and Ann, 5, say they will probably name the newcomers Pat and Mike. Their first set of twins, Jennifer and Theresa, who was stillborn—were born in 1973. In 1974, Daniel and David were born. James Eisen, genetics professor at the University of Nebraska Medical Center, said the chances of having one set of fraternal (*not identical*) twins is 1 in 80. The chances of two sets are 1 in 80 times 80 and for three sets it is 1 in 80 times 80 times 80, or 1 in 512,000.

When the North Penn School District told Margaret Maust that her son Vincent had, in effect, flunked kindergarten, Mrs. Maust was not amused. She sued. "I just couldn't believe they could do something like that," she said. Neither did a U.S. District Court jury, in Lansdale, Pa., which this month awarded Vincent $6,000 in damages, concluding that the school board's 1973 decision had violated his constitutional rights. The school board is considering an appeal. "We haven't had a chance to fully analyze the decision yet," said president Mary Gehman. "But if it means that every time you fail to pass a student you take a chance of getting hit with a damage award, then a lot of school districts may find they can't do what they think is best for the child."

Chairman Hua Kuo-feng at agricultural conference.

ua Gives Top 1977 Priority o Drive Against 'Radicals'

KING, Dec. 27 (Reuters).— munist party chairman Hua feng says the Chinese peo- most important duty in 1977 struggle against Mao Tse- s widow, Chiang Ching, and fellow radicals.

a year-end message, the chairman admitted that the of Mao last September had ed "tremendous difficulties" he Chinese Communist party. referred to "acute and com- struggle between the two it. 1976," but said the purg- Miss Chiang and three Politburo members last er had been decisive.

Hua's message came in a h at a national agricultural rence two days ago. Reports s address were on the front of Peking newspapers to- chairman laid down four fighting tasks" for China in 1977. Top priority went to the anti-radical campaign, which appears about to develop into a nationwide purge. By designating the anti-radical drive as China's "central task" for 1977, Mr. Hua clearly indicated the Communist party has decided not to be lenient.

The three other tasks he set for 1977 were the strengthening of the Communist party, improved agricultural and industrial performance and greater efforts in studying ideology.

The report made no mention of Teng Hsiao-ping, the once powerful vice-premier who was dismissed last April after being attacked by radicals as a "capitalist roader."

Several weeks ago the official media ceased its daily denouncements of Mr. Teng and analysts believe a decision to rehabilitate him may have already been made.

Lawyers Confident

Spain Reds Expect Provisional Liberty

By James M. Markham

MADRID, Dec. 27 (NYT).— Lawyers for Santiago Carrillo and seven other prominent Communists formally presented their defense briefs today after expressing a widely shared confidence that their clients would be given provisional liberty.

Mr. Carrillo, the party's secretary-general, was arrested with his personal secretary and six members of the Executive Committee by plainclothes policemen five days ago.

The government, which has denied Mr. Carrillo a passport to live in Spain legally, considered returning the clandestine party chief to exile in Paris but then delivered the case to the Court of Public Order, which was widely used by the Franco regime to try political cases.

The court ordered the eight Communists jailed "provisionally" for a presumed violation of an article of the penal code that was drafted specifically this year by the holdover Franco-era parliament to keep the Communist party illegal.

The article declared "an illegal association" any party that "submitting to an international discipline, proposes to establish a totalitarian system in Spain.

Three lawyers argued in their briefs that the Communist party of Spain, a staunch proponent of the so-called "Eurocommunist" line of independence from Moscow, does not fall within the penal code's strictures.

In public, the lawyers expressed confidence that the 62-year-old Mr. Carrillo and his comrades, who until their arrests operated unhampered here, would soon be released on bail in keeping with other provisions of the penal code.

Political informants said the government of Premier Adolfo Suarez intended to free the Communists provisionally, possibly two at a time, with Mr. Carrillo the last to be let out.

From the government's perspective, the advantage of turning the case over to the Court of Public Order is that its judicial independence is nonexistent. It seemed likely that the actual trial would be delayed for some time, to avoid a test case on whether the Communist party is a legal or an illegal association.

Mr. Suarez, who has told military leaders that his government will not legalize the Communists, wants to avoid blocking the country's political evolution over the issue. One of the Communists now in Carabanchel Prison, Simon Sanchez Montero, is a member of an opposition negotiating committee that hopes to meet the Premier soon to discuss the ground rules for next year's scheduled parliamentary elections.

Mr. Suarez's stance has been to grant the Communists wide de facto legality, leaving it to the next, popularly elected government to resolve the question of its formal legality.

The controversial nature of the Communist party grew out of the Civil War, which was portrayed by the victorious Franco forces as a "crusade" of Christianity and civilization against "godless Communism."

Most of the current party leaders are too young to have played important roles in the Civil War, but Mr. Carrillo, who held a key security job in the Madrid Defense Committee, is accused by rightists of being responsible for the execution of nationalist prisoners. He has denied the accusations.

Won't Try to Keep Quebec by Force

Trudeau Says He Fears a Civil War

OTTAWA, Dec. 27 (AP).—Prime Minister Pierre Elliott Trudeau said yesterday that he would not minimize the danger of civil strife if largely French-speaking Quebec moves to break away from the rest of Canada.

In a television interview, Mr. Trudeau reiterated an earlier statement that he would not lead Canadians into a civil war if Quebec endorses separatism in a referendum. He expressed determination to work through the country's democratic structures.

"I'm letting people know that they shouldn't count on me to keep Quebec in by the force of arms if Quebec overwhelmingly decides that it doesn't want to be a country in Canada," he said in the taped year-end interview.

But the Prime Minister did not dismiss the possibility of violence.

"We have the examples of Lebanon and Cyprus and Northern Ireland and Bangladesh," he said. "We have all kinds of contemporary examples of the absurdity of trying to solve the differences of ethnic or religious principles by arms. You start shooting and you don't easily stop.

"I'm just saying that I would not be the man to lead Canada into a civil war, but I don't say there wouldn't be others who would want to take up arms, and hence the danger is not one that I am minimizing."

Federalism Not Enough

Mr. Trudeau said just developing a form of federalism with more power for provincial governments would not be enough to sway Quebec's new ruling party away from its policy of eventual independence.

René Levesque of the separatist Parti Quebecois took power as the province's premier last month after his French-speaking party scored an upset victory in provincial elections.

Mr. Trudeau declared, "My course is to keep a strong federal government but to make Quebeckers feel that they have a role to play in that government."

At the same time he forecast that "if there is a referendum [on separatism], I think we can clobber the PQ so badly at the referendum that they will no longer have any leg to stand on, and either they'll resign or have to renege on their separatism commitment."

Mr. Trudeau indicated that he favors a publicity campaign by the Ottawa government in support of federalism as a way of offsetting the Parti Quebecois separatist strategy.

Carter Defense Aide Cautious On Soviet Military Intentions

By Robert Gilette

PASADENA, Calif., Dec. 27.— Secretary of Defense-designate Harold Brown says that he is skeptical of Pentagon reports that the Soviet Union is engaged in a huge new effort to protect civilians from nuclear attack, an allegation that has led to fears that the Russians are seeking a strategic advantage.

Even if the Soviet Union is engaged in building civilian shelters, Mr. Brown said in an interview, there is little reason to believe that such a program would in fact confer a significant advantage in the event of a nuclear war. Nor, he indicated, does it seem appropriate to launch a matching U.S. program to close what some news reports have called the "survival gap."

"Without expressing a preference," Mr. Brown said, "there are in fact changes in American strategic forces that could t adopted that would be directed at countering such a massive Soviet program, if there is one.

"The way to counter a relatively ineffective system is not to replicate it on the other side," he added.

In recent months, U.S. Defense Department officials have said that the Soviet Union was spending $1 billion a year on civil defense, in contrast to an $82.5-million annual program in the United States. Among others, former Defense Secretary James Schlesinger reportedly has viewed the Soviet buildup with alarm, although major differences exist among intelligence agencies about its extent and about its implications for U.S. national security.

Deterrence Belief

Concern stems from the widely held belief that attempts by an adversary to shield its population and industry against nuclear attack—whether by underground shelters or anti-ballistic missiles—indicates that the adversary may believe it is possible to survive and thus to win a nuclear exchange. A mutual belief that nuclear war cannot be won is considered essential to deterrence.

"The belief on either side that

Saudis Reported Ready for a 20% Oil Output Boost

BEIRUT, Dec. 27 (UPI).—In an apparent move to undersell "hawks" in the Organization of Petroleum Exporting Countries (OPEC), Saudi Arabia will increase its oil production by almost 20 per cent next year, the Middle East Economic Survey said today.

The influential oil newsletter, quoting "an authoritative Saudi source," said, "Saudi Arabia will raise its crude oil production ... by an average of 1.5 million barrels daily to 10 million barrels daily in the first quarter of 1977." Saudi oil will cost less than oil produced by most other OPEC members after Jan. 1 because of the split at the organization's price conference earlier this month. Saudi Arabia and the United Arab Emirates refused to go along with the "hawks'" 10-per-cent price hike and decided to hold any price increases for their oil to 5 per cent.

Production Cutback

The Saudi decision to raise production will apparently force Iran, Kuwait, Venezuela and other OPEC members to cut back on their production and sales at the higher price—or, if they want to maintain current sales levels, to drop their prices and grant discounts.

Saudi Arabia pumped an average of 8.44 million barrels of crude oil per day this year, almost 30 per cent of the total OPEC output of 39.7 million barrels per day. Thus, the Saudi decision to raise production by 1.5 million barrels a day amounts to about 5 per cent of total OPEC production.

That increase will not flood the market, but it will still have a major impact, oil industry sources said.

"An increase of 1.5 million barrels a day is pretty hefty," a knowledgeable oilman said. "The impact may not be felt immediately, because a short-term drop in demand is expected early next year. But this means the other OPEC members will almost surely have to cut back their production to maintain their 10-percent price increase."

Brisk Demand

"Demand for Saudi crudes is expected to be exceptionally brisk from the beginning of 1977" because of their lower prices, the survey said. It said that Saudi medium-weight oil would sell for $11.69 per barrel under the new price levels. An equivalent oil from Kuwait, after the 10-percent price hike there, will sell for about $12.37 a barrel.

The 11 OPEC countries which decided on the higher price level have already agreed with each other to coordinate production cuts, the survey said.

Saudi Arabian Oil Minister Ahmed Zaki Yamani said last week that his country would lift its production ceiling, but the survey report was the first reliable indication of how big an increase Sheikh Yamani planned.

No OPEC Breakup

VIENNA, Dec. 27 (UPI).— Speculation that OPEC might break up as a result of the oil price split are nothing but "wishful thinking," OPEC Secretary-General Meshach Feyide said today.

"Our organization is stronger than ever," Chief Feyide said at a news conference. "Speculations about a possible breakup are nothing but wishful thinking."

"Two oil prices do not mean two organizations," Chief Feyide said. "There is no doubt in my mind that OPEC's unity and solidarity were not affected by the price split."

Oil Price Gives OPEC Surplus Of $40 Billion

CARACAS, Dec. 27 (Reuters). — The world's major oil-exporting countries had a current account balance-of-payments surplus this year of $40 billion, the Venezuelan Central Bank said today.

That compared with a surplus of $3 billion for the major Western industrialized countries and a deficit of $32 billion for the main Third World countries which do not have oil, according to the bank.

[The figure for the major Western industrialized countries differed greatly with projections by the Organization of Economic Cooperation and Development, which said these countries would show a deficit of more than $22 billion.]

The bank's report on world economic trends said that the surplus this year of the 13 nations in the Organization of Petroleum Exporting Countries was 14 per cent higher than last year because of higher oil prices.

U.S., Panama Weigh Canal Neutrality

By Don Oberdorfer

WASHINGTON, Dec. 27 (WP). —The United States and Panama are exploring a formula to guarantee nondiscriminatory operation of the Panama Canal after U.S. control of it expires at the turn of the century, according to informed sources.

Agreement on such a formula, which must await policy decisions by the incoming Carter administration, would be a major breakthrough in the 13-year-old negotiations and probably lead to early settlement on a new Panama Canal treaty, the sources said.

Panama expressed willingness to consider 21st-century guarantees of the waterway's neutrality in the course of talks in that country Dec. 13-18, the last round of diplomatic negotiations expected before the Jan. 20 inauguration.

The form and substance of the guarantees, which would be designed to assure continuing access to the canal by all nations without infringing on Panama's sovereignty, represent a difficult problem for the negotiators. But Foreign Minister Aquilino Boyd, who heads Panama's team, promised to be "imaginative" in finding a formula, and U.S. chief negotiator Ellsworth Bunker also has taken a positive attitude, sources said.

Panama has insisted that the U.S. physical presence for either administration or defense purposes should terminate no later than the end of this century. To Panamanians, the duration of the new treaty—replacing the 1903 document granting U.S. rights "in perpetuity"—is the most important and sensitive issue.

While the major issue remains

be sure, the climate varies the six East European ies of the Communist al- In Poland, riots over at- d food price hikes last e left a disquietude that poses perhaps Moscow's biggest worry in Eastern Europe. In Hungary, the unsuccessful revolt of 20 years ago has given way to a stylish preoccupation with consumerism.

Living standards in East Germany and Czechoslovakia look higher statistically, but these are offset by tight ideological controls. Romania, the bloc's maverick, pursues a relatively independent course, partly because its own authoritarian system has made this more palatable to the Russians. Bulgaria, with strong ethnic and historical links to Russia, faithfully imitates the Soviet example.

Greater Expectations

But greater expectations throughout most of the bloc have given Eastern Europe a generally better standard of living than the Soviet Union and this gap poses a subtle problem. From the Soviet viewpoint, Eastern Europeans tend to live better, talk more freely and identify in more ways with the West.

The driver of a jaunty little Polski Fiat taxi in Warsaw conveyed a popular sentiment. "We're not Communists," he said. "Maybe officially, but not in our hearts." U.S. rock music blasted from the stereo speakers of his Japanese tape deck and a gilded St. Christopher's medal dangled from the car visor.

A visitor from the West may still perceive a Soviet stamp on Eastern Europe. The dreary prefabricated apartment blocks on East Berlin's Leninallee or in Warsaw's Bellany district could have been lifted from the outskirts of Moscow or Leningrad. Soviet-made Volga taxis and Zhiguli ply the streets along with Czech Skodas, East German Trabants and Hungarian Ikarus buses.

But anyone arriving from the Soviet Union is jolted by more

Benefits, Dangers of Pesticides Weighed on Scale of Nations' Priorities

By Dan Morgan and Peter Milius

WASHINGTON, Dec. 27 (WP). —Fourteen years after Rachel Carson called attention to the perils of pesticides in "Silent Spring," the United States is using about twice as much poison against insects and weeds as it was then.

The pesticide industry is a growth sector of the U.S. economy —a $2.6-billion-a-year business that produces 1 billion pounds of chemicals for use at home and 600 million more pounds for countries abroad.

Moreover, the chemical warfare against pests has been rapidly spreading around the world, as less-developed tropical countries turn to pesticides to combat devastating diseases and increase their lagging food production.

For those nations, the United States is the major pesticide arsenal and dominates the $7-billion-a-year global market in the chemicals.

Many of the country's best-known industrial giants are involved in the making and trading of the poisons: Dow Chemical, Eli Lilly, du Pont, Monsanto, Shell, and Chevron, to name a few. And the scope is indicated by the fact that one firm, American Cyanamid, reportedly sold nearly half a billion dollars worth of agricultural chemicals worldwide in 1974.

To the policy makers who have to make the ultimate decisions about the use of these poisons, the spread of pesticides around the world poses extraordinarily complicated questions.

Widespread Disagreement

Many countries rely on the United States to guide them in selecting compounds that are safe and effective. Yet in this country, there is still widespread disagreement about what is safe. Recent controversies involving the insecticides Kepone and Leptophos illustrate the nightmarish difficulties faced by the regulators. Both of these nerve-attacking chemicals have been linked to illnesses of workers at plants where they were made.

Since 1970, the Environmental Protection Agency has had the task in this country of weighing the potential harm against the benefits of such chemicals. But the EPA is a new agency, and has only begun to review fully the impact of dozens of substances upon our lives and health. Scientists say that almost all substances are potentially poisonous if used in certain ways and in certain amounts. In determining what serves the general good, the regulators are operating in the murkiest of areas with evidence that is, at best, tentative.

Some pesticides kill or cripple people when they are improperly manufactured or used. Their potential for causing delayed illnesses, perhaps years from now, is a matter of intense scientific investigation.

At issue is whether it is worth risking some lives in order to achieve economic or medical objectives that may save others from death, illness or malnutrition.

For instance, is it worth risking the lives of chemical workers in Texas so that farmers in Egypt can produce an abundant cotton crop and avoid death from starvation and disease?

Role of Priorities

National priorities play a powerful role in pesticide decisions. Improper use of the common pesticide Malathion last summer caused at least five deaths and an estimated 2,900 illnesses in Pakistan. But the government has ordered the spraying against mosquitoes again next year to stop a feared resurgence of malaria.

In many poor countries, the environmental movement's concern about pesticides has been viewed until recently as a luxury of the rich.

Pesticides have been used abroad in public health programs to fight yellow fever, typhus, malaria, river blindness, Chagas' disease and numerous other illnesses spread by mosquitoes, tsetse flies, black flies, ticks and snails.

There is no question that the pesticides have also aided farmers abroad who face fearful losses from pests. Bayer Chemical of West Germany has estimated that locust swarms capable of eating as much as 3,000 tons of food a day cause $1 billion in crop losses in Africa and South Asia every year.

One of the strongest defenders of the use of chemicals against such pests has been the U.S. Agency for International Development, which has financed the export of over half a billion dollars worth of pesticide chemicals since 1957.

AID estimates that pesticides can increase farmers' yields by an average of 40 per cent.

For all those admitted benefits, however, scientists, environmentalists, and increasingly public officials have begun to raise serious questions about the global chemical war on weeds and insects.

Regulatory Efforts

Efforts to regulate the use of the poisons worldwide and gauge their long-term impact in different climates and cultures are in their infancy. Only late this year did AID, prodded by environmental groups, draw up a report assessing the impact of its own international "pest management" programs in foreign countries.

Regulations governing the use of the chemicals are a global hodgepodge.

Leptophos, the nerve-attacking compound that was recently linked to illness among workers at the Bayport, Texas, plant that makes it, is being used against plant insects in Mexico, Indonesia, Taiwan and possibly other countries.

Japan forbids the use in its own country of a pesticide compound called Ortho-Chlorophenyl Carbamate, but sells it to Taiwan. Japan also has strict laws against importing U.S. citrus fruit treated with OPP and TBZ, fungicides which delay molding and rotting —yet traces of those chemicals are allowed on fruit sold in the United States.

The insecticide DDT was banned in the United States in 1972, yet it continues to be widely used abroad, and the Montrose Chemical Co. plant in Torrance, Calif., continues to make it for sale abroad.

In 1975, 12 countries received 4 million tons of U.S.-made DDT. Moreover, many countries not only defend its use in agriculture and against malarial mosquitoes but are taking steps to boost their own production. India is building a new DDT plant, and the substance is widely manufactured in the Soviet Union, France, Italy, East Germany, Poland, Romania, Pakistan, Mexico, Brazil and Argentina.

Indiscriminate Use

"Nobody will deny the benefits of pesticides in increasing food production, but there is a serious problem when they are used indiscriminately," says Maureen Hinkle of the Environmental Defense Fund.

Until last January, when AID agreed to suspend financing overseas shipments of a number

French Arrest 4 In Deputy's Death

PARIS, Dec. 27 (IHT).—Police arrested four men tonight in connection with the murder of former deputy foreign minister Jean de Broglie on Christmas eve.

The four men, who have not been identified, were arrested in a country inn west of Paris after being followed for several hours by police.

Mr. de Broglie was shot dead by a young man on a Paris street after talking with the youth for a few minutes. Police earlier discounted a political motive for the killing despite a rightist group's claim of responsibility for the deputy's death.

News Analysis

UN Assembly Avoided Controversy

By Peter Grose

UNITED NATIONS, N.Y., Dec. 27 (NYT).—The General Assembly wound up over three months of debating and voting last week with one impressive achievement: It managed to be uncontroversial.

Compared with the bitter, fractious confrontations of the two previous sessions, which threatened to tear the world legislature apart, that very dullness became a virtue. A clear sense of relief and self-congratulation on this point was evident among delegates from all regions and all ideologies as the Assembly droned through its final procedural resolutions.

Viktor Israelyan, director of the international organizations department of the Soviet Foreign Ministry, said that the session was "routine, dull, without sensations." Precisely because of that, he added, it was "businesslike and constructive."

"The whole tendency now is to get something positive done," Secretary General Kurt Waldheim said.

"I think we are on the beginning of an upbeat here in the United Nations," said the chief U.S. delegate, William Scranton. "It just may be that we have turned a corner."

'Benign Tedium'

Part of the reason for this mood—one observer called it "benign tedium"—lay in the nature of this year's global developments. The civil war in Lebanon left the Arab world dispirited, diplomacy in southern Africa left the African bloc in suspense and the economic troubles of the industrial nations weakened the developing world's demands for a more rapid transfer of resources.

But there was also some successful quiet diplomacy to avert sterile arguments over such issues as Korea, Puerto Rico and the Panama Canal—issues on which third-world spokesmen enjoy embarrassing the United States but on which the General Assembly realized that it had no substantial role to play. As Mr. Scranton put it recently:

"Beginning last spring, we targeted specific issues and launched a major educational campaign, including several trips abroad. Aided by a number of developed nations, the United States explained in depth to United Nations members that their handling of Korea, Puerto Rico and similar issues did not impact just on the United States but would go a long way toward determining the United Nations' future effectiveness on issues of all types."

This General Assembly amounted to little more than a holding pattern in the rush of pressing events. On all the major issues the action was elsewhere, and there seemed little for the 2,274 delegates to do but "take note" and "express concern" and "reaffirm" their pressure for positive outcomes in other forums.

Action on Africa

The crisis that loomed the largest when the session opened Sept. 16—the confrontation of the black majority and the white minority in southern Africa—was quickly defused, though hardly resolved, through the joint efforts of Secretary of State Henry Kissinger and Britain's chief delegate to the United Nations, Ivor Richard. Mr. Richard was absent for almost the entire Assembly session as he presided over the hastily arranged Rhodesia conference in Geneva.

The Arab-Israeli conflict, which last year provoked the explosive debate on Zionism as an alleged form of racism, called forth traditional rhetoric. But the only substantial contribution was a move to get the parties to the negotiating table in Geneva next year.

The Palestine Liberation Organization, which stirred an uproar two years ago when its leader, Yassir Arafat, appeared at the General Assembly rostrum like a head of state, was scarcely noticed in this Assembly. At times even Arab speakers took care to play down the role of that organization, left shattered and confused by the ruinous civil war in Lebanon. That war so embarrassed the majority at the United Nations that they chose to do nothing at all about it.

The economic confrontation between the rich industrial states and the developing Third World, which two years ago erupted into bitter controversy at the General Assembly's sixth special session, remained tense and deadlocked. Assembly delegates recognized reluctantly that the action was in Paris, at negotiations of the nations most involved.

Meeting Postponed

Rather than admit failure, the parties to this conference decided to postpone their final meeting until the incoming Carter administration could show its hand. The General Assembly could only wait and schedule an extraordinary resumed session next spring or summer to review whatever is accomplished in Paris.

Yet through their 107 full meetings and countless committee and group caucuses, delegates to this General Assembly managed to keep busy.

In perhaps the most potentially significant initiative, the Assembly started the drafting of an international convention to prevent the taking of hostages—the only approach to the terrorism issue that has been able to gain majority favor in the United Nations. Proposed by West Germany, this move overcame Libyan insistence that it be applied only to "innocent" hostages and was approved in the Assembly by consensus on Dec. 15. Its sponsors hope to present the completed treaty for formal signatures by the end of next year.

The initiative into which the Soviet Union poured its major effort, a proposed treaty to ban the use of force in international relations, was also approved, but only after numerous members, including the United States, questioned whether such a document would have any real meaning.

More meaningful was final Assembly approval of an extensively negotiated disarmament treaty prohibiting the use of environmental modification techniques—changes in the weather, ocean or ionosphere, for instance—for hostile purposes.

A measure that the United States pressed unsuccessfully last year, a general amnesty for political prisoners, met an equally unpromising fate in this Assembly. Introduced in more limited form by Sweden, it was strongly opposed by the Communist bloc and was deferred until next year.

On human rights issues in general, the record of this Assembly was no better than its predecessors and provoked Mr. Scranton's most bitter speech of the session. "I am quite discouraged on this subject," he told reporters in the Assembly's final hours.

BATTLE OF TRENTON—In a re-enactment of the 1776 battle, Hessian troops pass in review in Trenton, N.J., after surrender to Washington, who crossed Delaware Christmas Day to inflict defeat. New Jersey Gov. Brendan Byrne reviewed them.

Cannot Go Back Home

Vietnamese Refugees Face Growing Hostility of Thais

By David A. Andelman

SAKON NAKHON, Thailand (NYT).—Portraits of the royal family grace the facades of most of the shops along the main street of this tiny northeast Thailand provincial capital. Thai flags hang from the balustrades of the wooden houses, in honor of the King and Queen who have been in residence here recently at their new Buphan Palace.

But it is clear that the hearts of most of the shopkeepers and homeowners are hundreds of miles to the east—in Hanoi and other parts of Vietnam, from where most emigrated more than 30 years ago and where, politics and geography willing, most would like to return.

The fact, however, is that they cannot return, at least not for the present. And lately they have become the objects of calumny, persecution and racial antagonism from the Thais among whom they live, who deeply resent the strange language, alien faces and economic dominance the Vietnamese have managed to achieve in northeast Thailand by their frugal and industrious ways.

Thai Minister of the Interior Samak Sundaravej claimed weeks ago that he had "solid evidence" of a plot in which Vietnamese refugees would incite rioting in northeast Thailand, providing Vietnam with an excuse to invade Thailand through Laos and Burma on Feb. 15.

Up to 60,000 in Region

This allegation was, however, only the latest in a series of actions directed against the Vietnamese community here.

There have been many mysterious fires in Vietnamese-owned shops in recent months, widespread arrests since the coup that brought a military-backed government to power here in October and a feeling by most government leaders that, in the words of the provincial governor, Somporn Klinpongsa, "they are all 100 per cent Communists."

There are as many as 60,000 ethnic Vietnamese scattered throughout areas of northeast Thailand—some 5,000 here in Sakon Nakhon. They arrived for the most part during and after World War II, many of them driven by the fighting between the French and the Viet Minh.

Dao Duc Ho, 42 years old, arrived in Sakon Nakhon with his parents when he was about 10 years old. He grew up here, went to school, learned the Thai language, married and fathered four sons. They all work now in the fabric shop he owns on a small side street.

"It is terrible, terrible being a foreigner for 32 years," he told a visitor. He has an uncle and some other family in Hanoi, he continued, but no hope of seeing them for a long time.

He cannot even to go Udon Thani, 90 miles away, without permission, he said, "and they never allow me to go."

Respect for Ho

He does, he said, respect and admire Ho Chi Minh, the late president of North Vietnam, not because he was a Communist, but "because he was a great man, because he unified my country and because he brought peace there."

But, he said, no one in Sakon Nakhon outside the Vietnamese community understands that, and he despairs of ever trying to make them understand. "They are not nice to us here, and I understand that. It is not my country," he said.

He began to weep softly, clutched his hand to his chest and whispered, "My heart is in Hanoi."

Mr. Ho and others in the Vietnamese community have tried to adapt. Most have learned the Thai language and, apart from the Red Cross refugee center, there are no signs here in Vietnamese.

But some 70 per cent of the small shops that are the backbone of commerce and trade here are owned by Vietnamese, 20 per cent by Chinese and a mere 10 per cent by Thais, most of whom, though they form the bulk of the population, eke out a bare subsistence living on the dusty, barren soil in this Thailand's poorest region.

In the last two months, however, there have been some new elements injected into the normally strained situation between the communities here.

Hundreds of Vietnamese have been arrested, allegedly for Communist sympathies or for outright assistance to Communist insurgents operating in the jungles.

Charges and Threats

Vietnam has retaliated, charging, apparently inaccurately, that thousands of Vietnamese here have been herded into "concentration camps" and hinting of dire consequences should such "persecution" continue.

Yet it is clear Vietnam that is partially responsible for the situation—refusing to accept back any of the Vietnamese refugees although large numbers would, given the opportunity, gladly give up all their accumulated wealth and, with the blessings of the Thai authorities, return.

Recently, the psychological war against the Vietnamese in Sakon Nakhon escalated still further.

Many Vietnamese in and around the city operate restaurants that cater not only to their own countrymen but to many Thais as well. A rumor began spreading recently that the Vietnamese were putting a chemical into the food that caused impotence. Within days there were long lines of men at the local hospitals worried that they had been affected.

Medical experts were dispatched from Bangkok when the Thai newspapers began displaying the story with huge headlines.

Throughout northeast Thailand Vietnamese restaurants closed down, though officials at the Ministry of Public Health quickly denied that there was any truth to the rumors or that any such chemical even existed.

Nevertheless, the rumor persisted and intelligent, educated men and women were still refusing it recently to visitors from the capital.

"Mama-san's," is the best restaurant in Sakon Nakhon, for years the owner cared for the servicemen stationed at the airbase at Nakhon Phanom Udon Thani or at the headquarters command of Thailand's Second Army.

Mama-san herself, a large and friendly woman with distinctly Vietnamese features, never admitted until last month to anyone her Vietnamese parentage, which was generally accepted as fact and as a reason for her culinary abilities.

Now she is denying it. Her half Vietnamese, half Lao daughter smiled as several listeners, college students who had come, solemnly described the symptoms of the "disease," elbowing each other in the ribs.

"But it's the Lao half that runs this restaurant," she added.

Carter Defense Aide Cautious on Soviet Aims

(Continued from Page 1)

you can survive a strategic thermonuclear war as a going society—when you can't—is the worst possible situation for the world to be in," Mr. Brown said. Responding to questions with great caution, Mr. Brown said he believed that it would be inappropriate to discuss strategic policy issues in any detail before the Senate has had a chance to question him.

Mr. Brown did, however, appear to hedge his previous advocacy of the $22.8-billion B-1 bomber project. The Air Force wants to build 244 of the supersonic, swing-wing bombers at an estimated cost of $93.8 million apiece to replace its aging fleet of B-52s.

Mr. Brown acknowledged that he had been "more favorably inclined toward it than a good many other people," and he said, "I don't want to throw it out, out of hand ... but it clearly needs more study than I've given it before I come to a final conclusion."

A nuclear physicist by training, Mr. Brown said he considers himself a "pragmatist" rather than one who adheres to a particular ideology of national security. His reputation for flexibility, combined with the fact that he has only infrequently published articles on foreign affairs, leaves his philosophy on a wide variety of strategic issues as something of an enigma.

Possibly the best recent insight to Mr. Brown's thinking on such matters as limited nuclear war and the future of limits on arms is found in a talk he gave in March of last year before the Institute of U.S. Studies of the Soviet Academy of Sciences in Moscow.

In his paper, Mr. Brown took issue with a view put forward by former Defense Secretary Schlesinger that the United States should be prepared to wage a limited nuclear ground war and to launch selective or surgical nuclear missile strikes against Soviet targets.

While any nuclear-armed nation will want to assure itself that it has a range of responses short of an all-out, spasmodic, thermonuclear attack, Mr. Brown observed, "Every examination I have seen of the various possible subsequent courses of events indicates that it is unlikely that the other options will, in the end, avoid mutual destruction of the attacker and the attacked."

Making plans for such limited or "counterforce" attack is an acceptable military exercise, he emphasized, so long as military planners do not deceive themselves into believing that they can stop a nuclear war short of catastrophic destruction.

"This contingency planning could increase the likelihood of catastrophe," Mr. Brown said. "For this reason it ought to be severely limited."

Step Forward

On the matter of limiting strategic arms, Mr. Brown told the Soviet academy that numerical ceilings on missiles and bombers agreed upon by President Ford and Communist party Secretary Leonid Brezhnev at Vladivostok in 1974 represented a "substantial step forward" but should be negotiated downward as soon as possible.

Taking a position that coincides closely with that of President-elect Jimmy Carter during the campaign, Mr. Brown said last year that "my own strong preference is for a new equilibrium in strategic arms at a lower level."

He did not say how much lower, however, and he declined to elaborate in the interview. The Vladivostok ceilings limited both sides to 2,400 strategic delivery vehicles (missiles and bombers) with a maximum of 1,320 missiles equipped with multiple, independent warheads. These numbers were widely criticized because they allowed both sides to expand forces considerably.

In his 1975 paper, Mr. Brown placed his strongest emphasis on a proposal to limit technological changes in strategic nuclear arms—contending that limiting and roughly equalizing the numbers of missiles and bombers each side has aimed at the other was only half the problem of preserving a stable balance between the two superpowers.

Among possible approaches, Mr. Brown suggested limiting the numbers of new weapons systems that could be deployed by either side during each five-year period and limiting the number of missile tests that could be conducted each year.

Russian Rudeness, Suspicion Are Just a Phone Call Away

By Robert C. Toth

MOSCOW, Dec. 27.—There are about 6 phones for every 100 persons in the Soviet Union, which is four times more than 10 years ago. But although everyone here wants a phone, people and authorities still seem suspicious, even distrustful, of it.

"Slushayou"—"I'm listening"—is the standard way to answer its ring. It is a rude opener. Displeased voices answering phones are so common that the newspaper Evening Moscow this month carried a plea for more politeness. "We try to be polite on the street to each other, why not on the phone?" the author asked.

Beside the ordinary telephone rudeness, there are "telephone hooligans." The weekly magazine Nedelya, which urged a police campaign against the misuse of phones, concluded that until there were video phones to identify callers "the telephone should be included in the list of dangerous machinery, along with automobiles."

Soviet bureaucrats always have operated on that principle. None will answer with his organization or his name, and information is almost impossible to obtain by phone.

Letter Requested

The information desk of a Soviet women's magazine was asked by a Western reporter how many hero-mothers (mothers of five children or more) there are in the Soviet Union.

"Write a letter," the woman at the desk said, "and we'll write back."

"But that will take a week. Don't you have the number?"

"Of course I have the number, it's no secret," she answered. "But how do I know you are who you say you are? Write a letter."

Her phone had been busy for about an hour before that exchange, so it was being used, although apparently not to give out information.

"You should understand that in our system," a Soviet woman said later, "you are not working if you answer by phone. That girl needs pieces of paper, letters from you and others, to prove to her supervisors at the end of the month how many inquiries she had received and answered. We are not used to phones as you in the West are."

Business is not done by phone here to any extent, a Russian said. Some communications experts have claimed that to the Russians, who tend to be expansive and emotional, the phone is too cold and impersonal. "Conversation takes looking into faces, into eyes," a Soviet woman said.

Endless Gossip

But once Russians know the face and eyes at the other end, they are talkative. Clerks will gossip endlessly on phones and show annoyance when interrupted by customers.

A pay-station call costs 2 kopeks (2.7 cents), and a home phone costs 2.50 rubles ($3.33) a month for unlimited local calls.

Those rates have not changed in 30 years—a political decision that keeps basic commodities and services, such as bread and rents, cheap and stable. But during that time the average wage of a phone worker has quadrupled, and equipment needed for expansion, such as automatic exchanges imported from Eastern Europe, has grown much more costly.

Rural phone systems, which account for 14 per cent of the 17.4 million phones here, regularly lose money, and the service is bad.

Despite Official Denunciation

Soviet Rumor Mill Nourishes Debate Over Flying Saucers

By David K. Shipler

MOSCOW, Dec. 27 (NYT).—A flying-saucer craze has been flourishing in the Soviet Union. In classrooms and around dinner tables, in buses and offices, it has infected conversation like a ubiquitous germ, sometimes dividing friends into hostile camps of believers and nonbelievers.

The official press has thrown cold water on rumors that extraterrestrial beings have been visiting the earth.

All this began several months ago. As Soviet dissidents circulated clandestine typewritten essays and statements opposing government actions, someone began spreading copies of a five-page typed "lecture" attributed to F. Y. Zigel, assistant professor at the Moscow Aviation Institute. It said there had been 300 recorded sightings of unidentified flying objects in the Soviet Union over the years and gave some examples.

It is not clear whether Mr. Zigel, who has written books on astronomy, is actually the author of the lecture, or even whether such a lecture was actually given. The professor has said nothing in public since the synopsis began circulating.

The typescript included the tantalizing line, "In the U.S.S.R., there exists a ban on all kinds of publications about UFOs," a remark sure to enhance the document's credibility. In a controlled society in which many—intellectuals, at least—tend to disbelieve the official press, the papers known in Russian as Samizdat, meaning unauthorized publications, take on extraordinary verisimilitude.

The flying-saucer talk has a certain glitter, not only because it appeals to fantasy but also because it is unapproved. "Everybody has to believe rumors because they are unofficial," a Russian observed.

The lecture offers several examples of reported UFOs that are widely believed. Last January, the lecture avers, a UFO hovered over the city of Nalchik for 36 hours; a UFO trailed after an airliner from Vorkuta to Omsk; in 1961 a saucer hovered for 45 minutes over a railroad crossing at Golytsino, 26 miles west of Moscow, and auto engines stalled and could not be started until the saucer left.

Three weeks ago, the government had evidently had enough. Yeremei Parnov, a Soviet science-fiction writer, denounced the Samizdat lecture. "Typed in hundreds and thousands of copies, and even copied in handwriting," he wrote in the youth newspaper Komsomolskaya Pravda, "the report lives a life of its own, causing violent arguments in the widest circles: from the youngest schoolboys to celebrated representatives of the creative intelligentsia. They gossip about the saucers—meaning UFOs—and humanoids everywhere, in trolleybuses and palaces of culture."

He then sought to disprove the lecture's contentions, point by point.

The appeal to logic was followed a few days later by an appeal to fear. The same newspaper, which is an organ of the Young Communist League, implied that those who spread the flying-saucer stories were somehow subversive, indulging in the "mass culture" of the West, "flirting with superstitions and religious impulses, manipulated indirectly by the Pentagon."

Canal Parley In Doldrums

(Continued from Page 1)

unresolved, U.S. and Panamanian negotiators have been narrowing differences in other areas. On Oct. 21, for example, the United States unveiled its maps and lists of "lands and waters" inside the U.S.-run Canal Zone that it said would be needed to operate and defend the waterway during the duration of the treaty.

Previously, the United States had asked for about 85 per cent of the Canal Zone area. The Oct. 21 presentation by the U.S. military's negotiating representative, Lt. Gen. Welborn Dolvin, is reported to call for the United States to hold about 40 per cent of the area until the termination of the treaty, with the rest to be returned immediately, or turned back in successive phases, or assigned to U.S.-Panamanian joint use.

This plan is still unacceptable to Panama, which originally said the United States needed only a strip bordering the canal and covering no more than 10 per cent of the Canal Zone. Technicians on both sides are scheduled to begin meeting Jan. 10 to narrow the differences, sources said.

16 on Hunger Strike In West Germany

HAMBURG, Dec. 27 (Reuters).—Sixteen alleged sympathizers with the Baader-Meinhof urban guerrilla group being held in two north German jails have begun a hunger strike to back demands for better detention conditions, prison authorities said today.

The strikers have made a series of demands, including calls for common recreation periods and unrestricted television viewing. The spokesman said that these demands had already been met and that the strike was a propaganda exercise.

World Faces Rise in Use Of Pesticide

(Continued from Page 1)

of questionable pesticides, agency had subsidized the ... seas sale of DDT, BHC, Endrin, Heptachlor, Chlordane and Toxaphos.

Environmentalists complain that AID had been insensitive to findings about these pesticides in this country. Of the 34 insecticides, all but Leptophos members of the chlorinated hydrocarbon family of chemicals. Their use has been banned or severely limited in the United States.

Many scientists say the toxicity of this generation of pesticides is overstated because of findings that they produce tumors in animals and because significant residues of them have been found in the muscle tissue of humans.

Robert Metcalf, professor of entomology at the University of Illinois, said in a telephone interview that the insecticide dieldrin has poisoned hundreds of people in Central America and left them suffering from persistent convulsions when it was used against "kissing bugs." These bugs live in the cracks of houses and spread Chagas' disease, which is incurable, debilitating and unrelated to African sleeping sickness. He estimated that 10 to 30 per cent of the Dieldrin-sprayed crews had been poisoned while fighting the bugs.

Growing Resistance

Scientists say resistance to chemical poisons is building up in insects. In the United States they have noticed a resistance in some of house flies. In Sri Lanka, the use was discontinued several years ago because mosquitoes were becoming resistant to it, although malaria has again reached epidemic proportions there.

David Pimentel, professor of entomology at Cornell, said farmers in Central America who have to spray their cotton with insecticides eight times a season had to increase the spraying 40 times, but the weevils still survive.

"Unless we change our ways, the pressures from these chemicals will make more judicious use of them inevitable. I would think we are in danger of exhausting their effectiveness. There won't be effective ones left in a few years," Prof. Metcalf said, prescribed better housing, farming and sanitation.

Prof. Pimentel maintained that U.S. agriculture's dependence on poisons has led to poor agricultural practices which, in turn, have increased the need for pesticides. He said that if pesticides were eliminated altogether, "we wouldn't starve."

Surprisingly, other countries are making significant advances in trying alternatives to pesticides that are relatively unknown in the United States. For example, China releases tiny, parasitic wasps each year to attack the eggs of other insects.

Moscow Gives Eastern Bloc Leeway as Price of Solidarity

(Continued from Page 1)

than the conspicuous absence of Communist slogans plastered on prominent buildings, as is common in Moscow.

There are surprises in a myriad of seemingly inconsequential consumer items—teflon-coated frying pans in Prague, a genuine choice of sheer panty hose in the shops along East Berlin's Karl Marx Allee.

Moscow's cavernous GUM department store seems definitely dated after a visit to the new Swedish built Kotva in Prague.

Along Budapest's Vaci Street, chic shops entice customers with luxuries like Austrian-made shirts.

At a well-stocked record shop, shaggy Hungarian teen-agers in denims listen to recent rock releases by the British group Wings. At a nearby café, modish matrons chat over pungent coffee and flaky nut strudel.

The quality of life is not limited to the hi-fi stereo components from East Germany or the cooperative houses that young Hungarian couples are building together in the Budapest suburbs. At art salons in Warsaw, Budapest and Bucharest, customers appraise and buy avant-garde oils and graphics that would be too nonconformist for sale in Moscow.

Tolerances differ within the bloc. In East Berlin, the biting lyrics of balladeer Wolf Biermann led authorities to strip him of his citizenship, causing an outcry from intellectuals. But in Warsaw at cafés like the Egida, skits include cautious digs at the government's fumbling attempt to raise food prices.

Political cabarets in Budapest are popular and cabaret sketches have satirized factory brigades who feign comradely togetherness off the job and nervous editors who navigate by the latest from the Soviet press agency Tass.

It is hardly surprising that less-traveled Russians may equate a trip to Budapest or East Berlin with one, say, to Helsinki.

Some East Europeans who visited the Soviet Union brought back their own impressions of drabness.

"They didn't have much you could buy," remarked an East German.

Price for Contentment

So far, Moscow has accepted the disparity of a price for contentment among the East Europeans who tend to measure their well-being by Western standards.

The Soviet Union seems more concerned about Eastern Europeans exploring other Western values beyond materialism. Earlier this month, Soviet bloc ideologists met for three days in Sofia to map out a joint defense against the more democratic variants of Marxism being espoused by the Western European Communist parties, such as in Italy and France.

The instability in Poland has been heightened by the role that the Catholic Church plays as a counterforce to the official ideology. When Stefan Cardinal Wyszynski told Polish workers recently that they should demand higher wages if they felt they were not paid enough, his counsel involved more than simple economics.

In fact, even the party apparatus is respectful of the Catholic Church's influence in Poland, where up to 70 per cent of the population attends weekly services.

Though the 31 Soviet divisions in Eastern Europe are kept discreetly out of sight, their presence comes up in almost any serious discussion with East Europeans about the future. The question is at what point the Soviet Union would feel sufficiently threatened by change to intervene. One Polish journalist feels it would be the abolition of censorship. "What frightened the Russians in Czechoslovakia was free speech," he contended.

Several other East Europeans thought that the Soviet Union would step in only if the Moscow-backed party apparatus lost control—a current worry in Poland—but that the Russians would do soo with real reluctance since this would destroy their credibility about relaxing tensions in Europe.

Though Soviet troops won the showdowns in 1953, 1956 and 1968, some in Eastern Europe do not feel that the confrontations were futile. "In 1953, we showed the Russians we could resist and they have been careful since about how they treat us," said an East Berliner who recalled the short-lived uprising.

St. Lawrence Seaway Shut

OTTAWA, Dec. 27 (Reuters).—The Great Lakes were cut off from the Atlantic yesterday when the St. Lawrence Seaway was closed to ocean-going ships for the winter.

AN ANTHOLOGY OF MY OWN THING

Carter Turns To Economic, Staff Choices

Holding Meetings With His Cabinet

By James T. Wooten

PLAINS, Ga., Dec. 27 (NYT).—With his cabinet complete and its key advisers appointed, President-elect Jimmy Carter has moved into the second and final segment of his transition calendar, turning his attention now to the economic package for Congress and the selection of a personal staff.

The basic outlines of the economic legislation he has said he will propose soon after his inauguration are expected to be drafted in three days of meetings, starting today, with his entire cabinet on St. Simon Island, Ga.

Moreover, the announcement of several White House staff appointments is anticipated here later in the week when he returns to Plains.

Those tasks, plus the selection of an international trade negotiator, a decision on who will run the FBI and the filling of nearly 300 second-level posts in the various government departments, remain on Mr. Carter's pre-inaugural agenda.

The President-elect is said to be generally well pleased with the performance of his transition staff during the cabinet selection.

Tax Cut Seen

He and his aides have declined to discuss the contents of the proposals he will make to Capitol Hill dealing with the country's economy, but it is apparent from both public statements and off-the-record discussions that some form of a tax cut will be among the recommendations he makes.

Its size and scope have not yet been determined, sources said last weekend, and will not be until the total amount of economic stimulation to be proposed is decided.

Mr. Carter, Bert Lance, the Atlanta banker who will run the Office of Management and Budget, and Charles Schultze, Mr. Carter's choice as chairman of the Council of Economic Advisers, have said the tax cut would be but one element of an economic-stimulus package that would include several new approaches to unemployment and inflation.

"I think by the middle of next week, we will all have a clearer view of just what the proposals are going to be," a close aide to Mr. Carter said.

In addition to the cabinet members and major advisers, Mayor Abraham Beame of New York City and Gov. Hugh Carey of New York will also be on hand on St. Simon Island this week, talking with the President-elect about the needs of the city and the state, a source said.

Smaller Premature Infants Being Saved by Old Methods

By B.D. Colen

WASHINGTON, Dec. 27 (WP).—Premature babies weighing less than about two pounds (900 grams), who as recently as two years ago were generally considered beyond saving, now have as high as a two-out-of-three chance of surviving if they are born at certain major U.S. medical centers, according to a Washington Post survey.

What is most striking about this dramatic development is that it is not the direct result of some technological breakthrough. Most of the technology needed to perform such medical miracles has been available for at least the last five to eight years.

Rather, almost all those interviewed agreed that more and more of these infants, delivered at a third or less the weight of an average infant, are surviving because obstetricians are beginning to realize that they can survive, and are expending the same effort to save them that they expend to save an infant born at full term.

"We started in January, 1975, with a lot more aggressive approach in obstetrics," said Dr. Fred Battaglia, chairman of the department of pediatrics at the University of Colorado Medical Center in Denver, one of a half dozen medical centers surveyed by The Post.

"The obstetricians on our service said they were prepared to make obstetrical decisions for a 600 or 700 gram (25-26 weeks of gestation) infant the same way they would a 1,400 gram infant. We found that with pretty much the same newborn care, there was a big change in survival rates."

"Below 1,000 grams"—about 28 weeks' gestation—"the mortality was 90 per cent," said Dr. Watson Bowes, Colorado's chief of obstetrics and gynecology. "The 1,000-gram (and below) group was thought of as just not having any chance for survival. The data we presented for 1976 was a 41-per-cent survival rate."

Dr. Bowes said that about 66 per cent of the babies in the 800-1,000-gram range—about 27 to 28 weeks—are surviving. "To a great extent this is due to trying harder," he said.

Total Attitude

"We are being more aggressive. We're doing things for these tiny, little babies that we've always done for the bigger babies—caesarian section, fetal monitoring. It's a total attitude on the part of people taking care of these patients that this baby is a survivor.

"...We felt there was so little chance of a baby [so small] surviving that we didn't put any effort into it. These were cases that we felt we were going to abort.

Dr. Bowes said that one of the reasons obstetricians were hesitant to save such small infants was that the physicians had been taught that any such infants saved would most likely be grossly retarded or damaged in some way.

That attitude, he said, "has been a terrible disservice to these babies. If you look at the follow-up studies we've done on these babies, about the same proportion are normal [now that 66 per cent are surviving as were normal when only 10 per cent lived]. You're not just saving a bunch of handicapped babies. Before 1974, 60 per cent [of the babies below 1,000 grams who survived] were completely normal. Sixty per cent still are."

Dr. Bowes was careful to stress repeatedly that his group has thus far seen only about two years of improved survival rates. "It's going to take much more data before we can be enthusiastic about it," he said. "There have been too darned many things [in medicine] where improvements have been transient."

In some hospitals where there were, and are, no neonatologists, pediatricians have sometimes been slow to recognize the chance such premature infants have.

"When I trained, in 1974, many nurseries had a flat rule that nobody under 1,000 grams went on a respirator," said Dr. Dale Phelps, a neonatologist at UCLA Medical School in Los Angeles.

Ford Calls Lack of SALT Pact One of His Biggest Regrets

By Lou Cannon

VAIL, Colo., Dec. 27 (WP).—President Ford said in an interview released yesterday that "one of my big disappointments" was his inability to achieve a strengthened strategic arms limitation agreement with the Soviet Union.

"One of my big disappointments . . . was not building on the Vladivostok agreement of 1974 and getting a SALT-2 agreement," Mr. Ford said. "I think it is tremendously important to the world—not only to the United States and the Soviet Union, but to mankind—that a SALT-2 agreement should be achieved."

"With good leadership and with good decision making," a SALT-2 agreement could be achieved during the coming administration, the President added.

Mr. Ford's comments were made in an interview that is scheduled to be televised Jan. 3. It was taped Dec. 4 and made available yesterday.

Mr. Ford made no comment and was not asked about his own emphasis on "peace through strength" instead of détente when he was being pressed by Ronald Reagan in the Republican primaries for supposedly being too conciliatory to the Russians.

Few Regrets

In the interview, the President joked back with relatively few regrets on his 2 1/2 years in office. He reiterated that his greatest achievement was a restoration of trust in the presidency and his greatest disappointment the fact "that we haven't been able to turn the economy around as effectively as I had hoped."

Mr. Ford also defended his pardon of former President Richard Nixon, saying that before the pardon he was spending 25 per cent of his time on issues relating to Mr. Nixon, when he should have been devoting full time to the problems of the economy and the Vietnam war.

When asked why he had maintained his relationship with Mr. Nixon, Mr. Ford said that he had seen him only once, in the autumn of 1974, when Mr. Nixon was "desperately ill" in a California hospital.

"I would have had a guilty conscience if I hadn't gone to the hospital and seen a man who was literally on death's bed," Mr. Ford said. "He had been my friend for 25 years and here was a person who was as close to death as I have ever seen somebody and I felt that it was a personal obligation to go and see him."

Mr. Ford had few second-guesses about this year's political campaign other than to say that he made a mistake in failing to visit Delaware, which was carried by Jimmy Carter while Republicans were winning the other races in the state. But Delaware's three electoral votes would have made no difference in the outcome.

The President again defended his running mate, Sen. Robert Dole of Kansas, saying that he did not think that Sen. Dole had cost him votes. And he dismissed President-elect Carter's campaign rhetoric, which he suggested would not hamper him in office.

"You realize that in a hotly contested political challenge, the challenger has to make broader statements . . ." Mr. Ford said.

The President said he would not miss the helicopters and the presidential perquisites, having done without them for 58 years. But he freely admitted that he would miss Washington and the White House.

"I like living here," Mr. Ford said. "I am very frank about it. I like the house . . . I really will mostly miss the day-to-day challenges. When I walk into the Oval Office every day, there is something new that will have to be done, whether it is domestic or foreign policy. And I will miss that challenge because that has been the thing that has been the thrust in my life as long as I can remember."

Detention Extended In Dutch SS Case

AMSTERDAM, Dec. 27 (AP).—A city judge yesterday ordered the detention for a further six days of 77-year-old Pieter Menten, the Dutch millionaire art collector accused of war crimes. The ruling upheld a request by the Amsterdam public prosecutor. Menten has been in custody since Dec. 7, when he was arrested in Switzerland after fleeing from the Netherlands. He was expelled to his homeland Dec. 22 and has been under interrogation in a prison in Amsterdam. Under Dutch practice a judge can extend preliminary custody for two periods of six days followed by three periods of 3 days. Pretrial procedures could therefore last more than three months.

Hyena Kills Zambian Girl

JOHANNESBURG, Dec. 27 (AP).—A hyena attacked villagers who had been drinking at a Christmas party and killed a 16-year-old girl, according to reports reaching here from neighboring Zambia.

Obituaries

Philip Hart, Described as 'Conscience' of Senate

WASHINGTON, Dec. 27 (NYT).—Sen. Philip A. Hart, 64, a Michigan Democrat, died here yesterday of cancer.

In his 18 years in the Senate, Mr. Hart was not a fiery orator or a seeker of headlines. Yet it was a measure of the esteem in which the gentle, slightly built senator was held by his colleagues that the Senate in August named the new Senate building under construction the Philip A. Hart Office Building—something that the Senate had done for only two of its former colleagues, Everett Dirksen of Illinois and Richard Russell of Georgia.

Some members called him "the conscience of the Senate," a description not conferred lightly in an institution of 100 generally larger-than-average egos. But while his colleagues used words such as "gentleness," "kindness," "compassion" and "modesty" in describing Sen. Hart, it was not because he sought popularity or the politically easy way out of legislative battles.

Sen. Hart played a large although not always visible role in shaping almost every major civil rights, consumer and anti-trust bill passed by Congress since the 1960s.

He was floor manager of the Voting Rights Act of 1965 and its extension in 1970 and the open-housing civil rights bill of 1968. He was a leading sponsor of the Drug Safety Act of 1962, the Truth-in-Packaging Act of 1965, the Truth-in-Lending Act of 1966, the Motor Vehicle Information and Cost Saving Act of 1972 and the major anti-trust bill passed in the final days of the 94th Congress giving state attorneys general the power to bring anti-trust suits on behalf of citizens.

Although school busing became a volatile political issue in Michigan and elsewhere, Sen. Hart continued to oppose legislative curbs on busing, while some of his fellow liberal Democrats began wavering.

And although his state has a large number of hunters, the senator was a strong backer of comprehensive gun control legislation.

The automobile industry is a dominant force in Michigan, but Sen. Hart advocated safety and anti-pollution legislation and, as chairman of the Senate Judiciary subcommittee on anti-trust and monopoly, conducted long hearings on the concentration of economic power.

He was a key organizer of Senate opposition to the anti-ballistic-missile defense system and of the successful effort to block the confirmation of President Richard Nixon's nomination of Clement Haynsworth Jr. and Harrold Carswell to the Supreme Court.

Sen. Hart was the only senator to stand up in a 1972 Democratic caucus to challenge the naming of Sen. James Eastland of Mississippi as president pro tem of the Senate. Sen. Hart, a member of the Judiciary Committee of which Sen. Eastland was chairman, said that it was "outrageous" to put a man of Sen. Eastland's views in the line of presidential succession.

But when the Senate was paying tribute to Sen. Hart on his retirement, Sen. Eastland said of him: "I have never known a man I have been more apart from philosophically but closer to personally. He is a man of principle, courage and intellectual honesty."

Sen. Hart was elected to the Senate in 1958 and was re-elected by wide margins with strong labor support in 1964 and 1970.

Before it was known that he had cancer, Sen. Hart announced in June of last year that he would not seek re-election when his term expired at the end of this year.

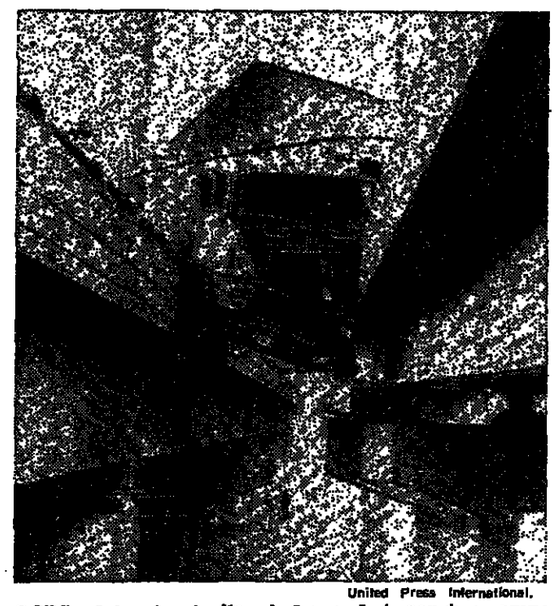
Dr. Richard B. Capps

CHICAGO, Dec. 27 (UPI).—Dr. Richard B. Capps, 70, an internationally recognized authority who wrote more than 100 scientific papers on liver diseases, died Saturday. He was best known for two major studies on acute infectious hepatitis among soldiers he treated in the Mediterranean theater during World War II and on the discovery that babies can be carriers of hepatitis and can transmit the disease without being ill themselves.

Fedor A. Surganov

MOSCOW, Dec. 27 (AP).—Fedor Anismovich Surganov, 65, the president of Byelorussia and a member of the Soviet Communist party Central Committee, died yesterday in an automobile accident, Moscow radio reported.

David W. Kendall



GROSSE POINTE, Mich., Dec. 27 (AP).—David W. Kendall, 73, a special White House counsel under President Dwight Eisenhower, died today.

A Republican national committeeman from 1953 to 1956, Mr. Kendall also served as assistant secretary of the Treasury under Eisenhower and general counsel for Chrysler Corp. from 1962 to 1968.

Appeals to Mexico's Business Leaders

Portillo Turns to Usual Power Centers

By Alan Riding

MEXICO CITY, Dec. 27 (NYT).—The new centrist government is turning for support to the handful of individuals and institutions that have long played a quiet but major role in determining Mexico's political direction.

During the presidency of Luis Echeverría, who left office Dec. 1, controversial attempts were made to exclude some of these conservative interests from the decision-making process. After a wave of economic and political unrest, the new President, José Lopez Portillo, is trying to rebuild the alliance between political and business leaders.

Since taking office, Mr. Lopez Portillo has emphasized the need for unity and conciliation among the interest groups alienated by Mr. Echeverría—notably the old political bosses, leading businessmen, foreign bankers and the U.S. government—and in two sensitive areas he has actively wooed the private sector.

On Dec. 10, the government signed an agreement with 140 large companies to coordinate their investment plans with the aim of creating 300,000 jobs. The accord symbolized the end of a five-year investment slowdown by the private sector to protest the Echeverría administration's policies.

A few days later a Mexico City judge annulled Mr. Echeverría's decree last month expropriating 220,000 acres of private farmland in the northwest. Negotiations that have followed are designed to achieve the return of some of the land to private owners and to compensate them for properties that will remain in the hands of militant landless peasants.

As the new President turns to the traditional interest groups for support, many political analysts believe that the reconciliation between the political and business leaders that he is seeking is essential to avoid instability.

Another important element is the improvement in relations with the United States, which was openly irritated by the Echeverría administration's Third-World attitude. The U.S. Embassy and the U.S. Chamber of Commerce are expressing confidence in Mr. Lopez Portillo. The deference with which Rosalynn Carter and Secretary of State Henry Kissinger were treated when they attended the inauguration here was one apparent sign of the new government's desire for improved relations.

Listening to Bankers

In contrast to Mr. Echeverría, who ignored frequent warnings that his overspending could lead to devaluation of the peso, his successor is paying heed to the foreign banking community and the International Monetary Fund by accepting economic austerity as the price for much-needed external credit.

Meanwhile, the government has announced plans to raise the price of its oil exports by 10 per cent and to increase foreign sales of crude oil to at least 400,000 barrels a day by 1982.

Although Mexico is not a member of the Organization of Petroleum Exporting Countries, it has always followed OPEC's price policy since it began exporting small quantities of crude oil in 1974.

Jorge Diaz Serrano, the new head of Mexico's state-owned oil monopoly, Pemex, said last week that the country's proven oil reserves had increased from 6.3 billion barrels a year ago to 11 billion barrels today. Pemex sources added, however, that the new estimate is still "highly conservative."

Marcos Details Moslem-Control Plans for South

MANILA, Dec. 27 (AP).—President Ferdinand Marcos said today that his "tentative agreement in principle" with Moslem secessionists includes a regional Moslem government, Moslem courts and a special internal security system for the southern Philippines.

Details of the agreement with the Moro National Liberation Front, aimed at ending centuries of Moslem unrest in the south, are to be worked out at a second round of meetings in Tripoli, Libya, in February, Mr. Marcos said.

He said yesterday that a referendum must be held in 13 southern provinces to see if the people there want to be part of an autonomous Moslem region. How many of the provinces will choose such a government "I dare not anticipate," Mr. Marcos said today.

About 1.89 million Filipinos in the 13 southern provinces are Moslem and more than 6 million are Christians. Moslems are a majority in five of the provinces.

Danes Blocked Terrorist's Trip

COPENHAGEN, Dec. 27 (AP).—The Danish police today confirmed that a Japanese terrorist named Takamaro Tamiya was put on a flight bound for North Korea last month after he arrived here with a fake passport and had tried to go on to London.

The police declined, however, to give details of the case, saying that Tamiya was never properly extradited as he never set foot on Danish soil but only came and left as a transit passenger.

Tamiya, a former student, hijacked a Japan Air Lines Boeing 727 with eight other Japanese Red Army members on March 31, 1970, and forced the pilot to fly to North Korea, where they had been reported "staying and studying" under special permission of President Kim Il Sung.

South Korea Hit by Cold

SEOUL, Dec. 27 (UPI).—A cold wave, described as the worst in 49 years, gripped Seoul and most parts of South Korea today.

Soviet Quake Victims Of May All Rehoused

MOSCOW, Dec. 27 (AP).—The last of 10,000 persons left homeless by a Central Asian earthquake in May have been moved from tents into new houses, the Tass news agency said today.

The natural-gas-producing desert town of Gazli, near the epicenter of the quake, is being rebuilt with shock-resistant buildings and is scheduled to be completed within four years, Tass said.

Canadian Scholars Propose Move to 'Conserver' Society

By Henry Giniger

MONTREAL, Dec. 27 (NYT).—A team of university researchers, after a two-year study financed by the Canadian government, is urging public acceptance of a "conserver" society instead of the present consumer society.

The intellectual resources of McGill and Montreal Universities—economists, scientists and philosophers—were placed under contract to 14 federal departments and agencies to study what alternatives Canada or any industrial nation might have to the present system of continual growth in consumption and its accompanying intellectual poverty and squandering of resources.

The study group of 16 researchers proposed three possible outlines for the future, representing increasingly radical departures from current society.

The first, described as the most feasible, calls for "a change of behavior without a radical change in the value system" and entails "doing more with less." Industrial production and consumption would continue to grow but in a controlled and rational manner.

The authors cite the following examples of how this could be accomplished:

• Renting instead of owning certain consumer goods that are used only part of the time. As a result of organizing rental periods for such products as cars and summer and winter homes, a large number of people could use a relatively limited number of goods. This would decrease demand for production and for resources and encourage durability of products.

• Managing time more efficiently. Some roads are congested only at certain peak hours, and instead of constructing new highways to meet only occasional demand, rearrangement of work days to make the working hours more flexible would save materials and energy.

• Adoption of technologies that avoid waste. The technologies would include the use of recyclable materials, substitution of renewable energy sources such as the sun and tides for fossil fuel, and the cleaning up of pollution.

• Reform of wasteful consumer habits, including turning off lights in empty rooms, driving in a manner to save gasoline, insulating homes to save fuel and discouraging overpackaging of goods.

• Inclusion in consumer prices of certain hidden costs that are not now charged to consumers. These costs include those that result from cleaning up or preventing pollution and from the premature depletion of non-renewable resources.

• Coordination of efforts by the government, private corporations, labor and citizens in bringing about such a resource-conserving society.

Two other types of conserver societies proposed would require more radical change. One would freeze growth at a certain level of abundance by halting the stimulation of "artificial" needs and consequently the further production of novelties.

The third and most radical outline would decentralize and reduce the scale of living so that industrialization would decrease and huge urban areas would be replaced by medium-sized towns, and the pursuit and accumulation of material things would give way to a concentration on the arts and other spiritual goals.

The authors acknowledged that a country like Canada might not be ready for the most radical forms of conservation because they demanded changes in human values. They expressed pessimism that even the mildest alternative would be accepted.

'Black Box' Is Found In Crashed Egypt Jet

BANGKOK, Dec. 27 (AP).—Salvage crews who combed the wreckage of a shattered Egyptair Boeing 707 yesterday found the "black box" with flight data they hope will help determine why the plane crashed on Christmas Day.

The plane crashed into a textile mill near Don Muang airport, killing all 55 persons aboard and at least 18 mill workers.

2 Jailed in Russia In Drug Traffic

MOSCOW, Dec. 27 (Reuters).—A Moscow court today sentenced a Briton and a Frenchman to 6 and 4 years respectively in a labor camp for smuggling hashish, the news agency Tass reported.

Lesley Kennett and Pascal Remondini were arrested Oct. 10 at Moscow's Sheremetyevo Airport after they were found to be carrying 7 kilos of the drug in false-bottomed suitcases, Tass said. They were in transit from Karachi to Copenhagen.

The sentences brought to 23 the total number of foreigners convicted here in just over a year for drug smuggling or transit flights from Asia to the West. The route has become known as the Moscow Connection.

Havens for Political Refugees

The matching release of political prisoners by the Soviet Union, which let imprisoned dissident Vladimir Bukovsky go into exile, and Chile, which freed Luis Corvalan, leader of the Chilean Communist party, sets an extremely promising precedent. For the world is full of states—on the left like Russia, on the right like Chile—that incarcerate dissenters and independent thinkers. Especially when, as in this case, the prisoners achieve a certain celebrity status, foreign demands for their liberty create real pressure on the governments that hold them. They may be reluctant, however, either to release the prisoners back into their own societies, or to release them in a way that nourishes the charge that they have yielded to foreign demands. The obvious answer is to send the prisoners into a haven in exile, and to match releases so that, for instance, to save face in releasing a Bukovsky, Russia can claim that it has obtained the liberty of a Corvalan.

The United States acted as the go-between in the Bukovsky-Corvalan release. Chile now proposes a second pairing, this one involving Cuba. Since the United States does not keep up diplomatic relations with Havana, another go-between would have to be found. If somehow the principle of parallel release or mutual exchange got more firmly established, then it might be possible for an appropriate international or regional agency, say, the United Nations High Commissioner on Refugees or the Intergovernmental Committee for European Migration, to set up a regular service. Not just well-known prisoners but unknown dissenters could be drawn in. We find it an exciting idea, and we commend the Soviet Union and Chile for setting a positive example. Other states should be encouraged to follow them.

For such a policy to take deep root, however, there must be the assurance of alternative safe havens. Here the United States has done less than it could. True, this country has received large groups of refugees fleeing Communism in the last generation: 650,000 from Cuba, 30,000 from Hungary. We have been far stingier, however, toward victims of right-wing repression. The private U.S. Committee for Refugees recently reported in respect to post-Allende Chile, for instance, that of 3,600 refugees resettled internationally in 1973, we took 2 and of 1,500 resettled in 1974, we took none. In the year ending last July, we accepted 182 heads of Chilean households. In the same period, we resettled 130,000 Vietnamese.

This imbalance is politically anachronistic and morally unseemly. To right it, Sen. Edward Kennedy, D-Mass., and Rep. Edward Koch, D-N.Y., among others, have proposed a change in the statutory definition of a refugee. The current definition emphasizes the plight of persons fleeing "from any Communist or Communist-dominated country or area." This cold-war bias should be ended. Then the admitting of refugees from rightist regimes like Chile or the Philippines could become a matter of routine humanitarian practice, consistent with law, instead of remaining an occasion for political tugging and hauling in Washington.

These ideas for havens do not exhaust what needs to be done to care better for the seemingly endless international supply of political prisoners and refugees. But they would make the world a somewhat more civilized place—no small feat to contemplate at this season or any other.

THE WASHINGTON POST.

'Who Prices This Stuff—OPEC?'

Bugging Our Wards

With the new U.S. administration preparing to take over, the intelligence community has been sending out strong signals that it would like very much to be left alone. The gist of the message is that the intelligence agencies have been hit by such blizzards of directors, charges of wrongdoing and shakeups that peaceful consolidation of all the recent reforms is badly needed.

Then came the news of the CIA's bugging of the Micronesians.

The United States undertook administrative responsibility for Micronesia under a UN trusteeship following World War II. Under that arrangement, it was obligated to move Micronesia toward "self-government and independence." The developing Micronesian position concerning the future relationship with the United States was deemed so important by the CIA that key Micronesian officials were made targets of secret taps and bugs. That operation is apparently being rationalized on the grounds that the United States ought to go slowly in giving up control of Micronesia because it might become the westernmost defense outpost in the event of the collapse of U.S. alliances with Korea, Japan and the Philippines.

The State Department, apparently feeling some obligation to Micronesia as well as a sense of national honor, blew the whistle on the CIA by telling President Ford about the surveillance. But instead of simply shutting the operation down, the President referred the matter to the Department of Justice for a determination of its legality.

The President missed the point. Though America's obligation toward the United Nations as well as to the Micronesians was quite clear, the CIA decided to give U.S. negotiators an underhanded assist. As one Justice Department official said, "It's like bugging your children's telephone."

So it's not really all that clear that the reforms have sunk in completely at the CIA. Somewhere in the world of dirty tricks policy-making, there has to be a voice that says, "Although we could do this, it is wrong, so we won't." Contrary to current pleas from the intelligence community to be trusted without further interference, it appears that unfinished work still awaits Carter and his newly appointed head of the CIA, Theodore Sorensen, before these agencies can be considered broken of their bad habits of placing themselves above the law and governmental control.

Tension in Poland

Poland's Communist regime and its protectors in Moscow are showing signs of feeling under pressure from rising discontent. The Kremlin recently granted Polish party chief Edward Gierek new credits reportedly worth almost $1.5 billion. Poland's Communists have announced a major cutback in planned investment expenditures, confessing this has been forced by the need to import large quantities of food. And in a major speech earlier this month, Gierek called on the Polish nation for patience and discipline, scolded his party's members for their passivity and bureaucratic attitudes, and warned of the impact of Western propaganda.

Gierek is troubled because a united front seems to be spontaneously arising in Poland, one seeking to create a legal and effective opposition to the ruling Communists. Coming together in this movement are workers, intellectuals and the Roman Catholic Church, all united in resentment against political oppression and economic hardships. The roots of this movement go back to last June's successful working class revolt against Gierek's program of sharp price increases. The Polish regime has since been busily punishing many workers who publicly protested and helped compel Warsaw's retreat.

Now Poland's outstanding intellectuals have organized to help the workers who have been jailed or fired. The Catholic Church has also entered the campaign to raise funds for the persecuted workers and their families. Rank and file workers, too, are protesting against the regime's vengeance. As these tensions rise, it would not be surprising if the Kremlin begins to consider sacrificing Gierek—as Wladyslaw Gomulka was sacrificed in 1970—to calm Polish anger before it explodes.

International Opinion

Carter's Cabinet

The new Cabinet... of Jimmy Carter will disappoint those who expected from the President-elect of the United States a little more imagination or a little more boldness in his choice of men called to second him. The new team doesn't shine.

Has Mr. Carter, a new arrival on the federal political scene, suddenly become afraid because of his own insufficiencies and, in order to make them pale by comparison, specifically chosen technicians and courtiers without great prominence? . . Well, this solid and uninspired Cabinet will not produce any line of strength or projects capable of mobilizing the American nation . Has Mr. Carter, who has chosen his team with minute care and obvious intent to use the most competent, lost a little of the impetus since his victorious and frenzied primary battles last spring?

Seventy-Five Years Ago

December 28, 1901

LONDON—The present generation is, perhaps, beginning to wonder what has become of the old-fashioned Christmas—the Christmas of the Christmas cards, with the Christmas bells ringing clearly across the snow, and the little windows of the church lighted up at night under a snow-capped roof and frosty, twinkling stars overhead—the Christmas of Charles Dickens. Customs have changed, the climate has changed and people have changed. Charles Dickens died in 1870, it was a long time ago.

Fifty Years Ago

December 28, 1926

PARIS—Foreigners now make up nearly 10 per cent of the population of Paris and the Paris region, it was revealed by the census figures for 1936, published by the French Ministry of the Interior yesterday. In Paris and the suburbs the population at the time of the census last winter stood at 4,204,853 and of this number 423,784 were foreigners. The total population of France is 40,743,784, which includes 2,489,230 foreigners. The population figures have been stationary since the war.

And There Was Darkness

By Anthony Lewis

WASHINGTON.—It is a season to think not only of the troubled in our midst but of the earth's afflicted peoples. Of all those whose unhappiness cries out to the conscience of mankind, the most desolate may be the people of Cambodia.

We have no current information on Cambodia from first-hand observation by Western diplomats or journalists; they have been excluded since the Khmer Rouge took control of the country in April, 1975. But refugees, questioned by experienced correspondents, repeatedly and convincingly paint the same picture: of a crushed society living under conditions of terrifying brutality.

The reports tell of whole populations marched great distances, forced to work endless hours in the field, cruelly punished, some clubbed to death. And all of this happens at the orders of an unseen, unknown, Kafkaesque leadership.

Americans have particular reason to look on Cambodia and despair. For American policy and American bombs played a large part in bringing Cambodia to its present pathetic state. To say that is not to excuse the cruelties of the Khmer Rouge; nothing can do that. It is only to recognize the heavy U.S. responsibility in the events that led to control of Cambodia by the faceless men of terror.

Mostly Faded

The American role in Cambodia has mostly faded from our memory, if indeed it was ever understood. But it has just been re-investigated and described in a way that compels understanding. Two weeks ago the Sunday Times of London published a detailed account of U.S. policy in Cambodia, 1969-75, by William Shawcross. It is a remarkable piece of contemporary history — and painful reading for Americans who believe in their country's ideals.

Cambodia lived in a state of inglorious but relatively peaceful political compromise under Sihanouk until 1969. Only a few thousand Communist insurgents fought, ineffectually, against the government. Then Richard Nixon began secretly bombing the eastern border areas used by the North Vietnamese as staging areas. The Vietnamese forces responded by moving deeper into Cambodia. The country's delicate internal political balance was upset.

In March, 1970, Sihanouk left for Moscow and Peking to see if they would hold the Vietnamese back. While away, he was overthrown by Lon Nol. (Shawcross does not suggest any U.S. part in the coup.) Opposition to the Lon Nol regime moved the country quickly toward full-scale civil war.

Crucial Question

The crucial question was whether the polarization could be stopped then—and Cambodia saved from the suffering of Vietnam and Laos. The Chinese premier, Chou En-lai, believed a settlement was possible, bringing Sihanouk back. According to Shawcross, Chou warned that the longer a civil war went on, the harsher would be the policy of the Khmer Rouge. China even delayed breaking relations with Phnom Penh after the Lon Nol coup—until May 6, a week after the United States had effectively ended the chance of political settlement then by invading Cambodia.

The U.S. invasion was planned by Nixon and his assistant for national security, Henry Kissinger, against the overwhelming judgment of their own experts. Kissinger told one member of his staff who objected, William Watts: "Your views represent the cowardice of the Eastern establishment."

At that stage there was still a question whether the United States would become involved in the Cambodian civil war. Nixon and his aides promised that it would not—that the U.S. role would end after the North Vietnamese "sanctuaries" were cleaned out. The promises were immediately broken. Within a week Kissinger's deputy, Alexander Haig, was in Phnom Penh to plan military liaison.

Over the next three years the United States virtually took over the war against the Khmer Rouge. A U.S. diplomat in Phnom Penh, Thomas Enders, in knowing violation of law, secretly targeted U.S. bombers. The heaviest bombing came in 1973, after the truce in Vietnam had ended any legal authority for it. A State Department official, William Sullivan, testified that "the justification is the re-election of the President."

Altogether, in the Nixon-Kissinger years, American planes dropped 500,000 tons of bombs on a peasant country without a single anti-aircraft weapon. The country was decimated. A Senate committee estimated that 500,000 Cambodians died in the war—the equivalent, in proportion to population, of 15 million American deaths.

Through those years Kissinger rejected one proposal after another for negotiation. The Khmer Rouge grew in numbers and ferocity. But then U.S. policy was essentially uninterested in the fate of the Cambodians. Its purpose was to preserve American "credibility" by not being seen to "lose."

U.S. culture, unlike some others, believes in individual moral responsibility. And so one wonders what has happened to Americans responsible for an interventionist Cambodia policy so indifferent to Cambodian suffering.

Thomas Enders, who guided the bombers in, is now the U.S. ambassador to Canada. William Sullivan, who cited politics as legal authority for the bombing, is ambassador to the Philippines.

—*Letters*—

Listen Here

Re Wayne King's article on Carter's accent (IHT, Dec. 20), the "honey chillun" of the Eastern Establishment press have implied on more than one occasion that, given Mr. Carter's accent, he is therefore guilty of faulty grammar and lax speech patterns they attribute to the South. As the [presidential campaign] debates prove, they would do well to listen more and write less.

CURTIS THOMPSON STOTLAR.
Paris.

A Rose, etc...

I wish to point out an inaccuracy published in the IHT of Dec. 22. On Page 1, column 1 it says "Egypt still formally calls itself the United Arab Republic" This has not been true for some years, the official name for Egypt being "Arab Republic of Egypt" (A.R.E. and not U.A.R.).

Year of Anniversaries

'Sick of Seventy-Six'

By George F. Will

WASHINGTON.—This year, at America's finest music hall and purveyor of prime rib, the Crystal Palace in Aspen, Colo., the performers, who also are the waiters, have entertained throngs with a revue that includes a song called "I'm Sick of Seventy-Six."

The performers are deeply patriotic citizens who would smilingly march to certain death against enemy cannon. But I know just how they feel. After this year, I hope it will be 100 years before I see another red, white and blue anything.

Like table place mats.

Breakfast is a testing experience under the best of circumstances. Breakfast in the average hotel is insult added to injury. And in 1976, it seemed that every hotel served breakfast on place mats that were rampant with patriotic motifs. Just to the right of your stale Danish, and just to the left of your underdone bacon and overdone eggs, you were confronted by a stirring tableau of, say, Nathan Hale being hanged. What a way to start a day, reminded that this is a world in which patriots are hanged and hotel cooks are not.

Anniversaries

A.J.P. Taylor, a curmudgeon and historian, sometimes in that order, has noted that 1976 featured an unusual number of anniversaries. Aside from the 200th anniversary of the Declaration of Independence, and of the publication of Adam Smith's "Wealth of Nations," this was the 100th anniversary of what the comparatively sensitive people of 1876 called the Bulgarian Horrors.

The Turks and their associates killed perhaps 20,000 Bulgarians, which is, as Taylor says, small beer by 20th-century standards. But the 19th century was appalled. Of course, the episode has been forgotten: Taylor reports that in a recent lecture he mentioned the Bulgarian Horrors and his audience thought he meant the current Bulgarian Politburo.

This year was the 50th anniversary of Britain's general strike. The 40th anniversary of the Spanish Civil War and of the abdication of Edward VIII, and the 20th anniversary of the Suez war, and the Hungarian uprising. But more notable, this year was the 60th anniversary of 1916, the last year of old Europe.

In 1916, the combatant nations made the most fateful decision of World War I, indeed of recent history: they decided that the war could not be won soon, and rather than seek a compromise peace they would fight a war of attrition until one side or the other was bled white and collapsed. This decision cost Europe a generation of young men, a sacrifice from which Great Britain, and especially France, never fully recovered.

For Germany, this decision meant resort to unrestricted submarine warfare, which brought the United States into the war. The decision for a war of attrition also led to the collapse of the Romanov regime and the triumph of Bolshevism. Nineteen-sixteen was the year of stubborn resolve; the men of 1917 were to be the stubborn ideologues, Woodrow Wilson and Lenin. With their appearance at center stage, the lines of future world politics were drawn.

War Industry

Remember the 20,000 killed in 1876 by the Turks? The British lost that many at the Somme on July 1, 1916. In 1916, war became total; society became a war industry. No subsequent war has been what World War I was: prior to 1916, a war of popular enthusiasm.

The war of attrition killed enthusiasm, and that killed the possibility of financing the war with taxes. So governments printed money, thereby letting loose the modern monster, inflation. That is one reason why 60 years ago Europe was convulsed during what survivors remember as the "turnip winter."

Also, 1916 was another big year for Turkish excess, the culmination of the slaughter of Armenians. This was a harbinger of genocides to come. And it armed mothers with a new moral vocabulary.

My parents were told by their parents: "Eat your spinach—think of the starving Armenians!" And such is the force of habit that my parents told me: "Eat your lima beans—think of the starving Armenians!"

This struck my finely honed seven-year-old mind as a weak argument for eating lima beans. But, then, that argument from 1916 is as strong as any argument for eating lima beans.

Iraq on Racism and Zionism

By Henri Hajdenberg

PARIS—At a time when the Iraqi government has recently sponsored (IHT, Nov. 16) an international symposium on "Racism and Zionism," it is particularly instructive to examine how the Baghdad regime treats minorities in that country.

The International League Against Racism and Anti-Semitism and Amnesty International, examining the Iraqi record at a major Paris meeting recently, gave evidence of a whole series of grave violations of minority rights and of systematic persecution in Iraq.

Amnesty International representatives stressed the fact that the Iraqi government is one of the most intolerant in the Middle East, oppressing its Kurds, Jews and other minorities and religious groups. To cite but a few examples:

- A number of members of the Bahai sect—founded in Persia about a century ago—were arrested in 1974, and given prison sentences ranging from 10-20 years.
- The religious heads of the Shiite community in Iraq were arrested in 1974, and five of them subsequently executed. New arrests took place in February of this year. Shiites actually are a majority in Iraq; but Iraq's rulers belong to the smaller Sunni sect.
- More than 200 Free Masons were imprisoned in 1974. Free Masons are harassed because the movement is considered of Christian-Jewish origin, and hence an enemy to Moslems. Virtually all those jailed were quite old, and most since have died in prison. About two score, it is believed, are still in jail.
- When the present Ba'ath party regime took power after its coup d'état in 1968, an estimated 3,000 Communists were put to death.

Persecution of Kurds and Jews in Iraq was graphically portrayed at the Paris meeting by Marie-Josée Protais, vice-president of Amnesty International's French Section, and by Jean-Pierre Bloch, president of the International League Against Racism and Anti-Semitism (LICA).

When the fighting between the Kurds and the central government ceased in 1974, those Kurds who had found refuge in Iran officially were invited to return to their home villages by the Iraqi authorities. They were promised there would be no reprisals. All who returned, however, had to fill out a 72-point questionnaire concerning their role in the Kurd revolt. And despite the amnesty decree and the promises of no reprisals, at least 200 Kurds were executed in the Mosul and Kirkuk prisons.

Nor were the Kurds—who number well over two million, some 20 per cent of the Iraqi population—allowed to return to their homes. The Baghdad regime is in the process of "Arabizing" the rich petroleum-bearing region of Kurdistan. Approximately a million Kurds presently are being displaced, moved to southern Iraq and scattered in Arab-majority territory.

Egyptian peasants are being "imported" to replace them in Kurdistan. The Kurdish tongue has been banished from the schools and no longer is recognized as the nation's second language.

As part of this policy of forced Arabization, too, any Arab who acquires a Kurdish wife is given a financial reward.

The recent history of Iraq's Jewish community also has been one of harassment, persecution and murder.

This was the mightiest Jewish community in the Middle East, three decades ago, about 130,000 strong, its history going back to biblical times.

Today only 300 to 400 Jews remain in all. With the creation of Israel in 1948, all Jewish properties were sequestered, Jews ordered to cease business activity, and emigration forbidden. When, following such repression, the Iraqi government announced in 1950 it would permit emigration for one year, virtually all Jews fled the country, only about 6,000 staying. Others managed to make their way out in subsequent years so that when the present Iraqi regime came into power, in 1968, only about 2,500 remained.

The Six Day war between the Arab states and Israel already had led to a new persecution of the remnant Jewish community. There were scores of arrests; Jewish homes were placed under surveillance; Iraqi companies dismissed all Jews, and all Jewish assets were frozen.

With the present regime came murder. In January, 1969 there was another series of arrests. Fourteen persons, including nine Jews, were summarily tried by a military court in a simulacrum of justice and hanged in public squares in Baghdad and Basra, resulting in shocked world public opinion outcry.

In September, 1972 Iraqi plainclothes police and security forces started picking up Jewish men and women from their homes and on the streets. Three of 21 Jews so imprisoned were released. The eighteen others "disappeared."

In all probability they were tortured and put to death by the police of the then Iraqi security chief Nazem Kazzar. President Ahmed Hassan El Bakr of Iraq later told Le Monde correspondent Eric Rouleau (Le Monde, July 20, 1975): "Beria was an apprentice executioner compared to Kazzar. When questioned he boasted of having tortured to death or secretly executed more than 2,000 persons. We now know that he is responsible for the assassination of innocent Jews." Cigarette burns, injection of boiling water into the intestines, electric charges, crushing of genital organs by mechanical means, and collective rape were among the methods which Rouleau attributed to Kazzar on the basis of discussions with Iraqi leaders.

Terror among Baghdad Jews reached new heights in 1973 when five members of the Kashkush family were machine-gunned to death in their home by police units.

Even today, the Paris meeting heard, the government of Iraq has not had the elementary decency to inform the Jewish families as to the fate of their relatives who disappeared in prison or as to the whereabouts of their bodies so that they can be given proper burial.

The indecent character and cynicism of the Baghdad symposium on "Racism and Zionism" is all the more apparent, the Paris gathering heard, in the face of such Iraqi treatment of Jews, Kurds and other minorities.

Mr. Hajdenberg is a member of the International League Against Racism and Anti-Semitism.

Pakistan Friendlier

...alm Comes to Khyber Pass ...s South Asia Relations Gain

By William Borders

KHYBER PASS, Pakistan, Dec. 27 (NYT).—The political ...d along this legendary mountain pass is suddenly calmer ... days as the two wary neighbors whom it connects move to ... a long-standing feud.

... the Pakistanis call "a ... a truce," both Pakistan ... Afghanistan have taken ... loudspeakers they use ... ment each other there at ... ier and Premier Zulfikar ... tto and President Sadar ... med Daud have exchanged ... ts to each other's capitals ... the last few months. This ... d have seemed unthinkable ... ar ago.

... good beginning has been ... de and the ice has been ... ken," Mr. Bhutto said recently. "We have started our ... logue. Tensions have gone ... m. It is not the same as it ... Of course, I cannot say for ... future."

... former relations between ...istan and Afghanistan are ... of what diplomats regard as remarkable—though largely ...cidental—reduction of ten... in several parts of the often-troubled subcontinent of South ... in the last six months or ...

Relations Improved

...kistan's relations with Ban...desh, its former eastern territory, are also much improved, ... so are its relations with ... Similarly, India is getting ... g better with China than ... as in 15 years. "Everybody is ... spending a lot of money on ... s but it is one of the coolest ...ods in this part of the world ... years," said a diplomat with ... experience in the region.

The dispute between Afghanistan and Pakistan centers on ... Pathans, a tough tribal ...ple whose warriors roam the ...ubby brown mountains around ..., paying allegiance to neither ... The Pathans, in floppy ...ans and loose white trousers, ... a life that is almost as independent as that of their ancestors who resisted the invading troops of Alexander the Great at the Khyber Pass 2,300 years ago as well as the many other foreigners who have come through since.

Pakistan regards them as Pakistanis, and Afghanistan thinks their land should either be part of its territory or an independent country called Pashtunistan.

But last month, after a bloody clash between soldiers and tribesmen trying to assert their independence in the rugged and remote Dir district near the border north of here, Mr. Bhutto ...ghtly how the mood has changed by stressing that he thought the Afghans had played no part in the uprising.

A Shining Example

For Mr. Bhutto, any move toward settling with the Afghans is also charged with domestic political significance, since the taming of the North-West Frontier Province, the area along the border here, has long been a major Pakistani goal. With a national election likely to be held next year, Mr. Bhutto is eager to project an image of Pakistan as "a shining example of democracy," as he put it recently, in an implicit contrast with In...a, which used to be South Asia's democratic beacon.

But one of his problems is that a principal political opposition group in Pakistan, the national Awami party, is the group that speaks for the Pathan people, and it advocates greater local autonomy for them. The central government, contending that the party was really a secessionist movement, banned it early last year and arrested its leading members. They are now the defendants in a drawn-out trial that keeps being postponed, reportedly because the government is trying to negotiate a settlement behind the scenes.

TRIMMING—Workers in China's Shensi province pruning trees planted in vast reforestation program.

Authors and the Overwhelming Book Problem

By Nan Robertson

NEW YORK (NYT).—Alistair Cooke's solution was geography; Nora Ephron's was divorce; James Dickey's was the alphabet and Erica Jong's may well be a house in the country.

They all write and all love books and were asked, along with other bibliophiles, how they organize their private libraries.

Some, such as Dickey—the poet who broke through to prose with the novel "Deliverance"—achieve sanity and control over their large collections with conventional systems. These include alphabetizing by author and grouping books under subjects, nationalities or periods. But some have found inventive ways that ordinary souls would never dream of to put their hands on the right books right away.

Take Cooke, celebrated commentator and chronicler, in print and on television, of America and Britain. He is probably the only New Yorker who thinks of his bookcase as a map of the United States.

Americana

His assemblage on America covers one entire wall of his Fifth Avenue study, with books on New England in the upper right corner, California down at the lower left and "Abe Lincoln in Illinois" anchoring the center.

Or take Miss Ephron, Esquire columnist and feminist. The end of her first marriage and relief from library trauma came simultaneously.

From college on, she spent "huge amounts of money and time" acquiring books so she would look well read.

"By the time I was 33 years old, I had thousands and thousands of books, which of course I could never find, which were all mixed up with my husband's books." He was Dan Greenburg, also a writer. Three years ago, they were divorced, and she decided to take "only what I really loved and probably would read again and that came to about 100 books."

Minimal

Now she is married to Carl Bernstein, the Watergate reporter, but she has remained ruthless about keeping her library minimal. She treasures her Jane Austen, her Dickens, her Popular Library, all the Oz books, the dictionary, the National Geographic Atlas and "about 85 others."

"I'm much happier now," she says, "and my decision about books is part of the reason."

James Dickey adds—he does not subtract. He has an enormous library and has found peace through strict alphabetizing. He estimates that he has 20,000 volumes stashed in his two South Carolina homes, "both with a preponderance of poetry, with a great many novels and philosophical works and books of celestial navigation, which is a great thing of mine."

"I don't go by country or subject—I'm author-oriented," he says, putting Ireland's Yeats right next to Russia's Yevtushenko.

The poet doesn't find that many books a burden at all. "I wouldn't do without them," he said.

'Hopeless Task'

By contrast, Miss Jong ("Fear of Flying") sounded panic-stricken. When asked how she organized her library, she sighed deeply and responded, "It's a hopeless task." Her books are scattered across the country—in a rented house in California, in cartons in her New York apartment.

She is house hunting now. "I thing a lot of writers are driven to buy a house in the country to have a place for their books," she said.

Lea Lerman, Vogue magazine's features editor and writer of volumes on Leonardo, Michelangelo and the Metropolitan Museum, has a library as big as Dickey's but feelings similar to Miss Jong's.

"I am overwhelmed," he said. He reported that his 11-room West Side apartment is "silting up" with books, and he closed off the dining room a year ago "when I could no longer navigate through it." It contains "a very large collection of what you'd call English lit if you were teaching it—all the way from Beowulf to now."

On the Floor

"Every closet shoves books on you when you open the door—it doesn't make for happy living," Lerman said. He has managed to isolate Proust in and near his bedroom, the Renaissance and art history and the Alcotts in the main workroom, foreign fiction and history in the passageway.

Alistair Cooke
... *bookcase map*

Nora Ephron
... *a minimum*

"Lots and lots of bound volumes of poetry are sitting on the dining room floor and under various tables—the wonderful thing is you can pick it up on the wing and read four thrilling lines and it nourishes you for the day," Lerman concluded on an upbeat note.

If Lerman's problem is horizontal, with an overflowing apartment, that of Robert Gottlieb, Knopf's president and editor in chief, is vertical. He has a four-story house in Turtle Bay, on Manhattan's East Side, "and there are books on all of them and on the stairs to carry up and down."

Frances Steloff of the Gotham Book Mart, long the most famous avant-garde bookstore in America, lives overhead, and occasionally brings some excess down.

Books, to Miss Steloff, are not "just merchandise or objects of usefulness—they are treasures your heart just beats to."

Irving Howe is philosophical rather than psychological about personal libraries. The teacher and author of "World of Our Fathers" mused on the question and then said: "With most people, libraries are like their lives. They begin with some order and go on to increasing disorder."

THEATER IN BERLIN

'Shakespeares Memory'—Dazzling

By Paul Moor

BERLIN, Dec. 27 (IHT).—A Bonnish German joke has it that a true German scholar can easily make his life's work the production of one gigantic tome in exegesis of a single footnote which he has found in another such gigantic scholarly tome. That story comes to mind in connection with the latest production by the Schaubühne am Halleschen Ufer which they call, to quote the title verbatim, "Shakespeares Memory."

That last sentence itself requires a bit of exegesis. The word *Schaubühne* has no English equivalent; it means, simply, a stage where shows take place. The rest of the company's name comes from the location of the theater where it customarily performs, Hallesches Ufer, the Landwehr Canal's northern bank, named after the city of Halle and located in the proletarian borough of Kreuzberg. The absence of an apostrophe in this new production's title makes the first word German, the second foreign—a puzzling juxtaposition.

Past Few Years

During the past few years, this fiercely unconventional company has taken over first place in German-language theater from the Berliner Ensemble, which after the deaths of its founders, Bertolt Brecht and his actress wife Helene Weigel, went into a decline. The Schaubühne has its own spiritus mentor, Peter Stein. In his recent operatic debut production, "Das Rheingold" in Paris, he apparently fared less than well, but a succession of dramatic productions here in Berlin has established him without competition as the most brilliant theatrical director in this part of the world today, displaying, at his best, touches of unmistakable and undeniable genius.

To Mr. Stein's chief dramaturgist, Dieter Sturm, must go the principal credit for authorship, if you can call it that, of "Shakespeares Memory." For this production, the company has moved into a cavernous film studio in the remote borough of Spandau, with no stage, no checkroom, and for most of the seven hours of playing time divided between two successive evenings, no place for the spectator to sit down. The script incorporates, like some sort of collage, just about everything under the sun which formed the environment of Elizabethan England, which, in turn, formed Shakespeare.

That means a production with a sort of carnival atmosphere, with strolling players, acrobats, singing, fencing, monologues, dialogues, with two or more simultaneous events in different parts of the huge hall making it impossible for a single mortal to attend it all, let alone absorb it. The plethora of information, combined with the contemptuous attitude towards the spectator's personal comfort, makes the experience fascinating, frustrating, dazzling, and infuriating all at the same time.

The Schaubühne company regards "Shakespeares Memory" as a technical exercise, a preparation for the first Shakespeare production they have yet to do—probably "Richard II" or "As You Like It." Whenever it comes, it should prove as overwhelming a theatrical experience as the best this troupe has yet given us. Certainly they will have readied themselves for it with what Berlin's leading theater critic, Friedrich Luft, calls "downright Teutonic thoroughness."

Argentine Detainees' Families Say Aides Demand Ransom

By Joanne Omang

BUENOS AIRES, Dec. 27 (WP).—Argentine rightists claiming to be police or soldiers have begun to demand ransom for the release of those they have informally detained, families of some of the prisoners say.

It is the latest among many alleged human rights violations here, a list of which resembles the charges that have been made against Brazil, Uruguay, Chile and other military regimes.

The charges appear in petitions for writs of habeas corpus, in detailed anonymous letters, in whispered conversations and in the poorly mimeographed pamphlets produced by underground groups.

Most of the accusations meet silence from the military rulers, who cite security as the reason for keeping the names of prisoners secret. They lament the presence of what they call "uncontrollable extremists" in their lower ranks and among retired officials and say that unspecified disciplinary measures have been taken.

Meanwhile, no one has been charged publicly with the admitted excesses, and habeas corpus writs are routinely answered with denials that the subjects are in government custody.

Differing Numbers

Church sources estimate that about 5,200 persons are being held. Interior Minister Albano Harguindeguy said that the number is "in thousands, fewer than half the number of fingers on one hand." Other sources estimate that it may be more than 20,000.

An Argentine doctor, who will be called Alfredo Stein to protect his family, told of being arrested on Aug. 12 by men claiming to be police and army officers. They ransacked his apartment, taking several thousand dollars' worth of valuables, and told him correctly that they knew he had been an active member of a now-extinct guerrilla group in the 1960s.

They took him blindfolded to a detention center, he said, and tortured him with electricity while he was strapped naked to a bedspring, asking him the whereabouts of current guerrilla leaders. Finally convinced that he did not know, his captors told him he would be freed on payment of $125,000.

Dr. Stein said he was then taken to a building with 60 or 70 cells containing scores of other prisoners, and later to a private house where he was kept blindfolded and chained to a bed.

Ransom Paid

His family, meanwhile, began denouncing the ransom demand and sent a letter to President Jorge Videla. Two days later, Mrs. Stein was told to bring all the money available to a café near the army's Campo de Mayo military base.

She dropped off $23,000 on Sept. 8, and Dr. Stein was freed on Sept. 12. He left the country two days later.

Neither has terrorism ceased by avowed leftists, despite the government's repeated claim that the terrorists have been militarily annihilated.

The army this month announced that it had killed guerrilla leader Norma Arrostito, a founder of the Montonero organization. A terrorist bombing carried out in her name two weeks ago killed at least 14 persons and wounded 30 in the Defense Ministry.

Car Destroyed

Another incident involved lawyer Roberto Sahores of Bahia Blanca, who had defended followers of the late President Juan Peron who were under attack at the university there. Two months ago a bomb destroyed his car in the carport adjoining his house. A delegation of the Bahia Blanca legal association went to the district military commander, Gen. Adel Vilas, to ask that Mr. Sahores be protected.

"They were told that Sahores was an enemy of the government because he defended its enemies, that the bomb had been a warning and the second time would be worse," a lawyer reported.

Protests over the handling of other cases forced the retirement of Gen. Vilas this month along with two other generals regarded as extreme rightists. The action was seen as evidence of a continuing attempt by President Videla to curb the obvious excesses. At the same time, President Videla and other leaders occasionally tell friends they are unaware of some major cases.

Amnesty Is Declared

BUENOS AIRES, Dec. 27 (Reuters).—The government has granted amnesty to 1,066 political prisoners, including 36 foreigners, it was announced here.

It said that those freed were held under regulations empowering the government to hold suspects without trial.

Entertainment in N. Y.:

Rock Version of 'A Star Is Born'

NEW YORK, Dec. 27 (IHT).—This is how critics for The New York Times rate new films and stage productions:

Films

"A Star Is Born," is the Barbra Streisand remake of the 1954 (Judy Garland) remake of the 1937 (Janet Gaynor, Fredric March) remake of the 1932 film "What Price Hollywood?", starring Constance Bennett. In the latest version, the scene is the world of rock with Streisand as an unknown singer and Kris Kristofferson as the fading star. The film was directed by Frank Pierson but the dominant personality is Streisand's—she is the executive producer, takes credit for the "musical concepts," contributed her own wardrobe and collaborated on two of the best songs, Vincent Canby reports. As long as this version attends to music, "it is not at all bad." But the drama "is as bogus as the star's performance when she pretends to be Esther Hoffman, unknown singer." What Miss Streisand does "is not acting. She's a queen condescending to her own court cameraman. She never plays to or with the other actors."

"The Voyage of the Damned," director Stuart Rosenberg's screen version of the book by Gordon Thomas and Max Gordon, is an all-star extravaganza that Vincent Canby finds "clumsy, tasteless and self-righteous." It recounts the story of the 937 Jews on their way to Cuba aboard a Hamburg-America liner in May, 1939. There was doubt that Cuba would accept them—or any other country for that matter. Hitler's thinking apparently was that Germany could not lose—there was the passage money to be considered and the possibility of proving his point that Jews were unwanted by the countries criticizing his anti-Semitic policies. This, in Canby's opinion, could have made an excellent film. But "The Voyage of the Damned" is "worse than merely boring. By exploiting the tragedies of real people, some wildly fictionalized," the film "attempts to turn them to profit without giving them any measure of the respect that is due." Among the stars: Faye Dunaway, Oskar Werner, Malcolm McDowell, Max von Sydow, Orson Welles, James Mason, Julie Harris, Wendy Hiller and Jose Ferrer.

"Nickelodeon," director Peter Bogdanovich's latest film, "is two hours and two minutes of impersonations," Richard Eder says. "Some of them are very good—deft and funny—but they lack a life to string them together." It stars Ryan O'Neal as an incompetent lawyer who meets up with a maniac movie producer and ends up directing an unskilled hoofer, Jane Hitchcock, and a cowboy, Burt Reynolds, back in the days when movies were new. "Bogdanovich mistreats his love for the vitality of American movie making by proclaiming it so breathily." It's supposed to be a parody of slapstick. "Some of the gags are very funny. But too many are obvious quotes from old routines." Reynolds is "appealing" and Miss Hitchcock "seems to have comic potential but the point is never really proved." Eder calls O'Neal, "a major mistake. He has very little talent for comedy."

"Pipe Dreams" is the occasion for recording star Gladys Knight to make her "nice low-keyed" movie debut. The film is set in Valdez, Alaska, among lonely construction workers—the Alaska pipeline is an essential part of the action. Playing opposite Miss Knight is Barry Hankerson, her husband on and off screen. Stephen Verona displays "little apparent talent" as either writer or director. Miss Knight doesn't sing on screen but with the Pips. "she's never long off the soundtrack." Canby says that a lot of the film is used up with aerial sightseeing.

Barbra Streisand

Plays

"Your Arms Too Short to Box With God" has "more spirit, more sense of exaltation" than Vinnette Carroll's "Don't Bother Me, I Can't Cope," Clive Barnes says. "A black celebration according to the Book of Matthew," it is "funny and fervent" and has an "onrushing vitality that practically pins you to your seat." Gospel singing is "particularly appropriate here." Miss Carroll originally developed the show with her Urban Arts Corps for the 1975 Spoleto Festival. The music and lyrics are by Alex Bradford (the lead singer) and Micki Grant with choreography by Talley Beatty. Jesus is played "with a gentle dignity" by Stanley Perryman. "The whole cast is as lively as a revival meeting that has just revived." Barnes singles out Delores Hall who stops the show with "I Love You So Much Jesus."

Unesco to Launch $15-Million Drive To Save Acropolis

ATHENS, Dec. 27 (Reuters).—The United Nations Educational Scientific and Cultural Organization will launch an appeal next month for $15 million to save the Acropolis from destruction, according to Greek Minister of Culture Constantine Tripanis.

The appeal will be made by Unesco director-general Amadou Mahtar M'Bow from the rock of the Acropolis itself on Jan. 10.

The monuments on the citadel in the center of Athens are threatened by air pollution due mainly to fumes from central heating systems, traffic and factories. The money, Mr. Tripanis said, will be used to take down some of the monuments and put them in a museum at the foot of the Acropolis. Replicas will be erected on the site.

News Analysis

As Uganda Slips Backward, ...ear, Suspicion Gain Ground

By David Lamb

KAMPALA—The tragedy of ...nda is mirrored in the apolo... of its people, apologies that ... spoken softly and cautiously ... a single emphasis: Uganda ... pping backward in time.

... country Idi Amin took over ...71 is today all but bankrupt, ...nically and spiritually. Its ...le live with fear and suspi... Its shops offer only bare ...es, its construction stands ... the skeletons of half-finished ...ings looming on the Kampala ...ine with abandoned cranes in place.

... the countryside, most farmers have stopped planting coffee ... cotton because the government can no longer afford to ... their crops. In the towns and ... people are reverting to ... arter system, producing only ... they can trade for other ... because money is of little ... when there are no available ...odities to spend it on.

... sorry you could not have ... Uganda a few years ago," a ...dan said. "This was such a ...ant place," another said. ...he Uganda will be born ... What you see now is not ...da."

Butter and Guns

... country's plight today is ... estimony to Field Marshal ...'s misplaced national priori... Uganda needs butter and ...al Amin buys guns—and to ...uthlessness of a 20,000-man ... which has ensconced itself ... new ruling elite. Many of ...ficers, enjoying the comforts ... colonial way of life, take ... they want on demand, ...e automobiles, businesses, ... smuggling rights.

... year Uganda spent one out... ery four shillings it earned on military hardware. One result, a banking source in Kampala said, is that the foreign exchange reserves will be exhausted within three months, and there are virtually no tourists, no foreign investors, no viable agricultural crops or industrial products to replenish them.

The magnificent game parks which once attracted thousands of tourists each year now belong only to the animals. Maitres d' in Kampala restaurants like Chez Joseph stand watch over empty tables. And Kampala's leading hotel, the 14-story International, had only two items on its menu the other evening: plain steak and plain chicken. Like most households in Uganda, it was out of vegetables, eggs, butter, bread, beer, sugar, milk. It served imported instant coffee, an irony in what was once one of Africa's important coffee-producing countries.

"Only the army lives well now," said a cab driver in as outspoken a protest as most Ugandans dare make. "People like me are getting poorer. Yesterday, my wife got in line before dawn to buy a kilo of meat. She stood there four hours but there was only enough for the first 30 people."

Impressive Facade

Along the capital's main thoroughfare, Kampala Road, the stores the soldiers took over when Marshal Amin kicked out Asian businessmen in 1972 display an apparently impressive variety of goods. But it is a facade. The paint cans piled high in one store window are all empty, as are the cardboard boxes supposedly containing electrical appliances in another shop. Down the road a typical grocery store for expatriate residents contains little more than bags of rice.

"This is a positively frightening place to live and it's getting worse," said a resident European businessman whose car was stolen at gunpoint last month and whose house was attacked by 20 bandits one night two weeks ago.

"The army does what it wants and the civilians are scared stiff. They're scared to entertain anyone but immediate members of the family at home because you don't know who's an informer and any gathering is suspected of planning a coup. They're even scared to go to the movies because no one goes out at night any more."

Since Marshal Amin took power, the most conservative estimates of the number of people killed by military authorities start at 10,000. Thousands of other Ugandans are in prison and tens of thousands more have fled to other African countries.

Against these grim statistics, Marshal Amin, whose authority appears unchallenged, told the nation this month that Uganda is in good shape. The economy is strong, he said, and the military has recovered from the Israeli raid on Entebbe, with five pilots now available for every plane in the air force.

What he did not add was that the air force has 11 serviceable planes.

19 Die in Riots Among Africans Near Cape Town

CAPE TOWN, Dec. 27 (AP).—Hundreds of blacks fled their homes in search of safety yesterday after clashes between blacks erupted in two segregated townships over a call for a Christmas boycott. Officials reported 19 persons dead and 97 injured in the weekend rioting.

Vehicles laden with furniture, bedding and other personal belongings left Guguletu and Nyanga townships. Men, women and children on foot carried whatever they could away from the scenes of rioting.

A Bantu Administration Board spokesman said 81 houses, five small hostel blocks and 14 vehicles were destroyed. In addition, 56 houses were damaged seriously and 36 others damaged slightly.

Hand-to-hand fighting broke out in the two townships outside Cape Town after black youths attacked migrant workers' hostels. The attacks were spearheaded by militant young women, according to one official. Police said the hostel workers retaliated by burning the homes of their attackers.

The youths apparently were angered by migrant workers' defiance of a call by militants to stop seasonal buying and boycott Christmas this year.

Man Gets Bill, Dies in Hospital

TEHRAN, Dec. 27 (AP).—A 43-year-old farmer in Shiraz died yesterday of shock after receiving a hospital bill, the newspaper Kayhan reported.

According to the newspaper, Karam Gholampour was hospitalized in Shiraz with a heart ailment. As he was leaving the hospital, he collapsed when he was handed a bill for $1,500 for his 10-day hospitalization, the newspaper said.

The Iranian government has a nationwide insurance arrangement, but only civil servants are now eligible.

...ize Damages ...edish A-Site

...RSMARK, Sweden, Dec. 27 ...ers).—Fire swept through ...uilding site of a nuclear ... plant here and caused ...ge of up to 500,000 kronor ...710), an official said today.

... director Stig Lindberg said yesterday's blaze destroyed ...ment and scaffolding around ...crete column outside the ...r core.

... said that it was probably ...d by a short circuit in a ...te-drying heater. The re... is scheduled for completion ...30.

oor Nations' Growth aid Stagnant Since '71

By Hobart Rowen

ASHINGTON, Dec. 27 (WP). eal economic growth in the rld's poorest countries has gnated in the last five years le the amount of their debt been rising sharply, accordto new data released by the ld Bank.

e growth results are so ouraging, according to World k vice-president Hollis Chethat the development goals the decade beginning in 1970 be said to have "collapsed."

constant dollars, the perta gross national product of poor nations, which increased an average of $110 in 1960 120 in 1965 and $130 in 1970, gained no further. In terms n index, with 1970 equal to 100, the 1975 figure is only 98.9.

At the same time, the per-capita GNP for all but the poorest nations has increased. In terms of the index, the industrialized countries have gained 10 per cent since 1970; the wealthy oil producers, 37.7 per cent; the less-wealthy oil producers, 16.8 per cent; the middle-income less-developed nations, 16.6 per cent; and the higher-income less-developed nations, 20.8 per cent.

Trend Since 1973

Among the industrial nations, Switzerland and Sweden continued to lead the United States in per-capita GNP, a trend that began in 1973. In 1975, the Swedish GNP per capita was $8,060; the Swiss figure was $7,880, and the U.S. figure was $7,060.

But the richest countries of all in per-capita terms are two of the major oil-producing countries—Kuwait, with $11,510, and the United Arab Emirates, with $10,480.

The 86 developing countries surveyed include three groups: 24 with per-capita GNP of $200 or less, 23 with per-capita GNP between $200 and $500 and the balance with per-capita income over $500.

Amid the concentration of the poorest countries—in Asia, Africa and Latin America—the combined population is about 1.7 billion persons, compared to 682 million in the industrialized countries and 300 million in the oil-producing areas.

Gross national product, as used in the World Bank's data, is the sum of all goods and services produced in each country, measured in constant U.S. dollars based on 1973-75 averages.

Although the bank's figures on debt are no more recent than 1974, and are limited to external public debt—thus failing to tell a complete story of borrowing by poor countries—they highlight what has come to be a growing concern in international financial circles.

The worry is that the debt of the less-developed countries has grown so big that merely to pay the accumulated interest is becoming too much of a burden. And since the loans have increasingly been advanced by commercial banks, on a short-term basis, there is concern that if some sizable country is forced into a moratorium, some major bank might also, as a consequence, find itself in trouble.

Private Lending

On $25.4 billion in net aid received by 86 developing countries in 1974, more than half—$13.9 billion—came from private financial institutions. In 1970-72, the private share had been only 42 per cent.

Among the 86 countries, 11 accounted for 72 per cent of the developing countries' outstanding debt to commercial financial institutions at the end of 1974. They are: Argentina, Brazil, Mexico, Peru, Greece, Israel, Spain, South Korea, Malaysia, Algeria and Zaire.

According to financial market information, these commercial—as distinct from governmental—aid commitments continued at a $14-billion annual pace through 1975 and at least the first half of 1976.

"External public debt has been expanding since 1971 at an increasing rate, growing at a 19-per-cent annual rate from 1971 through 1974, as compared with 13.3 per cent from 1967-71," the World Bank report said.

However, when adjustments are made for inflation, the report points out, the debt-service burden "looks much less formidable than is suggested by the nominal figures."

orld Bank's oan Policy Questioned

By Edwin L. Dale Jr.

ASHINGTON, Dec. 27 T).—In an event virtuaRy out precedent in the 30-year ory of the World Bank, its ntly retired U.S. executive ctor addressed a crowded ting of staff members early month and expressed U.S. rnment reservations about direction that the bank is ing.

he former director, Charles per, spoke at the invitation he staff. According to those ent, he was not sharply critiof the bank's performance or y direction under Robert Mamara, its president, but he d some fundamental ques- Mr. Cooper is now with Exxon Corp. in New York. ilar questions were raised tly in a farewell speech to oard of executive directors—not the staff of the bank—Taro Horie of Japan (IHT, 23).

Reports Confirmed

Cooper confirmed in an view that he had addressed staff. While declining to talk he record, he did not dispute accounts of what he had

e fundamental issue raised r. Cooper was the rapid rate owth of the bank's lending, r Mr. McNamara, to the leveloped countries. He noted the bank's key influence has en on the quality of its and on local government les rather than the amount ney loaned.

ile Mr. Cooper did not the financial soundness of ank, he pointed out that its ed debt under presently ed lending schedules, will rom about $18 billion now to $24 billion by 1980 and more after that.

bank has never seen one bond issues fail, he noted, e added that such a huge e of offerings might begin se questions in financial ets.

wondered whether the Mca policy of setting annual s for lending to individual ries, instead of the old of setting ceilings, might ading to a deteriorating y of loans. He did not r the question but he sug- that he preferred a policy which the growth of the would occur "naturally" as projects emerged.

Cooper also raised ques- about the huge growth of nk's staff, now about 4,500 ns. He said that this raised ns of "paper shuffling."

FINANCIAL NEWS AND NOTES

Accountants Qualify AMC Report

Auditors for American Motors Corp., noting the firm's recent heavy losses, have warned that AMC's financial problems threaten "the continuity of the business." However, an AMC spokesman reaffirmed the auto maker's forecast for an improved performance in 1977. The small-car specialist, caught in a severe sales slump, has lost $74 million in the last two fiscal years. The accounting firm, Touche Ross & Co., drew attention to the financial problems in a certificate attached to AMC's annual report for fiscal 1976, ended Sept. 30. The "company has outstanding short-term notes... that are renegotiated and renewed each December," Touche Ross said in a rare qualifying statement accompanying the standard two paragraphs certifying its audit. "The continuity of the business of the company depends upon the availability of adequate financing as well as an improvement in operating results." AMC says its working capital at the end of fiscal 1976 was $59.8 million, down from $129 million the year before, while short-term borrowing and long-term debt due in fiscal 1977 rose to $84.6 million from $65.2 million the year before. Some $63 million in short-term bank loans expire this month. An AMC spokesman says formal extension of the loans is imminent and a long-range financing plan is expected to be completed by January.

Nomura Unit Seeks Share in U.S. Co.

Nomura Securities International, the New York-based subsidiary of Japan's largest brokerage firm, is negotiating a 25-per-cent equity share in H. C. Wainwright & Co. It would be the first time a Japanese securities house acquired a substantial portion of a highly regarded U.S. securities firm. Nomura International will invest about $1 million in the institutional investor division. Wainwright, which does about 90 per cent of its business with institutions, is keeping its individual investor division in Boston, while the main operation will be based in New York. Wainwright is estimated to rank about 80th in terms of size among U.S. brokerage houses, and is highly regarded in the investment community. Nomura hopes to gain expertise in marketing Japanese securities to institutions and to improve its ability to prepare information about Japanese companies for large investors, officials say.

PUK Sees Balanced Results for 1976

The non-ferrous metals concern Pechiney-Ugine-Kuhlmann (PUK) expects to report balanced consolidated results this year and may even record a "slight profit," says president Philippe Thomas. Last year, the PUK group reported a consolidated loss of 195 million French francs (about $39 million). Group turnover in 1976 is expected to have increased about 20 per cent over the 13.6 billion francs recorded in 1975. He says that because the price of PUK stock on the Paris Bourse has declined out of proportion to its real value, the company has decided to correct the anomaly by buying its own shares. No figures were given, however. The current price is 78.45 francs, down from the year's high of 119 francs.

Opel Reports Record Output

Motor vehicle production of Adam Opel, the West German unit of General Motors Corp., set a new high of 919,838 units this year, up 39.9 per cent from 1975 and 4.8 per cent above the previous record, set in 1972. James Waters jr., management board chairman, says that 47.4 per cent of this production, or 435,725 units, was exported, raising the firm's export quota from 45.1 per cent in 1975. Opel's share of the European market rose to 9.5 per cent from 8.1 per cent in 1975

GAO Draft Report Calls Them Lax

3 U.S. Bank-Regulating Agencies Criticized

By Ronald Kessler

WASHINGTON, Dec. 27 (WP).—A study by the General Accounting Office shows that while federal bank examiners had recently cited more than half of 600 GAO-surveyed banks for legal violations, the examiners may have been lax in monitoring the banks' financial activities and had not acted vigorously enough to prevent violations of federal and state laws.

According to a confidential, 250-page draft of a report that the GAO is to present next spring to Congress, its parent body, the regulatory agencies' examiners have commonly found that banks have made illegal loans to their own directors, officers or affiliates, have made loans that violate lending limits and interest-rate ceilings or have violated "truth-in-lending" laws.

Each of the three regulatory agencies—the Federal Reserve Board, the Office of the Controller of the Currency and the Federal Deposit Insurance Corp.—has failed to deal strictly with such banks to curb law violations and other unsound practices, according to the GAO.

The congressional agency's report has been sent to each of the three agencies for comment and could be revised before it is formally published. None of the three agencies would comment to The Washington Post about the GAO draft report.

Unprecedented Probe

The GAO's unprecedented investigation of the regulatory agencies was begun early this year at the request of several congressional committees after The Post revealed that several large U.S. banks were on the regulatory agencies' "problem lists" or had been found by examiners to have engaged in unsound banking practices.

The Congress is considering legislation to reorganize the regulatory agencies or authorize regular review of their operations by the GAO—measures which all three agencies oppose.

In its draft report, the GAO criticized most strongly the Federal Reserve Board—for allegedly failing to detect problems in bank holding companies before these problems weakened the banks owned by the holding companies.

Bank holding companies control two-thirds of the deposits and assets of the nation's 14,700 banks.

Referring to 22 banks whose problems allegedly stemmed from their holding-company affiliation, the GAO said: "With 14 of these 22, the bank examination was the first indication of such problems, although the Federal Reserve Board had inspected seven of the controlling holding companies within the past two years. Had these inspections been adequate and had the other eight been inspected, the problems might have been resolved before they affected the banks."

The GAO also found that new bank-examination methods being tested by the Fed were not as good as those developed for the Controller of the Currency by the accounting firm of Haskins & Sells. In the event the controller's procedures survive final testing, the GAO said, both the Fed and the FDIC should adopt them.

The Controller of the Currency regulates the operations of nationally chartered banks, while the Federal Reserve Board supervises state-chartered banks that are members of the Fed. The FDIC, which insures deposits in nearly all the nation's banks, also supervises state-chartered banks that are not members of the Fed.

The GAO criticized the regulatory agencies for making "very limited use" of their formal enforcement authority, which includes the ability to obtain cease-and-desist orders.

Beyond these powers, the banking agencies must rely on effectively communicating with bank directors in order to insure compliance, the GAO said.

It said that especially in the case of reports prepared by the controller's office major criticisms of bank practices or bank managements are confined to a "confidential" section that is not seen by bank representatives.

This year, the number of bank failures increased to 18 from 1975's total of 13.

Last month, the number of banks considered by the FDIC to be problems because of their financial condition rose to a 25-year high of 379—compared with 359 banks last January, when The Post revealed that Citibank of New York and Chase Manhattan Bank, two of the three largest banks in the country, had been placed on the controller's "Victor" list of banks requiring special supervisory attention.

In its draft report, the GAO said a bank was placed in the "Victor" program when "any condition existed which could lead to the bank's insolvency" or when loans considered to be of questionable value reached a certain level.

Referring to the atmosphere that led to its investigation, the GAO said: "For the first time since the massive bank failures of the 1930s, there has been public concern over a possible recurrence."

Analyst Believes IBM Ripe for a Stock Split

NEW YORK, Dec. 27 (AP-DJ).—Will International Business Machines split its stock next month?

At least one Wall Street analyst who has been following IBM closely for years thinks so. Such a move could spark renewed ardor for the stock.

IBM is the highest-priced listed common stock on the market. It closed today at $377.75, up $6.125.

Harry Edelson of Drexel Burnham Lambert believes IBM might split its stock 3-for-2 on Jan. 25. "I'm fully convinced that IBM will split its stock next month, and I don't see any logical reasons why it shouldn't, at this point," he asserts. Others, however, had expected a split early this year, but that did not happen.

Last Split in '73

The last time the giant manufacturer of data-processing systems equipment split its stock was on Jan. 23, 1973, at 5-for-4—the stock's ninth split.

Mr. Edelson says he has been in close touch with IBM executives, but would not comment on their reaction to a study he released last week forecasting the split. "Our estimate of the size of the split may be only an educated guess," he says, "as IBM might decide on a much bigger split, but our estimate of the date is probably accurate."

When asked to comment on the matter, Bertram Witham, IBM treasurer, said through a spokesman, "That's pure speculation on Mr. Edelson's part." He added that "IBM makes it a practice not to comment on speculation about what its board may or may not do."

Mr. Edelson nevertheless says "statistical evidence" strongly indicates that IBM will split its stock. He recalls that IBM invariably announced a stock split on the last, or next-to-last Tuesday in January, concurrent with the monthly directors meeting. Next year, the IBM board is scheduled to meet Jan. 25. The company reports splits in January, says Mr. Edelson, for approval by shareholders at the an-

French Monthly Deficit Cut, But '76 Trade Shortfall Big

PARIS, Dec. 27 (Reuters).—France reduced its visible trade deficit last month as a result of increasing exports, the Foreign Trade Ministry reports.

But the total deficit for the first 11 months of this year stood at 19.27 billion francs (about $3.85 billion). This compared with a surplus of 6.3 billion francs in the year-ago period.

The deficit for November was 3.82 billion francs (seasonally-adjusted), compared with 4.71 million francs in October.

Foreign Trade Minister André Rossi said in a statement that the consequences of France's prolonged summer drought were still weighing heavily on the trade situation, accounting for about half the November deficit.

But exports to West Germany, France's major trading partner, rose by 3 per cent while imports held steady.

Overall, French industrial firms are pessimistic about their prospects and continue to forecast a decline in their production, the latest survey by the national statistics institute (INSEE) shows.

It says its December survey of 2,200 company chiefs shows that prices, which rose sharply after the government announced its counter-inflation plan in September, are expected to show modest increases of around 0.6 per cent over the next few months.

They add that since the early autumn orders have been exceeded by deliveries, and order books are now below normal.

The survey says orders from abroad have picked up slightly over November, but stocks of finished products have grown and are now above normal.

Net at Dai-Ichi Ahead 19.5% In Half Year

Toyo Kogyo in Black; Fuji Photo Shows Gain

TOKYO, Dec. 27 (AP-DJ).—Profits at Dai-Ichi Kangyo Bank, Japan's largest commercial bank, rose 19.5 per cent to 12.52 billion yen (about $42.6 million) in the fiscal first half ended Sept. 30 from 10.48 billion yen in the year-earlier period.

Deposits at the bank totaled 8.32 trillion yen as of Sept. 30, up from 7.79 trillion on March 31 and 7.19 trillion on Sept. 30, 1975.

Total assets came to 12.32 trillion yen, compared with 11.64 trillion yen on March 31.

The board of directors has approved the appointment of Kaoru Inouye, the former chairman, as chairman of the senior executive committee.

Shojiro Nishikawa, former deputy president, was named chairman of the bank and Shuso Muramoto, also a former deputy president, was named president, succeeding Takashi Yokota, who was also named to the senior executive committee.

Toyo Kogyo in the Black

TOKYO, Dec. 27 (Reuters).—Toyo Kogyo reported today a sharp improvement in its annual results—showing a profit of 1.05 billion yen, compared with a loss of 1.67 billion yen a year earlier.

Sales in the year ended Oct. 30 were up 18.5 per cent at 588.21 billion yen from 496.49 billion yen.

A company spokesman said production in the year ending next October is expected to total between 720,000 and 740,000 units, compared with an output of 722,000 cars and trucks in the year just ended.

Of the units produced last year, 447,000 were exported—compared with 640,000 units produced and 315,000 exported the previous year.

The spokesman said Western Europe was the best market for the firm's Mazda cars in the latest year, taking 33 per cent of the export total, followed by 27 per cent in the United States, which used to be the firm's largest export market.

Profits at Fuji Photo Film climbed 16.5 per cent in the year ended Oct. 31 to 10.1 billion yen. Sales were ahead 18 per cent at 226.71 billion yen.

Big Board Prices Rally, Dow Gains 10.47 Points

NEW YORK, Dec. 27 (Reuters).—A strong post-Christmas rally carried prices on the New York Stock Exchange sharply higher today.

Some analysts said the final week of the year often brings in buying—last minute restructuring of portfolios by institutional investors and early new-year reinvestment demand.

They said the market also appeared to be responding to indications there was a good pick-up in the final phase of the holiday shopping season.

Other analysts said the market was influenced considerably by lower interest rates and a stream of recently encouraging economic statistics, including a rise in November machine-tool orders.

President-elect Jimmy Carter said today he is encouraged by such signs but prefers to wait until further indicators are in before determining the size of an economic package to stimulate economic growth.

The Dow Jones industrial average rose 10.47 to 986.09. At 3 p.m. the Dow was ahead 7.72 points.

Volume totaled 20.13 million shares, compared with about 24.6 million Thursday, prior to the Christmas holiday.

Xerox rose 2 3/8 to 57 3/4, Kodak gained 2 1/8 to 85 7/8, General Motors was up 1 to 78 1/8, Ford rose 1 1/4 to 61 3/8, Polaroid 1 1/4 to 39, Fairchild Camera 1 to 42, Corning Glass 1 5/8 to 71 3/4, Natomas 1 to 34 3/8 and Honeywell 1 3/4 to 48.

Exxon picked up 1 to 53 3/4, and Texas Instruments was up 2 1/4 to 99 3/8.

Universal Leaf, however, fell 1 to 28 1/2. It is seeking to block a proposed tender offer by Congoleum, whose stock rose 1/8 to 14 7/8.

Prices on the American Stock Exchange pushed higher in moderately active trading. The index rose 1.31 to 107.21.

International Systems gained 4 to 19 5/8. It said a published report that it had projected a loss for the year ending June 30 is "erroneous, unauthorized and unrelated." It said it has issued no earnings forecasts.

Houston Oil rose 3 1/8 to 46, with Syntex up 1 to 227/8.

In Chicago, farm futures prices advanced strongly. Prices advanced partly on the basis of a firm close last Thursday and partly because of reports that the Soviet Union will be buying U.S. grain particularly early next year.

Rates in U.S. Seen Falling

NEW YORK, Dec. 27 (Reuters).—U.S. interest rates are expected to respond shortly to the recent reduction of bank reserve requirements by the Federal Reserve Board, money market analysts say.

The money market performed erratically last week as dealers showed some disappointment with federal funds rates, which rose as high as 4 3/4 per cent before the federal reserve intervened, they noted. Today, the rate fell to 4 5/8 per cent, at which point the Fed entered the market.

The analysts said heavy seasonal factors which are difficult to offset will possibly continue this week. These strains will end around the beginning of the new year when the cut in reserve requirements becomes effective, according to Henry Kaufman, chief economist at Salomon Brothers.

Thereafter, substantially easier conditions should prevail in the money markets, analysts say.

Alan Lerner of Bankers Trust Co. also expects the Fed's accommodative monetary policy to dominate the credit markets. He says the major consideration for monetary policy makers now is probably to get M-1 growing faster.

Last Thursday, the Fed reported that M-1, the narrowest definition of the money supply, declined $100 million in the bank statement week ended Dec. 15, lowering the growth rate over the latest quarter to only 4.6 per cent, for the latest 26 and 52-week periods M-1 grew only 4.1 and 5.1 per cent, respectively, all at the low end of the Fed's target ranges.

Efforts to achieve faster growth in M-1 will be complicated in January by seasonal factors which retard the growth of money supply, but the Fed will be under pressure to demonstrate that it is cooperating with fiscal stimulus undertaken by the new administration, Mr. Lerner estimates.

In its current money market report, Chase Manhattan Bank says there is a good possibility the federal funds rate will move below 4 1/2 per cent and that such a move would be likely to trigger a further decline in the entire spectrum of interest rates.

Australian Dollar Reset

SYDNEY, Dec. 27 (AP).—The Reserve Bank adjusted the exchange rate of the Australian dollar upwards again Friday by 0.58 per cent against the U.S. dollar. The new rates are U.S. $1.0659 buying, $1.0811 selling. This was the eighth upward adjustment in 17 days following the 17.5-per-cent devaluation of Nov. 28 for a net decline of 12.12 per cent.

Tool Orders Up In U.S. by 2.5% In Latest Month

NEW YORK, Dec. 27 (NYT).—November was a strong month for both the new and used machine-tool industries.

The National Machine Tool Builders' Association placed orders for new machine tools last month at $245.35 million, a 2.5 per-cent increase from the October total and 140.4 per cent higher than a year ago.

The association reported that sales of used machine tools were at their highest level for any November.

Shipments of new machine tools were valued by the association at $183.85 million in November, a rise of 12.7 per cent over the October level and 4.8 per cent ahead of a year ago.

The industry backlog of new machine tool orders rose $61.4 million during the month to reach $1.43 billion as of Nov. 30.

Japan Limits Exports

TOKYO, Dec. 27 (UPI).—Six major Japanese steel makers have decided to extend for another year their voluntary restrictions on steel exports to the Common Market, the Ministry of International Trade and Industry reported today.

Convening of Meeting

Shareholders are invited to attend an extraordinary shareholders meeting to be held at 10 a.m. on Tuesday, January 18, 1977 at the Centro Storico Fiat, Via Chiabrera 20, Turin (or on second summons on January 25, 1977 at the same time and place) to consider the following

Agenda

1) Increase in capital from 150 billion lire to 165 billion lire by means of the issue of 20 million ordinary shares and 10 million preference shares with a par value of 500 lire each, to be assigned fully to outside parties, according to Art. 2441, par. 5 of the Italian Civil Code;

2) Issue of 90 million convertible bonds with a par value of 1,000 lire each, to be wholly assigned to subscribers to the increase in capital as per the previous point; and resulting further increase in capital;

3) Modification of Art. 5 of the Statute and resulting provisions.

The right to take part in the discussion and vote is reserved to the holders of ordinary and/or preference shares who have deposited their share certificates at least five days in advance of the meeting with duly authorized Italian banks or with one of the following banks:

Banco di Roma (Belgique) S.A.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

Credit Demand Helps Boost Supply of DM

FRANKFURT, Dec. 27 (AP-DJ).—Fed by strong credit demand, West Germany's widely-defined money supply continued to expand last month, but at a slower pace than in the preceding month, Deutsche Bundesbank reported today.

The central bank said that M-3—the total of cash, demand deposits, savings deposits and time deposits—grew by a seasonally-adjusted 2.1 billion DM in November, following October's record rise of 9.5 billion DM. At the end of last month, the M-3 figure was 519.9 billion DM, on the seasonally adjusted basis.

Danish Price Index Up

COPENHAGEN, Dec. 27 (AP-DJ).—The Danish consumer price index registered 259.1 in November, up 1.1 per cent from the previous month, the government's bureau of statistics announced. The index is based on 1964 equals 100.

BOOKS

THE ANGRY MIDDLE-AGED MAN

By Pat Watters. Grossman/Viking. 190 pp. $7.

Reviewed by John Leonard

AT the age of 48, five years into a happy second marriage, 12 years and two books after he had quit the Atlanta Journal because they wouldn't let him write columns about the Southern civil-rights movement of the 1960s, Pat Watters lost his job. He was laid off by the Southern Regional Council, a "do-good organization" in financial trouble. The council had to cut back on staff, and Watters, who is white, was one of the first to go. Members of the executive committee felt that the directorship of a project in investigative journalism in which he was interested should be given, instead, to a black person.

Troubles, says Watters, come in bunches. (This probably isn't true. It is simply that we perceive and remember in bunches. Trouble is constant.) His mother had just broken her hip, was hospitalized, and had to go to a nursing home. A friend had died of cancer. A police car almost ran him down in the streets of Atlanta. These misfortunes, combined with a generally gloomy attitude toward young people, rock music, modern architecture, shoddy workmanship and Watergate, inspired in Watters an existential funk:

"Sitting here with that empty ache of defeat and disappointment in my gut, knowing that I had done my best, done everything I was supposed to do, and for what? The worst of it was knowing that if I had not lost my job, if Mother had not broken her hip, if all that trouble had not so suddenly come upon me, what I had before wasn't worth a damn anyhow." And "I was angry. Angry as hell."

At least, as a writer, Watters could get in touch with a literary agent, sell articles to magazines and, presumably, obtain a contract for his book. What of other middle-aged men who had played by the rules of their generation—"We were, most of us, good little boys, good scouts, game players, determinedly heterosexual suitors, and dutifully monogamous husbands . . . good husbands, proud fathers, grimly enduring the rat race . . . paying the bills, buying the split-levels . . . buying the insurance that made us worth more dead than alive"—and suddenly find themselves jobless, unwanted, unheeded by their children and their government, their experience and their selfhood and their musty values somehow, instantaneously, irrelevant to a corporate America and the special-interest groups that are its parliament?

Watters was a one-man project in investigative journalism. He would seek out the unemployed or unhappy in employment, who were as sad as he was, and ask what had gone wrong with their lives. At random, and without plan, he left Georgia, he talked to a tavern keeper, a grain trader, a political cartoonist, a plant manager, a purchasing agent, a real-estate man, an aircraft-engine salesman, an assembly-line worker, a grist-mill operator and so on. And they talked into his tape recorder.

Studs Terkel this is not, because Watters gets down to it in his own way, generally mischievously, and is always coming up in swatches, like a parody of a type, as if to advertise the fragility of comprehension. . . . There needed to be so much in his book. I'd prefer more. What, for example, is his first marriage like? What do his children like? Why did he take the writing of Ralph Nader as a threat to enrich his friendship with people who had been his friends for years, and what does that say about Nader's leadership? There is a point in reading "The Angry Middle-Aged Man," of standing on a street while someone else switching on and off in the various rooms of the house.

And yet Watters is a fine reporter, and acquaints us with people of dignity, people who have been honest in their jobs for 25 or 30 years, people who are the one friend of many friends and on the other hand joining the Ku Klux Klan, profoundly disappointed, "disillusioned," as he calls them. They have always worked, have always wanted work was the meaning of their lives—and now they are without work, and what do they do?

To be of use, to be respected, to live decently, to obtain insurance and government benefits for one's sides of private retirement, to eliminate age discrimination in employment better unemployment compensation, full employment, a federal works program "geared to our times"—not bigness, less noise, less killing; a human life. And, perhaps, the opportunity to teach, to pass on the subtleties of their experience to be taken seriously by their children. Otherwise, their lives will have been wasted.

Watters likes the man, defeated, he talks to; and makes us like them, too. He is not hopeful for such a very hopeful for such a time in the near future. He is an early for a form of national insurance. And he is angry, staggers, in his anger, not sure, what he is angry at. The women's liberation movement, the mouthing Ralph Nader, for other reason I can think of, but Nader's public interest. The trouble, which he expresses in constant bunches, is that a lot of our anger, and almost all our sadness, originates in a disappointing self, in a venal, ungrateful, ungenerative. And most of our work is meaningless.

John Leonard is on the staff of The New York Times.

BRIDGE

By Alan

Very light opening bids are acceptable in third seat for lead-directing reasons. East therefore chanced one spade, on the diagrained deal, comforted by the favorable vulnerability. South overcalled one no-trump, which was interpreted by North as showing 15-17 points, slightly less than the standard range. North took a shot at game, and West had a wide choice of opening leads.

It was clear that East had opened light, so his failure to take preemptive action suggested that he did not have more than five spades. The other suits offered better prospects, but the choice between them was tricky. A heart lead was too likely to give the declarer a trick, and would have done so, barring a weird lead of the ten or an even weirder lead of the king.

A club lead did not offer much hope of developing tricks, so he settled for the deuce of diamonds. This set the defense on the road to two tricks in the suit, and turned out to be the only lead to put the contract in jeopardy.

South played low from the dummy, captured East's ten with the king, and led a low spade. The ten was covered with the queen, and when East won with the king he had something to think about. He knew that South was headed for two spade tricks, and he had a good idea about the diamond situation; it was not likely that West had led from J x x x, generally an undesirable selection.

The best East could hope for his partner to hold in the rounded suits, clubs and hearts, was one king, so he mentally explored both possibilities. If West held the king, there would be plenty. There would be plenty for the defense to take five tricks.

But suppose West held the king? After thinking about the possibility, East shifted his heart, the key move. If West had snatched his ace, he would finally have lost three clubs and two spade tricks.

He therefore [illegible] won with the king and led back to diamonds. [illegible] grace. The queen won, and the [illegible] five tricks to take, [illegible] before the declarer could [illegible] nine.

Notice that if South had the heart king instead of the [illegible] king, the shift to a heart would have given him a trick. The heart, but not the contract with the actual deal, contract would have been made if East had continued with hearts.

Next for Raiders, Vikings: The Real Big One

...eelers Bow ...ithout Aid ...f Star Backs

From Wire Dispatches

...AKLAND, Calif., Dec. 27.— ...e will be Oakland against ...nesota in the next Super ...l game, a match between ...ms that have been reminded ...ral times they cannot win ...ne time." The Raiders won ...e yesterday, trouncing ...sburgh Steelers, 24-7, in ...e which was never very ...ctive although the Amer- ...Conference championship ...Super Bowl qualification ...the prizes.

...e Vikings will go into their ...th Super Bowl, this one to ...played at Pasadena, Calif., ...an. 9, never having won the ...ate game of pro football ...the Raiders will be in their ...rd, also without a prior ...mph. It took the Raiders ...st a decade to reach the ...r Bowl again but they were ...decisive in the way they ...handled Pittsburgh.

...e Raiders played perhaps ...soundest game of the year, ...when they needed it the ...defeating the two-time ...r Bowl defending champion ...ers who played minus run- ...stars Franco Harris and ...y Bleier.

...s had a stigma on us that ...couldn't win the big games, ...nes that counted, but now ...s all behind us," Raider ...h John Madden said, refer- ...of course, to his club's ...ility to reach the Super Bowl ...ix of the last seven years ...losing the conference title ...s.

...eople always are asking me ...compare one Raider team to ...ther," Madden continued. ...that's hard for a coach to ...There always are players you ...more than others as in- ...uals so sometimes you can ...rejudiced. I've liked all my ...through the years, but for ...determination I think the ...nt squad has it all over the ...rs. They overcame adversity ...adversity to make it this ...and I have to be proud of ...for that.

...for the Vikings, we have ...them only twice, and we ...both times, but that was a ...years back (1973) so they ...the same team now that ...were then. Hey, they have ...some adversity in the Super ...game, haven't they? But I ...want to think about them ...now. We have today and ...now off, but on Wednesday ...ll start planning for Min- ...a. There will be time enough ...ready for the Super Bowl."

...Vikings, who have lost ...times in the Super Bowl ...any other team, defeated ...s Angeles Rams, 24-13, yes- ...to win the NFC title and ...ght to play the Raiders, ...they beat 34-10 in an ex- ...on and 24-16 in the regular ...three years ago.

...s being frustrated so many ...in the past while playing ...ght in the Super Bowl, the ...rs were almost business-like ...ing their victory over the ...rs. Outside of one emotion- ...burst on the field after the ...whistle and another in the ...g room when they shoved ...h into a shower fully ...d, the Raiders kept things ...much in perspective.

...defense kicked the hell ...them," said quarterback ...Stabler, who threw two ...own passes. "This game ...shut up a lot of people— ...who said we would lay down ...we played Cincinnati so ...re wouldn't have to face ...elers and those who said ...yed dirty football. This ...esn't alibi. We proved ...good."

Associated Press.

Quarterback Terry Bradshaw of Steelers is about to be dumped by Raiders' Otis Sistrunk for 8-yard loss.

Stabler was knocked flat by Pittsburgh middle linebacker Jack Lamber seconds after he had floated a five-yard scoring pass to Pete Banaszak in the third quarter. The TD accounted for the final Oakland points and sealed the Steelers. Stabler suffered rib and hip bruises, a slight head injury and lost a cap on one of his teeth from the hit. But he will be in good shape by the end of the week.

"I could have stayed in and played," said Stabler, whose 27 TD passes during the regular season was tops in the NFL. "I'll be ready for the Super Bowl, don't worry 'bout that a second."

Earlier Stabler had thrown a four-yard scoring pass to Warren Bankston. Clarence Davis had dived a yard after a fumble recovery and 25-yard run by Willie Hall and Errol Mann had booted a 39-yard field goal to account for the other Raider points.

It was Oakland's 12th victory in a row. For the Steelers, who started the year by losing four of their first five games before winning the next nine to make the playoffs, it was a frustrating ending.

Harris and Bleier, who had rushed for more than 2,000 yards between them, didn't play a single down because of injuries suffered the last two weeks. Without them the Pittsburgh offense was stripped of its fuse and Terry Bradshaw had his hands full, trying to generate a serious drive. He did once, though, moving the Steelers 75 yards in eight plays with Reggie Harrison going the last three to make the score 10-7 in the second quarter. But then Stabler went to work.

Madden said the absence of Harris and Bleier had no bearing on the game. He added the Steelers shouldn't alibi the loss because Oakland didn't complain after last year's title game wide receiver Fred Biletnikov and defensive back Willie Brown couldn't play in a 16-10 loss to Pittsburgh. But Steelers' coach Chuck Noll disagreed.

"I'm sorry we didn't have all the weapons in our arsenal," Noll said. "If we had Franco and Rocky, we would have won the game. As it was, we had to play with our offense at 50 per cent."

"Two great teams played," Madden said. "One great team won, and one great team lost. That's the only way to look at this game."

Blocking the Kick Has Been No. 1 Weapon for Minnesota

By Red Smith

BLOOMINGTON, Minn., Dec. 27 (NYT).—The Minnesota Vikings, the only team in the history of professional football to lose three Super Bowl games, now have a chance to make it four for a record that could stand for years and years. They earned the opportunity on an arctic Sunday afternoon in a most ingenious manner. When their match with the Los Angeles Rams was over, they had been beaten at making first downs, 21 to 13; they trailed in net yards gained, 336 to 267; they had controlled the ball long enough to run 60 plays compared with the Rams' 71; they led on the scoreboard, 24-13, and that margin gave them the championship of the National Football League's National Conference. Their defensive unit did the job with the play that distinguished this truculent troupe all season—the blocked kick.

When their second game of the year, their first with the Rams, went into overtime, Nate Allen, the cornerback, blocked Tom Dempsey's field-goal attempt and preserved a 10-10 tie.

The next Sunday Allen blocked a conversion kick by Detroit, and Minnesota beat the Lions, 10-9. Then Natt Blair, a linebacker, blocked Chicago's try for an extra point in a 20-19 victory over the Bears. Against the New York Giants, Allen ran a blocked punt 28 yards for the first touchdown as the Vikings romped, 24-7.

Block That Kick

Minnesota had blocked 13 kicks coming into yesterday's entertainment, and on the Rams' very first punt Allen was only a breath away from the 14th. He got it on the very next Los Angeles kick, a field-goal attempt by Dempsey from Minnesota's seven-yard line. Bobby Bryant, the other cornerback, fielded the ball and was gone for 90 yards and a touchdown. Then Blair blocked a punt on the Los Angeles 10, setting up a field goal. And finally, with 2 minutes, 28 seconds to play and the Rams threatening a Minnesota lead of 17-13, Bryant intercepted a pass by Pat Haden on the Vikings' 3.

How do these Norsemen bring off these defensive master strokes?

"It's luck," Nate Allen said.

"It comes from working every day. If it takes guts to stick your face in front of a kick, well, these guys have shown character ever since I've been here." (The Vikings got Allen just before the season opened in a trade with San Francisco.)

"It takes 10 men to hold a crazy man down," Allen said, "and I'm the crazy man. I'm the one supposed to go in there. I try to watch how the wing back is blocking and if that doesn't work I study the center. On the field goal, I got a good start and the holder was a little slow putting the ball down. I blocked it with my chest, it bounced right, and Bobby picked it up in stride."

I glanced over my shoulder when I fielded the ball," Bryant said, "and I knew nothing would stop me unless I stumbled or they put a jet in there. I just took off, but I was getting a little tight at the end." Steve Preece was the only punter who got anywhere near Bryant, and he was flattened by Allen.

While the winners told how they did it, Minnesota's Sen. Hubert Humphrey moved through the room pumping hands. For a man recently operated on for cancer in the bladder, he looked great. "I've become a dressing room freak," he said, explaining his presence.

"Ninety-yard runs are fine," a man was saying to Bryant, "but tell us about the pass interception. That may have saved the game."

Coming His way

"I presume you mean the last one," Bryant said. "Both wide receivers came down the middle and my man, Harold Jackson, came down the middle, too. I saw the ball thrown and was able to get to it."

"We weren't supposed to block the kick," Blair said about the punt he swatted off Rusty Jackson's toe. "We were playing for a punt return and I was supposed to hit and come back. But if you've got football instinct, sometimes you get the feeling, 'I'd better go in.' I decided to give it a shot.

"I was held in the line but luckily Jackson dropped the ball and that gave me time to break loose. The ball hit the ground and he picked it up and kicked but by then he had no room."

Out in Oakland, the Pittsburgh Steelers and the Raiders were just starting their match for the American Conference title. Like the other Vikings, Blair insisted he didn't care which of them would oppose Minnesota for the big title.

"The Super Bowl," he said, "is a game between the two best teams in the league. I'm just glad to be on one of them."

Associated Press.

RUSH-HOUR CRUSH—Rams' back Larry McCutcheon is stopped after 10-yard gain in first period by Vikings' Wally Hilgenberg, No. 58, and Amos Martin. Vikings won game.

Black Hawks' Coach Gets 1st Taste of Victory

CHICAGO, Dec. 27 (UPI).—Bill White was savoring his first victory as the Chicago Black Hawks' coach.

"When you're in a slump you try everything," White said, flipping the game puck after the Hawks downed Colorado, 5-3, last night to break a 12-game winless streak. "We played everybody and having Stan Mikita back from his knee injury sure didn't hurt. I planned to use Stan only on power plays and to get important draws, but he skated so well he played the whole game."

White praised the play of goalie Tony Esposito.

"He made some tough saves and played without a backup since Michel Dumas hurt his left eye in practice today and Gilles Villemure was snowbound in New York," said White, a defenseman who has yet to play this season because of a nerve injury.

J.P. Bordeleau scored twice for Chicago and came within a judgment call of a hat trick. Bordeleau tied the score at 6:53 of the second period and tipped in the game-winner with 1:53 left in the period.

Dick Redmond and Alan Daigle scored first-period goals for Chicago while Chuck Arnason scored for Colorado. Stan Mikita, playing for the first time since a Dec. 5 knee injury, assisted on Daigle's goal and scored an empty net goal with 33 seconds left in the contest.

Bordeleau lost his apparent goal late in the third period when referee Charlie Banfield said Bordelean kicked the puck into the net.

"He was wrong, but what can you do? It would have been my first hat trick in the NHL, but I'm satisfied that we won the game," said Bordeleau.

Losing coach John Wilson saw his charges lose their fifth straight game and eighth without a victory since Dec. 3.

"It's tough to keep your club up during a losing streak," he said. "We keep making those monumental errors. We take the lead and then inexperience causes a breakdown in mental discipline. Those dreadful errors will kill you every time."

Sabres 5, Capitals 2

At Buffalo, N.Y., Lee Fogolin and Fred Stanfield scored goals 40 seconds apart to highlight a four-goal second period that gave the Sabres a 5-2 victory over Washington and extend their winning streak to eight.

Bruins 6, Barons 2

At Boston, John Bucyk and Jean Ratelle capped a four-goal spree with late first-period scores 50 seconds apart and the Bruins went on to post a 6-3 victory over Cleveland. Bucyk's goal at 18:21, his 14th of the year and 545th regular-season score, gave the Bruins a 3-1 lead and put the Boston captain into fourth place on the career NHL goal scoring list, ahead of Maurice (Rocket), Richard of Montreal.

Islanders 2, Rangers 1

At New York, Garry Howatt scored a breakaway goal at 7:58 of the third period to give the Islanders a 2-1 victory over the Rangers. Howatt, playing with a special facemask to protect a fractured cheekbone, slipped behind the Rangers' defense and took a pass from defenseman Pat Price that was deflected by the Rangers' Wayne Dillon. Howatt then beat Rangers' goalie Gilles Gratton with a 20-foot shot.

Penguins 4, Maple Leafs 2

At Pittsburgh, Pierre Larouche scored in his sixth straight game to help the Penguins defeat Toronto, 4-2. The Penguins grabbed a 2-0 first-period lead on goals by Jean Pronovost and Dennis Owchar and added third-period power-play goals by Larouche and Rick Kehoe.

50-Point Game by Maravich Heads NBA Jazz Comeback

NEW ORLEANS, Dec. 27 (UPI).—Pete Maravich scored 50 points, 30 in a second-half New Orleans comeback, to pace the Jazz to a 109-100 victory over the Washington Bullets last night in a National Basketball Association game.

Maravich, who hit 23 of 38 from the field, led the Jazz from a 45-28 deficit midway through the second quarter to a 79-79 tie at the end of the third period. He scored 15 points in the third quarter and 15 more in the final period, nine of them in a 15-6 Jazz streak that gave New Orleans a 94-85 lead.

Forward Elvin Hayes scored 30 points through the first three quarters for the Bullets, but he was shut out in the final period. The Bullets pulled to within 98-93 with 3:39 left in the game, but Maravich hit a 25-foot jumper and a layup to help the Jazz pull away.

Celtics 103, Nuggets 101

At Denver, Charlie Scott tied his season-high scoring mark with 31 points, including eight in the final quarter, as Boston took a 103-101 victory before a record Denver crowd of 17,851, ending the Nuggets' 16-game home winning streak. Boston went into the fourth quarter trailing by four points but took advantage of the Nuggets' poorest shooting performance of the season. Denver hit only 13 points in the final quarter.

Sonics 89, Blazers 87

At Seattle, reserves came off the bench to score 37 points in the second quarter to lead the SuperSonics to an 89-87 victory over Portland. Coach Bill Russell went to his bench after the Sonics' starters turned in an embarrassing first-quarter stint, going six minutes without a point and falling behind 24-12.

Ashe Is Beaten In First Round By an Unknown

SYDNEY, Dec. 27 (Reuters).—Former Wimbledon champion Arthur Ashe of the United States was embarrassed and upset by New South Wales youngster Chris Kachel in the first round of the New South Wales Open tennis championships here today.

Kachel, 21, won, 7-5, 7-6.

The Australian trailed Ashe 4-1 in the opening set but bounced back with splendid serving and a succession of superb passing shots. Ashe again built up a 4-1 lead in the second set before slumping to his shock defeat.

"I had been told before the match that Ashe's weakness was his forehand and I just kept plugging away at it," said Kachel.

A disconsolate Ashe said: "I've lost my confidence . . . I haven't played well since June. My form today was terrible."

The sponsors have used Ashe's photograph on all the posters for the tournament—"It's not a very nice feeling . . . your picture is all over the place and you lose in the first round."

Fellow-American Roscoe Tanner was in excellent form in his first grass court tournament since Wimbledon to beat the Australian indoor champion Geoff Masters, 6-4, 6-3 to go into the third round. Australian Ken Rosewall, the No. 4 seed, just sneaked home 3-6, 6-1, 7-5 against young New Zealander Chris Lewis in his first-round match.

In a fiery all-Australian second-round clash, Ray Ruffels beat Kim Warwick 6-3, 6-3. The match finished on a sour note when Warwick hurled his racket in the direction of the umpire after Ruffels had clinched victory on a controversial point.

Braves 103, Cavaliers 96

At Richfield, Ohio, Randy Smith, Adrian Dantley and John Shumate combined for 69 points to lead Buffalo to a 103-96 victory over Cleveland. The Braves, who came into the game with a 3-14 road mark, grabbed a 14-4 lead in the first period and held off a Cleveland drive that saw the Cavs cut the lead to 94-91 with 4:25 left.

A three-point play by Shumate and a jumper by Smith with 3:10 left opened up an eight-point Braves' lead and the Cavs couldn't catch up.

Knicks 103, Hawks 96

At Atlanta, Earl Monroe scored 16 of New York's last 18 points and had an assist on the other basket to spark the Knicks to a 103-98 victory over the Hawks. Atlanta led by four, 89-85, with 5:11 left when Monroe began his scoring streak, hitting the first of his 16 closing points with 4:38 left. Bill Bradley's jumper, on a Monroe assist, was the only other Knick basket in the stretch drive.

Rockets 93, Pacers 79

At Indianapolis, John Johnson and Calvin Murphy combined for 38 points as Houston beat the injured Pacers, 93-79.

Spurs 110, Kings 105

At Omaha, Neb., Larry Kenon's 29 points and 15 rebounds helped San Antonio, which trailed Kansas City by 17 points in the third quarter, to a 110-105 victory.

Kenon scored 18 points in the second half. Allen Bristow added 24 points and Mike Gale had 14 for the Spurs.

Lakers 107, Bucks 99

At Inglewood, Calif., the Lakers rallied for 13 consecutive points in less than four minutes late in the fourth quarter and went on to whip Milwaukee, 107-99, for their 13th consecutive home-court victory.

Reserves Kermit Washington, with 17 points and 17 rebounds, and rookie Earl Tatum, with a career high 16 points, led the Los Angeles comeback, which snapped Milwaukee's winning skein at three games. Washington tallied seven points in the last period while Tatum had seven in the fourth quarter.

WHA Results

Sunday's Games

New England 3, Minnesota 2 (Lyle 2, Callaghan; S. Carlson 2).

Calgary 6, Cincinnati 2 (Sentes, Jodsio, Chipperfield, Morrison, Mayer; Marsh, Carroll, Sobchuk).

San Diego 2, Indianapolis 1 (Shmyr, Pinder; Peacosh).

Birmingham 6, Houston 2 (Napier, Farda, Sheehy, Henderson, Stewart, Marrin; Larway 2).

Quebec 12, Winnipeg 3 (Constantin 3, Cloutier 2, S. Bernier 2, Sutherland, Roy, P. Bordeleau, G. Bordeleau; Hedberg, Nilsson, Ruhnke).

Klammer Tops in Austria

VIENNA, Dec. 27 (AP).—Olympic downhill champion Franz Kammer and downhill silver medal winner Brigitte Totschnig Habersatter were elected as Austrian Athletes of the Year 1976. The result of the poll among 156 Austrian sportswriters was announced today.

Associated Press.

Rams' Tom Dempsey has his first-period fieldgoal attempt blocked by Vikings' Nate Allen, No. 25. The ball bounces over to Bobby Bryant, No. 20, who runs 90 yards to TD.

Not Playing Hurt Most for Injured Steelers Harris, Bleier

...y Leonard Shapiro

...LAND, Calif., Dec. 27 ...A few minutes after the ...m had sounded yesterday, ...sburgh Steeler equipment ...s escorting Franco Harris ...e locker room. "Clear the ...en," he bellowed to anyone ...t in his way. "This man ...

...was painfully obvious to ...who watched Harris's ...t hurt to walk, and then, ...he finally emerged from ...dner's room, he had dif- ...culting up his socks or ...t on his shoes. Franco ...could not bend over. His ...ribs wouldn't allow it.

...for Harris and his run- ...mate Rocky Bleier there ...other kind of hurt. They ...play in a game Oakland ...-7, advancing the Raid- ...to the Super Bowl and ...the Steelers home for the ...their dream of an un- ...uted third straight Super ...championship shattered.

...what hurt most of all. ...is hurt so badly he did not ...talk to anyone. "I have ...to say, okay," he said. ...reporter asked him if he ...he could have played. ..."a lot of people out there ...ndering."

...ess a lot of people won't ...then. All right," Harris ...en walked away.

...cubicles away, Rocky ...was saying openly that yes, ...d have played, despite a ...y sprained big toe that ...ds entire foot hurt, even though he took a shot to ease the pain.

Bleier was willing to risk it, but his coach, Chuck Noll, was not. "Franco could hardly breathe," Noll said, "and Rocky had trouble running. Yes, it was my decision."

"I would have at least liked the opportunity to try," Bleier said, easing his feet into a pair of bedroom slippers. The only shoes he said he felt comfortable wearing. "I don't want to make a big thing about it, or a controversy.

"But as a player, you like to play, and I felt I could. I was ready. I told them I could. It was their decision. He (Noll) asked me before the game, and again at halftime, and I said I was fine.

"Afterward, he (Noll) told Franco and I that 'I didn't want you to take a beating that wasn't necessary and hurt your bodies more.' Yes, of course you appreciate that.

"People in general have an attitude toward professional athletes and particularly professional football players that coaches make them play when they shouldn't. Whatever it takes to get the end result, that kind of thing, that they have no regard for the players.

"It's untrue, especially on this club. They always consider a person first. We were shown that today. All the players have a right to say if they want to play. It's just tough to finish the season this way."

Without Harris and Bleier, both 1,000-yard backs this season, the Steelers were forced out of their normal game-plan, a system that calls for 70 per cent rushes and 30 per cent passes.

Noll also changed the entire offensive around and called all the plays for quarterback Terry Bradshaw.

To compensate for the loss of Harris and Bleier, the Steelers tried a lot of things they had not worked on all year. They used three tight ends at times, three and four wide receivers with a one-back attack. "It was complicated," said Bradshaw. "I didn't think we had that many formations.

"We're not a football team that works using the pass as our offense. They forced us to throw the ball, and that's not the way this team wins football games. We had to do what we did because of what happened to our players.

"I didn't expect those guys to play. Hey, they were hurt. Even Frenchy (Fuqua) was hurt. He sucked it up and then he got hurt again. Why make them suffer like that?

"We did what we could. Maybe if we had another week to work on it, who knows."

Not Dirty Game

The Steelers, to the man, insisted they had not been intimidated by the Raiders, a team they love to hate. There had been a lot of talk about cheap shots and dirty tactics in the pregame buildup, and there were at least four small tussles between the teams as the day wore on.

Some of the Steelers' receivers also had difficulty holding onto the ball. There were at least a half-dozen dropped passes. But Lynn Swann, Pittsburgh's classy wide receiver, insisted the game was played hard and clean.

Swann suffered a concussion in the regular-season meeting of the teams when George Atkinson leveled him with a vicious forearm smash to the back of the head. Atkinson was fined $61,500 after the incident.

"No, it wasn't a dirty game," Swann said. "There was pressure put on both teams by the officials. We were told the officials would be very tough in this game, that if someone took a cheap shot, they would be ejected. The word came down. From where? Hey, there's only one place it could come from—the top."

Swann and Jack Tatum went at each other in the third quarter. Swann said Tatum hit him late after an incomplete pass (the replay bore him out) and that, "I just decided I wasn't going to take too much. So I let him know it. It's only the third time in my career I've ever done that. That's not how I like to play."

Swann said the Raiders' defensive backs were "talking at us quite a bit, but you get a lot of that. What were they saying? Use your imagination. It wasn't G-rated, I can tell you that."

Swann also said he was knocked down by the crowd in the closing seconds after he caught a pass from Terry Bradshaw, and headed toward the endzone. "There was no way I could get there. Yeah, Atkinson was there. I don't know if he was trying to help me or not.

"I think he wanted the game ball but I held onto it and gave it to Neal Colzie. I was trying to get out of there. The fans were kicking and throwing some fists. It was kind of nasty," Swann said.

Waiting to Sweep Up the Gold

LEOPARDSTOWN, Ireland, Dec. 27 (AP).—This could be the day when somebody strikes gold in Grand Canyon.

That's the name of a New Zealand-bred horse that is favorite to win today's Irish Sweeps Hurdle here. It is the last of the year's four races associated with the Irish Sweepstake.

Grand Canyon carries odds of 7 to 2 in the bookies' lists. But Irish Sweepstake ticket-holders who got Grand Canyon in the draw would clean up £75,000 ($123,000) each.

The sweepstake, run for hospital charities, still sells most of its tickets in the United States.

Grand Canyon, trained by Derek Kent and ridden by Ron Barry, has been a clear favorite following fine victories in Britain, France and the United States.

Observer

Plus Ça Change

By Russell Baker

NEW YORK—Jimmy Carter began his shopping early last month. "I want to see something in a nice new face," he said. The clerk smiled and took a gentle yet handsome face from the rack.

"That's not a new face," said Jimmy Carter. "That face has been used."

Baker

"Well," said the clerk, in a bit of a huff, "people of discernment would hardly call Cyrus Vance a used face. Would you refer to a vintage Rolls Royce as a used car?" Jimmy Carter conceded that it was a nice face. The clerk quickly pointed out that it had not been used since the Johnson administration. They weren't making faces like that these days, he said.

Jimmy Carter said perhaps he could get by with one used face but he would need several new ones to go with it. The clerk showed him a thoughtful, reflective face. It was a masterful, slightly detached looking face. Jimmy Carter knew the moment he saw it that this face had to be his.

* * *

The clerk immediately sensed his position of power and in that insolent way of certain clerks in the tonier shops said, "Of course, this is a used face, too, and I wouldn't think of sending you out with two used faces."

Jimmy Carter asked if the face had a name. "James Schlesinger," said the clerk. "In that case," said Jimmy Carter, "I shall be forced to take it. As I already have a used face from the Johnson administration, I will need on from the Nixon administration to show that I do not play favorites."

"Of course," agreed the clerk. "And to maintain complete impartiality, you will want a used face from the Kennedy administration." With that, he produced a studious scholar's face. "Ted Sorensen," he said. "A real collector's item."

Jimmy Carter took it. "Now," said Jimmy Carter, "I need a really new face and no more vintage goods." "Splendid," said the clerk, with an understanding sneer. "I have just the thing for you in a foreign policy face. Brand new." And he went to the rack and took down a black, feminine face.

Jimmy Carter examined it and, as he did, his eye wandered and he saw a brilliant intellectual face with cool piercing eyes which was just being delivered from the warehouse. "I'd like to see that one," Jimmy Carter said.

"Absolutely out of the question," the clerk said. "That is Zbigniew Brzezinski, a face that has been used repeatedly inside and out at the State Department for years."

Jimmy Carter said it was exactly the kind of face he needed for foreign policy and he was going to have it. "Oh, very well," the clerk said. "But what about the brand new black feminine face?"

"I guess I ought to have a face like that somewhere," Jimmy Carter said. "You could always tuck it away in one of the less important departments," the clerk said. "I'll have it wrapped."

* * *

Speaking of the less important departments, Jimmy Carter said, he had promised to clear out the old Washington crowd and bring in exciting new faces to give the government a new look. Was there a new face to be put into one of the less vital agencies so that this pledge could be fulfilled?

The clerk showed him a genial, friendly face. "It is Brock Adams," he said. "Isn't that a used face?" asked Jimmy Carter.

"He's only been a congressman," the clerk said. "Nobody ever remembers having seen a congressman unless he's been mixed up in a scandal."

"Wrap it," Jimmy Carter said, "and show me what you've got in the defense and new-face line."

"You'll love these," said the clerk, producing Joseph Califano and Harold Brown. "They are two of the nicest faces we have ever had, but unfortunately..."

"No 'buts' about it," Jimmy Carter said. "They are just what I'm looking for."

"Used faces," cautioned the clerk. "They go back to the Johnson administration."

"There is no substitute for experience," said Jimmy Carter, walking out with his faces under his arm and looking very much like President Ford, or perhaps President Nixon. Or maybe President Johnson and President Kennedy. Or even a good bit like all of them.

The Musical 'Key' to the Hebrew Bible

By Betty Freudenheim

PARIS (IHT).—A recording of music said to be as old as the Bible has hit the French best-seller category this holiday season. "La Musique de la Bible Révélée" (Music of the Bible Revealed) also has just come out in the United States with a rave in Stereo Review magazine.

Suzanne Haik Vantoura, composer and organist, has written a book with the same title in which she explains how she found the "key" to the small symbols used above and below the lines of the Hebrew Old Testament. "These are not punctuation marks, pauses or syntax as most Jewish scholars believe," she says, "but exact musical notation to accompany the text as it was sung in the court of King David." This is the music which has attracted thousands of Parisian record buyers.

Bernard Gavoty, music critic of the French newspaper Le Figaro, has compared Mrs. Haik Vantoura with Champollion, the French archaeologist who deciphered Egyptian hieroglyphics with the Rosetta Stone. He calls her discovery "fundamental, perhaps one of the most important of this half century."

Jacob Kaplan, grand rabbi of France, says that Mrs. Haik Vantoura has succeeded in her self-appointed task of uncovering "this Hebraic chant which is permeated with piety, profoundly moving, and which awakens a lively religious fervor in our souls."

One American connoisseur said that he found the beauty of the recording the most convincing argument for the authenticity of Mrs. Haik Vantoura's arguments.

'Handicaps'

However Prof. Simha Arom, Israeli musicologist living in Paris, calls this the "bluff of the century." He concedes that her book is remarkably well written and represents an immense amount of hard work. But, he says, she worked with many handicaps:

- She had only a classical Western musical preparation (Paris National Conservatory, where she received top prizes in harmony, fugue and composition).
- She didn't learn Hebrew until adulthood (she was reared in a family where only the boys attended Hebrew school).
- Most important, she didn't consult the experts.

"Her solution has nothing in common with oral Hebrew tradition," contends Prof. Arom, who accepts the traditional explanation of the symbols. "Since the Bible has no punctuation, not even periods, these signs simply explain how it must be read. Musical accompaniment changes from country to country, just as the clothes ornamenting statues of a saint carried in religious processions vary from village to village."

Mrs. Haik Vantoura, a small middle-aged woman with astounding energy, finds it inconceivable that anyone should not accept her discovery. She has written letters to hundreds of musicologists, musicians and composers in both France and Israel. Her box of responses is stuffed. "There is only one there who doesn't agree with me," she claims, "and yet he was among the first to congratulate me on my discovery and to say that my 'efforts deserve great support.'"

Suzanne Haik Vantoura

Tape Recording

In her apartment furnished with a large organ and antique inlaid furniture, she explained over a glass of orange juice, "It's all there in my book, both the historical and musical proofs." Five hundred and ten pages, footnoted and indexed, document her thesis that this 3,000-year-old music has been preserved intact. A tape recording of all the musical selections included in the book, and sung by Mrs. Haik Vantoura, is also available from her publisher, Robert Dumas.

The music of the record, put out by Harmonia Mundi, is sung by a bass, tenor and choir directed by Mrs. Haik Vantoura.

She says that it took her only three or four months to discover that the little marks below the writing represent the notes of a scale. Among the shapes: a diagonal line, a right angle, an upside-down horseshoe, an angular "s". "Years of study were necessary to uncover the significance of the 15 more complex symbols written over the Hebrew," she adds. But the book never precisely relates how she arrived at the exact interpretation of each symbol. "I am a musician, you know," was her answer when asked.

Although she believes that the music was composed in approximately 1000 BC, there is no written example of these symbols before AD 895, when Moise Ben Asher wrote the first Bible using these signs. Three other volumes of the Bible appeared in the 9th and 10th centuries, one by the son of Ben Asher, another by his student and one in Leningrad. The first printed Hebrew Bible was issued in 1536. All bear the same signs which are seen in Hebrew Bibles today.

"I became convinced that the ancients didn't just transmit their music orally, but with simple gestures. The Egyptians and the Greeks used these as well as the Hebrews." She illustrates this point with art from Egypt and Greece, the Roman Empire and Central Asia in which the people portrayed are making gestures with their fingers, very much like the hand language of the deaf. Musicians are also seen in these same ancient paintings and sculpture.

In the book, this author denies that there could have been an evolutionary change during all these centuries.

Constraint

"Sacred music must be preserved in its spirit as well as in its form. Artists couldn't aspire, as do modern musicians, to express themselves in an original way. The finger gestures imposed an indispensable constraint."

These gestures became the written symbols with one hand's gestures showing the notes, the other raised hand, the upper ornamentation.

"There are too many of these symbols to explain them in terms of syntax. Some, which are said to mark punctuation or pauses, are found in the middle of a word. One sign, which is considered to be the major division symbol, is often found two or three times beneath one word. Why, when once would suffice?" she asks.

Some verses have no symbols on top; this indicates the importance of the lower marks which are the notes, she says. Sections which contain no signs at all should be read on a single continuous note. The Ten Commandments contain the greatest quantity of "musical notation." The Psalms have symbols which are not found at all in other parts of the Bible. Mrs. Haik Vantoura says, "They are poetry and therefore have the most beautiful music of all."

PEOPLE: *It's That Time: 2 Men of the Year*

It's man-of-the-year time again. *For Time magazine it's* Jimmy Carter. His rise to the presidency was "one of the most astonishing in the history of the Republic." For Le Point, the French newsmagazine, it's Enrico Berlinguer, Italian Communist party leader. He made his mark by bringing his party "to the threshold of power" in 1976 and, Le Point said, by changing the face of Communism in Western countries.

* * *

Actress Marlene Dietrich observed her birthday Monday in Paris. Her friends say she's 72 and never mind the reference books that give her birthdate as 1901 or 1902. Miss Dietrich was not, however, giving interviews. "If you want to ask me any questions," she told Roland Tyrrell of United Press International, "you should write me a letter and I may answer." But Tyrrell did find out that Miss Dietrich recently gave her butcher a self-portrait with the inscription, "Without you as my butcher, I couldn't be such a good cook."

* * *

Actor Peter Lawford is seeking $2.5 million in damages after an accident on a film set in which his left thigh was cut when a wine glass was thrown at him. The suit was filed in Los Angeles naming Aaron Spelling, producer of the film, "Fantasy Island"—20th Century-Fox and actress Carol Lynley who threw the wine glass. Lawford, 53, said the cut required 22 stitches, put him in the hospital for nine days and aggravated a spinal disk condition which could permanently affect his career. A false glass made of hardened sugar was to have been used in the scene. But, the suit says instead Miss Lynley used a real glass given her by a prop man which shattered and cut Lawford's thigh.

* * *

Cheekwood, the Nashville, Tenn., fine arts center, is buying Andy Warhol's portrait of Jamie Wyeth, as well as Wyeth's of Warhol. Price: $65,000. The two artists are expected to be at a Cheekwood reception in their honor on Jan. 30.

* * *

Playwright and poet Carl Zuckmayer turned 80 Monday in a Swiss hospital where he is recovering from pneumonia. Zuckmayer, author of "The Captain of Koepenick," fled Nazi Germany and became a U.S. citizen, living on a Vermont farm during the war. Since 1958 he has been a

Enrico Berlinguer

resident of Saas-Fee in Switzerland. Among his birthday messages was one from German President Walter Scheel.

MEETING OF THE MINDS—President-elect Jimmy Carter conferring with members-to-be of his incoming administration at St. Simons Island, Ga. From left: Mr. Carter; Vice-President-elect Walter Mondale; an unidentified man; Andrew Young, to be named ambassador to the UN; Robert Bergland, agriculture secretary-designate; Harold Brown, to be appointed defense secretary; Michael Blumenthal, Treasury secretary; James Schlesinger, coordinator of energy policy; Charles Schultze, head of Council of Economic Advisers, and Theodore Sorensen, director of CIA.

To See Brezhnev in 1977

Carter Moves to Act On SALT and Mideast

By Don Oberdorfer and Morton Mintz

WASHINGTON, Dec. 28 (WP).—A series of potential foreign policy initiatives by President-elect Jimmy Carter, involving strategic arms talks with the Soviet Union and meetings with Israeli and Arab leaders about Middle East peace, was disclosed yesterday.

En route to the first of three days of meetings with his cabinet nominees at St. Simons Island, Ga., Mr. Carter said that a meeting with Soviet party leader Leonid Brezhnev is "a likely prospect for 1977," although specific plans have not yet been made.

Amplifying the point in a Time magazine interview released yesterday, the President-elect expressed the hope that a new strategic arms limitation agreement to be negotiated by the United States and Soviet Union by next autumn will advance beyond present limitations and that talks would "lay the groundwork for much more drastic reductions in common nuclear capabilities."

Arms Reduction

Mr. Carter reported that preliminary exchanges between him and Mr. Brezhnev have explored the possibility of reducing the agreed ceiling on strategic offensive weapons below that tentatively approved by President Ford and Mr. Brezhnev at Vladivostok in November, 1974. As he indicated during his campaign, Mr. Carter said that he would like to arrange an actual reduction in the nuclear arms of the two sides, including some destruction of existing weapons.

On the Middle East, Mr. Carter told Time that he believes the first step toward resumption of comprehensive peace negotiations should be meetings between him and Israeli and Arab leaders.

He mentioned Israeli Prime Minister Yitzhak Rabin, Egyptian President Anwar Sadat and Syrian President Hafez al-Assad and said that he contemplates meetings with unidentified "others." After these sessions, the United States may make a public proposal to initiate peace talks, he said.

Mr. Carter expressed uncertainty about the timing, saying that he has not decided whether it would be appropriate to convene exploratory meetings prior to the Israeli national elections, reportedly to be held May 17.

Sense of Momentum

Diplomatic sources said that Mr. Carter's plan to meet Israeli and Arab leaders appears to be his way of seeking a renewed sense of momentum toward a settlement in the region without endorsing the Arab demand for an early return to the Geneva peace conference.

Mr. Rabin, who is facing a likely fight for renomination as prime minister at the convention of the ruling Labor party in February and an election campaign in the spring, is reported to be eager for an early meeting with Mr. Carter to enhance his domestic prestige.

Diplomatic sources believe that it is likely that Mr. Sadat would agree to visit Washington in pursuit of Middle East peace. There is greater doubt about Mr. Assad, who has never visited the United States and who has taken a stiff position in previous Arab-Israeli negotiations.

Tough Cutbacks Threatened

Portugal Democracy Future May Hang on U.S. Loan Soon

By Marvine Howe

LISBON, Dec. 28 (NYT).—If the United States does not deliver a promised $300-million emergency loan next month, Portugal's first constitutional government will have to initiate a politically suicidal program of rationing, forced savings, drastic limits on imports and reductions in social and development spending.

The emergency loan is urgently needed to alleviate this country's balance-of-payments deficit, now running at about $1.2 billion.

Portugal was already Western Europe's poorest country when the military overthrew the right-list dictatorship in April, 1974, and after 2 1/2 years of revolutionary instability, foreign-exchange reserves have fallen substantially and much of the gold is obligated to West European countries for loans.

Premier Mario Soares's five-month-old minority Socialist government has taken a number of firm measures to restore social and economic order, but his program has consistently been fought by the Communists or the parties to the right, and sometimes both.

"We must have the loan support now to stabilize the situation," Mr. Soares said this week.

Request for Help

The initial request for substantial financial assistance was made by former Finance Minister Francisco Salgado Zenha during a visit to Washington last March. The Ford administration was receptive but there were delays, first because of Portuguese elections and later because of the U.S. elections.

Finally, just over a month ago Secretary of State Henry Kissinger told representatives of NATO that the United States was studying a program of "substantially increased economic aid" for Portugal and that Lisbon would be informed of the decision within a week.

The New York Times reported from Washington at that time that the Ford administration had already approved the $300-million emergency loan and would seek congressional approval to join an international consortium to provide an additional $1.5 billion in long-term aid. The emergency loan was to come from the Treasury Department's Exchange Stabilization Fund and thus would not require specific congressional authorization.

Since then, the Portuguese finance minister, the governor of the Bank of Portugal and the U.S. ambassador to Lisbon, Frank Carlucci, have flown to Washington for talks with administration officials.

Talks 'Going On'

But the emergency loan has not been delivered and there has not even been an official announcement on the subject. The U.S. Embassy here declines to comment on the question except to say: "Discussions are still going on."

Washington officials have told the Portuguese that there has been no change of heart. In fact, Treasury officials have all along pushed the concept that in addition to the emergency loan, a large long-term loan by an international consortium, including the United States, was needed to help Portugal make essential structural changes in its economy.

The Portuguese have been informed that the loan is taking longer than expected because the administration is at the height of transition and everyone is cleaning out desks. Also cited as factors in the delay were simultaneous loan requests from Britain, Italy and Mexico—requests that were keeping the Treasury Department extremely busy.

The Portuguese have not complained but they are worried that the assistance may come too late.

Economy Minister Antonio Sousa Gomes, who is currently fighting in the National Assem-

(Continued on Page 2, Col. 8)

Foul Play Puts Chill On Thievery

LONDON, Dec. 28 (Reuters).—When a frail elderly woman fainted in a supermarket here an anxious store manager tried to make her more comfortable by taking off her hat.

Below the hat he found an entire frozen chicken, still bearing the store's price tag.

Harry Shepherd, president of the Oxford Street Traders' Association, said today a doctor later diagnosed the faint as being due to hypothermia—the abrupt lowering of the body's temperature.

New Fighting Reported

Rightists in Lebanon Charge Palestinians Mass in South

BEIRUT, Dec. 28 (NYT).—A reported buildup by Palestinian guerrillas in southern Lebanon is causing concern among right-wing Christians.

According to reports in right-wing newspapers today, the Palestinians have encircled a number of Christian villages on the slopes of Mount Hermon near the border with Israel. The inhabitants of at least one of these villages, Kawkaba, have fled, according to the daily Al Ahrar, organ of the National Liberal party, and Al Amal, organ of the Phalange party.

Al Ahrar quoted reliable sources in the area as saying that as many as 25,000 guerrillas were now stationed in the area, which Israel refers to as Fatahland after the main Palestinian group.

Al Amal accused the guerrillas of "pushing the south back into the danger circle" and Al Ahrar said that tension in the south "is the time-bomb which could explode the entire Lebanese situation."

Christian forces and the Palestinians clashed in the south during the Christmas holiday. Although little information was immediately available, Al Ahrar reported today that the rightist forces in control of the town of Marjeyoun repelled an attack by the guerrillas, killing 100 of them.

Marjeyoun, about eight miles from the Israeli border, fell to the rightists during the last days of the civil war when the guerrillas were fighting the Syrians.

After the Palestinian-Syrian confrontation eased, the guerrillas sent reinforcements to the south. During the last few days, they also moved heavy weapons out of Beirut and the northern port of Tripoli and sent them to bases in the south.

Informed sources said that the reinforcements had tipped the balance of power in the south back to the Palestinians. "This is the basic reason for rightist concern," the sources said.

Fuad Butros, the Lebanese foreign and defense minister, who is expected to visit Damascus tomorrow to discuss the matter with Syrian officials, met here today with Pierre Gemayel, the leader of the Phalange party, Lebanon's principal Christian organization.

Mr. Gemayel said after the meeting that the Lebanese "are not ready to tolerate more aggression by the Palestinians."

Limits for Jews Lifted by Syria

KUWAIT, Dec. 28 (UPI).—The Syrian authorities have lifted travel, employment and property restrictions from the country's Jewish population of 8,000, the newspaper Al Qabas said today.

"Syria's Jewish community can now travel, own property and work freely and enjoy exactly the same privileges as any other Syrian citizen," the newspaper reported from Damascus.

Jews living in Syria had been subjected to a number of restrictions which prevented them from traveling within and outside Syria without special permission.

$906-Million Imbalance

U.S. Trade for November Registers a Record Deficit

WASHINGTON, Dec. 28 (AP).—The United States had a record monthly trade deficit of $906 million in November, the government said today, assuring the second highest annual trade deficit on record.

The previous record monthly deficit was $888 million in August, 1974, and the highest annual deficit was $6.4 billion in 1972.

U.S. trade now has been in deficit for 10 of the first 11 months of the year, and the overall deficit for the year is more than $5 billion.

Part of the November deficit was blamed on a big increase in petroleum imports to beat the increase in oil prices on Jan. 1. Part was also blamed on the slow growth of foreign economies, which reduced demand for U.S. goods.

A drop in exports of food and live animals was largely responsible for a 1-per-cent decline in exports in November to a total of slightly more than $9.6 billion. Imports rose 1 per cent to more than $10.5 billion.

Total food and animal exports were valued at just under $1.2 billion in November, down $309 million from October. Both corn and wheat exports were down sharply, the Commerce Department said.

Among imports in November, petroleum shipments rose $75 million to a total of more than $3 billion, and shipments of transportation equipment rose $135 million to $1.2 billion.

There also was a $71-million increase in clothing imports, to nearly $365 million. A Commerce Department spokesman said increased clothing purchases may have been the result of early ordering by stores for the Christmas season.

Also rising sharply in November were coffee imports, which increased $135 million to a total of $303 million.

The United States had a record trade surplus last year of nearly $10.4 billion and a surplus had been forecast for 1976.

To Be Announced Next Week

Carter Calls Tax Cut Likely In Economic Boost Program

ST. SIMONS ISLAND, Ga., Dec. 28 (AP).—President-elect Jimmy Carter said today that a tax cut is a "likely prospect" for inclusion in a broad program of economic stimulus that he plans to unveil next week.

Speaking with reporters outside his borrowed resort home here, Mr. Carter said that he plans an announcement by the end of next week on the outline of his economic package, including a range of likely price tags for the proposal.

While terming a tax-cut plan a likely prospect, Mr. Carter said that it nevertheless represents "a second priority with me after we make moves to put our people back to work." He said that he is firmly committed to a "work opportunity program."

Mr. Carter arrived here yesterday for a series of meetings with his new cabinet. After his arrival, he conferred for nearly four hours with his key economic advisers. Aides said that the session was held to consider "alternative approaches to job creation, tax reduction and reductions in government waste."

Mr. Carter said that the latest economic indicators had left him "fairly well encouraged" compared to a few weeks ago.

He reiterated that statement after the meeting, saying that he and his advisers also "focused on current economic trends, which seemed slightly more positive than we had earlier expected."

Previously, Mr. Carter had voiced concern that the economy was worse than he had thought during his campaign for the White House.

Mr. Carter said today that next week's announcement probably will include a range of costs for his economic program. But he cautioned that the total amount of stimulus he will favor might remain indefinite "even up to the last minute"—even as Congress considers the package. The total amount, he said, would hinge on whether or not the economy advances further or declines in the interim.

Before holding an informal meeting with all members of his cabinet and appointees of cabinet rank, Mr. Carter conferred with Gov. Hugh Carey of New York and Mayor Abraham Beame of New York City. After that session, he emerged with his visitors to declare: "Bankruptcy for New York City is not a viable alternative... We have eliminated that as a possibility for the future."

At the same time, Mr. Carter announced that Treasury Secretary-designate Michael Blumenthal will serve as his coordinator for efforts to ease the financial plight of New York City and other urban areas.

As the governor and mayor departed, Mr. Carter told them: "We're all partners together. Your constituents are my constituents."

Before the cabinet meeting began, reporters talked with Joseph Califano jr., named to head the Department of Health, Education and Welfare, who said that welfare reform probably will have to wait for significant economic improvement.

"It may be that the realization of substantial welfare reforms is related to a better economy," he said. "So, we've got to have economic growth and more money coming into the federal government."

At the same time, Secretary of Defense-designate Harold Brown said that because of inflation, a reduction in the Pentagon budget may not be achieved next year. "I don't see a reduction in military spending from present levels in constant dollars," he said.

Farm Cooperatives Challenge South Portugal's Communists

BALEISAO, Portugal, Dec. 28 (NYT).—A score of farm workers have without publicity set up an independent, prosperous cooperative here, a few miles outside of Beja, in a direct challege to the Communists who dominate the area.

The Fonte de Frades, or Friars Fountain cooperative, is a pioneer in the movement to form independent farm cooperatives in the southern Alentejo Province, the main Communist stronghold. There are now about 60 such cooperatives in the Beja district, most of which have seceded from the large Communist-controlled state farms in recent months.

"We pulled out of the collective farm because the Communist union was running the show and badly, and we know we can do better on our own," said Jose Fialho da Silvo, a member of the Fonte de Frades cooperative.

The Socialist government of Premier Mario Soares is encouraging the independent cooperatives in an attempt to break the Communist party's hold over Portugal's young land-reform program.

"Portugal has begun its second agrarian reform," said the new Socialist minister of agriculture, Antonio Barreto, in a nationwide address earlier this month. He said that the main task now was to free the Alentejo from its "new landlords, the Communist party and its unions."

Mr. Barreto emphasized that while there have been many positive results under the land reform, it has been carried out hastily and inefficiently, leading to "errors and grave distortions that must be corrected."

The land reform is one of the most important achievements of the 1974 revolution. In southern Portugal, more than 2.25 million acres, mostly in large holdings, have been seized and turned into collectives and cooperatives. The north and center, traditionally small-farm areas, have not been affected.

The Communist party took control of the reform operation at the outset through its powerful farm workers' unions and its sympathizers in the early revolutionary provisional governments. In July, 1975, the Communists pushed through their agrarian-reform law, which legalized most of the land seizures and ruled that a farmer could not own land worth more than 50,000 points, a rating based on type of soil, location and equipment.

But in many cases the law was not respected. Small and medium farms were taken over, often with the support of the Communist unions. And the former landowners were not promised compensation or reserve lands.

When the Socialist party, which won the country's first free legislative elections, formed the government five months ago, Mr. Soares pledged to end the abuses in the agrarian program.

When farm workers objected to the return of illegally occupied lands to the original owners, Mr. Barreto called out troops to enforce the law.

When farm workers refused last week to obey national guardsmen and threatened to invade one of the newly returned properties, five of their leaders were ordered to face trial.

Manuel Alegre, Socialist secretary of information, said in a recent interview that the government's position was that the reform program must be continued, but on different, democratic lines. He said the government planned to hold elections in the Alentejo so that the farmers could decide whether they wanted to stay on the large collective farms, form cooperatives or receive small plots of land.

The Alentejo citizenry voted heavily for the Communists in this month's local elections. The Communists won the Beja and Evora districts with more than 47 per cent of the vote in each area while the Socialist count was 39 per cent in Beja and 34 per cent in Evora.

Mr. Soares commented: "They voted Communist because they were ordered to do so; when they see there's a democratic alternative, they won't vote Communist anymore."

A recent tour of the Evora and Beja districts showed deep divisions and high tension. A struggle is going on, with the main forces in conflict being the big collective estates run by the Communist farm workers' union, the smaller cooperatives and the former landowners who still have hopes of recovering their lands.

Swedish Birth Rate Is Lowest on Record

STOCKHOLM, Dec. 28 (Reuters).—Sweden's birth rate this year was the lowest since records were first kept in 1749 and could portend a decline in the population if maintained over a generation, the Central Bureau of Statistics said today.

The bureau said: "The number of births during 1976 is about 25 per cent below what is needed for a generation to reproduce itself, given current death rates."

United Press International.

In central Greece, a shepherd guides his flock to shelter after heavy snowfalls.

Snow Causes Problems Across Wide Area in Europe

PARIS, Dec. 28 (IHT).—While flurries barely left a white covering on roofs and automobiles in Paris today, much of Europe was struck with a heavy snowfall that derailed trains in western Sweden, closed airports in Denmark and covered wide areas of Greece and Italy.

Some Swedish cities were completely isolated by up to 20 inches of snow. "The traffic situation is just hopeless," said a police official in Vaestervik, 186 miles south of Stockholm. "All roads around the city are blocked; visibility is zero."

Packed snow derailed three trains in western Sweden. There were no injuries, but the railroads were blocked all morning.

In Denmark, the storm caused traffic chaos, ferry delays and closed airports in northern Jutland.

The Swedish Meteorologist Center said that it was Sweden's coldest December in 20 years. The temperature today was 22-31 degrees below zero Fahrenheit (minus 30-35 centigrade) in western and northern Sweden, 14 degrees below the seasonal norm.

Meteorologists predicted that the extreme cold would continue, with more snow, during the next few days.

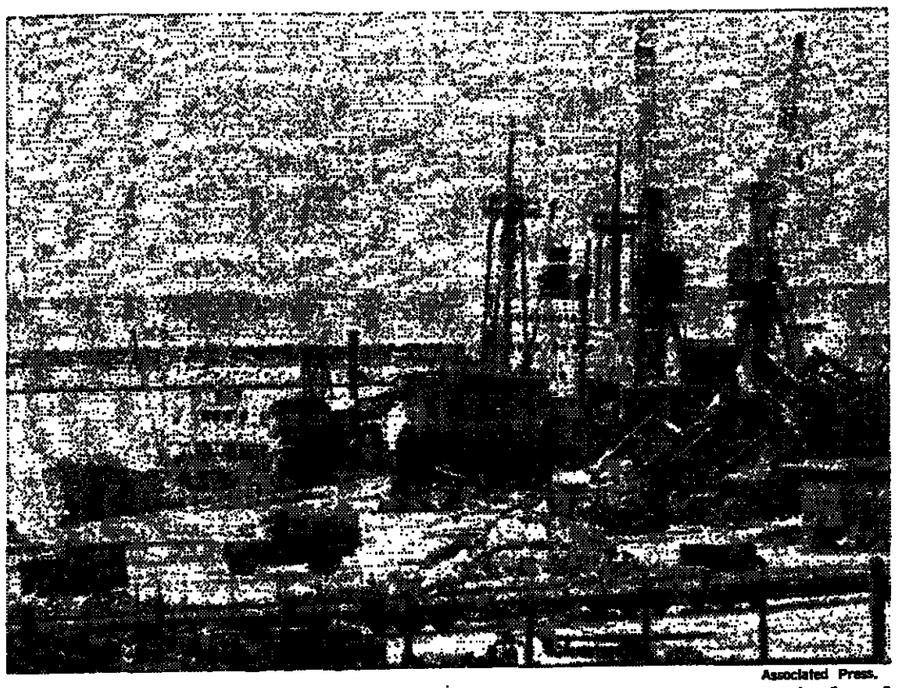
About two inches of snow snarled traffic in Brussels and delayed flights this morning.

Blacks' Toll Rises to 26 At Cape Town

Police Are Reinforced In 2 Townships

CAPE TOWN, Dec. 28 (Reuters).—Police reinforcements moved into Cape Town from Pretoria tonight to help patrol black townships where 26 persons have been killed in continuing violence since the weekend. Thousands have fled the townships.

Most of the bloodshed was caused by fighting between Basa migrant workers from Transkei and residents of the Nyanga and Guguletu townships who supported calls by militant students for a "black Christmas" of racial mourning.



But a news agency, the South African Press Association, said that at least two blacks were killed by police gunfire in the Langa townships during the night after about 500 blacks attacked police vehicles with stones and bottles. The police would not comment.

In Pretoria, meanwhile, it was announced today that Mrs. Winnie Mandela, wife of Nelson Mandela, a jailed nationalist leader, had been among four prisoners released from detention without trial. Another set free was a prize-winning black news photographer, Peter Magubane of the Rand Daily Mail. His pictures of rioting in Johannesburg's black township of Soweto earlier this year were widely published here and abroad.

Mrs. Mandela, generally regarded as the most influential black woman in the country, was released yesterday after four months' detention. She was set free under house arrest, confined to her home in Soweto from 5:30 p.m. to 6 a.m. and prevented from attending gatherings of more than four persons.

The two other prisoners released were Mrs. Oshadi Phataki, a regional director of the anti-apartheid Christian Institution of South Africa, and Mrs. Joyce Seroke, a civil rights campaigner.

More than 80 detainees were released last week in what was seen as a Christmas gesture by Justice Minister James Kruger.

Associated Press.

BACK IN BUSINESS—What were reportedly two of the first ships to enter the harbor of Beirut when it was opened after being closed by civil war unloading cargo at a quay still cluttered with wreckage from the fighting. Two cranes were working the ships.

Dismiss Arab Reports as Propaganda

Israeli Officials Doubt PLO Eases Enmity

By William E. Farrell

JERUSALEM, Dec. 28 (NYT).—Recent reports from various corners of the Arab world that the Palestine Liberation Organization is softening its opposition to Israel's existence are being dismissed by Israeli officials and Foreign Ministry analysts as propaganda that is part of an overall Arab diplomatic strategy to project a more moderate image to the international community.

In the official Israeli view, the Arabs have mounted a drive aimed at convincing other nations, particularly the United States, that in their eagerness for renewed Middle East peace talks they are modifying their intransigence toward Israel.

The reports that the PLO mainstream is moving toward acceptance of a Palestinian state composed of lands captured by Israel during the 1967 war—the West Bank of the Jordan River and Gaza—are interpreted in some quarters as tacit signs of PLO recognition of Israel. But not here, at least not in government circles.

Terrorism a Tactic

Foreign Ministry officials and spokesmen say certain facts have been lost in the recent reports: the Palestinian covenant still calls for the dissolution of Israel; Yassir Arafat, the leader of the PLO, has not renounced terrorism as a tactic, and terrorist groups are still being organized on the West Bank.

According to Prof. Yehoshafat Harkabi, an Israeli expert on the Palestinians and a government adviser, 15 of the 33 articles in the PLO covenant call for the demise of Israel either explicitly or implicitly, and none of these were revised at recent PLO meetings.

Shlomo Avineri, director general of the Foreign Ministry, told a group of students in Beersheba yesterday that "without a basic and fundamental change in the Palestinian covenant, it cannot be expected that this moderation will be regarded, in Israel, as being any more than a tactical move."

Mr. Avineri added that it appeared as if Syria and Egypt were putting strong pressure on PLO leaders to move closer to the Syrian, Egyptian and Saudi Arabian initiative to adopt a more moderate posture, "but so far these efforts have not borne fruit."

Another View

The reports that the PLO is leaning toward acceptance of a West Bank-Gaza state are viewed as hopeful signs by some Israeli doves and leftists, but Israeli officials in policy-making positions see the situation differently.

Foreign Ministry analysts tend to view any Palestinian acceptance of such a state as an interlude in what they regard as the ultimate Palestinian commitment to the dismantling of Israel. These analysts also say that, based on their monitorings of Arab broadcasts, what Palestinians and Arab officials are saying in the West is not what they are telling people in the Arab countries.

Foreign Minister Yigal Allon *of Israel reported* at a Cabinet meeting Sunday that a few days ago a Damascus radio station said that at resumed negotiations, "the Arabs will submit to Israel an invoice that will include not only Jerusalem, Nablus, Gaza, Sinai and the Golan Heights, but Tel Aviv, Haifa, Jaffa and Nazareth."

Mr. Allon told the Cabinet, "Restoration of the rights of the people of Palestine and the liberation of Palestine have one implication—the elimination of Israel."

Protest in Gaza

GAZA, Dec. 28 (UPI).—Security forces dispersed today stone-throwing Arab women who blocked traffic here to protest the status of Arabs in Israeli jails.

It was the second day of demonstrations in sympathy with a hunger strike of prisoners held on terrorist charges at the jail in Ashkelon. The prisoners are demanding better food and treatment as prisoners of war.

Military prosecutors, meanwhile, charged five Arabs with planning to attack targets in Israel.

As the trial opened, the prosecution said the five apparently went astray and landed in a motorboat on a crowded Tel Aviv beach Sept. 27. The Arabs, who pledged not guilty, said they were fleeing a draft of Palestinians in Egypt to serve in the Lebanese civil war.

Clifford Describes Opposition To Truman's Stand on Israel

WASHINGTON, Dec. 28 (AP).—President Harry Truman's chief political adviser confirmed today that the State Department tried in 1948 to subvert Truman's Middle East policy and prevent U.S. recognition of Israel.

Clark Clifford, special counsel to Truman and later secretary of defense under President Lyndon Johnson, said in a speech prepared for the American Historical Association convention:

"President Truman was deeply incensed at what he considered to be the consistent attitude of obstructionism on the part of the State Department to his policy toward Palestine."

The speech was Mr. Clifford's first public statement about the fight within Truman's administration over U.S. policy toward Israel in the years immediately following World War II.

Mr. Clifford's remarks were in answer to charges made then by officials such as Secretary of State George Marshall and others that Truman's pro-Israel stand was politically motivated.

In a meeting between Truman and Marshall in May, 1948—described in a volume of historical materials released by the State Department last month—Marshall told the president that if he recognized Israel it would be only for domestic political reasons and that he would have to vote against Truman in the election that autumn.

(It was generally known that the State Department opposed recognition of Israel on the ground that such a step would alienate the Arabs. The volume shows how Truman first went along with that view and then changed his mind.)

Subterfuge and Deception

Mr. Clifford presented claims of subterfuge, deception and omission by elements in the State Department during that time.

At the same time, Mr. Clifford said, State Department officials prepared a plan to strip Israel of large sections of land as Truman was promising Zionist leaders his full support for the boundaries laid out in a United Nations plan. When Truman found out, he was outraged, Mr. Clifford said, saying that the State Department plan was little more than a territorial ghetto.

Mr. Clifford intimated that the State Department was under the heavy influence of Britain, which controlled Palestine in 1948, and was traditionally biased toward the Arabs.

New Constitution Of Albania Bars Foreign Capital

VIENNA, Dec. 28 (Reuters).—Albanian leader Enver Hoxha, underlining his country's isolationism, has presented it with a new Constitution barring foreign troops from its soil and prohibiting joint-venture deals with capitalist or Soviet-bloc states.

A speech to parliament, as reported by the Albanian news agency ATA, did not mention Albania's sole ally, China, with which relations have cooled since the death of Mao Tse-tung last September.

He made sharp attacks against the Soviet Union, and said the Constitution forbade Albanians to ask for foreign intervention. He said this was to deprive potential aggressors of an excuse to invade.

Last month Mr Hoxha accused eight former senior officials of plotting with foreign enemies to liquidate Albania's independence.

He said the Constitution barred "all concessions, establishment of companies and other foreign economic and financial institutions, or mixed enterprises with monopolies, capitalist, bourgeois and revisionist states."

Thai Says Russia Has Built Missile Silos High in Laos

BANGKOK, Dec. 28 (AP).—A top Thai foreign policy expert says that intelligence reports show that the Soviet Union has built missile silos in the "high mountain area" of Laos. He says that the silos could be used to direct missiles against either China or Thailand.

The expert, Thanat Khoman, gave few details during a television talk yesterday and he did not indicate if any missiles had been installed in the silos. He cited "some intelligence reports" as also showing that the Russians have "many military facilities in the highlands of Laos."

Mr. Thanat is a former foreign minister and head of the Thai National Assembly's Foreign Relations Committee.

Pentagon and State Department spokesmen in Washington said that they knew nothing about any Soviet missile silos in Laos. They said that they would have no comment about the reports.

Rumors about Soviet missile facilities in Laos have circulated in Bangkok since last December, when Communists took over the country.

The rumors have been impossible to confirm. Some Western analysts here have been skeptical, saying that large-scale Soviet military involvement in Laos could lead to a confrontation with China.

Ramgoolam Forms Mauritius Coalition

PORT LOUIS, Mauritius, Dec. 28 (AP).—Sir Seewoosagur Ramgoolam, Mauritius's only Prime Minister since this Indian Ocean island gained independence from Britain in 1968, yesterday announced a new political alliance to enable him to stay in power.

Sir Seewoosagur, 76, told a news conference his moderate Labor party intends to form a new government with the backing of the rightist Social Democratic party (PMSD).

1956 Speech Is Used

Regenerated Mao Talk Seen Key to Hua Aims

By Jay Mathews

HONG KONG, Dec. 28 (WP).—By releasing a speech from its trove of unpublished Mao-Tse-tung works, the new Peking administration of Chairman Hua Kuo-feng appears to be trying to take China back to the quieter days of the mid-1950s.

The April 25, 1956, speech entitled "On the 10 major relationships" was distributed this week under red headlines in the People's Daily and was identified by Chinese leaders as a crucial subject for study.

It seems to make clear Mr. Hua's intention to return to the days of steady economic progress before Mao tied to communize the country overnight in the Great Leap Forward of the mid-1950s, and before the mass purges of the Cultural Revolution and the last few months since Mao's death.

The speech is perhaps the key document in Mr. Hua's effort to curtail Maoism while honoring Mao. It regenerates the Mao of 20 years ago, who supported wage increases and the use of Western technology, policies that the Chairman—or at least his closest disciples—turned against in the last years of his life.

Also importantly for China's current political crisis, the speech contains a lengthy section proposing clemency for counterrevolutionaries and Communist officials who have made mistakes.

Debate on Punishment

Mr. Hua appears to be in the middle of a debate over how harshly to punish followers of Mao's disgraced widow, Chiang Ching, and other leading radicals purged in October.

The official media have been sending conflicting signals to provincial officials now hunting down Mrs. Chiang's allies. In what the New China News Agency called an "important speech" Saturday night, Mr. Hua emphasized the need to "strengthen the party's unified leadership," a sign that the dispute over punishment of wrongdoers and other issues is continuing.

Although delivered 20 years ago to a meeting of the Communist party Politburo, the Mao speech—which was leaked to the West in an unauthorized Red Guard version in 1969—raised a number of issues that are still very much alive in China. A note attached to the end of the speech by the New China News Agency indicates that it *is intended to have* more than just historical interest.

Mao "set forth basic ideas about the general line of building Socialism with greater, faster, better and more economical results, a line suited to the conditions of our country," the note said.

Economic Priorities

In his speech, Mao proposed a cut in military and administrative spending, saying, "Only with the faster growth of economic construction can there be more progress in defense construction." That may in part be an answer to China's ascendant army chiefs who are pushing for more funds.

Mao proposed in his speech the trimming of bureaucrats and allowing local government offices and factories some leeway to make decisions on local matters. Because of threats from imperialists and counterrevolutionaries, the "dictatorship of the proletariat cannot but be highly coercive," but democratic non-Communist parties in China ought to be allowed to continue to function, Mao said.

He noted with approval that wages at the time of his speech had just gone up. Chinese workers have been complaining in recent years of the lack of any further general increase since the mid-1950s, and Mr. Hua is believed to be sympathetic to them.

As for counterrevolutionaries, Mao said that if someone "should throw a bomb into this building" he ought to be executed, but bad elements in the party or government following wrong policies should not be killed—a statement that appears to apply now to Mrs. Chiang and her followers.

The full text of Mr. Hua's speech Saturday has not yet been released, although the news agency report on it revealed few surprises.

Mr. Hua did say, for the first time, that the purge of Mrs. Chiang and her cohorts occurred "without firing a single shot or shedding a drop of blood." There had been reports that a nephew of Mao allied with Mrs. Chiang and some security guards had been killed.

The report of Mr. Hua's speech also countered rumors of political troubles for Peking Mayor Wu Teh. Mr. Wu appeared at the meeting, listed in his usual place in the hierarchy.

Before Court Rules on Jailed Communist

Madrid Reply to Carrillo Appeal Is Awaited

MADRID, Dec. 28 (UPI).—Despite new optimism today that jailed Communist party secretary-general Santiago Carrillo would be granted provisional freedom, government sources said that judicial procedures would put off the possibility for at least one day and probably more.

Mr. Carrillo, 62, yesterday appealed charges against him of illegal association, arguing that Spanish Communists are independent of Moscow and want democracy.

Today there were new reports of imminent freedom for Mr. Carrillo and the seven other Communist leaders arrested with him. But the sources pointed out that once an indictment is appealed, the prosecution has 48 hours in which to file a reply to the appeal.

The Public Order Court, a tribunal founded in the Franco era, will then make its ruling.

With Mr. Carrillo and his stand-in, Simon Sanchez Montero, both in Carabanchel Prison, the Communist seat on the opposition "Commission of Nine" negotiating team was occupied tonight by Jose Sandoval, a member of the party's executive committee.

The democratic opposition chose the nine-member commission to negotiate with Premier Adolfo Suarez's government a widening of democratic freedoms and regulations for the 1977 elections.

At tonight's meeting, its third, the commission was to get a report from Socialist leader *Enrique Tierno Galvan and* Catalan Social Democrat Jordi Jujol on their meeting with Mr. Suarez last week, when they formally requested negotiations.

According to government officials, Mr. Suarez has refused to negotiate directly with Communists.

In an editorial, the liberal newspaper El Pais said that while the participation of the Communist representative in the negotiations is completely justified, the Communists should not insist on forcing the point when democratization of the country is at stake.

In the latest development in a shake-up of law-and-order commanders, the new chief of the paramilitary Civil Guards, Lt. Gen. Antonio Ibanez Freire, officially took over his post in ceremonies attended by the vice premier for military affairs and the interior minister.

Gen. Freire *said in a speech:* "We must keep ourselves solidly united in discipline which makes us immune to any attempt at division." He promised to act energetically against attacks against discipline.

Seoul Lifts News Ban, Tells Nation of U.S. Bribe Scandal

SEOUL, Dec. 28 (NYT).—The South Korean government for the first time gave full disclosure today to the U.S. congressional bribery scandal in which many of its agents are said to have been involved. A formal government report on the case was submitted to the National Assembly this morning.

In briefing the Korean legislators, Premier Choi Kyu Hah repeated his earlier position that the government here is in no way linked with Tongsun Park, Mr. Park, a Korean businessman based in Washington, is said to have been a conduit for up to $1 million in bribes and gifts given to U.S. congressmen each year.

The government said that since Mr. Park, now in London, is a resident of the United States, he could be punished, if found guilty, under American laws. The report gave a strong impression that the government here would not give him legal assistance or back him with diplomatic initiatives.

The Premier said that much of the U.S. reports linking the scandal with President Park Chung Hee have been distorted and misleading. He said that no meetings had taken place at President Park's official mansion to discuss the bribery scheme against U.S. congressmen.

At the same time, a Foreign Ministry statement said that negotiations were still under way to interview a top Korean agent who has defected to the FBI. Charging that Kim Sang Keun, the agent, has been held against his will, representatives of the Korean Embassy in Washington have sought to see and talk to *him inside their office. This pro*posal has been rejected by the State Department.

In a related case, the Premier's statement said that South Korea was closing the book on controversial reports of U.S. bugging of the official mansion of President Park. It said the government has decided to accept U.S. assurances that such bugging had never taken place.

The U.S. reports have indicated that much of the information allegedly linking President Park to the scandal was collected from electronic eavesdropping against Mr. Park's Blue House by U.S. intelligence agents.

Nearly four months after the scandal reports were first published in Washington, the South Korean press was today permitted for the first time to report on the case.

All Korean papers gave the story banner headlines.

U.S. Loan Key In Portugal

(Continued from Page 1)

bly to defend the 1977 development plan, said today that if the emergency loan did not arrive next month, the government would be forced to take highly unpopular and economically disruptive measures.

Various Measures

He listed some of the measures in an interview: the sale of gold, the rationing of food and petroleum products (Portugal imports all of its oil and half of its food), cutting of general imports, a curtailment of remittances as well as a major reduction of public investments planned for housing, social welfare and the creation of new jobs.

Mr. Soares has warned repeatedly that Portugal's young democracy is dependent on economic recovery.

It is widely agreed that if the Socialist government fails, there is no viable democratic alternative and the way would be open to the creation of an authoritarian regime, either Communist or of the right.

Carter Plans SALT Review

(Continued from Page 1)

Jordan's King Hussein, are among the other Middle Eastern leaders who would have an important role in a comprehensive settlement. Representatives of Palestinian groups—including the Palestine Liberation Organization, which the United States has refused to deal with so far—would also play a major role in any settlement.

Mr. Carter's relations with the Arab world are likely to be *affected by his attitude and that* of Congress regarding legislation aimed at blocking U.S. participation in the Arab boycott of Israel. A strong anti-boycott measure passed both House and Senate in the past session, but was stopped short of final passage at the urging of Ford administration officials concerned about U.S.-Arab relations.

Mr. Carter sharply criticized Mr. Ford and attacked the Arab boycott in strong terms during the campaign. He repeated his attack on Dec. 16 in a message to the American Jewish Congress, declaring that "there is no room in the international area" for "foreign discrimination" against Americans "on grounds of their race, their religion or the countries with which they trade."

Rhodesia Will Try Swiss Missionary

IMMENSEE, Switzerland, Dec. 28 (Reuters).—A Swiss missionary priest, the Rev. Paul Egli, has been freed from preventive detention in Rhodesia and told he will face trial Jan. 10 on charges of aiding guerrillas, his missionary society said here.

Father Egli a member of the Roman Catholic Bethlehem Fathers, also faces charges of failing to report the presence of guerrillas, the Swiss-based society told a press conference at its headquarters here.

The society, which has 120 missionaries in Rhodesia, said Father Egli had been told to stay in the town of Gwelo, after being held in preventive detention for 30 days, and has also been forbidden to contact his parish. When he appears in court at Fort Victoria, he will be charged with 10 offenses under Rhodesia's security laws.

Roof Kills 7 in Karachi

KARACHI, Dec. 28 (AP).—Seven persons were crushed to death and 10 injured when the roof of a three-story building here collapsed.

Examination Flushes Out Toilet Device

NORTH SMITHFIELD, R.I., Dec. 28 (AP).—After a year of looking into the backs of toilets, Nicholas Ludovici has found what he has been looking for.

Mr. Ludovici has filed for a patent on a device which he claims can save two gallons of water every time a toilet is flushed—a saving of about 40 per cent.

Such a saving could amount to billions of gallons of water each year, thereby lessening the pressure on water resources, he said yesterday.

The device, he said, is made of a rubberized compound and forms a protective collar around the outlet of the toilet, creating a dam that prevents some of the water from flowing out.

HARRY'S N.Y. BAR ®

New Malta President

VALLETTA, Dec. 28 (UPI).—The Maltese Parliament today elected Anton Buttigieg, 68, a poet, lawyer and politician, as the island nation's second President, succeeding Sir Anthony Mamo, who retired Saturday.

Light Quakes Shake Italy, Yugoslavia

ANCONA, Italy, Dec. 28 (UPI).—A predawn earth tremor struck east-central Italy today, causing residents to flee their homes in panic but resulting in no damage or injuries, officials said.

Yesterday, a medium-strength quake shook the Mostar area of Yugoslavia, 200 miles east of Ancona across the Adriatic, causing damage to buildings. No casualties were reported.

Bilandic Chosen To Be Temporary Mayor of Chicago

CHICAGO, Dec. 28 (AP).—Michael Bilandic, a lawyer who is little known but has considerable influence at City Hall, was chosen temporary mayor today to succeed the late Richard Daley.

Mr. Bilandic, alderman of Mr. Daley's 11th Ward, was elected with only token resistance at a special City Council meeting, in accordance with a deal worked out in the wheeling and dealing that has gone on among the city's Democratic leaders since Mr. Daley, 74, died of a heart attack Dec. 20.

Mr. Bilandic's election was assured after black Alderman Wilson Frost, president pro-tempore of the council, withdrew from contention. Mr. Frost, who had the support of a broad coalition of black community and political leaders, was rewarded with the chairmanship of the Finance Committee, considered the second most powerful post in city government.

Mr. Bilandic was nominated by Alderman Edward Vrdolyak, a leader of younger regular Democrats. The candidate was praised by Vito Marzullo, an old-line close ally of both Mr. Daley and Mr. Bilandic, and by other regulars.

Mr. Bilandic has said he will not be a candidate in a special election to fill the 2 1/2 years left in Mr. Daley's term. That election must be held within six months.

6 Hurt at Indonesia Mass

MEDAN, Indonesia, Dec. 28 (Reuters).—Hand grenades were thrown into a Roman Catholic church during a Christmas Day mass, wounding eight persons, police at this north Sumatran capital said.

North Korea Names New Chief Policeman

TOKYO, Dec. 28 (UPI).—Li Jin Su, a veteran police official and prosecutor, has been named North Korea's procurator-general, making him the country's top law enforcement officia, Pyongyang radio said in a broadcast heard in Tokyo.

Mr. Li replaces Chong Dong Chol, who was "released so he could perform other duties," Pyongyang radio said. The nature of Mr. Chong's new assignment was not disclosed. He had been serving as procurator-general at least since December, 1973.

Dassault Said to Seek Suit Against Le Point

PARIS, Dec. 28 (Reuters).—French aviation industrialist Marcel Dassault has decided to sue the weekly newsmagazine Le Point for 100 million francs (about $20 million) in libel damages, the French radio reported last night.

The action concerned a series of articles about former Dassault accountant Hervé de Vathaire who has alleged that Mr. Dassault, 84, and his companies were involved in major tax frauds.

Hordes of Rats Consuming Rice Crop in Venezue

CALABOZO, Venezuela, Dec. (NYT).—Ravenous field rats are consuming as much of this year's Venezuelan rice crop as will reach the tables of consumers according to farmers here.

The assault by the hordes of rats in the rice fields below the Guarico Reservoir, which normally produce half of the Venezuelan supply, has been called a national calamity. The rats, their weight in rice each day.

The losses have forced Venezuela to import 86,000 metric tons of rice, adding to food imports that include sugar, wheat, sorghum and oil seeds. During 1975, Venezuela was a rice exporter.

No one is quite sure why the rats have appeared in such numbers. The farmers are using poison, which is killing 10,000 rats a week on some farms. They also are putting up plastic fences around the fields. Some pest control experts have proposed that sterilization pills be used to control the birth rate of the rats.

But this could be dangerous. The poison is already killing a lot of hawks, foxes and snakes that are the natural predators of the rats. Sterilization could also kill off the natural predators and affect the public, it is said.

8. Your good news.

Ford Rejects Atlantic Air Route Shifts

Cites Foreign Policy in Refusing CAB

WASHINGTON, Dec. 28 (UPI). —Citing "foreign policy reasons," President Ford has rejected a Civil Aeronautics Board decision making changes in the overseas routes of major U.S. airlines.

Mr. Ford's disapproval of the changes in overseas flights came in a letter dated Dec. 24 and released today by the CAB, which said it had "no comment at this time."

The President approved another CAB decision extending the authority of supplementary airlines to provide charter and cargo services to new foreign points.

Mr. Ford said that he was returning the board's decision in the so-called transatlantic route proceeding because some foreign governments "are presently dissatisfied" with bilateral agreements governing international air travel.

The CAB decision, designed in large part to help restore the profitability of Pan American World Airways and Trans World Airlines, would have provided flights to Europe from many U.S. cities that now lack direct overseas service.

New Decision

In his letter, Mr. Ford said that the CAB should come up with a new decision by Sept. 1 of next year that would be more acceptable to other nations.

The board, he said, should come up with a transatlantic route system that "will best serve the long-term interests of the public, the financial strength and competitiveness of our private United States flag carriers, and overall United States international aviation policy."

He said that it was "particularly important" that U.S. flag carriers "be viable, their routes be economic."

Pan Am and TWA have suffered heavy deficits in recent years.

Mr. Ford said that the board should come up with a decision dealing with "the need for service" to Japan, Australia and New Zealand.

The CAB is not likely to hold new hearings until after President-elect Jimmy Carter takes office next month. It could, if it wished, submit the original decision to Mr. Carter without changes.

U.S. May Resume Swine-Flu Shots For Elderly, Ill

WASHINGTON, Dec. 28 (WP). —There is a chance that swine-flu inoculations will be resumed for "at least" the elderly and the chronically ill, the persons at highest risk if flu strikes, Dr. Theodore Cooper, the U.S. government's top physician, said yesterday.

He has asked the government's Advisory Panel on Immunization —the group that first recommended national swine-flu vaccination and also agreed to its suspension—to consider restarting the program.

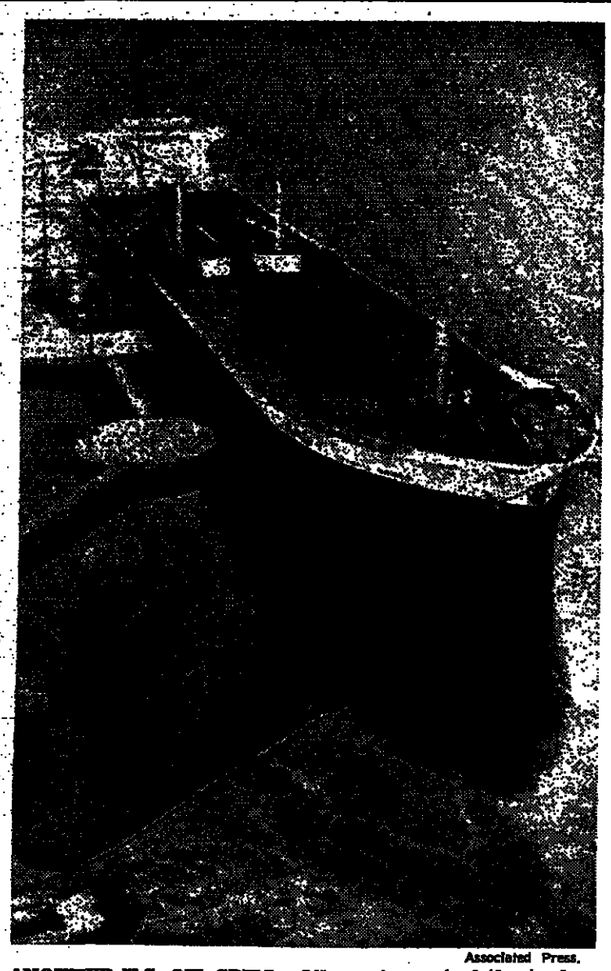
At a tomorrow the group will weigh the evidence that led to the Dec. 16 suspension—a concentration of cases of sometimes paralytic Guillain-Barre disease in persons who had been vaccinated.

"We still don't know whether or not there is a connection between the vaccine and Guillain-Barre," Dr. Cooper said in an interview.

"It is true that there are more cases in the vaccinated than in the nonvaccinated, but it's also true that the reporting of cases was probably been more reliable in the vaccinated.

"At any rate, there is no real indication that there are any more Guillain-Barre cases in persons over 65. The heaviest concentration is still in persons from 25 to 64 years old. And we're heading into the season where there's more chance of influenza, which always hits the elderly hardest."

Firestone Urged To Sue Ex-Aide



WASHINGTON, Dec. 28 (AP). —The Firestone Tire and Rubber Co. is being urged to take legal action to recover from its former chief financial officer part of a $1.6-million fund used for illegal or questionable political payments.

The recommendation by a special audit committee followed an examination of company records. The committee report said the special fund was controlled by Robert Beasley, who resigned as Firestone's chief financial officer earlier this year.

The special audit was conducted as part of a settlement of a civil suit brought in June against the company, Mr. Beasley and former board chairman Raymond Firestone by the Securities and Exchange Commission. It disclosed that about $625,000 remained unaccounted for, adding that the monies apparently went through Beasley-controlled accounts.

Drug Plot Beaten

ANTWERP, Belgium, Dec. 28 (Reuters).—Seven Africans have been charged with trying to smuggle nearly 500 kilos of hashish into Belgium inside tom-toms, police here said. The drugs are worth about 7 million Belgian francs ($180,860).

Associated Press.

ANOTHER U.S. OIL SPILL.—Oil pouring out of the tanker Olympic Games, moored at Marcus Hook, Pa., has left a 20-mile stain in the Delaware River south of Philadelphia.

Captain of Sunken Oil Tanker Blames Faulty Gyrocompass

By William Claiborne

NEW YORK, Dec. 28 (WP).—The captain of the sunken tanker Argo Merchant, which spilled 7.6 million gallons of oil off the New England coast, said yesterday that his gyrocompass was awry and that he had not obtained an accurate celestial fix on his position for 15 hours before he went aground on Dec. 15.

George Papadopoulos, the Greek master of the Liberian flag ship, said that he was steering the vessel by a relatively primitive magnetic compass when it grounded and subsequently foundered in heavy seas on shoals 27 miles southeast of Nantucket Island.

Mr. Papadopoulos said that sextant sightings had been taken a half four before the grounding, but that because of the darkness at that hour, he "had no trust in them." The ship's last accurate solar fix, he said, was made at 2:30 p.m. the day before the wreck.

The Argo Merchant, he testified, was not equipped with long-range electronic navigation equipment.

Mr. Papadopoulos's testimony was taken in a deposition at U.S. District Court here in connection with a counter lawsuit filed by the owners of the Argo Merchant, the Thebes Shipping Co., seeking to limit its liability in the accident—the worst oil spill off U.S. coasts.

$68-Million Suit

The shipowners and its principal officers are being sued for $60 million by a coalition of Cape Cod fishermen, who claim that the spill resulted from negligence. Civil actions have also been filed by the Northeast Petroleum Co., purchasers of the oil cargo that was bound from Venezuela to Massachusetts, and by a collective of fishermen of George Bank, off the Massachusetts coastline.

At the hearing, Mr. Papadopoulos said that his crew took sextant sightings at 5:30 a.m. the day of the grounding, but that he had doubts about the accuracy of the reading and decided to wait until it was lighter. The ship ran aground at 6 a.m., he said.

When asked whether the grounding could be attributed to the faulty gyroscope, Mr. Papadopoulos replied, "Yes, that's possible. It probably was."

No Criminal Charges

Stephen Rosenfeld, assistant Massachusetts attorney general, said yesterday that his state is considering filing a lawsuit against the shipping company, but that his office has no plans of filing criminal charges.

Mr. Rosenfeld said that a Massachusetts lawsuit, if filed, may seek damages as high as $200 million.

Under the U.S. Water Pollution Act, the Thebes Shipping Co. is liable for cleaning costs of $100 per metric ton up to a limit of $14 million. However, the ceiling may be lifted if negligence is proven.

The oil slick was pushed to within 19 miles of Nantucket Sunday by a southerly wind, but an abrupt change in wind directions pushed it back out to sea where it remained, according to the Coast Guard.

UPI.

Capt. George Papadopoulos

Spill in River

GLOUSTER CITY, N.J., Dec. 28 (AP).—The grounding yesterday of the Liberian tanker Olympic Games during a docking maneuver on the Pennsylvania side of the Delaware River has created a 20-mile oil slick which could soil some beaches and harm wildlife, the Coast Guard said today.

Kenneth Wyman, Coast Guard captain of the port of Philadelphia, said that creeks on both the New Jersey and Pennsylvania sides of the river have been rimmed with booms to protect them against the 134,000-gallon crude-oil spill.

886th Cosmos Aloft

MOSCOW, Dec. 28 (UPI).—The Soviet Union yesterday launched the 886th satellite in its Cosmos series, according to Tass.

'Top Priority' Probe Stirred By Killing of Bald Eagle in U.S.

By Robert D. McFadden

NEW YORK, Dec. 28 (NYT).—An American bald eagle with an 84-inch wingspan, one of possibly fewer than 100 of its species in the Northeast, was shot and killed on a rural byway on Long Island two weeks ago, the U.S. Fish and Wildlife Service reported yesterday.

The eagle, a representative of an endangered species that has been the nation's symbol for nearly 200 years, was slain on Dec. 13 on a farm east of Watermill, N.Y., near Bridgehampton, by two men with a shotgun who left their prey and fled in a car when spotted.

The Interior Department's Wildlife Service and the National Wildlife Federation posted rewards of up to $3,000 for information leading to the slayers' arrest and conviction.

The killing of a bald or golden eagle is punishable by up to a year's imprisonment and a fine of up to $5,000.

Dennis Crouch, special agent in the Wildlife Service office at Lawrence, N.Y., which is investigating the incident, said, "This is a top priority case. Anybody who can furnish any information—no matter how slight—we'd appreciate it very much."

There are probably fewer than 250 nesting pairs of bald eagles in the United States, Mr. Crouch said, noting that nesting pairs rather than actual numbers are statistically more important in terms of survival.

Soviet Bloc A Tough Sell For U.S. Firms

Long and Expensive Negotiations Required

By Paul Hofmann

VIENNA, Dec. 28 (NYT).—Every working day, some American gets in touch with the U.S. Embassy here to ask what the prospects are for doing business in Eastern Europe.

Some of the callers are old-timers who want to compare notes with the East-West trade information service of the embassy. Others would like to make money in the Soviet bloc but do not know how to go about it.

Embassy officials and private experts and consultants tell those interested in East-West exchanges that they must be prepared—and have the resources—to conduct negotiations with Communist bureaucrats for years.

That usually requires numerous visits to official buildings in Warsaw, Prague, Bucharest and other East European capitals. It requires infinite patience and the capacity for innumerable cups of coffee and glasses of vodka, barack, slivovitz or some other brandy.

Business Slowed

The euphoria with which the opportunities of East-West trade were viewed only a few years ago has considerably abated. Recession and inflation in the West, internal economic difficulties in the countries of the Soviet bloc, the world energy crunch, bad harvests and other factors have slowed business between Communists and capitalists.

Experts on East-West trade here insist that to have success "you need staying power." For a newcomer, as a rule of thumb, it takes at least two years to clinch a first substantial deal.

Frequent personal contacts with key officials of the foreign trade banks and other state agencies in East European countries are indispensable. Continual market research, participation in Soviet-bloc industrial and trade fairs, good lawyers and a strong credit line also are necessary.

Right now, East-West transactions are hampered by the mounting foreign indebtedness of Communist countries, which makes it more difficult, and more costly, for them to obtain further hard-currency loans.

Still Interested

But the East-West trade coordinator of the Chase Manhattan Bank in Vienna, Alfred Apponyi, said in a recent interview: "We continue to be interested in credits for Eastern Europe if they meet our criteria. They must be negotiated in direct talks between the foreign trade banks in Eastern Europe and Chase. We prefer project credits—as distinct from less specifically defined financing credits—with the possibility for us to examine projects through our own experts as to technical feasibility and economic viability."

Some Soviet-bloc countries, Poland for instance, now agree to having foreign experts make on-site inspections of projects for which Western financing has been requested.

The Vienna affiliate of Chase Manhattan is one of more than 100 U.S. or U.S.-related organizations with offices in Vienna that are active in East-West trade.

They range in size from the regional office of International Business Machines, with a staff of more than 200 persons, to desk-space operations.

Bureaucratic Hurdles

A leading consultant said: "I advise American companies not to go into Eastern markets just because last year's sales figures were bad and they feel they have to drum up new business. Eastern markets and contacts have to be developed over years. Eventually, when you have taken all the bureaucratic hurdles, be sure to write a strong, good contract. This needs expensive legal expertise. The small guy just hasn't a chance."

All deals must be cleared by the foreign trade agency of the Communist government, and usually also by such bureaucratic citadels as the council of ministers, the state planning committee and the ministries of technology, finance and foreign trade.

It helps if a proposed sale is for a high-priority project that is featured in the current five-year plan of the prospective buyer's country.

Sen. Taft Acts to Give Successor Advantage

CINCINNATI, Dec. 28 (AP).—Sen. Robert Taft jr., R-Ohio, said today that he is leaving the Senate ahead of time in hopes that an early appointment of Democrat Howard Metzenbaum will give Ohio a possible advantage in committee appointments.

Sen. Taft, who was defeated by Mr. Metzenbaum after serving one term, said he intends to leave the Senate at the close of business today rather than wait until Jan. 3, when his term would normally end. He said he has asked Ohio's Gov. James Rhodes to appoint Mr. Metzenbaum immediately, although Senate Democrats have indicated that seniority will not be the only criteria for preferred committee appointments.

In Selecting the Cabinet

Mondale, as Promised, Serves As Major Adviser to Carter

By Leslie H. Gelb

WASHINGTON, Dec. 28 (NYT) —From all indications, Sen. Walter Mondale has had an important impact on the selection of President-elect Jimmy Carter's cabinet, and if that pattern continues he may become the most influential Vice-President in the history of the modern presidency.

Sources with knowledge of the Carter-Mondale relationship said that Mr. Mondale would be "the senior adviser" in the White House, the man Mr. Carter would look to for advice unbiased by parochial department interests.

The sources said that Mr. Mondale was the key factor in Mr. Carter's choice of the new secretaries of agriculture and of health, education and welfare—Bob Bergland and Joseph Califano jr. The sources said that Mr. Carter had offered him direct responsibility for any program he wanted end they cited Mr. Carter's statement last week that the Vice-President would be his top staff person and would receive the same briefings and reports as the President.

The word is that Mr. Mondale and his aides could not ask for anything more. Yet, there is anxiety in the Mondale camp.

Mr. Mondale and his aides are said to be mindful of the traditional powerlessness of his position but they are said to think that things will be different this time.

Chemical Reaction

The sources noted that Mr. Carter recognizes that he needs Mr. Mondale's knowledge of Washington. But, far more important, they said, Mr. Carter believes in personal chemistry and feels he has this chemistry with Mr. Mondale. "Jimmy is always saying how close he feels to Fritz," a source noted.

But Mr. Mondale and his aides have been acting as if personal chemistry and confidence were fragile things. The senator has refused to be interviewed until the new year and his aides are reluctant to talk to reporters, especially about details of the Carter-Mondale relationship.

The Mondale strategy seems to be to avoid publicity and to fade into the background—except when Mr. Carter chooses to put him in the foreground—in the expectation of being able to develop real power behind the scenes. The aim is to convince Mr. Carter that his Vice-President is loyal and not a political threat.

On the Platform

Mr. Carter has gone out of his way to give Mr. Mondale a role that is considered to be unprecedented. Publicly, he has credited Mr. Mondale with being a major adviser on appointments and has had him on the platform when he introduced his cabinet officers.

Sources said that Mr. Mondale succeeded in making Rep. Bergland the only real candidate for secretary of agriculture, and fought hard and well for Mr. Califano to be named secretary of health, education and welfare. They also said that Mr. Carter gave Mr. Mondale primary responsibility in putting together the team lists for Treasury secretary and the heads of the Council of Economic Advisers and the Office of Management and Budget.

Mr. Mondale was also given a major role as a conduit to leaders in labor, black groups and Congress in soliciting names and getting reactions to them.

It could not be learned what position Mr. Mondale took on two of the more controversial names considered for the cabinet—John Dunlop and James Schlesinger. On these men, Mr. Mondale was clearly pressured by his friends in labor and the liberal community.

Broad Outlook Sought

All reports are that Mr. Carter wants Mr. Mondale to be as comfortable and as useful as possible. The sources said that the two men had agreed that Mr. Mondale should not get tied down organizing particular programs but should maintain a broad outlook.

They added, however, that Mr. Mondale had expressed a special interest in overseeing federal programs against crime.

Perhaps most important, Mr. Carter has indicated that Mr. Mondale's office will be in the White House, right next to his own, rather than across the alleyway in the old Executive Office Building where vice-presidents have traditionally been lodged. This would underline Mr. Carter's pledge to make him "my top staff person."

Ford Is Studying Broader Amnesty But Is Skeptical

VAIL, Colo., Dec. 28 (WP).—President Ford said yesterday that he is considering giving amnesty to Vietnam war draft evaders and deserters, but he later cautioned newsmen against concluding that he would change his present opposition to such action.

Mr. Ford said he had promised to review the issue because of a request made by Jane Hart, widow of U.S. Sen. Philip Hart, who died Sunday of cancer. But when a reporter asked Mr. Ford last night if he was serious about granting across-the-board amnesty, the President replied: "Oh no, I just said that at the request o her I would look at it."

Mr. Ford said that when he telephoned Mrs. Hart to express condolences, "I said is there anything I can do. She said she would like to ask if I could extend amnesty across the board, and I said I would look into it."

The President's system, in which draft evaders performed some alternative service in return for amnesty, attracted applications from only 21,723 persons of a total of 106,472 known to be eligible.

Mr. Ford indicated yesterday that his basic thinking on the amnesty issue has not changed despite his promise to review the issue. He referred to his limited-amnesty plan as "a good program."

Strike Set Tomorrow At French Ski Lifts

PARIS, Dec. 28 (AP).—Union leaders today ordered 8,000 French ski-lift workers to strike Thursday, for up to 24 hours, at the height of the year-end ski season, to back demands on wages and working conditions.

They did not spell out how individual ski resorts would be affected by the action. Union demands include a minimum monthly wage of 2,000 francs ($400), shorter working hours and job security.

City in Mexico Is Terrorized By Heroin Traffickers' Wars

By Alan Riding

CULIACAN, Mexico, Dec. 28 (NYT).—"People carry a submachine gun here as calmly as they might carry an umbrella anywhere else," a local businessman said. "Almost everyone in Culiacan is armed. We get shoot-outs every day, people are assaulted; it's all normal for us."

Since Culiacan became Mexico's heroin-producing center, this traditionally tranquil agricultural city has turned into a city of gang warfare, police corruption and general lawlessness.

"Just last night there was a half-hour gun battle down by the river," the businessman went on. "One man was killed, but his body had gone by the time the police arrived. Of course, the police always arrive late."

But the forced nonchalance many adopt toward the chronic violence is beginning to evaporate. A wave of kidnappings and rapes of young girls by gangsters trafficking in heroin has produced a public outcry and the army is to intervene forcefully to restore law and order.

'This Fear . . . Tension'

"The army should move in immediately," said Pedro Gutierrez Ramirez, manager of the Sinaloa State Businessmen's Center. "People can't live forever in this fear, in this tension. There isn't a night without the sound of machine guns being fired."

Sinaloa State, in the northwest of Mexico, has traditionally been an important marijuana-growing region. But since 1970 it has also been the country's main region devoted to the growth of opium poppies, with Culiacan the center for hundreds of small laboratories converting opium gum into heroin for smuggling into the United States. Sinaloa is said now to produce more than half the heroin consumed in the United States.

The first outbreaks of serious violence early in the 1970s were limited to disputes between gangs of traffickers in the Tierra Blanca slums, where most laboratories were situated. But since then, gang warfare has spread across this ugly, sprawling city.

The traffickers drive without licenses or number plates in huge limousines smuggled in from the United States, use the city streets like racetracks, wear pistols or carry submachine guns in public with impunity, kidnap women and threaten parents who dare to report the crimes.

Good Marksmen

The gunmen are considered good marksmen. The victims of battles on crowded streets are invariably members of other gangs.

Visitors to Culiacan are warned not to sound the horns of their cars impatiently if other cars are slow to move off from traffic lights or are otherwise blocking the road. "Someone is quite likely to jump out and put a pistol to your head," a shopkeeper said. "Recently, an offended trafficker jumped from his car and shot out the four tires of a car that sounded its horn."

The night life of Culiacan is also dominated by the heroin traffickers who swager into clubs without bothering to hide their guns. "You can hardly expect the cloakroom girls to ask them to hang up their submachine guns and take a numbered ticket," the shopkeeper said. "So we locals don't go out at night nowadays."

The number of killings in Sinaloa rose from 770 in 1970 to 1,773 in 1975. The state's murder rate last year was one for every 869 inhabitants and this year in Culiacan alone the average is 1.7 a day.

Shortage of Gum

Law-enforcement efforts are hampered by the amount of money generated by Sinaloa's heroin traffic—according to some estimates, $800 million a year. "How do you expect a local cop who earns $200 a month not to take a bribe," asked one official, "particularly when the alternative may be death?"

The federal judicial police, who have made some progress in destroying marijuana and opium-poppy plantations, say that the recent surge of violence here in Culiacan stems partly from the shortage of opium gum among the gangs.

Carlos Aguilar Garza, who coordinates the federal anti-drug campaign in Sinaloa, said: "They're doing our work for us by killing each other. But we can't stop the violence. Investigation of murder is a matter of local and not federal jurisdiction."

But because city and state policemen have families that can suffer reprisals, the local authorities turn a blind eye to most of the violence. Even Sinaloa's governor, Alfonso Calderon, had complained that Culiacan's reputation for violence was being exaggerated.

But after the latest wave of kidnapping of young girls—15 cases have been reported so far in December—Mr. Calderon joined those urging the army to step in to solve the problem. Until now, the army has only occasionally set roadblocks at night in the city to search for illegal weapons.

Zambia Expels UNITA Members, Newspaper Says

LUSAKA, Zambia, Dec. 28 (Reuters).—The government has ordered officials of UNITA, one of two pro-Western liberation movements defeated in the Angolan civil war, to leave the country, the Times of Zambia said.

The newspaper, owned by the ruling United National Independence party, quoted Home Affairs Minister Aaron Milner as saying the decision had been made in accordance with the Organization of African Unity charter.

The charter does not allow member states to harbor groups fighting against the legal government of other OAU nations, Mr. Milner was quoted as saying.

UNITA (National Union for the Total Independence of Angola) was defeated by the Soviet-backed Popular Movement for the Liberation of Angola but has since started a guerrilla campaign against the government.

In September, Zambia and Angola agreed to exchange ambassadors and establish a joint body to study their relations, following Zambia's recognition of the former Portuguese colony in April.

Mr. Milner was also quoted as saying that some 800 Angolan refugees entered Zambia last week, bringing the total to about 16,000.

A New Beginning: Space

Space exploration has become so relatively non-controversial that it played practically no role in last fall's presidential campaign. But the national consensus that this activity is worthwhile and should be continued does not mean that it presents no problems or opportunities for the new Carter administration.

On the contrary, not since the days when John F. Kennedy lived in the White House has a U.S. president been faced with the need to make such fundamental decisions for the future of the space program as Mr. Carter will find on his agenda.

Two factors create the policy issues for the Carter administration in space. The first is the virtual completion—brilliant completion—of the national space program decided upon in the 1960s.

American astronauts have landed on the moon, explored it, collected rock and soil samples and returned safely to earth. An even larger number of unmanned American rockets—Mariners, Vikings, Pioneers—have carried instruments to the surface or the neighborhood of the moon, Mercury, Venus, Mars and even Jupiter.

Far more information about the solar system has been obtained in the past decade than in all earlier history. Earth-orbiting satellites have been put to work successfully for the most diverse purposes—from providing cheap, reliable global telephone, radio and television communication to forecasting the weather, estimating the harvests, prospecting for natural resources and helping to keep the peace by providing essential intelligence information. All these great accomplishments were essentially planned in the early and mid-1960s, and then carried out these past ten years.

* * *

Now, in 1976, there is no really comprehensive long-range national space program, even as each day brings closer the next revolutionary change in American space capabilities. In 1979 or 1980, if all goes on schedule, the space shuttle will go into orbital flight and then return to earth. This will begin the era in which space vehicles will be reusable for multiple missions, as are airplanes today. The revolution in economics of space travel that this accomplishment will bring has not yet been comprehended by most Americans. The experts understand, however, that in the 1980s and afterward the economic and technological possibilities in space will bear the same relationship to present capabilities as, in civil aviation, the current era of the 747 and DC-10 has to the time of the DC-3.

The great opportunity of the Carter administration these next four years is to map out the optimal exploitation of the new space technology for the rest of this century, at least in major outline. The vast range of choices must be surveyed and priorities chosen. It will be essential for Washington to consult with other interested governments—including the Soviet Union, of course—and with both domestic and foreign private corporations.

Should there be some grand major objective—say, a manned round trip to and landing on Mars in the 1990s or creation of the first permanent human settlement on the moon—to play a role analogous to the Apollo project? To what extent can space contribute economically to the welfare of humanity by providing a new domain for activities as different as precision manufacture, the collection of solar energy for transmission to earth, and tourism—to name but three of the many possibilities. How much of the future national and international space effort should be devoted to advancing the interests of basic scientific research—for example, by orbiting large optical and radio telescopes to study the universe?

* * *

The era of space exploration began in an atmosphere of fierce competition engendered by a raging ideological and military cold war. For all the gains that initial situation made possible, it is far safer for all people on earth that there have been beginnings, in a small but important way, in space cooperation between Washington and Moscow.

The new range of capabilities opened up by the space shuttle will extend still further, and enormously, the possibility for mutually advantageous cooperation in space among all interested nations. Not the least of the potential contributions the Carter administration can make in the next four years will be to formulate a space program that will help bring together the capabilities of as many nations as possible for the benefit of mankind.

THE NEW YORK TIMES.

The Gilmore Case

Just when you have come to believe that there is no way for the Gary Gilmore story to get any more grotesque, somebody—more often than not, Mr. Gilmore himself—finds a way. Just before his second attempt at suicide, Mr. Gilmore asked the sentencing judge to order him executed very soon. When that request was denied, he said he would seek immediate release from prison. There is a lack of consistency there, if Mr. Gilmore believes himself to be guilty and wishes to pay the penalty as soon as possible, because each new legal maneuver may well delay the execution even more. Meanwhile, the State of Utah is moving to block low-level helicopter flights over the outdoor execution site in order to prevent live television coverage. Offstage, there is an unseemly scramble for Mr. Gilmore's most negotiable asset—his life story. Inevitably there will be books, and probably a motion picture or a television spectacular and so we are going to hear about him for a long time.

For what could be the *ultimate* twist in this grim tale, we would like to suggest, in necessarily hypothetical terms, one way it could all turn out: some time after Mr. Gilmore is shot by a firing squad, the Utah Supreme Court or the U.S. Supreme Court holds unconstitutional the statute under which he was sentenced. His heirs then file a suit against various Utah officials for monetary damages based on the claim that he was wrongfully killed. Do they win? Given what has already happened, who knows? Is this fanciful? A footnote in the opinion of Supreme Court Justice Byron R. White suggests just such a scenario. Justice White pointed out that the purported waiver of constitutional rights would not necessarily be a defense under Utah's wrongful death statute.

In other words, the State of Utah has gotten itself into a legal snarl. And so, we think, has the Supreme Court. It refused to stay Mr. Gilmore's execution by a vote of 5 to 4 on the ground that he had knowingly and intelligently waived all his federal constitutional rights. At least four of the five justices in the majority explained that in such a situation no one else can assert those rights on Mr. Gilmore's behalf. In other words, if Mr. Gilmore or anyone else knowingly and intelligently waives his right against cruel and unusual punishment, a state can do anything it wants with him—kill him for petty larceny, cut off his arms, banish him or what have you, even if the particular thing has already been held unconstitutional. Presumably the same logic would apply to a waiver of any other constitutional right. Now, that may be what the court wants and it may well be a precise reading of judicial precedents, but it does open the way for states to do peculiar and unconstitutional things to willing victims. That in turn suggests more rounds of litigation by citizens who don't want their government acting unconstitutionally.

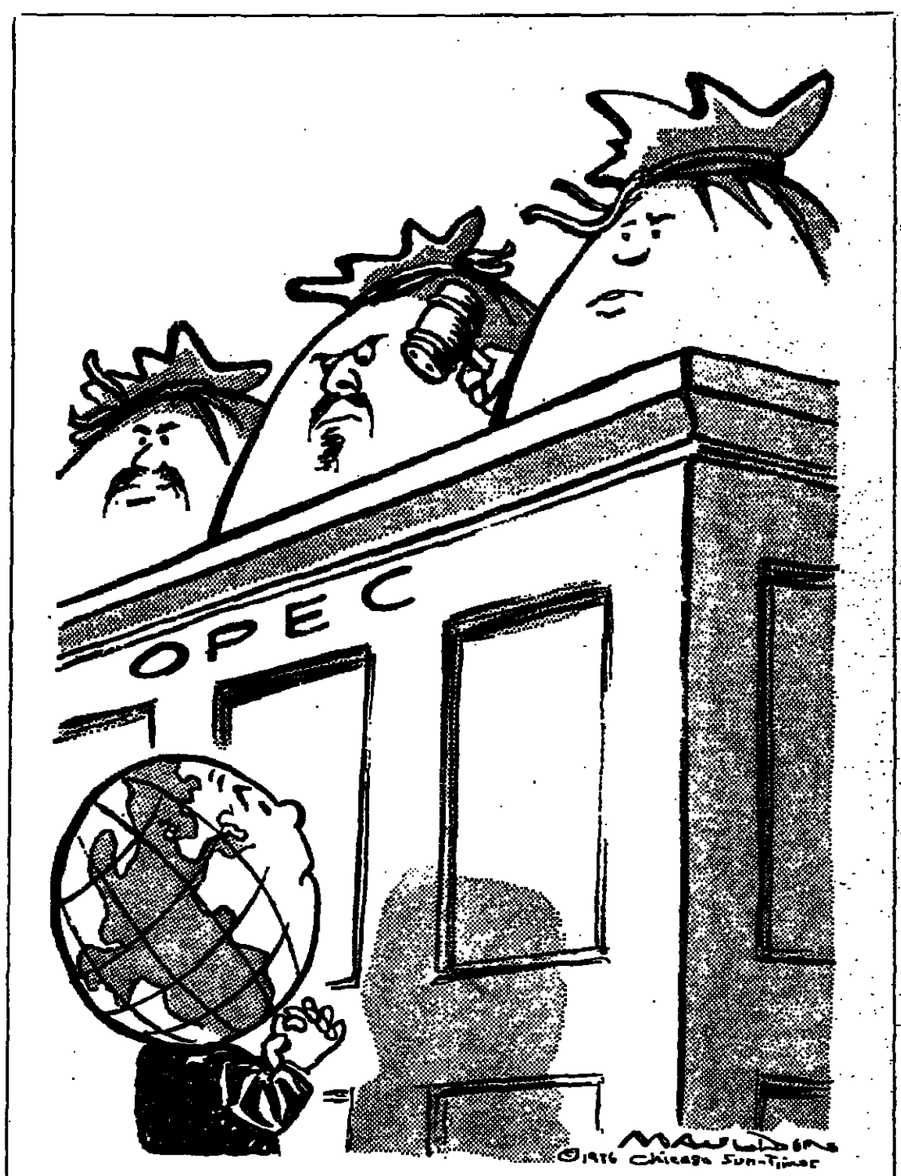
Two other crucial questions still exist in the Gilmore case. The first is the constitutionality of the law under which he was sentenced. That law has not been tested in any appellate court and probably does not meet the requirements the Supreme Court laid down last summer. The second question is Mr. Gilmore's mental competency to waive his rights. The Utah courts have ruled that he is competent. Five members of the Supreme Court have held that finding to be "firmly grounded." But in his dissent, Justice Thurgood Marshall questioned the finding on the basis of Gilmore's erratic behavior and of the way in which the Utah courts determined he is mentally sound. Adding to the confusion is the inability, according to Justice Marshall, of the Utah Supreme Court to produce a complete transcript of the hearing at which Gilmore's lawyer discussed his view of this question.

One of the practical difficulties created by capital punishment—as distinct from the profound moral issues it poses—is its capacity to confound judges and to tie the legal system in knots. This case is a perfect illustration of that point.

THE WASHINGTON POST.

In the International Edition

Seventy-Five Years Ago



December 29, 1901

PARIS—Not many days ago the clergy of Saint-Sulpice laid a formal complaint with the commissary of police against the pigeons from the Luxembourg Gardens, and similar grievances are alleged against these birds by the residents of the Rue de Medicis, all on account of their uncleanly habits. Permission having been asked from the police to destroy the troublesome pigeons, it will be necessary first of all, says the "Matin," to obtain a legal opinion on the question.

Fifty Years Ago

December 29, 1926

NEW YORK—Tears, laughter and round after round of applause greeted the premiere performance of "Mozart," with Sacha Guitry and Yvonne Printemps, presented by Mr. A. H. Woods at Chanin's Theatre last night. Old first nighters say that never within their memories have New Yorkers extended such an impassioned welcome to any foreign play as to that in which the distinguished French actors won the hearts of their no less distinguished audience. The critics were also loud in their acclaim.

'We Have Decided to Be Merciful and Strangle You Slowly.'

Europe: U.S. Challenge, Opportunity

By Sen. Jacob K. Javits

WASHINGTON.—There is an economic bomb ticking at the heart of Western Europe. It is composed of not only the crises of the pound and the lira, but of elements of instability which range from the psychological and the political, to the *fear of further adverse developments* in the crushing Middle East oil prices. The air of crisis, not to be seen at all in the shops and the restaurants and theaters of Western Europe, is very clear in the chancelleries and among the heads of state—the men and women who make the decisions in Paris and London, Rome and Bonn, Brussels and Belgrade. My recent conversations with the leaders of Western Europe convince me that the crisis of economic and political uncertainty there cannot be resolved unless the United States is ready to begin to give a strong lead based on the principles of self-help and mutual cooperation. Western Europe not only needs this U.S. lead now, it *wants* it. It seems clear to me that without it, Western Europe may well be headed, at the very least, for *a period of drift under makeshift solutions* that could well lead to social and political paroxysms capable of changing the whole nature of Western institutions and altering drastically the relationships between nations.

Urgent need has arisen for outstanding world statesmanship from leaders of the United States, Western Europe and Japan. Thirty years after World War II, the issue is not whether the political and economic systems of the Western world shall be preserved, but whether the social order of individual human rights and opportunities shall survive. The test will be whether self-help, mutual cooperation, the love of liberty and the pride of nationhood will prevail *over* national timidity, national chauvinism and the avarice of the human condition.

This, I found, is the real meaning of the European crisis.

It is the thread which connects the United Kingdom's financial stringency, lack of productivity and class rigidity with Italy's erosion of patience with *democracy*. It is the thread which connects France's economic stratification, Yugoslavia's danger of ethnic separatism, and the German Federal Republic's near disillusionment with its own prosperity.

The current crisis dictates that the leading industrial states will have an economic summit meeting sometime early this summer.

Energy's Priority

It is clearly recognized that there were *serious structural* deficiencies in the world's economy before the 1973 Middle East oil embargo. The 400-per-cent price increase imposed on the Western world in 1974 by the OPEC cartel dealt the world economy the blow that pushed it into a deep recession. It is impossible to take the extra billions (now an estimated $50 billion for 1977) out of the industrialized world for oil without having a disastrous result in unemployment and inflation. Therefore, energy must be the first item on the summit agenda.

In this area, the United States plays a decisive role. The ability of the OPEC countries to charge what they do for oil is due in great measure to U.S. dependence on those nations to supply 40 per cent of our oil requirements. The recent split within the OPEC cartel further demonstrates the shaky political and economic context in which the price of energy is determined. *By a policy of effective conservation* and substitution, backed by an accelerated storage program to provide a one-year reserve, there can be material *cuts* in U.S. oil imports. If this goal is achieved, there will be an absolute bar to further price increases and, indeed, there could ensue material cuts in world oil prices.

Similarly, the United States needs a bold economic policy that emphasizes productivity and the expansion of markets through better financing and capital investment. The end result—a diminution of both inflation and unemployment in the United States—will also provide needed stimulus to economies in Western Europe and Japan.

U.S. Action

While in Europe I examined carefully the British balance of payments and the sterling crisis, and the Italian balance of payments and the lira crisis. Again, in each case, action by the United States is awaited. The principal international agency concerned is the International Monetary Fund, which is going to make the necessary immediate loans conditioned upon governmental expenditure limitations and new money issue limitations in each country. But the issue of confidence, which will be determined by whether some form of international safety net can be established on the pound and the lira, depends on the determination and will of the United States. If the United States is willing, the German Federal Republic and Japan will come along and so will the United Kingdom and Italy.

These arrangements, which will prevent a European economic catastrophe and a depression for Western Europe and the Americas, will fall short without the structural changes respecting energy and the development of Third World economies and markets. These steps are indispensable if the world economy is to materially improve. Here again I found the Western European countries awaiting leadership from the United States with our own interests so heavily involved in terms both of security and economics.

I am convinced that the present crisis in Western Europe can be surmounted, that the values of representative government and individual human rights can be preserved and enhanced. These goals can be achieved through existing international organizations which are completely adequate for the purpose. However, the United States needs again to join intimately with Western Europe for that purpose. And, the incoming administration can be an excellent beginning.

Ending the threat to democratic values in Western Europe should appeal to the historic experience, the idealism and the competitive spirit of the people of the United States. And, it will serve to sustain democratic values and economic prosperity in the U.S.A. Therefore, I believe the United States will be prepared to join in the efforts I have described with our substance and our spirit. We must only be given the opportunity to see that our chances of success are good.

Mr. Javits, a Republican, is the senior U.S. senator from New York.

Carter and Clemency: It's Not So Simple

By Tom Wicker

NEW YORK.—President Ford says he may yet issue a pardon for Vietnam era draft evaders and deserters. Even if he doesn't, the mere fact that he considered it will put more pressure on President-elect Carter to go beyond his pledge of a pardon for draft resisters only.

Carter still says he will act in the first week of his administration, but the scope of his proposed order is in doubt. He said in his campaign that he would not issue an amnesty for Vietnam war offenders because that "says what you did was right." He could not agree with that position, he frequently said, because so many poor, often black, Georgians neither had the money to go to college nor knew how to hide out in Sweden or Canada; "many of them thought it was a bad war, but they went anyway."

Therefore, he said time and again, he would issue a blanket pardon for draft resisters because that only says that whether what "you did was right or wrong, you are forgiven for it." This seemed a reasonable distinction and Carter was less "fuzzy" on this issue than any other candidates. But a close examination of the problem suggests that by his own logic he needs to go much further than a mere pardon for draft resisters.

Two major categories, in particular, exactly reflect his description of young men who didn't know enough to dodge the draft or flee the country:

• Vietnam veterans with less-than-honorable discharges, all awarded administratively, not as sentences for criminal action but typically for trouble making and dissent—refusing to be assigned to Vietnam, for example, or distributing anti-war literature. These "bad" discharges went to perhaps 790,000 Vietnam veterans, and constitute a lifetime barrier for most of them to decent employment and equal opportunity.

• Armed service deserters. There may be about 20,000, only about one in a thousand of whom actually deserted on the battlefield. The Ford administration's clemency board found that of the deserters appealing their cases to it, a fourth were black or Hispanic, three-fourths were high school dropouts, and 57 per cent were from low income families.

These 800,000 or so cases far more nearly reflect those for whom Carter expressed sympathy in his campaign than do the roughly 4,000 indicted draft resisters who would be cleared by the kind of pardon he has promised. And while there may be a million or more Americans who simply failed to register for the draft in the Vietnam years, none of them now appear likely to be indicted, no matter what the new President does.

There are two other substantial categories at which equity demands Carter also should look:

• Civilian protesters, any number of whom suffered arrest, prosecution, fines or imprisonment or both, for demonstrations, destroying draft records, blocking troop and ammunition movements, flying the flag upside down and the like. Surely Carter might at least to consider expunging the criminal records of those who made open protest at the time against a war that, years later, he concedes was racist and immoral.

• Excluded aliens who, as a consequence of fleeing abroad to escape the draft, took Canadian or other citizenship. Present legislation provides that they may never return, even if criminal charges against them should be dropped or wiped out by a pardon.

Exactly what Carter will or should do about this complex situation is not clear, but at least three political considerations might recommend to him more sweeping action than he promised in his campaign. One is that those who are certain to oppose any clemency program of greater scope than Ford's limited effort will denounce Carter, in whatever he does—so, as they say down South, he might as well be hung for a sheep as a goat.

Another is that, in one of the few instances where it overrode Jimmy Carter's wishes, the Democratic Platform Committee wrote into the platform on which he ran a pledge of clemency to anyone "in legal or financial jeopardy because of their peaceful opposition to the Vietnam war." A sweeping clemency proclamation would not be breaking faith but keeping faith.

Finally, the keen disappointment felt by many of those who supported Carter and his conventional and rather conservative Cabinet choices might well be overcome by a generous clemency proclamation. At the stroke of a pen, the new President could restore the impression that his will be a humane and compassionate administration, not just a counting house for bankers, businessmen and budgeteers.

Giscard's Middle East Bet

By C.L. Sulzberger

PARIS—French President Valéry Giscard d'Estaing is convinced that 1977 must be the year in which peace is at last established in the Middle East; that there can be no advantage to any party in postponing a settlement until later; and that, apart from the nations directly involved in the Arab-Israeli dispute, the entire world would benefit.

"Everything should be done to make 1977 the year of Middle East peace," he told me in a recent conversation. And it is possible, I am convinced. All of us—certainly in the Western world and also among the Arab states and Israel—are deeply and directly concerned. There is no reason for anyone to think it would be easier to make peace later.

"We should explore all possible roads that might lead to peace in 1977. Months ago I told Henry Kissinger that 1976 would not be the year of peace in the Middle East but that 1977 would be more favorable.

"The unhappy Lebanese conflict has now finished—contributing a stabilizing element. It put an end to the internal chaos in Lebanon and to the bitter dispute between Syria and Egypt. The Arab world has shifted opinions. The extremist position is weakened. Saudi Arabia is now playing a very positive role.

"I am truly hopeful that if we all work together, keeping in mind that 1977 is the best possible opportunity and time, we can succeed."

France's chief of state is also concerned about the effect of rising fuel prices in Europe brought about by the OPEC oil cartel. He does not believe—as some observers do—that OPEC is crumbling as an organization. Moreover, although the present split in its attitudes has produced a double petroleum price level, he thinks the consequent rate will be an important new surcharge on West Europe, especially France and West Germany.

A good deal of our talk related in one or another way to Communism in its various forms. Giscard seems optimistic that Yugoslavia (which he has just visited) will manage to maintain its independence and freedom of action after the death of 84-year-old Marshal Tito.

Since what is now called "Eurocommunism" was born in Belgrade 29 years ago when Tito severed ties with Moscow, rebuffing all Soviet bloc threats, discussion of Giscard's visit led naturally to analysis of similar nationalist Communist movements.

He doesn't seem to accept personally the word "Eurocommunism" which he appears to think is loosely and carelessly used. Thus, in some countries (and one must infer that he includes France) it is his belief that publicized *differences* between local party views and Soviet policy represent simple tactical changes in search of political success.

View of Italy

For him, such tactics don't represent any genuine new ideological development. Yet he does apparently think there might be a true "Italian" Communism—in that country—rather than a broader "European" form.

The Italian Communists give an impression of being fundamentally adapted to a West European industrial society—although even in this respect, were they to gain official power in Rome, that fact might contradict the development of the European Community which has homogeneous arrangements in which they couldn't play a role.

Of course the greatest Communist "heresy" from the standpoint of Moscow, where Leninism was first established, is that of China. France seems persuaded that, despite the shifts in the guiding personnel of the Peking regime, it will continue to follow its basic foreign policy line. This means continuing the break with Moscow and maintaining relatively good relations with the West.

In terms of Western Europe, Paris is clearly concerned about developments within its two principal ESC partners, West Germany and Britain. Giscard acknowledges that the Germans have a splendid organization with an active and well-run industry.

Moreover, the West German economy at this moment is exceptionally well placed to finance current international requirements and special equipment. But he thinks France's position in this sense will improve within a relatively short period.

The British problem is complex. However, the President doesn't seem to fear any imminent disintegration despite British engulfment in economic difficulties. Friendly nations like the U.S.A., West Germany and France are doing what they can to help.

One absolute necessity is to clear up the menace of existing sterling balance obligation. Almost six years ago Giscard, as finance minister, warned the then Tory government this was inevitably bound to cause grave trouble.

Letter

Cypriots

C.L. Sulzberger, in his column "Blind Eye of the Third World in the UN" (IHT, Nov. 27-28), made the contention in a reference to Cyprus that "on dozens of trips to that lovely if bloody island I have never met one single person who spoke of himself as "Cypriot"; only "Greek" or "Turkish." We do not know in what *circles Mr. Sulzberger moved*, nor can we recall the actual number of times that he visited Cyprus, but we can assure Mr. Sulzberger that Cyprus abounds in Cypriots—in people who consider themselves first and foremost as *Cypriots and then as Greeks or* Turks.

Cypriots have come to realize only too well that their respective "Greekness" and "Turkishness" cannot, and will not, restore to them their homes and beloved lands. Some Cypriots, namely those that are still living in the free lands of Cyprus, can still speak out and say so: others are less fortunate; but we have no doubts in our minds that they will come out with equally strong sentiments, if only they felt safe to air openly their views—which of course they do not.

Using Détente, Ex-Agent Reports

KGB Is Said to Step Up Subversion

LONDON, Dec. 28 (Reuters).—A former officer of the Soviet secret police (KGB) said in a book published today that Soviet agents have stepped up anti-Western subversion since the beginning of détente.

The book, by Alexei Myagkov, who said he served five years as a KGB officer in East Germany before defecting in 1974, purported to show some of the inner workings of Soviet intelligence at home and abroad.

Called "Inside the KGB," it was published here by the Foreign Affairs Publishing Co. a concern which specializes in Soviet and East European subjects.

In some ways it represented a counterpart to the writing of former U.S. agent Philip Agee and his much discussed book on the secrets of the Central Intelligence Agency.

Mr. Myagkov said the KGB (Bureau of State Security) was under orders to extract the maximum advantage from the Kremlin's policy of détente.

When the Soviet Union signed a treaty of friendship with West Germany in August, 1970, Mr. Myagkov said, KGB chief Yuri Andropov issued a directive requiring field officers "to make more active efforts to recruit agents in West Germany, to make more active use of double-agent recruitment . . ."

"The total of [West German] citizens working for [Soviet-bloc] espionage agencies can be put at about 8,000," Mr. Myagkov said.

He cited the French withdrawal from the military structure of NATO in 1966 as an example of what he described as the effectiveness of KGB subversion in the West.

"Using its agents among Soviet journalists and officials of the various agencies in France, as well as among members of the Franco-Soviet Friendship Society, it propagated actively among politicians the theme that the country's political independence suffered from the fact that it was a member of NATO . . .," he said.

"In 1968 the head of KGB School No. 311, in a lecture to future officers about the organization's activities abroad, stated plainly that, in the opinion of the Politburo, events in France were a positive result of the efforts of the Soviet government and of the successes of the KGB."

De Broglie Killer Believed Among 8 Persons Held

PARIS, Dec. 28 (Reuters).—The killer of a former French government deputy minister is "without doubt" among eight persons being held for questioning in connection with the murder here last Friday, a senior police officer said today.

Pierre Ottavioli, the Paris crime squad chief who is leading the investigation into the shooting of Prince Jean de Broglie, made the remark to newsmen.

Police, who detained four persons for questioning yesterday, detained four more today and are investigating a theory that the 55-year-old prince was killed by a hired gunman. Among those in detention is a police officer.

A member of parliament in President Valéry Giscard d'Estaing's Independent Republican party, Mr. de Broglie was a deputy minister of foreign affairs in several governments during the 1960s.

Police have discounted the possibility of a political motive for his assassination.

Four Dissidents Reported Seized in Soviet Union

LENINGRAD, Dec. 28 (UPI).—Four Soviet dissidents including human-rights activist Vladimir Borisov, who has spent nine years in mental institutions for rights activities, have been arrested in Leningrad during the last week, relatives and other dissident sources said today.

The latest to be arrested was Vladimir Swerdlin, 35, a Jewish refusenik," who was charged with a weapon violation. He was arrested yesterday and could face up to five years in prison if convicted.

Dissident sources said he had engaged in target shooting under official auspices 10 years ago and when he stopped competing he forgot to turn in "a few small-caliber bullets." Police found them in his apartment during a search in August, the sources said.

On Dec. 21, poetess Yuliya Voznesenskaya, 38, a mother of two, was arrested on charges of dissemination of publications "slandering the Soviet system" and is scheduled to go on trial Dec. 29.

Ilya Levin, a Jewish refusenik, was arrested Dec. 23 and given 15 days in jail for alleged hooliganism. Both Miss Levin and Mr. Swerdlin have sought and have been refused permission to leave the Soviet Union.

The nickname refusenik is used in the Soviet Union to refer to Jews whose applications to emigrate have been ignored.

Italy Banker Freed

AVELLINO, Italy, Dec. 28 (UPI).—Kidnappers released a 78-year-old Naples banker today, a week after his abduction, and after police said the kidnappers received about $1.2 million in ransom. Lucio Antonio Pabrocini told police he was treated well.

The Rev. James Allen holding a copy of what may be part of the final draft of the U.S. Declaration of Independence.

AP.

Boston Minister Says He Found Part of Jefferson's July 4 Draft

BOSTON, Dec. 28 (AP).—Half of what may be the long-lost final draft of the Declaration of Independence, written by Thomas Jefferson, has been found in a folder of old papers in an attic here, says a Boston minister.

"I don't have any doubt that it's the document lost 200 years ago," said the Rev. James Allen, who discovered the two-page document among papers given to him by a friend.

The two pages, written in ink, cover a little more than half of the full text of the declaration.

At the National Archives in Washington, an expert who examined the document 10 days ago said, "it takes time and literally takes samples" to determine if it is authentic, but added, "We are fascinated by the potential of what he's found."

Mr. Allen, minister of the First Parish Church of Dorchester, said, "There are several things that make me sure this is the authentic original. For one thing it shows that Jefferson wrote 'inalienable' but the printer made it 'unalienable.'

"For another thing, this second page includes three lines that were dropped by the printer from the original broadside, but were later put back in."

The original, drafted by Jefferson with help from John Adams, Benjamin Franklin, Roger Sherman and John Livingston and changed by members of the Continental Congress, was approved by the Congress on the evening of July 4, 1776.

It was given to John Dunlap, a printer, who worked through that night to produce 1,000 broadsides for rapid distribution through the colonies. But the original from which the printer worked was lost.

New U.S. Coin Game Permits Players to 'Kill' Pedestrians

By Ralph Blumenthal

NEW YORK, Dec. 28 (NYT).—A new coin-operated game called "Death Race" that puts players behind the wheel trying to run down humanoid figures on a television screen is apparently catching on in amusement parks around the country—to the outrage of the National Safety Council.

For a quarter, a player gets a minute to chase and run down all the symbolic pedestrians he can. Hitting one of the figures rewards the player with an electronic shriek and points scored on a grave-marker.

About 900 of the games have been built and sold so far to amusement arcades, fun parks and bars, according to the manufacturer, Exidy Inc., in Mountain View, Calif., halfway down the San Francisco peninsula.

Phil Brooks, the company's general manager, compares the game to a harmless "cartoon." He said in an interview: "It's like laughing at ourselves. None of us drive all that well. It's poking fun at our driving ability."

But the National Safety Council is not amused. An article in the winter issue of the nonprofit service organization's quarterly magazine, Family Safety, describes "Death Race" as "insidious," "morbid," "gross" and "sick, sick, sick."

"Nearly 9,000 pedestrians were killed last year and that's no joke," said Gerald Driessen, manager of the council's research department and a behavioral psychologist who was quoted extensively in the article. "It's not amusing."

"On TV, violence is passive," Mr. Driessen said in an interview. "In this game, a player takes the first step to creating violence. The player is no longer just a spectator. He's an actor in the process."

The way "Death Race" is set up, a player—two can play side by side—stands at a steering wheel with his right foot on an "accelerator pedal." In front are the hood and wheels of a simulated racing car and a 23-inch television screen. At the drop of a quarter, stick figures called "gremlins" with arms and legs duck around obstacles on the screen, trying to avoid the onrushing car.

A high scorer is called "expert driver." "That violates my sense of taste and decency," Mr. Driessen said.

India Weekly Closes Over Censorship

NEW DELHI, Dec. 28 (UPI).—Mainstream, a left-leaning English-language weekly which had been critical of the emergency policies of Prime Minister Indira Gandhi's government, closed down today rather than submit to censorship by the government.

In a front-page article entitled "Good-Bye," editor Nikhil Chakravarty said, "There comes a moment in the life of a paper, as in the life of many an individual, when the sense of purpose is in danger of being lost by the constraints of circumstances.

"Such a moment has come today for Mainstream, after more than 14 years of toil and tribulations, of successes and setbacks."

Mr. Chakravarty did not explain what he meant by "constraints of circumstances." But an official of the journal said, "We are closing down rather than submit to precensorship."

Since Mrs. Gandhi declared a nationwide state of emergency 18 months ago, severe restrictions have been placed on the Indian press, and civil liberties have been suspended.

The new censorship laws ban publication of orders given by censors to newspapers and magazines.

The government imposed censorship on Mainstream, one of the last remaining publications critical of the emergency policies, two weeks ago without giving any reasons. Mr. Chakravarty said the government's order was the result of the "cumulative effect" of his journal's writing in the last several months.

Mainstream had been an advocate of Indo-Soviet friendship and had supported Mrs. Gandhi's "progressive socialist policies."

Mr. Chakravarty frequently criticized the government for curbs on the press and civil liberties.

Although the government says censorship of domestic news and writing was lifted more than six months ago, selective censorship continues on newspapers critical of the government.

Mainstream is the second journal which has chosen to shut down rather than submit to censorship. Seminar folded nearly six months ago under similar circumstances.

Alex Rose Dies; Founder of N.Y. Liberal Party

NEW YORK, Dec. 28 (UPI).—Alex Rose, 78, a founder of the New York Liberal party, who wielded political power in the state for three decades, died today in his New York City home.

Mr. Rose held the title of vice-president of the party, which he helped found in 1944. He was also president of the United Hatters, Cap and Millinery Workers International Union.

Mr. Rose was a close friend and adviser of New York State Gov. Hugh Carey and an intimate of former New York City mayors Robert Wagner and John Lindsay.

His position made him a major dispenser of patronage jobs in the state and city, where the Liberal party continued to exert influence despite its relatively small membership. The party claims some 115,000 members.

Mr. Rose was born Olesch Royz in Warsaw and came to New York 15 years later because Polish universities at the time would not admit Jews.

Paulo Pontes

RIO DE JANEIRO, Dec. 28 (UPI).—Brazilian playwright Paulo Pontes, 35, died yesterday of cancer. He was one of the founders of the "Opinao (Opinion) Theater Workshop," which has injected new creativity into the Brazilian theater over the past 10 years.

Chafic Maluf

SAO PAULO, Brazil, Dec. 28 (UPI).—Chafic Maluf, 71, considered one of the greatest contemporary poets in the Arabic language, died here yesterday after a heart attack. Mr. Maluf began his writing career as a journalist in his native Lebanon when he was 17 and in 1923 came to Brazil, where he did most of his writing.

A Critical Look at the Film Scene, 1976

By Thomas Quinn Curtiss

PARIS, Dec. 28 (IHT).—The moment has arrived for film critics everywhere to crawl out on a limb and announce, as is the custom, the 10 motion pictures that have pleased them most during the past 12 months. Below are listed—not in exacting order of merit for they differ widely from one another—the 10 films, released in Paris since January, 1976, that have been in my opinion the best.

• "Le Voyage au Bout du Monde," Jacques-Yves Cousteau's documentary of his Antarctic expedition aboard his ship, Calypso. An informative journey filled with thrilling adventures and stunning visions of the polar region and the creatures that inhabit it. A cinematic achievement of great beauty.

• "Silent Movie," Mel Brooks's gorgeous spoof of the silent cinema's technique. A hilarious caricature of Hollywood as it was and as it is with Brooks as an ex-director who presents a promising project to impose silence on the screen again. The film is a happy return to grand slapstick tradition.

• "Cadaveri Eccellenti" (known in France as "Cadavres Exquis" and to be titled in English "The Context"), Francesco Rosi's chilling thriller about a detective assigned to investigate the assassinations of a set of judges, alleged to be victims of a terrorist plot.

Liv Ullmann
. . . in "Face to Face"

Lino Ventura
. . . "The Context"

An absorbing guessing game and a striking example of adroit screen technique with a sterling performance by Lino Ventura and outstanding acting support from Fernando Rey, Charles Vanel, Marcel Bozzuffi and Alain Cuny.

• "Telefoni Bianchi" ("La Carrière d'une Femme de Chambre" in France), Dino Risi's ingenious satire of life in Italy under Fascism, depicting the rise of a domestic at the Lido Excelsior Hotel to the affections of Mussolini and her subsequent stardom at Cinecittà. Agostina Belli as the bewildered maid and Vittorio Gassman as the period screen idol are invaluable assets to this exuberant cartoon.

• "Mr. Klein," Joseph Losey's grim drama of Paris under the Nazi heel and of a dissipated antique dealer who holds himself smugly above the situation until he, suspected of non-Aryan origins, is plunged into the maelstrom. Alain Delon as the protagonist contributes his most mature characterization.

• "L'Argent de Poche," François Truffaut's comedy of childhood, a collective portrait of a French school, done with gentle humor and delightful freshness and played by the students themselves.

• "Face to Face," Ingmar Bergman's enthralling study of a young woman's emotional crisis, her retreat into intense melancholia, her gradual rehabilitation and her final acceptance of life's challenge, beautifully enacted by Liv Ullmann.

• "Family Plot," Alfred Hitchcock's latest, a suspense melodrama set against the scene of California spiritualistic seances and graveyard chases quick with the master's customary strokes of humor and the macabre.

• "One Flew Over the Cuckoo's Nest," Milos Forman's adaptation of Ken Kesey's novel about an individual committed to a mental clinic and fighting a losing battle with the institutional attitude. Jack Nicholson as the disturber of the asylum peace and Louise Fletcher as his implacable foe deliver memorable portrayals.

• "Barry Lyndon," Stanley Kubrick's adaptation of the Thackeray novel, is often dramatically deadweight and minus the relieving irony of its original. It has been strangely cast, too, but it is pictorially the most exquisite work of the year.

The best lead performances this year were by Lino Ventura as the harassed investigator in "Cadaveri Eccellenti" and Liv Ullmann in "Face to Face." The outstanding actress in a supporting part was the 9-year-old Anna Torrent as the orphan possessed by memories in the Spanish film directed by Carlos Saura, "Cria Cuervos," and the best actor in a supporting assignment was Vittorio Gassman in "Telefoni Bianchi."

As might be expected, the foremost directors—Cousteau, Risi, Brooks, Hitchcock, et al—have been responsible for the foremost films of 1976, but several less renowned directors have accomplished reputable work: the Polish Walerian Borowczyk with "The Story of a Sin" and the bizarre "La Marge"; Gérard Blain with "Un Enfant Dans la Foule"; Henry Jaglom with "Tracks"; Lina Wertmuller with "Swept Away"; Ettore Scola with "Brutti, Sporchi e Cattivi," a rogues' comedy of a Roman shantytown; the Ethiopian Haile Germa with "Harvest: 3000 Years"; Claude Farakdo with "Les Fleurs du Miel"; Luigi Comencini with "Casanova," and the Egyptian Shadi Abdelsalam with "The Mummy."

The special effects prize for 1976 must be shared by "Jaws" and the new "King Kong."

LONDON, WASHINGTON

Open Season on 'The Nutcracker'

By Oleg Kerensky

LONDON, Dec. 28 (IHT).—There are three productions of "The Nutcracker" in England for the holidays. The more ambitious of the two new ones is also the less successful. Ronald Hynd, whose version for Festival Ballet had its London premiere at Festival Hall yesterday, has adapted the traditional story in an attempt to give the ballet greater emotional content and dramatic interest.

But, unlike the late John Cranko in Stuttgart, John Neumeier in Hamburg, and, apparently, Roland Petit in Paris, he has not had the courage of his convictions. He introduces extra characters—Clara's elder sister Louise who falls in love with Drosselmeyer's nephew Karl, and a rather nasty rich hussar called Hermann von Rattenstein whom Louise's ambitious mother wants her to marry. But this plot is forgotten by the second act, which is the usual divertissement. The program note says that, in the end, Louise's mother is reconciled to her marrying Karl, but all the audience sees is two young ladies waking up from a dream and being joined by their mother.

Neither Hynd nor Peter Docherty, his designer, has been able to give the second act any dramatic verisimilitude. Clara and Drosselmeyer watch the dances from behind, though admittedly they are placed on high in an attractive bower. Later Clara joins in some of the dances but is led right off the stage just when her sister is about to dance the famous pas de deux!

As for the first act, the adults at the Christmas party are so ill-mannered that it's not surprising the children take after them. Frau Stahlbaum snatches the bouquet her daughter is given by Karl and pushes her towards Hermann. He grabs Louise from Karl and seizes the nutcracker doll in a threatening way, while Karl does the toy soldier solo as an attack on his rival.

Ballet International

Ben Stevenson, in his production for the newly formed Ballet International, has also opted for a nonaristocratic Stahlbaum family. He makes his Christmas party friendly and homely—some of the parents carry in their own children and clap hands to get the dancing going, while the host and hostess exchange a weary sigh and drink a toast together when it's over. He has kept the traditional story and made some of the divertissements funny. The result is a production that is ideal for children.

Both versions have lively and amusing fights for the toy soldiers and giant mice, but Peter Farmer's designs for the animals in Ballet International's production are more endearing. His divertissement costumes, too, in various pastel colors, are more tasteful than Docherty's opulent ones. Farmer's decor for the second act is just a flimsy floral backdrop, with changing colored lights projected on it; Docherty's is much more elaborate and spectacular. Neither looks much like a kingdom of sweets.

The dancing in both productions is perfectly competent without being exciting. Eva Evdokimova as Louise in Festival's staging had gentle charm and was well partnered by Peter Breuer, though his solo was untidy and he lacks magnetism. The biggest individual success was scored by Nicholas Johnson doing a dashing hornpipe as Fritz; he is one of the alternates dancing Karl later. Ballet International's best leading couple is Gaye Fulton, very similar to Evdokimova in physique and manner, and Woytek Lowski, a stylish and impressive partner and dancer.

Nureyev Version

Rudolf Nureyev's sophisticated "Nutcracker" at Covent Garden is now familiar. His arrangement of the first act remains intelligent and interesting for adults as well as children but his second act, with part of the divertissement danced in Clara's house, is much less satisfactory. The first performance this season was magnificently danced by Nureyev himself and by Merle Park, ideally cast as Clara.

Festival Ballet's "Nutcracker" is at Festival Hall until Jan. 15. Ballet International will be in the Netherlands, with Dame Margot Fonteyn, Jan. 7-11, and then it goes on a British tour: Paignton (Jan. 17-22), Hull (Jan. 31-Feb. 5) Newcastle (Feb. 7-12), Eastbourne (Feb. 14-19), Oxford (Feb. 21-26) and Coventry (Feb. 28-March 5). Further performances of "Nutcracker" at Covent Garden, all with Nureyev, will take place on Jan. 12, 13 and 14.

Baryshnikov 'Nutcracker'

WASHINGTON (NYT)—Mikhail Baryshnikov's staging of "The Nutcracker," for American Ballet Theater, had its world premiere at the Kennedy Center in Washington last week. This was the first time Baryshnikov has tried his hand at choreography, and, moreover, the entire concept and direction of the production was his alone. Could the 28-year-old dancer emerge triumphant when faced with the entire responsibility for a full evening production?

Well, this "Nutcracker" is decidedly different. For one thing it is the first production where it seems that the Nutcracker Prince has the leading role, which certainly makes a change.

Baryshnikov also—perhaps following the precedent of Yuri Grigorovitch in his Bolshoi Ballet presentation—gives rather more prominence to that mysterious éminence grise of the ballet, Dr. Drosselmeyer, as a master of puppets who gives the nutcracker doll to the heroine Clara at a Christmas party. In Baryshnikov's version what follows is Clara's dream—her nutcracker is transformed into a prince and takes her to a marzipan castle where they dance together. There is no Sugar Plum Fairy to spoil her fun—the prince is hers alone. At least until she wakes up.

Baryshnikov's production is attractive, his concept rewarding and the choreography consistently engaging. He seems happier, at present, with solos and duets rather than group dances, and for the big Snowflakes ensemble he has, sensibly, restored the Soviet choreography by Vasily Vainonen.

Some of the best dances, not unexpectedly, are the fiendishly difficult, yet effortlessly graceful, solos he has awarded himself, but throughout there is a special originality here and a natural musicianship. There was none of the faltering or hesitation one expects from an unfledged choreographer, however distinguished his lineage.

The ballet has scenery by Boris Aronson, which is a charming mixture of Biedermeyer domestic and sweetshop Gothic, and stylishly adequate costumes by Frank Thompson. And the music was well conducted by Kenneth Schermerhorn. Naturally the performance went devotedly well—the dancers seemed to have put their hearts into it.

—CLIVE BARNES.

Italy Reports Huge Art Hauls Over Christmas

ROME, Dec. 28 (UPI).—Burglars stole art works worth hundreds of thousands of dollars in Turin and Florence during the Christmas weekend, police said yesterday.

They said that thieves in Florence raided a private collection willed to the Italian state by its last owner and took 550 items worth an estimated 200 to 300 million lire ($228,000 to $342,000). They included paintings, ceramic works, weapons, clandlestics and other objects.

In Turin, burglars broke into the cathedral and stole four valuable 17th-century paintings. They did not take the most famed relic in the cathedral, a shroud in which Roman Catholic tradition says Christ was wrapped after His Crucifixion.

PARIS, WEDNESDAY, DECEMBER 29, 1976

Soviet Wages To Rise 18% Over 4 Years

But Decree Covers A Third of Workforce

MOSCOW, Dec. 28 (AP-DJ).—The Soviet Union announced wage increases today for millions of its citizens in an apparent move to help out its worst-paid workers and draw more Russians into jobs in cold and distant areas.

The decree—which covers 31 million of the nation's 102 million workers—promises an average increase of 18 per cent in minimum wages over the next four years, averaging out to 4.5 per cent annually. The average worker here now earns 145.80 rubles ($192.45 at the official exchange rate) per month, according to official statistics.

The decree will give wage boosts first to workers in the far north, far east and Siberia and only after 1977 to workers in many other areas. This distribution may make jobs in isolated parts of the country immediately more attractive to citizens, helping the areas to develop.

Particular fields mentioned in the new decree indicate the government hopes to give a fairer shake to doctors, teachers and others who have traditionally been low on pay scales compared to industrial workers. A doctor may make 120 rubles ($158.40) per month, compared to 162.20 rubles ($214.10) for an average worker in industry.

Store and restaurant workers will also be getting pay increases amid an on-going campaign to eliminate the sullen employee attitude in many shops and restaurants. There will be special bonuses for these workers, the decree says, for "improving the quality of services provided to the population."

The decree gives no indication that inflation is a factor in the wage increases. The state boasts that it has almost no inflation and Western experts acknowledge that inflation of retail prices in state stores here is only about 2 per cent per year.

Each five-year plan has included some wage increases. Communist party leader Leonid Brezhnev foreshadowed the latest increase last February when he said factory and office workers would get 16 to 18 per cent increases and farm workers would get 24 to 27 per cent more pay by the end of the 1976-80 economic planning period.

Most of this increase is attributed to the increased cost of goods imported from the West or to increases hidden by the introduction of new, more expensive products in place of old ones.

A shortage of luxury goods here and only limited need to save for the future make pay increases less significant than for workers in the West. Buying an automobile can take years of waiting even if the customer has his money ready. For instance, and state-subsidized vacations for workers do not require large amounts of cash.

Controlled prices for such staples as bread and meat, however, do not make up for the fact a 30-ruble ($39.60) pair of shoes or a 90-ruble ($118) suit makes in a 145-ruble average monthly paycheck.

Area in West Excites U.S. Drillers

By Steven Rattner

EVANSTON, Wyo., Dec. 28 (NYT).—The terrain here offers a variety of faces. A broad basin provides range for grazing cattle and a path for a state highway. To the west, gentle hills covered with scrub roll toward the horizon. Across the meadow jagged formations protrude like buck teeth.

From these strange geologic formations come the area's name—the Overthrust Belt—and also geologists' convictions that the band running north and south from this southwest corner of Wyoming is rich in oil and gas.

After years of looking and hoping, Amoco Production Co., a subsidiary of Standard Oil of Indiana, has found both at Ryckman Creek, 15 miles northeast of here.

Quasar Petroleum Co., with an earlier well, was equally successful at nearby Pineview, Utah, and the reverberations continue to stir the petroleum industry.

"This is the most exciting on-shore play in the United States," said Leonard Diamond, senior oil analyst at Lehman Brothers. "Whether it's going to turn out, though, is too soon to tell."

Amoco Most Active

Amoco, the most active company in the region, with multi-million-dollar leases from the Union Pacific railroad is reluctant to estimate its find. But some industry experts are talking about a billion barrels of crude oil for the Pineview-Ryckman Creek field alone, and nearly everyone agrees that the discovery is likely to prove the most significant for the United States since Alaska's Prudhoe Bay.

With the two discoveries, more than a dozen oil companies have begun scurrying to lease land throughout the 60-mile-wide belt, which runs from central Utah north to the Canadian border. About 30 seismic crews are conducting preliminary exploration, and at least as many drilling rigs have been moved into the area, signaling a major upsurge in activity here next year.

Such movement is also indicative of a new wave of exploration that has hit the Rocky Mountains. Regional offices in Denver are being created or enlarged. New finds, such as Nevada's second oil field in Nye County and several small fields near Denver, were recently reported. And interest is intensifying in other unprospected areas once thought too risky or too marginal to warrant development.

The Overthrust Belt is not going to solve the nation's energy problems of course. But, together with less spectacular developments around the country, the efforts are expected to have an impact.

Amoco has already begun producing from its discovery well, Ryckman Creek No. 1, and the oil appears to be both plentiful and of good quality. According to Roger Jarvis, the youthful Amoco engineer overseeing the drilling, the oil is low in sulfur and light in weight and it yields much gasoline. However, the natural gas—although plentiful—is currently burning away in a bright orange flame because, Amoco says, a pipeline to utilize it would be too costly.

Drilling in the area has occurred off and on for years. Until the energy crisis, however, high risks discouraged exploration.

For one thing, exploration experts say that the region is one of the most geologically complex areas in the country. Hundreds of millions of years ago a sheet of layered sedimentary rock lying along the West Coast began moving eastward. Blocked by rock already in place, the slide began moving over the rock already in place or "overthrusting."

Bizarre Formations

This created bizarre formations replete with faults, misplaced strata—and petroleum.

The geology is so unusual that in drilling some of its wells, Amoco has reached a petroleum-bearing layer, passed through it and then encountered what is called the "nugget" again farther down.

The geologic complexities make exploring expensive. An average well in this region, according to Amoco, will cost about $1 million—an expense it contends would not have been justifiable before the quintupling of oil prices over the last three years.

Federal Energy Agency Issues Report

Transport Costs to Cut Alaska Oil Profits

By Wallace Turner

SAN FRANCISCO, Dec. 28 (NYT).—The expected high cost of getting oil to market from Alaska's North Slope limits the prospects of huge profits for companies involved in the venture, according to a study by the Federal Energy Administration.

The massive price increase in late 1973 by the Organization of Petroleum Exporting Countries provided an economic justification for the project, which until then had appeared questionable. In 1968, when the first wells in the North Slope's rich Prudhoe Bay field were brought in, Saudi Arabian oil was being delivered to refineries here for $2.50 a barrel. Prudhoe Bay oil could not compete at that price.

The subsequent increases, however, raised the price of Arabian crude oil here to $12 to $13 a barrel—plus a further 5 to 10-percent rise to result from OPEC actions this month. Under these circumstances, Alaskan oil, which is expected to begin flowing next summer, would be competitive.

Isolation a Problem

Now the study, compiled for the FEA from a wide range of data over the last few months, again raises questions about the economics of the North Slope venture. A primary factor that is expected to limit profits in the project, according to the study, is the field's isolated location.

The 800-mile trans-Alaska pipeline, which had to be built to move the crude oil to tankers in an ice-free harbor, will cost about $10 billion when interest is included.

The tariff for moving the oil to the tankers must amortize that investment and pay 8 per cent on it, plus finance operation of the line under the most inclement, and therefore costly, conditions.

The tariff has not yet been set but is already controversial. The FEA study assumed it would be $4.60 a barrel.

Heavy Tax Burden

The state of Alaska, in addition to its 12.5-per-cent royalty at the wellhead, levies severance taxes, property taxes and state income taxes on profits. The federal government levies income taxes on pipeline profits, and on the "production profit," which is the term for what is left for the owners of the wells.

Then there are the high costs in moving the crude from the ice-free harbor at Valdez, Alaska, to refineries. Getting to the refineries along the Pacific Coast is no problem.

But the field is so huge that the expected optimum production level will be about 1.2 million to 1.5 million barrels a day. To produce more slowly might damage the ability to recover crude from the sandstone, engineers said.

The FEA study found that the West Coast market could absorb about 500,000 barrels a day from the North Slope. Any amount over that must be marketed elsewhere for the first few years, until demand here grows.

Solution of this export problem is the next major hurdle in the trouble-ridden development of the big oil discovery.

Exports Barred

The Japanese, always in need of oil, are ready to buy the Alaska petroleum. But Congress, in passing the Alaska Pipeline Right of Way Act, stipulated that no oil going through the pipeline could be exported unless the President found that it was in the national interest. Even then, Congress reserves the right to overruled that finding.

"Exchanges with Japan, as a solution to the Alaskan surplus, are not attractive from a federal perspective," William Arntz, the FEA regional administrator here, told the California Energy Resources Conservation and Development Commission recently.

So by tanker or new pipeline, the surplus must move to refineries east of the Rocky Mountains.

Until the question of a pipeline crossing the mountains is settled and the line built—three proposals are under study but all appear to be snagged—the surplus Alaskan crude will be shipped by tanker through the Panama Canal.

Tanker Route Costly

The FEA calculated that it was feasible to run 160,000-ton tankers (a ton of tanker capacity means about 7.5 barrels of oil) to the western approaches of the canal, transfer the oil to smaller tankers that can go through the canal, and then reload it into large tankers at the eastern end of the canal.

But this will be costly—perhaps $3 a barrel, as contrasted with estimates of half that amount to deliver the oil through a pipeline.

And unless the federal government sets some artificially high price for Prudhoe Bay crude by requiring refiners to use it no matter what it costs, that expense of going through the canal will come from the profits of the owner company.

As the FEA study examined the economics of the Prudhoe Bay oil delivery problems, it was clear that, if the OPEC price rise had not occurred, the companies would have had to create one somehow—or else see their oil discovery diminish to become the industry's most burdensome white elephant.

'Europort' Recovering From Recession

By Michael Getler

ROTTERDAM, Dec. 28 (WP).—Like a forest of tilted, metal trees, hundreds of loading cranes poke through the morning overcast and give the world's largest seaport a strange, erector-set skyline.

The cranes lead along the banks of the Nieuwe Maas River and out 25 miles (40 kilometers) to where the mouth of the vast "Europort" empties into the North Sea and open ocean.

There, the skyline shifts to scores of crude-oil storage tanks and refineries of six major oil companies, whose supertankers ply the port regularly.

This year, more than 32,000 seagoing vessels will enter Rotterdam harbor, a figure that dwarfs activity at any other port in the world.

Yet, that is not quite as many ships as came here last year and even further below the record 34,200 that came in 1973, before the Arab oil embargo. The embargo ended in July, 1974, but the global recession that it touched off still lingers, and Rotterdam, like a lot of places, has not yet fully recovered.

In a way, however, this seaport—twice the size of its nearest rival in Kobe, Japan—is a mirror of the world's shifting problems, and not all of them spell trouble for Rotterdam.

Gateway to Europe

Rotterdam, with its size and refineries, its position at the gateway to the Rhine river network, with links by barge, railhead and pipeline to West Germany's Ruhr and to Belgium, and by ship to Scandinavia and England, remains at the top of the list.

While oil unloaded here is still 1 per cent behind 1973 levels, the shipment of grain is up another 1 per cent this year over last year's record high. This reflects the severe drought and continuing bad harvests in Eastern Europe which have meant more grain purchases in the West.

So, too, does Rotterdam reflect the newly sharpened battle between environmentalists and the unemployed that is going on throughout the industrialized world as the recession hangs on.

For years, environmentalists here pressed for laws to control air and water pollution in the port area. Ironically, the government failed to act when times were good but did impose new restrictions during the 1975 peak of the recession.

Now, the scales are tipping back again. With an eye on the increasing transshipments of ore coming through Rotterdam, the government is being pressed to ease restrictions on a new plant that would allow the ore to be palletized here, making it even cheaper for transshipment to European customers.

Gain in '76 Seen

In its record year of 1973, some 309 million metric tons of goods were handled here. Through 1974 and 1975, however, that figure slumped to 273 million tons as the recession took hold and the West cut back on the use of newly expensive oil.

For this year, port officials are predicting the first post-embargo rise, by about 5 per cent to some 285 million metric tons.

Though vast quantities of many products are handled here, it is crude oil that accounts for more than half of the port's business.

This year, the trend is once more on the rise, to about 90 million tons for nine months. Port officials say crude holds the key to eventual recovery, and they estimate that it will still be another two to four years more before they regain 1973 levels.

Shah Says Fiat Lost Chance to Move Into Iran

From Wire Dispatches

MILAN, Dec. 28.—The Shah of Iran said in an interview published here today that Fiat had "lost all its chances" to do "great things" in Iran because of the recently established link with Libya.

The Shah, in an interview in Il Giornale Nuovo, referred to the pact announced Dec. 1 under which the Libyan Arab Foreign Bank will control 13 per cent of the Italian automaker—the second largest holding after the Agnelli family's 29-per-cent stake.

He said the Libyan move was "realistic" and similar to one that he had proposed to the Agnellis.

"I certainly would have done the same thing (as Libya)," the Shah was quoted as saying. "On many occasions I have proposed various cooperation agreements with the Agnellis, but I do not understand why they always said no."

The Shah said that "five years ago Fiat could have done great things in Iran. Others have done great things, many others. But Fiat will never again be able to do these things—in Iran, Fiat has lost all its chances."

Russia Offers To Barter Oil With India

Would Swap Crude For Indian Iron, Steel

NEW DELHI, Dec. 28 (AP).—The Soviet Union has offered to provide India with 5.5 million tons of crude oil over the next four years in a barter exchange for Indian export product, the Indian government announced today.

According to the announcement, the Soviet Union would provide 1 million tons of crude in 1977 and 1.5 million tons in each of the following three years.

India would pay for the crude through a variety of exports that are expected to be dominated by pig iron and steel products during the initial year of the barter arrangement, the statement added.

An Indian spokesman said that a formal agreement on the crude sale is expected to be signed in Moscow in February.

The arrangement would enable India to cut its foreign exchange outlay for crude imports, now costing about $1.5 billion annually for the approximately 14 million tons of imports.

The announcement came at the conclusion of week-long trade talks here. The two countries signed a protocol tonight envisaging a total turnover in India-Soviet trade during 1977 of more than $1 million. The estimate does not include the possible crude barter arrangement.

Under the new protocol for increased quantities of petroleum products, sulphur, various nonferrous metals and selected engineering goods.

It also has agreed to take from India increased quantities of automobite storage batteries, hand tools, aluminum power cables, electronic instruments, parts and computer software, drugs and medicines, paints, detergents, cosmetics, tires and finished leather in addition to leather shoes.

Japan Prices Steady

TOKYO, Dec. 28 (AP-DJ).—Japan's nation wide consumer price index in November was unchanged from October and up 9.1 per cent from the year-earlier month at 112.4 on the 1975-based index, the government announced today.

Dow Index Inches Over 1,000-Mark

NEW YORK, Dec. 28 (IHT).—The Dow Jones industrial average closed above the magic 1,000-mark today, the first time since Sept. 27.

Wall Street's post-Christmas rally carried the blue chip average to 1000.08 for a gain of 3.99 points for the day. At 3 p.m., it was up 6.32 at 1002.41. The index has jumped past 1,000 a dozen times this year, but each time it has met with resistance and fell back.

Brokers say the market's current strength arises from spreading hopes that the economy is perking up again after a sluggish second half. Helping to swell demand for securities were the belief among investors that U.S. business conditions may be improving, optimistic comments by President-elect Jimmy Carter dealing with the return of confidence in the economy and a good performance in many top quality shares.

Volume totaled 25.79 million, compared with 20.13 million yesterday.

Singer rose 1 1/3 to 19 1/4. The company said it expects significant" profit gains in 1977 and may resume quarterly dividend payments.

Among the actively traded issues, Rorer-Amchem was up 3/4 at 19 5/8, NCR rose 3/8 to 36 1/2, RCA was up 1/2 at 26 7/8 and General Electric gained 1 1/4 to 54 7/8.

Bectrice Foods added 5/8 at 23 1/8, after reporting higher quarterly earnings.

Royal Industries was unchanged at 13 3/4 after a delayed opening. Lear Siegler, which has offered to purchase Royal, said so far it has received 5.1 million shares of Royal stock, or 87 per cent. Lear gained 1/2 to 13 3/4.

General American Oil fell 1 3/4 to 62, and Technicare was off 1 1/4 to 37 5/8.

On the American Stock Exchange prices advanced in active trading. The index rose 0.88 to 108.09.

Houston Oil rose 1/2 to 46 1/2, but Syntex eased 1/8 to 22 3/4.

Cook Industries dropped 5/8 to 16 7/8. It reported a loss in the second quarter against a profit a year earlier.

In Chicago, soybean futures rallied for nearly 7 cents a bushel in the closing minutes of trade and set off a buying spree that lifted the prices of most other commodity futures. Soybean meal advanced $2.50 a ton while soybean oil prices rose around 15 points. Wheat and corn futures closed around 2 cents higher.

Exporters Are Underselling U.S. on World Wheat Mart

NEW YORK, Dec. 28 (AP).—The United States increasingly is being undersold in the world wheat market.

"It isn't uncommon these days to pick up a cable from abroad and read that Canada, Argentina, Australia or even some other nations have undersold us in a wheat deal by 30 cents a bushel," says a New York-based exporter.

Recently, Egypt, traditionally a U.S. customer, bought wheat from Canada and Australia, and Brazil bought wheat from Argentina at prices well below U.S. quotations. Egypt bought its wheat on credit—the first time in about a decade that a wheat seller other than the United States has been willing to extend credit terms. Other sellers are offering credit, too.

Last week, U.S. exporters offered to sell wheat to foreign nations for $106 a metric ton, but Canada and Argentina were willing to sell for $92 a ton and by week's end, even lower-priced offers showed up in the world market, exporters say.

Competition is expected to intensify in coming months, exporters say. Both Argentina and Australia are about to start harvesting new crops of wheat, which they will be anxious to sell.

The reason for the stiff competition is that world wheat production increased about 15 per cent this year from 1975, the U.S. Agriculture Department estimates. Moreover, production rose in China and India, which normally import a lot of wheat. As a result, the Agriculture Department calculates, the world wheat-export trade is expected to shrink about 3 per cent this year.

The United States has exported 573.6 million bushels of wheat since the new crop year began June 1, down from 734.2 million bushels in the year-ago period. The Agriculture Department first estimated exports in the 1976-77 crop year at 1.1 billion bushels but has lowered its forecast to 1 billion. Exporters say total exports this season may fall below 900 million bushels, and they add they are not optimistic about export prospects next season.

An Agriculture Department official acknowledges that under current circumstances the department's export projection probably will have to be lowered. He adds, though, that if world prices drop low enough to make the grain economical to feed to livestock, the 1 billion-bushel export projection could prove accurate.

While U.S. competitors are busy selling their wheat, U.S. wheat farmers are impounding more and more of their grain in the government crop-loan program. The national average loan rate—which determines how much farmers can borrow from the government and which also act as a floor for market prices—was raised to $2.25 a bushel on Oct. 13 from $1.50. By Nov. 30, some 145 million bushels had been placed in the program and more is coming in. Estimates of the amount of wheat that eventually will go into the loan program range from 400 million to 700 million bushels.

If the Carter administration boosts the loan rate, as has been discussed, as much as 750 million bushels may be impounded in the loan program, one grain-market observer estimated.

OPEC Loans Go To Six Nations

VIENNA, Dec. 28 (UPI).—The Special Fund of the Organization of Petroleum Exporting Countries allocated last week long-term loans to six developing countries as part of a program to support their balances of payment.

The loans were allocated to Sudan, \$7.45 million; Western Samoa, \$1.6 million; Sri Lanka, \$8.1 million; Guinea, \$2.35 million; Pakistan, \$21.45 million, and Central Africa, \$1.75 million.

Each loan is given interest-free for 25 years.

Italy Payments Surplus Tied to Capital Reflow

ROME, Dec. 28 (Reuters).—Italy had a provisional balance-of-payments surplus of 382 billion lire (about \$437 million), in November compared with a deficit of 76 billion lire in October, the Bank of Italy said today.

The bank said the improvement was partly due to the return of some \$704 million of Italian capital which had been invested abroad.

The bank also said official reserves rose \$1.11 billion in November to \$6.44 billion.

48 Lost Off Celebes

JAKARTA, Dec. 28 (Reuters).—About 48 people are feared drowned after a government boat sank in a storm off central Celebes a week ago, a Jakarta paper reported today.

BUSINESS OPPORTUNITIES

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

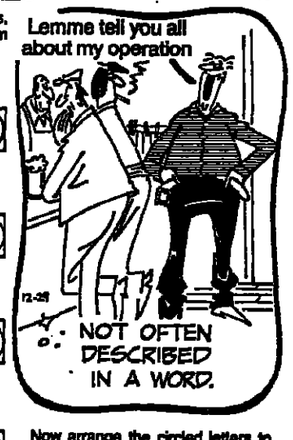
JUMBLE® THAT SCRAMBLED WORD GAME
by Henri Arnold and Bob Lee



Unscramble these four Jumbles, one letter to each square, to form four ordinary words.

BALFE

MAXIO

SCOTUC

LUDSON

Now arrange the circled letters to form the surprise answer, as suggested by the above cartoon.

Print answer here: "○○○○○○"
(Answers tomorrow)

Yesterday's Jumbles: ADULT ENTRY ROSARY BEFORE
Answer: Plates sometimes used for everyday eating—DENTURES

DENNIS THE MENACE

"DON'T SAY NOTHIN' ABOUT BEIN' COLD AND WET... THAT'S THE *WORST* THING YOU CAN TELL A MOTHER."

BOOKS

BOULEZ

Composer, Conductor, Enigma

By Jean Peyser. Schirmer-Macmillan. 303 pp. $12.95.

Reviewed by Donal Henahan

OF all the authors, the biographer in-depth is the most optimistic, and the most surely doomed to failure. Who can ever know another human being? The biographer's self-imposed duty, however, is to do the impossible, to dive deep beneath the surface of appearances and return with another person in tow. It is enough to give one the bends just to think about the presumptuousness of such a mission.

But Joan Peyser was not daunted. An early enthusiast of Pierre Boulez, she set out in 1971 to write a book about the French conductor after he had been appointed music director of the New York Philharmonic. The appointment took most of the music world by surprise because Boulez had built his reputation as an avant-garde composer, an uncompromising promoter of new music and the J. Walter Thompson of the post-Webern school of serial composition. He took the New York post, he made clear, to educate audiences out of what he regarded as a necrophilic obsession with 19th-century music.

Mrs. Peyser's book, "Boulez: Composer, Conductor, Enigma," is full of fascinations for anyone who thinks at all about the dilemmas facing composers, musicians, orchestras—and listeners. The Boulez odyssey from enfant terrible composer to wealthy maestro is rather depressing in some ways, but also enormously instructive. If Pierre Boulez, who is deferred to as a genius even by his enemies, could not turn musical history around by his talent and force of will, it may be that music has a mind of its own and wants to go another way.

It seems now, at any rate, that the Boulez impact on New York has been slight, and his mission a failure. The 20th-century Viennese composers he promoted most heavily—Schoenberg, Webern and Berg—occupy just about the place in public affection they did before the Boulez period. And soon he will be gone, leaving New Yorkers still not really sure why he decided six years ago to change the life of a composer for that of an orchestral traffic cop, and why he now has decided to return to France and spend his time monkishly investigating the mathematical and acoustical bases of music.

Mrs. Peyser arrives at some explanations but her expedition in search of the man behind the Pierre Boulez mask will infuriate many people, including many who know him as personally charming and professionally flexible and agreeable. What a man does should count more than what he is, these acquaintances may protest, so let's have an end to curate psychiatry and get on with assessing Boulez as a musician and cultural force.

Mrs. Peyser, however, is careful to show Boulez operating efficiently in his craft, and especially at trying to promote his own vision of a new-music commune in New York. She contends that he started with the unashamedly cynical idea that the audience, at least in the beginning, would have to be largely composed of snobs, ignoramuses and dilettantes. One of the book's chief contributions, in fact, may be its explanation to the layman of how the various contemporary music "families" operate on behalf of their favorite composers. This is a useful guidepost to the criss-crossing loyalties, the vendettas, the intrigues and the conflicting interests of the New York music, and it explains how Boulez attempted to solicit the opposing forces behind him and why he found it so difficult. Was his own divided nature at fault?

The author suggests so, at least, and digs hard to find the key to Pierre Boulez's strange personality. He is shown to us as a child who loved his mother and hated his father, as a brother with an almost Nietzschean attachment to his sister Jeanne (the book is dedicated to her as "the source"), as the product of rigid Jesuit upbringing, as the arrogant young provincial rebel Boulez's personality and character are discussed with candor and it is not a pleasant picture. We see and hear of a brilliant talker, the man who can be overwhelmingly charming, the unfeeling technocrat, the loner who knows how to use people but wants no friends, the cold and emotionally constipated artist.

How well all this corresponds to Pierre Boulez in reality, few people really could say. Mrs. Peyser herself came to her disillusioning conclusions about the man after a fairly long social and business relationship and, from the evidence she presents, it would appear that her frustration stems from not discovering the "real Pierre Boulez" may have deepened her dislike.

It might be possible to put all of Mrs. Peyser's findings into a computer and arrive at a psychometrical profile of Pierre Boulez, but who would presume to be the programmer? It might well be discovered that there is no human being behind the chilly facade known as Pierre Boulez, and in fact Mrs. Peyser's book could be used to support that thesis. But it is also possible that the man is just what any of us seem to acquaintances: charming to this one, cruel to that one, cold in New York, warm in London, and afraid of being undressed in public by anyone, friend or enemy. John Cage, who once thought himself a Boulez friend, tells of driving back from Cape Cod with him and, as chance would have it, running out of gas: "Pierre thought that was inelegant." They eventually fell out, and Cage is quoted as saying: "Now when I think of the former I see the face, I no longer see the electricity. What I find is a look around the eyes, nose and mouth that is the look of a bad animal, an animal waiting for the kill."

Is that, then, the real Pierre Boulez? Perhaps even John Cage does not know. Certainly Mrs. Peyser leaves us wondering, though inclined to think so. But aren't we all, you and I and Pierre Boulez, enigmas waiting to be solved but afraid to let it happen? There is a Henry James story about a man who builds his life around the creation of such an enigma about himself, living for a time with the knowledge that if and the second were to be unwrapped, nothing would be found. The most vivid impression one carries away from Mrs. Peyser's biography is of such just such an eerie void. In the end, we know everything about Pierre Boulez except who he is. The fox has escaped.

— Donal Henahan is a music critic for The New York Times.

BRIDGE — By Alan Truscott

On the diagramed deal an analyst present suggested that North-South would reach four spades after North opened one heart. The auction shown is a reasonable one, although North might well consider jumping to four spades at his final turn since his support for that suit is very much better than it might be.

After West led the diamond king and shifted, perhaps, to a trump, the declarer must obviously tackle hearts. When the queen falls conveniently on the second round, he draws trumps, winning the second round in dummy with the nine. If both opponents follow, he cashes the spade king and makes 12 tricks.

However, if the trumps divide 4-1, the declarer reverts to hearts. With four trumps to his right, he could simply continue hearts until East ruffed and still have an entry to the dummy after overruffing. But with four to his left, he would have to play a heart winner and discard a loser, emerging with 10 tricks after West ruffed and led the diamond ace.

The analysts contemplated the possibility that some players might reach six spades.

"Six spades is not such a good slam," they stated, "but we've all been in worse ones. As long as the heart queen falls in two rounds, 12 tricks are easy."

Easy, but only if looking at all four hands. If South was playing in six spades and received a heart diamond lead followed by a shift, he would have to plan to make five spade tricks, six heart tricks and the club ace.

But the best chance of making six heart tricks is to take a club round finesse of this jack; it is much more likely to have East than East to have a singleton doubleton queen. So unless South misplays the hand or gets info the opponents' cards, all spades will fail.

THE ROCKIES ARE CRUMBLING—Atlanta Flames' Tom Lysiak falls after shooting puck, which was blocked, and about to land on the Colorado Rockies' goalie Doug Favell, with knee pads, and Tracy Pratt while, in bottom photo, referee Bruce Hood is caught between battling Rick LaPointe, of Detroit Red Wings, who is losing his jersey, and Kings' Dave Hutchinson. Both players received 5-minute penalties. Los Angeles won NHL contest, 7-4.

Raiders Convince Bookmakers—Favored by 5½

By William N. Wallace

OAKLAND, Calif., Dec. 28 (NYT).—The betting margin—"the line"—was established yesterday for the Super Bowl by a legal gambling emporium in Nevada called Harrah's Tahoe Race Book. The Oakland Raiders, who will meet the Minnesota Vikings at the Super Bowl-in-the-Rose Bowl on Jan. 9 at Pasadena, are favored to win the new year's first ultimate football game by 5 1/2 points.

That seems eminently fair.

However, one presumes that the cerebrations required to establish that line were influenced by the McLuhanisms of Sunday, meaning watching television for six hours as Minnesota squeaked by Los Angeles and Oakland marched by Pittsburgh.

This presumption cannot be confirmed. A man who identified himself as merely David at Harrah's Tahoe Race Book refused to join in a rationalization of how 5 1/2 was derived although he agreed to spell the name of his establishment.

It must be understood that pro football has moved apace since the third Super Bowl of 1969 when the Baltimore Colts were made 17 or 18-point favorites—depending upon the source and the time of day—over the New York Jets and then lost by nine.

The day of the 17 or 18-point favorite, or even the 10, in Super Bowl games is long gone because the teams that get there are about the same as to strengths and weaknesses before any kickoffs are made.

The reason the Raiders are pegged at 5 1/2 is that Sunday they played a strong game and put 24 points on the scoreboard—14 of which were honestly earned at the end of long drives—against the best defense in pro football.

Meanwhile, the Vikings were born again several times in their 24-13 victory over the Los Angeles Rams. Luck indeed may be the residue of design, to quote Vince Lombardi, but how many times can a team count on a blocked punt, a 90-yard touchdown run after a blocked field-goal attempt, plus two key interceptions? The establishment of a favorite at a specific point margin is not accomplished by relying on the turnovers that so favored the Vikings.

So may have the 14-degree temperature at Bloomington, Minn., a condition which better suited the Vikings than the Rams. "How do you get used to that sort of cold?" asked Jack Youngblood, the Rams' defensive end who played so well. "Environment is 90 per cent of what you are and you can't shut out this kind of environment."

It will not be 14 in Pasadena but more like the 55 degrees in which the Raiders performed so competently here Sunday.

Also in Pasadena there will be no principals missing on account of injuries, as was so here.

Franco Harris, Rocky Bleier and Roy Gerela of the Steelers were merely spectators along with other millions as they stood forlornly on the Pittsburgh sidelines. Did their absence make a difference, and if so how much?

Chuck Noll, their coach, said it made a difference of 50 per cent in his offense, but the Raiders said they would have won even if the Steelers had Red Grange, Jim Brown and Lou Groza on the field.

Did the Steelers hide the absence of these key offensive players during the days leading up to the game? No, they did not but the betting line, which continued to favor Pittsburgh by five points, never took into account the official word from the National Football League. The word for Harris, Bleier and Gerela always was doubtful.

In reporting injuries each NFL team is required to choose one of five words to describe the availability of a wounded player in the upcoming game. These are, in ascending order, out, doubtful, questionable, possible and probable.

Gerela had been kicking, but poorly, in recent games with a pulled muscle in his thigh. He had neither power nor distance so he was passed by in favor of Bobby Walden, the veteran punter, for kickoffs and Ray Mansfield, the veteran center, for placements.

Bleier was definitely doubtful because of a sprained toe. Harris was a maybe right up to game time. He had some injections to ease the pain of cracked ribs but he could not breathe comfortably.

That is all history now. The Raiders had a big team party in a hotel near the stadium here Sunday night and next Monday they will fly south to the University of California at Irvine, their training site.

The Vikings, in a lovely dash of irony, will prepare at the Rams permanent practice place in Long Beach.

Four Raiders are still around who were on the only Oakland team to play in a Super Bowl, the 1967 outfit that lost to Green Bay in Miami. These are Pete Banaszak, Gene Upshaw, Fred Biletnikoff and Willie Brown.

Two-thirds of the Vikings know all about the Super Bowl hoopla because of Minnesota's losses in that event to Miami at Houston in January of 1974 and to Pittsburgh in New Orleans the next year. There are seven who go back to the Vikings' first failure at a Super Bowl, the defeat in New Orleans in 1970 against Kansas City.

Tarkenton: A Positive Attitude Despite Poor Super Bowl Past

By Dave Brady

WASHINGTON, Dec. 28 (AP).—Minnesota Viking quarterback Fran Tarkenton, with his suspect throwing arm and injured right knee, stuck his neck out a little Sunday, saying, "We want the world to know, this time we're going to win the Super Bowl."

For the record, the Vikings lost to Kansas City, 23-7, in the fourth Super Bowl; to Miami, 24-7, in the eighth, and 16-6 to Pittsburgh in the ninth.

Joe Kapp was the quarterback in the loss to Kansas City in which the Vikings were held to 67 yards rushing and Dave Osborn scored on a four-yard run.

Tarkenton was in the command slot in the loss to the Dolphins and scored the touchdown on a four-yard bootleg.

Tarkenton also was at the controls against the Steelers two seasons ago and produced only 119 yards of total offense, including a Super Bowl low of 17 yards rushing.

Tarkenton has more weapons now. All-purpose back Chuck Foreman has matured into the most valuable player in the National Conference, wide receiver Sammie White is rookie of the year, and wide receiver Ahmad Rashad is having the best season of his four-year career.

Tarkenton did not appear to be as frisky and sure-footed as usual on Sunday. He was sacked four times and there was speculation that he also had arm trouble, connecting on only 12 of 27 passes for 143 yards and no touchdowns, in beating Los Angeles, 24-13. He was intercepted once because wide receiver White was held up by defenders.

The quarterback said, "My arm wasn't bothering me, but my knee bothered me all week. I hurt it last week against Washington (running for a first down) and didn't work much this past week."

He also made light of a sore arm in preparation for the ninth Super Bowl, but after the season consulted with baseball pitcher Mike Marshall on how to rehabilitate it.

Dr. Donald Lannin, Vikings team physician, who is an orthopedist, said yesterday from his office, "Fran's arm is okay. Some of my patients told me today they had heard reports on the telecast of the game that Fran's arm was injured. But he was off in his timing because he rested his knee last week.

"He was throwing off balance because of the knee. He uses that right knee to back up to pass and plants it to throw. When he can't move around freely his passing isn't as effective as usual. He practiced only one day.

"His knee is okay. What he had two seasons ago was similar to a pitcher's sore shoulder."

A club spokesman disclosed yesterday that Tarkenton took a bump on the inner side of his upper arm from a defensive lineman on the one day he practiced, Thursday. The arm was extended to hand off the ball for a running play and his elbow was bent backward.

The spokesman said that if it had been a hard hit, Tarkenton would have suffered hyperextension of the elbow, but he did not have the physician examine it.

Tarkenton carries a leather-covered iron ball, resembling a shot put, during practice when he is not otherwise active, as part of the regimen developed by pitcher Marshall.

It serves as a weight-lifting device to strengthen a little muscle in the upper arm that is called on to stop the forward motion of the arm after a pass is released. Early in 1974, the muscle was damaged a bit and he had a sore arm all season.

The spokesman reported Tarkenton as saying before adopting the regimen that a quarterback is the player in the worst of shape in training camp because he usually limits his action to dropping back and throwing. Now, Tarkenton does wind sprints and sit-ups and says he has never been in better condition.

Against the Rockies, Flames Able to Overcome Adversity

ATLANTA, Dec. 28 (UPI).—Colorado coach John Wilson once was an executive with the Atlanta Flames and he knows the team's history well. To Wilson, the entire existence of the Flames has been one of pressure and strain.

"It's unfortunate," Wilson said yesterday after the Flames had routed his National Hockey League Rockies, 6-2. "Every game they play they have to strain themselves to maintain their playoff position. The division they are in is so tough.

"Looking back through their history, it's always been that way. They're always under so much strain."

But Eric Vail, the Flames' leading goal-getter, says he thinks Atlanta has finally learned to live with the pressure.

"After that streak we had a few games back, eight in a row without a loss, I think we realized that we can play with anybody," Vail said.

"It gave us more confidence. Of course there's pressure. With everybody saying the team will move or the team will fold (because of financial problems) that causes pressure, too. But I think our guys are adapting to it. It causes added incentive to win and bring the fans in."

A crowd of 12,613, better than average in a holiday week, watched the Flames jump to a 3-0 lead. Vail assisted Tom Lysiak on the first goal of the game and then scored the third.

Kings 7, Red Wings 4

At Detroit, former Detroit center Marcel Dionne notched three goals to spark Los Angeles to a 7-4 National Hockey League victory over the Red Wings. Dionne scored in each period of the penalty-marred game. Referees handed out a total 116 minutes in penalties, 64 to Los Angeles.

Canadiens 4, Barons 2

At Montreal, Serge Savard and Guy Lafleur broke a 2-2 tie with third-period goals to lead the Canadiens to a 4-2 victory over Cleveland. The victory gave the Canadiens 58 points, 23 better than Pittsburgh atop the Norris Division.

Flyers 5, Canucks 1

At Vancouver, British Columbia, Reggie Leach scored two goals to lead Philadelphia to a 5-1 triumph over the Canucks and into first place in the Patrick Division. The Flyers scored once in the first period and twice in the second and third periods.

WHA Whalers Defeat Russians In Ice Hockey

HARTFORD, Conn., Dec. 28 (UPI).—The New England Whalers beat the Soviet Union national team, 5-2, last night and their dressing room after the game was noisy. Over in the Soviet locker room, the team lately dressed for a trip to Cincinnati and the second game of an eight-game tour of World Hockey Association cities.

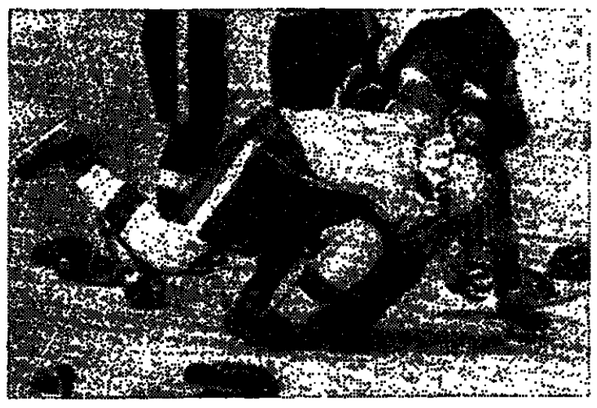
Boris Kulagin, senior coach of the Soviet team, had only one comment: "The Whalers played a good game."

Whalers' coach Harry Neale admitted he was a "little surprised" at the victory, but said he "knew they could do it."

Whalers' goalie Cap Raeder, who stopped 31 of 33 shots, said it was "one of my biggest thrills I never forget it."

Twenty-one penalties were called in the game, 11 against the Whalers.

The Soviet team is the same one that finished first in the just-completed Izvestia Cup tournament in Moscow. Many of the players were on the team which finished third in the six-team Canada Cup international tournament last fall. The team is preparing for the world championships scheduled for April 7, in Vienna.



Before the game, Viacheslav Kloskov, Soviet delegation head, said that as far as North American teams are concerned, the Boston Bruins, New York Islanders, Montreal Canadiens and Philadelphia Flyers are in a class by themselves—with the Winnipeg Jets "No. 5."

The Jets finished fourth in the Izvestia tournament.

Two goals by high-scoring Mike George Lyle led the Whalers last night. Also scoring for the Whalers were Garry Unger, Tom Earl and Gary Macgregor. Aleksander Maltsev and Aleksander Yakushev scored for the Russians.

Notre Dame Defeats Penn State in Gator Bowl

United Press International.

Notre Dame defender Joe Restic stops Penn State's Bob Torrey in first-period action in the Gator Bowl.

JACKSONVILLE, Fla., Dec. 28 (UPI).—Al Hunter, the first Notre Dame player to gain 1,000 yards in a season, scored two first-half touchdowns last night to lead the Irish to a 20-9 victory over Penn State in the Gator Bowl.

Hunter, picking up 76 yards in the first half, scored on a one-yard plunge with 2 minutes 26 seconds left in the opening period and on another one-yard smash 2:20 before halftime for the only touchdowns the favored Irish needed in a game dominated by their defense.

Irish defenders turned back two Penn State scoring threats in the final period with interceptions. The only time Penn State got beyond its 32 in the first half was on its first possession, when they drove 55 yards to the Notre Dame 10 and had to settle for a 3-0 lead midway through the first period on a 26-yard field goal by Tony Capozzoli.

A 65-yard return by Terry Eurick on the ensuing kickoff put Notre Dame at the Penn State 35 and, 11 plays later, Hunter gave the Irish a lead they never gave up.

Notre Dame was inside the Penn State five twice in the first six minutes of the second period, but was held on downs the first time at the two and then settled for a 23-yard field goal by Dave Reeve.

Hunter's second touchdown capped a 51-yard Irish drive and Reeve kicked his second 23-yard field goal as time ran out in the first half to give Notre Dame a 20-3 lead.

At that point, Notre Dame was having an easy time in its first meeting with Penn State in 48 years—but the underdogs dominated second-half play with three late scoring opportunities.

Notre Dame turned back the first Penn State threat when Jim Browner intercepted a Chuck Fusina pass in the end-zone. Bruce Clark blocked a Notre Dame punt to give Penn State the ball at the Irish eight and this time Fusina threw a touchdown pass to Matt Sinsey to end the scoring with 8:37 left to play.

The victory was Notre Dame's fourth in five meetings over Penn State; they played to a scoreless tie in 1925. Although they have not met since 1928, they are scheduled to resume regular season competition in 1981.

Celtics' Cowens Plans to Return For Next Season

QUINCY, Mass., Dec. 28 (UPI).—Dave Cowens of the Boston Celtics plans to resume his basketball career in September when the team opens training camp for the 1977-78 season, he disclosed yesterday in an interview with the Patriot Ledger.

Cowens, who took an indefinite leave of absence from the team Nov. 10, discussed his plans in an interview from Cold Spring, Ky. He said he would be taking a job Jan. 11 as assistant general manager at the New England Harness Raceway in Foxboro, Mass.

As for returning to the Celtics, Cowens said, "I'll definitely be there the first day training camp opens. I'll be ready to go at it again. Whether the Celtics want me or not, I'll be there."

He said, "I will not be playing again this season."

When he left the team, he said he had lost his enthusiasm for the game and needed a rest. Since that time, the defending National Basketball Association champions have remained in contention in the Atlantic Division, but struggling in the absence of the 6-foot-9 center.

Hemmi First in Giant

ELM, Switzerland, Dec. 28 (AP).—Swiss Olympic gold medallist Heini Hemmi edged Andreas Wenzel of Liechtenstein by a tenth of a second to win the European Cup giant slalom race today in this Alpine resort.

Marquette Gains in College Tourney Season

NEW YORK, Dec. 28 (UPI).—This is a classic week in college basketball—as in Far West Classic, Louisiana Classic, Milwaukee Classic, Motor City Classic, Rainbow Classic, Reno Classic and the rest of the holiday tournaments.

A number of the tourneys began last night and the rest start during the week.

In the first round of the Milwaukee Classic, Butch Lee scored 17 points and No. 14 Marquette stopped Clemson's high-scoring offense to hand the nation's 11th-ranked team its first defeat after seven victories, 74-66.

Marquette led 28-23 at the half, then used a full-court press to stop Clemson's fast break and build a 42-26 lead with 11:30 left. The Warriors switched to a tight zone the rest of the way to contain the nation's second-highest-scoring team, which had averaged 104 points a game.

Bo Ellis had 14 points and Gary Rosenberger 11 for Marquette, while Stan Rome led the Tigers with 21. Wayne (Tree) Rollins, Clemson's 7-foot-1 all-America candidate, scored only two points.

Marquette seeks its ninth straight Milwaukee Classic title tonight against Wisconsin, which edged Boston College, 74-66.

Phil Ford scored 26 points and Walter Davis added 18 as No. 6 North Carolina overcame a 46-point effort by Anthony Roberts to beat Oral Roberts, 100-84, in the opening game of the Far West Classic in Portland, Ore.

Basketball Poll

(The United Press International Board of Coaches college basketball ratings with won-lost records through games of Sat., Dec. 25, and number of first-place votes in parentheses.)

	Pts
1. Michigan (32) (5-0)	385
2. Notre Dame (1) (7-0)	275
3. San Francisco (4) (12-0)	244
4. Alabama (6-0)	218
5. Cincinnati (7-0)	191
6. North Carolina (5-1)	143
7. Kentucky (6-1)	116
8. UCLA (7-1)	97
9. Nevada-Las Vegas (8-1)	68
10. Wake Forest (7-0)	55
11. Clemson (7-0)	48
12. Minnesota (8-0)	40
13. Arizona (8-1)	37
14. Marquette (4-2)	34
15. Louisville (5-2)	24
16. Maryland (7-1)	17
17. Arkansas (8-0)	14
18. Syracuse (7-1)	12
19. Iowa (7-0)	9
20. Oregon (5-1)	7

Roberts, who made 21 of 38 shots, scored 25 points in the first half to keep Oral Roberts within four points, 48-44. But North Carolina outscored Oral Roberts 14-4 to take a 76-64 lead with 9:37 left.

In the nightcap of the Far West Classic, 20th-ranked Oregon stopped high-scoring Bowling Green, 66-54. The Ducks, the third best defensive team in the country, were sparked offensively by Greg Ballard with 19 points and Rob Closs with 16.

Scott Sims, who hit six straight free throws during a technical foul barrage late in the first half, scored 26 points to lead No. 19 Missouri to an 81-67 victory over Iowa State in the opening round of the Big Eight Holiday tournament.

With 1:23 left in the first half, Stan Ray scored for Missouri and was fouled. Iowa State coach Lynn Nance, who had received a technical foul earlier in the game, and assistant coach Dave Harshman began complaining. Harshman was assessed a technical and Nance two more, which resulted in his ejection.

In the second game of the tourney, which Missouri has won four of the past five years, Kansas State defeated Oklahoma State, 74-56.

Longshot Victor in Irish Sweeps As Grand Canyon Finishes 8th

LEOPARDSTOWN, Ireland, Dec. 28 (AP).—Master Monday, a 22-to-1 shot ridden by John Harty, romped to victory in the Irish Sweeps Hurdle horse race at this famous track today, 2 1/2 lengths ahead of Straight Row.

Straight Row, 6-1 with the bookies, beat Dublin Express, 25-1.

The favorite, Grand Canyon, finished eight in the two-mile race on a soggy track hit by rain, then frost and finally a snowfall before the race. The hurdle race was the last of the year's four races associated with the Irish Sweepstakes.

Grand Canyon's backers feared rain and a heavy track. The New Zealand horse, at odds of 7-2, had earlier run up a string of victories in Britain, France and the United States.

Master Monday's victory means that ticketholders who drew the horse in the sweepstake will pick up £75,000 ($133,000) apiece.

Those who drew the second-placed horse won £20,000 and the prize for the third-placed was £10,000.

American, S. African Win in Junior Tennis

MIAMI BEACH, Dec 28 (Reuters).—John McEnroe of the United States and Marise Kruger of South Africa won the singles titles in the Orange Bowl junior tennis tournament here yesterday.

McEnroe took the boys' crown with a 7-5, 6-1 victory ove fellow-American Eliot Teltscher and Kruger, rated No. 1 junior in the world, beat Ann Smith of the United States, 2-6, 6-3, 6-4, in the girls' final.

Saban Goes to College

MIAMI, Dec. 28 (AP).—Louis Saban, a former coach of the Buffalo Bills of the National Football League, yesterday was named head football coach of the University of Miami. He replaces Carl Selmer, who was dismissed early this month.

Vilas Advances To 3d Round

SYDNEY, Dec. 28 (AP).—Top-seeded Guillermo Vilas of Argentina beat Australian Rod Frawley, 6-2, 7-5 today and advanced to the third round of the New South Wales Open tennis championships.

Vilas will meet promising Australian Brad Drewett in the third round following Drewett's 3-6, 6-4, 6-3 victory over fellow-Australian Bob Carmichael. Ken Rosewall scored a 6-3, 6-3 victory over American Vic Amaya.

In other second-round men's singles matches, defending champion Ross Case beat fellow-Australian Dick Crealy, 6-3, 6-1; Australian Phil Dent beat Richard Drysdale of Britain, 6-4, 6-4, and Australian Chris Kachel beat American Brian Teacher, 6-3, 6-3.

A Festive Meal

WASHINGTON—Holiday eating can be divided between large festive lunches and dinners, and meals served during football games. The football fare has been largely ignored, as the food pages of newspapers and magazines devote all their space to how to stuff a goose, how to baste a turkey or how to roast a rib.

Buchwald

And yet football eating is far more important to the welfare of the family and has much greater significance for most people during this merriest time of year. Here is the perfect football TV menu, one that has been handed down in my family through the generations.

For appetizers we always have a selection of potato chips in a low glass bowl. (We disdain Pringles, which come in a tube with each one the same size. We want a potato-chip assortment so our guests will be surprised every time they put one in their mouths).

Next to the potato chips should be placed a large deep dish (four inches) of salted peanuts. The peanuts should be shelled, otherwise there will be a mess all over the living room as people in their excitement toss the shells around.

Another hors d'oeuvre which we traditionally serve is M and Ms, a colorful candy that looks like medicine pills. The beauty of M and Ms during a football game is the surprise factor. You never know whether you're going to get one with chocolate inside or one with a nut. Also, you can hold at least 40 in your hand at one time while watching the tube.

* * *

All right, that should take care of the appetizers. In some families the lady of the house adds a guacamole or an onion dip for the potato chips, but very few football watchers have time to dip, and usually get furious at their wives and girl friends for serving something they can't grab with their fingers without taking their eyes from the set.

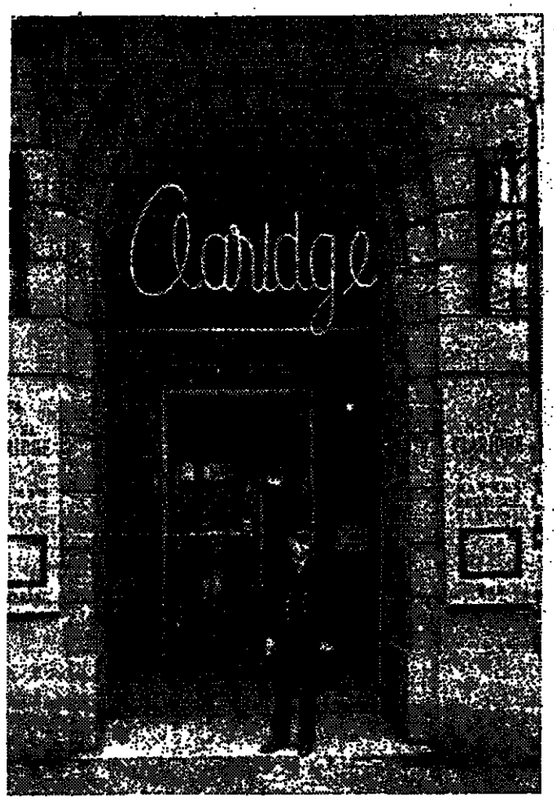
The main course of a football dinner is always the traditional can of beer. In order to prepare the beer, you place it in the icebox for six hours so it will be properly chilled. The beer is then put on a tray and brought into the living room. The lady serving the beer must be very careful in carrying it into the living room or den, as the slightest shaking of it will cause the beer to foam when opened.

The serving of beer during a football game can either make or break the traditional football dinner. If the lady of the house walks in front of the set when placing the tray on the coffee table she can ruin the holiday spirit she has worked so hard to achieve. Always serve the beer behind the viewers and make yourself as unobtrusive as possible. Never say, as you place the beer on the table, "What's the score?" or "Who are the men in the white jerseys?"

* * *

After the main course of beer is served—we prefer cans in our house as we find pouring bottled beer into a glass messy—you can serve the traditional condiments that go with it such as buttered popcorn, Fritos and bacon-flavored chips. This should be followed by pistachio nuts, hard candy and Hershey kisses.

For dessert I recommend Poppycock, a unique popcorn covered with molasses and mixed with walnuts. It is absolutely perfect for a third-down situation when the ball is on the 15-yard line and it's four yards to go for a first down. Poppycock comes in a can, so you can keep it on your lap and not have to reach for it during a crucial play.



The thing to remember while serving the traditional TV football dinner is that, while beer is served as the main course, it can also be drunk with appetizers, dessert and as an after-dinner drink. The lady of the house must always make sure the empty cans are removed and replaced with full ones while the game is in progress. The best way to spoil this nutritious, festive occasion is to make one of the TV spectators go to the icebox and get his own beer.

When it's done right, the TV football dinner can be the highlight of the holiday season, and one every man and male child will remember for years to come.

Ancient Sanctuary

ROME, Dec. 28 (AP).—Archaeologists today announced the discovery near here of what they termed one of the oldest sanctuaries of ancient Rome, perhaps dating back to the foundation of the city, more than 27 centuries ago.

Doorkeeper Victory Mary at his post at Claridge's. AP.

The Disappearing Elegance Of the Champs-Elysées

By Michael Goldsmith

PARIS (AP).—Doorkeeper Victor Mary, who has shaken the hands of princes, maharajas and movie queens in his 39 years at the entrance to the Claridge Hotel, will escort his last guest into a taxi on the Champs-Elysées on New Year's Eve.

The Claridge, one of the French capital's few remaining old-time luxury hotels, is closing its doors to make room for a shopping center.

The disappearance of the prestigious, 215-room Claridge will leave the Champs-Elysées without a single hotel, but with at least eight shopping centers specializing in expensive ready-to-wear clothing, gadgets and souvenirs.

"The Champs-Elysées is not what it used to be," sighed Mr. Mary, 66, as workmen carried the hotel's rented television sets out into a van. "It's become vulgar. There is no elegance left. It's no longer the right street for a hotel like this. Just look around at what they are selling in the shops. No quality."

Fringes of City

The old-fashioned elegance of the Claridge and a few remaining hotels like it has been overtaken by events. Big hotels with up to 1,000 rooms have sprung up on the fringes of the city since World War II. They belong to airlines and conglomerate corporations and make ends meet by catering to large groups and "treating their clients like items of merchandise," Mr. Mary said. "The human touch has gone."

The Claridge—not linked with its elegant namesake in London—was built at the beginning of the century and became a focal point of the city's social life in the twenties.

It was one of the world's first hotels to feature an indoor swimming pool, and one of the first in Europe to offer an American invention known as the cocktail.

Victor Mary started as a bellboy nearly half a century ago, and has never worked anywhere else.

"The twenties, that was the really great time," he recalled. "We were filled with the famous and the wealthy all the year round. The afternoon tea dance was where everyone who was anyone in Paris wanted to be seen. And at night we had dancing and gaiety until the small hours, with everyone dressed in elegant evening clothes. Those were the days."

The Depression

In the Depression years of the 1930s the Claridge came on hard times, largely because the company operating the hotel did not own the building. The old monumental entrance was converted to shops and restaurants, and guests entered the hotel through what used to be the servants' entrance next door.

But the hotel kept its prestige. After serving as a German Army headquarters in World War II, it housed the provisional French government of Gen. Charles de Gaulle following the liberation of Paris.

The Claridge regained its old eminence in the 1950s and kept its fashionable clientele to the end. A hotel spokesman said some 60 rooms would be occupied until the last day—New Year's Eve.

"We have told them that breakfast that day is the last service we can give them," the spokesman said. "They all have to be out of the hotel by nightfall."

The owners of the building, France's largest insurance company, in effect forced the Claridge out of business when the current lease expired by demanding a 3-million-franc ($600,000) annual rent increase, the spokesman said.

No Choice

"We were making a regular profit, but we could not absorb that kind of additional expense," he said, "Particularly as the government would not allow us to increase our prices. So we had no choice but to close down."

The 150 employees are retiring, like Victor Mary, or have found other hotel jobs.

The shops in the Claridge building facing the Champs-Elysées have been given notice and the whole ornate, stone-carved building will probably be demolished.

"Until the last moment, we hoped a miracle would turn up to save us," said Claridge manager Pierre Plousseau. "But the miracle didn't happen. It's very sad."

"The tea dance on Dec. 30 will be a sort of last tango," Victor Mary said. "Of course, we all feel unhappy about it, but I suppose one has to adjust to modern life."

PEOPLE: *Billy Graham: 'That Wasn't Grape Juice'*

Was that really Billy Graham, the Southern Baptist fundamentalist preacher, talking? It was and what he said about drinking was new—for him. "I do not believe that the Bible teaches teetotalism," said the teetotaling Graham. "Jesus drank wine. Jesus turned water into wine at a wedding feast. That wasn't grape juice as some of them try to claim."

* * *

Actor Richard Todd was "quite comfortable" Monday after suffering a heart attack Sunday at his home in the English Midlands. Todd is 57.

* * *

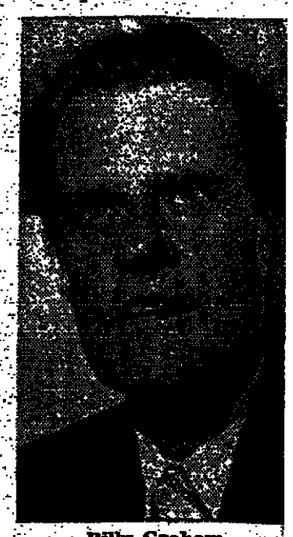
Mae Thelma Carter, wife of Rubin (Hurricane) Carter, had a son Monday in a Paterson, N.J., hospital. The boy's father, convicted with John Artis of murder for a second time on Dec. 21, had sought to be released on bail until after Mrs. Carter had the baby. The request was denied and he remains in jail pending sentencing Jan. 26.

* * *

Modesty is not running amuck in the Ivy League. Asked to measure their intelligence in relation to that of President-elect Jimmy Carter, 48 per cent of the students at Princeton said they were brighter. Half the students at Harvard think they are more intelligent than Carter. At Yale it's 45 per cent. The polls were taken by school papers.

* * *

Elinor Guggenheimer, New York City's Commissioner of Consumer Affairs, has launched a campaign for a 50-per-cent reduction in coffee consumption by U.S. consumers to force manufacturers to cut prices. "With a minimum of 14 cups of coffee a day," she told The New York Times, "I was an addict that's gone 'cold turkey' and stopped altogether." She was sipping tea at the news conference. Coffee in New York City now costs about $2.55 a pound—almost $1 more than it cost last year.



* * *

World middleweight boxing champ Carlos Monzon says he doesn't know the young Italian actress who claims that he is the father of the child she is expecting. Christiana Amodei, known professionally as Crippy Yocard, allegedly made the statement to Novella 2,000, a magazine edited in Milan. "I don't know this woman," Monzon said in Buenos Aires, "and I am sure she is trying to promote herself at my expense." His film, "La Cuesta Está Saldada," has just had its premiere in Rome—Monzon was among the first-nighters.

* * *

The dukedom of Bronte, a large estate on the slopes of Mt. Etna, given to Lord Nelson in 1799 for his victory over Napoleon's fleet, is up for sale. Its present owner is Alexander Nelson-Hood, 28, Viscount Bridport, the only living descendant of the British naval hero. The viscount is an official of a Rome bank. The property, which includes 60 acres and a 25-room, 12th-century castle, was given to Lord Nelson by King Ferdinand IV of the Two Sicilies, in recognition of Nelson's defeat of the French in 1798. "The viscount wants to see if there are any interesting offers," said Frank King, an Englishman who administers the holdings.

Police Close Valley Of Greek Temples

AGRIGENTO, Italy, Dec. 2 (Reuters).—Police have closed Sicily's valley of ancient Greek temples and diverted traffic over looking it after a big landslide Sunday stopped only 150 yards short of one of its most famous ruins.

But officials said there was no immediate danger of further subsidence.

Provisional accommodation was found for about 200 persons living in the valley, site of some of the Mediterranean region's oldest and best-preserved Greek temples dating back more than 2,500 years

United Press International.

Damage after blast in men's store yesterday in Brentford High Street in London.

Gas Explosions Damage Areas of London and Bristol

LONDON, Dec. 29 (UPI).—A midmorning gas explosion injured 38 persons today on a suburban London street crowded with shoppers, the police said.

Six persons were hospitalized. Most of the victims, who included an 8-month-old baby and 18 elderly women, were slightly cut by flying glass.

In Bristol, a predawn explosion apparently caused by a gas leak ripped through a discotheque and restaurant in the city center, destroying several buildings. No injuries were reported but a police spokesman said, "It's lucky this happened when it did—around 4:45 a.m. A few hours later the area would have been packed with sales shoppers and rush-hour traffic."

Both explosions caused damage over 300-yard areas.

Experts said that in both cases gas pipes might have been affected by the current freezing weather in Britain.

The London explosion gutted a men's clothing shop next door to a store where engineers were investigating reports of a gas leak.

Carrillo Release Sought

Police in Madrid Again Clash With Communist Protesters

MADRID, Dec. 29 (UPI).—Several thousand young Communists today resumed illegal "free Santiago Carrillo" demonstrations, braving police clubs and smoke bombs on Madrid's main street to campaign for freedom for the jailed Communist chief.

Smoke billowed on the Gran Via as the protesters chanted, "This is the way you see the power of the Communist party."

The first such violent protest was held seven days ago, hours after police arrested Mr. Carrillo, 62, general secretary of the Spanish Communist party. Because of a ban against him Mr. Carrillo had been living clandestinely in Spain for 10 months.

Police were slow to deploy after the demonstration started and fewer officers than usual seemed to be on the job.

Smoke Grenades

Smoke grenades and tear gas were used. But police were more discriminate than in the past in using their clubs, trying to differentiate between protesters and pedestrians.

Groups of about 1,000 demonstrators were able to assemble and march for a minute or so on the cinema-lined avenue.

Attorney Antonio Rato, a member of the legal team defending Mr. Carrillo and seven other Communist leaders who are in jail, said tonight that his initial optimism concerning a possible release of the Communists was fading.

"Every day the situation gets worse," Mr. Rato told the national news agency Cifra. "Because the demonstrations and pressures from the street are increasing and the government may feel that it is being coerced."

Occasional 'Pop'

After an hour of disturbances in central Madrid, the protesters had practically disappeared as police took over the key intersections. There was only an occasional "pop" from a smoke bomb or rubber bullet.

Since Dec. 22, the Communist-orchestrated "free Carrillo" campaign has produced street demonstrations in many of the country's largest cities.

Meanwhile, in Barcelona this morning, a leftist attacked and seriously injured a policeman.

Police sources said policeman Lucas Jurado was critically hurt when he tried to stop a leftist extremist militant from distributing propagnada at a subway stop.

An appeal filed Monday against the indictment of Mr. Carrillo and the other Communist party leaders is in the hands of the prosecutor and legal sources said the judge could not be expected to make a decision before tomorrow.

As an Italian "free Carrillo" (Continued on Page 2, Col. 3)

A U.S. Summit Is Welcomed By Brezhnev

MOSCOW, Dec. 29 (Reuters).—Soviet leader Leonid Brezhnev has welcomed the prospect of a summit meeting with incoming U.S. President Jimmy Carter, the official Tass press agency said today.

". . . We are for the continuation of such meetings. A date for a new Soviet-American meeting will be decided naturally by mutual agreement and depending on progress in corresponding questions," Mr. Brezhnev was quoted.

Saudis' Fear of a Recession, Red Gains Led to Price Stand

BONN, Dec. 29 (UPI).—Saudi Arabian Oil Minister Ahmed Zaki Yamani said in an interview released today that his country's restraint in raising the price of its oil stemmed from fears of a new recession in the West and Communist take-overs in Italy and France.

Saudi Arabia and the United Arab Emirates split with the Organization of Petroleum Exporting Countries earlier this month and refused to raise the price of their oil by 10 per cent, settling instead for an increase of 5 per cent.

Sheikh Yamani told the weekly Der Spiegel news magazine that "we are extremely uneasy about the economic situation of the West, uneasy about the possibility of a new recession, uneasy about the situation in Britain, Italy and even France and several other nations. And we don't want another regime to come to power in France or Italy."

Asked if by another regime he meant the Communists, he replied, "Yes."

"If an economic recovery does not take place, then this will have not only a political significance for Saudi Arabia. Economically it would affect Saudi Arabia. Finally, there is a third factor: We are working together with you and trying our best. The West can rely on the fact that it has a friend who can do a lot for it," he continued.

Sheikh Yamani said that he saw signs that President-elect Jimmy Carter would fulfill Saudi Arabia's demands for an Arab-Israeli peace.

"Some of us thought that Carter would not be good for the Arab cause and that he would not be neutral. But, in the meantime, there are some indications in favor of the opposite view," he said.

Asked if there was a connection between the Saudi Arabian decision and the Carter administration, the minister said, "Not actually a connection. There is no obligation on the Americans to do one thing if we do another. But in politics, one does one thing and expects something in return."

Asked about Mr. Carter's denial of any connection, Sheikh Yamani said, "If I were Carter, I would also say that.

"These kinds of statements are dictated by the strong Zionist lobby. But no one can deny that there is a connection. Everyone knows that, the United States and even Israel. They hate that and try to hide it, but you cannot hide facts."

Magazine Cites Tax-Free Property Deals

Vatican Is Reported to Own Quarter of Rome

VATICAN CITY, Dec. 29 (AP).—The Vatican and its religious orders own at least a quarter of Rome's real estate and have sold some of their holdings at windfall profits without paying Italian taxes, an Italian magazine reported today.

L'Europeo, an independent weekly, said the transactions—some involving millions of dollars—turned historic religious buildings into modern hotels and banks.

L'Europeo, in an investigative report entitled "Vatican S.P.A.," or the equivalent of Vatican Inc., said the Holy See's holdings extend from buildings in Rome's historic center to over 2,000 hectares on the outskirts of the capital.

It said the Vatican, the worlds smallest state, with an area of 0.2 of a square mile, is "a real empire" in real estate holdings exempted from taxes through the 1929 concordat that regulates relations between the Holy See and the Italian government.

"A fourth of Rome is in the hands of shadow companies registered in Panama, Liechtenstein, Luxembourg and Switzerland," the magazine reported. "A fourth is in state hands [in the form of government buildings]. A fourth is in private hands. The final fourth, or more, is in the hands of the Vatican."

The treaty grants Vatican holdings "extraterritoriality," particularly for such church property as the Basilica of St. Mary Major, St. John Lateran and the papal palace in Castelgandolfo in the Alban hills southeast of Rome.

However, the report said, the Vatican or its religious orders also own extensive property around the Piazza Navona, the Colosseum and the plush Spanish Steps and Parioli sections.

"To give a commercial value to this empire is impossible," L'Europeo said. "It encompasses convents and other housing for the religious that can be—and have (Continued on Page 2, Col. 5)

Blacks Quit Cabinet in Rhodesia

2 Chiefs Form A New Party

SALISBURY, Rhodesia, Dec. 29 (UPI).—Two of four black tribal chiefs appointed to the Rhodesian Cabinet this year by Prime Minister Smith to give it a multiracial character resigned today to form a new party.

Chiefs Jeremiah Chirau and Ksyisa Ndiweni said their movement, the Zimbabwe United People's Organization, will "bridge the gap between the government and the African National Council and other nationalist groups." Zimbabwe is the nationalist name for Rhodesia.

A spokesman for nationalist leader Joshua Nkomo said the new group "will cut no ice with the people of Zimbabwe." Nationalist leaders have frequently called the black Cabinet members "sellouts."

[Reuters reported that the new party—ZUPO—is supported by about 250 tribal chiefs and 450 village headmen, according to a party spokesman. It supports democratic institutions, free enterprise, a role in the free world and would seek an end to intimidation and racial discrimination, the spokesman said.

Tribal Leaders

[Chief Chirau is president and Chief Ndiweni vice-president of Rhodesia's Council of Chiefs, making them the paramount tribal leaders, Reuters reported.

[For some time the government has been trying to persuade "moderate" Africans to participate in attempts to resolve the Rhodesian constitutional dispute. The formation of ZUPO was believed here to have the government's support.

It was not known whether ZUPO would seek representation at the Geneva conference on Rhodesia.]

Meanwhile, a government spokesman declined to comment on reports by the Mozambique news agency charging that Rhodesian troops, supported by aircraft, have attacked positions in Mozambique's Gaza Province near the countries' common frontier.

Denial Issued

Rhodesian military sources said the Mozambicans have made such charges in last two weeks and that Salisbury has repeatedly denied involvement.

A military communiqué today said 21 more black civilians have been killed in the latest incidents in the guerrilla war. The report said nationalist guerrillas fired mortar bombs on African villages in Rhodesia.

"A security patrol reacting to one of the incidents was fired on by the terrorists, who then fled using a number of locals as shields," the communiqué said. "In all these incidents, 21 African civilians were killed and others wounded."

The communiqué did not say when the clashes occurred or exactly where.

Mr. Smith's office said he will hold talks Saturday with Ivor Richard of Britain, the chairman of the adjourned Geneva conference on Rhodesia.

African 'Shuttle'

Mr. Richard left London today at the start of an African "shuttle," heading first for Lusaka, Zambia, for talks with President Kenneth Kaunda, one of the "front-line" black leaders attempting to coordinate Rhodesian nationalist objectives for the former British colony's future.

Mr. Richard will try to reconcile differences between Mr. Smith and four black nationalist leaders before the talks resume Jan. 17. The discussions are deadlocked over the composition of a transitional government.

A Rhodesian government source said today that Mr. Smith still insists on sticking to Secretary of State Henry Kissinger's plan, as outlined to the Prime Minister, which would give whites control of the Defense and Law and Order Ministries in the interim two-year government before black majority rule.

The sources said Mr. Smith will reject a compromise proposal by Mr. Richard that Britain take charge of the disputed ministries in the interim period. Black leaders reject Mr. Smith's assertion on installing whites in the posts and claim—Mr. Kissinger concurs— that the secretary's proposals are negotiable.

U.S. Liaison for Mission

WASHINGTON, Dec. 29 (AP).—Deputy Assistant Secretary of State William Edmondson will serve as U.S. liaison for the African mission of Mr. Richard, the State Department said today.

A State Department spokesman said Mr. Edmondson will serve as "a point of contact" for Mr. Richard's mission. He said Mr. Edmondson's itinerary will roughly parallel Mr. Richard's.

. . . and hardy somethings-or-other swimming in ice-covered Neva in Leningrad.

Cold Wave Grips a Shivering Europe

LONDON, Dec. 29 (UPI).—Britain reported freezing temperatures, colder than Iceland, today as winter came sharply to Europe, snarling road, rail and air traffic in a combination of snowstorms, ice and freezing fog.

Only ski resordt operators were happy. Holiday crowds flocked to resorts in France, Italy, Switzerland and Austria, where the Alpine village of Radstatt reported Austria's coldest night of the season, minus 13 Fahrenheit (minus 24 centigrade).

It was just as cold in places in Britain. The sea froze for a mile near Ramsgate, on the English Channel; the mercury in central London dropped to 28 F.

It was down to 12 F in Oxfordshire, enabling British newspapers to report it colder than Iceland where the temperature was 30 F today.

From Siberia

In a cold front from Siberia that looked like ending Europe's recent mild winters, ice was forming in West Germany's North Sea and Baltic ports, but shipping was not reported hindered. Highway traffic was slowed and 10,000 accidents were reported in West Germany yesterday. Most were minor, but three persons died in one crash.

Airports all over the Continent were affected. Snow closed Zurich Airport for two hours, and traffic was disrupted at others, including Paris and Brussels as well as London.

Snow blanketed much of France, Belgium, Switzerland, the Netherlands, Austria, Italy and Yugoslavia, with more predicted.

Moscow newspapers said an estimated seven million tons of snow had fallen there this month, overwhelming the usually efficient snow clearing gangs, who managed to catch up only in recent days.

Cold Hits Great Lakes

NEW YORK, Dec. 29 (AP).—Temperatures dropped early today to near 30 degrees below zero Fahrenheit in the upper Great Lakes region of the central United States. Low-temperature records were broken in many parts of Michigan.

Mystery of Fraudulent Sale Deepens

France, Libya May Have Known of Arms Deal

By Flora Lewis

PARIS, Dec. 29 (NYT).—The mystery of the Libyan arms fraud deepened today with clear evidence that the French government, and apparently also the Libyan government, knew beforehand that a fake deal was planned.

The deal was disclosed last week as a caper that cheated the Libyan government out of $15 million for fake U.S. military equipment, after its appetite had been whetted by the evidently illegal sale of $1 million worth of authentic U.S. merchandise. But it is now emerging that more than purely private skulduggery was involved although officials refuse to offer any comment or explanation of the evidence.

The deal was for Startrons, a light-amplifying device that enables tanks, planes and other weapon platforms to operate with high speed and accuracy in the dark. They are manufactured by Smith & Wesson, cost $7,000 each and were credited for much of the nighttime success of Israeli armor in the 1973 Middle East war.

They are not considered secret by the Pentagon, but are on the State Department's Munitions Control List, which requires permission for export and prohibits the buyer from re-exporting them without further specific permission.

Permission is routinely granted for allied countries, but U.S. officials here said it would almost certainly be illegal for them to be re-exported to Libya. Nonetheless, according to French officials, 110 were delivered to the Libyan government last year as the initial instalment on a contract for 300. Delighted with the Startrons, the Libyans then increased the order to 3,000.

The traffickers involved could not or did not choose to fill that order, but neither did they want to let the deal collapse.

Therefore, they arranged for a metals manufacturer in a Paris suburb to make 3,000 useless instruments, at $130 each, which looked like Startrons but had none of their special capacity. The manufacturer was unaware of the purpose of the order but, according to French sources, he was visited during production by French customs inspectors to make sure that he was not actually turning out military equipment.

The visit was not accidental. French authorties had obviously gotten wind of the deal, but after assuring themselves that the goods were not authentic, they allowed the shipment to be exported to Madrid.

According to French sources, the French government also informed the Libyan government of what was up.

Nonetheless, after a representative of Libya examined the shipment in Madrid and pronounced it acceptable, the Libyan government released the $15 million which it had deposited in a Swiss bank for the new Startron shipment. There is no explanation available of why this was done.

In any case, the fake equipment never went farther than Madrid, but was returned to Paris and left unclaimed at Orly Airport until customs examiners decided to open some of the boxes and then leaked the story of the false Startrons to the Paris daily Le Monde.

Meanwhile, the Libyan government has filed no complaints in (Continued on Page 2, Col. 6)

Socialists In Portugal Win a Vote

Left, Right Help Economic Policy

By Marvine Howe

LISBON Dec. 29 (NYT).—The minority Socialist government won a critical parliamentary vote today on next year's economic development plan, thanks to the abstention of the Communists and conservatives.

The Social Democrats voted against the plan in what was said to be a move to try to force the Socialists to agree to a government alliance with them.

Premier Mario Soares warned just before the vote early this morning that his Cabinet would resign if the Assembly of the Republic rejected the "indispensable tools for governing."—its economic plan and budget.

In an urgent appeal to the assembly, Mr. Soares asked the deputies to keep in mind "national interests and the political consequences of a government crisis."

He stressed that the rejection of the plan and a government crisis would be a severe blow to Portugal's negotiations for entry into the Common Market and for international financial assistance. This last was a reference to current talks with the United States for a $300-million emergency loan.

'Moral Obligation'

The Premier emphasized that if the opposition parties voted against his government's economic and financial policies, they would have "the moral obligation" to present an alternative.

Listing possible alternatives, Mr. Soares said that either a leftist coalition with the Communists or a "so-called democratic coalition" excluding the Communists would only broaden the political split in the country. On the other hand, he went on, another military-led government would be generally viewed as "a regression and the failure of the party system—th essence of democracy—in Portugal."

Mr. Soares insisted that his own middle-of-the-road government was the "only viable democratic solution" at present. He said that the sharp and often contradictory criticism of the plan and budget from the left and right "in a way cancels out." He pointed out that the right accused his government of failing to encourage private enterprise while the left charged that they were "opening the door to capitalist recovery."

Priorities Listed

The stated aims of the plan are to contain inflation, reduce unemployment, ease the deficit in the balance of payments, improve income distribution, correct regional inequalities, satisfy the basic needs of the population and accelerate economic recovery in both the public and the private sectors.

The budget forecasts expenditures of $5.214 billion with a substantial increase in social expenditures, particularly in education and housing, and investments in agriculture, fishing, industry, construction and tourism.

When it came to the final vote, both the Communist party and the conservative Social Democratic Center indicated they opted to abstain because they felt a government crisis would be bad for the young democracy.

But the Social Democrats, a center party, refused to listen to Mr. Soares's appeal for "civic cooperation." The party announced that it voted against the plan because it felt that "a change of direction is necessary now."

Loan Talks Continue

WASHINGTON, Dec. 29 (UPI).—The State Department said today the United States is "desirous" of helping Portugal over its current economic difficulties with a $300-million emergency loan and is continuing negotiations on it in Lisbon.

Healey Expects To Keep Pay Lid

BONN, Dec. 29 (Reuters).—Denis Healey, British chancellor of the Exchequer, has said he is confident that before his next budget trade unions will agree to extend wage restraint for another year.

In an interview with the weekly Deutsche Zeitung, released here today, he also said that a suitable renewal of the wage pact with the unions was the condition for the cut in income taxes that he hoped to be able to announce in the budget around Easter.

Talks will be held with union leaders in the next few weeks to extend the present pay policy, he said, noting that for two years British workers have accepted wage increases less than half the rate of price rises.

Unrest in China City Said to Lead To Attacks on Arsenals, Factories

PEKING, Dec. 29 (Reuters).—Political unrest in the northern Chinese city of Paoting has erupted into armed conflict, sources said tonight.

They reported that long-existing disputes in Paoting, 110 miles south of here, were now being quelled on special orders from Peking.

The conflict, which has been briefly mentioned in the official news media, has led to factories being blown up, raids on military arsenals and robberies from banks, grain stores and shops, the sources said.

They said the violence in Paoting, on China's main north-south railway line, had disrupted the supply of relief materials to the earthquake-devastated city of Tangshan.

It was understood that following the arrest of Mao Tse-tung's widow, Chiang Ching, and other radicals in October, authorities here issued instructions on how to handle the Paoting unrest.

Earlier this month, the official Peking People's Daily said Chiang Ching and other radical leaders had sowed discontent in Paoting and tried to disrupt surrounding Hopeh Province.

The Paoting disorders appear to be especially serious because of their proximity to Peking. The sources said they understood the conflict had sometimes disrupted telecommunications.

Britain, Italy Worst Hit

Teacher Unemployment Rises In Some European Countries

By Alvin Shuster

ROME, Dec. 29 (NYT).—Maria Caterina Colonna, a 33-year-old Roman, recently became so desperate in search of a teaching job that she began answering advertisements for maids.

"I wanted to do something," she said. "I felt useless. At one point, I even went from door to door to ask adults to sign up for reading lessons."

In London, Eileen Robinson, who is 22, spent months in the search for a teaching job, lived on unemployment benefits, and found that the only work available was in drugstores or as a barmaid.

"I've got a grant to go back to college now for another year of study," she said. "Maybe that will better qualify me for a teaching job. But I'm afraid it will only make it easier to get a job in Woolworths."

Mrs. Colonna and Miss Robinson are among the thousands of trained teachers in Italy, Britain and other parts of Europe who have engaged in a fruitless quest for jobs. Teacher unemployment, which is widespread in the United States, is a nagging and growing problem in some European countries.

20,000 in Britain

A survey by New York Times correspondents showed that the surplus of teachers was most acute in Italy and Britain, both in the depths of an economic crisis. In Britain, an estimated 20,000 teachers are unable to find jobs in elementary and secondary schools and here even more are believed to be facing similar troubles.

In West Germany, the problem is less serious, but the trends are worrying, particularly to union leaders. The newspapers in Bonn speak of a "teacher shortage" but that relates to the reluctance of local authorities to hire teachers because of pinched budgets.

Union officials in West Germany estimate that 10,000 teachers are now unemployed or working outside their field, which represents a jobless rate for teachers of about 1.8 per cent compared with the general unemployment level of 4 per cent. But many new teachers are in the colleges now and, given the present problems, the number of unemployed teachers is expected to rise.

In France, however, the survey showed that teacher unemployment did not appear to be a serious problem. Education is financed from a national education budget, which has been rising regularly so that the lack of funds in city budgets does not influence hiring policy.

Smaller Classes

Moreover, the National Teachers Union in France has campaigned successfully for smaller classes, which has led to more jobs. Officials reported there that at a time of 1 million unemployed, or less than 5 per cent of the work force, teacher unemployment may be less than 2 per cent.

Of the Scandinavian countries, Denmark shares a problem of teacher unemployment with Italy and Britain, while Norway and Sweden report no major surplus. The troubles in Denmark arose because an unexpected drop in the birthrate generated heavy unemployment among kindergarten teachers.

The reasons for the surplus of teachers in Italy and Britain vary. They include an overproduction of teachers and an underproduction of children as well as the economic squeeze.

In Italy, for example, any graduate of high school, no matter his grades, can enter a teachers' college or a university and the result is an increasing number of men and women who, in the absence of other jobs, decided to try to teach. Yet the school population declined with the birthrate.

Four years ago, for example, there were 4,626,000 students in elementary schools. Now there are 300,000 less and the projections show a continuing decline.

In Britain, the teacher glut has become so acute that the government is moving to close down colleges of education. So far, 20 of 160 colleges have stopped or been told to stop admitting students in a move to curtail teacher training.

In times of prosperity, of course, a decline in the birth rate could be a blessing for schools because of the possibility of smaller classes. But, in times of economic trouble and curbs on public spending, the effort is to employ fewer teachers and hold classes at the same size or even expand them somewhat.

The official estimate of the number of teachers graduating this year from British schools is about 39,000. Not more than half can expect to find jobs right away.

Angola Refugees Report Fighting

LUSAKA, Zambia, Dec. 29 (AP).—Angolan refugees arriving in Zambia said yesterday that heavy fighting is still raging between government forces and guerrillas in the former Portuguese colony.

There are about 200 refugees at a camp here. They said they fled because of the fighting between government troops and guerrillas of the National Union for the Total Independence of Angola, led by Jonas Savimbi.

Podgorny Plans Tour of 3 States in Southern Africa

MOSCOW, Dec. 29 (AP).—Soviet President Nikolai Podgorny will tour three African states in March in an effort to give the Soviet Union a more important role in southern African diplomacy, according to African diplomatic sources in Moscow.

The Soviet news media, which have not yet officially announced the visit, are expected to portray it as a routine tour to Zambia, Mozambique and Tanzania.

But diplomats here believe the visit could be a major Soviet attempt to play a bigger role in the black-white conflict in southern Africa and nurture its contacts with black governments and nationalist leaders there.

"Given the general background in which the visit is taking place, with the fluidity of the situation in southern Africa, I can't see how the Soviets could be in the area without addressing themselves meaningfully to the problem of southern Africa's future," an African diplomat said.

China Official Says Four Tried To Create Army

TOKYO, Dec. 29 (AP).—A Shanghai official charges that Mao Tse-tung's widow and her alleged co-conspirators tried to distribute weapons to the Shanghai militia and create rival armed forces in a plot to seize power at the time of Mao's death in September.

The widow, Chiang Ching, and her cohorts in the "gang of four" were arrested in October. Their present whereabouts have not been disclosed.

The latest allegation came in a speech by Wang Yi-ping, vice-chairman of Shanghai's Municipal Revolutionary Committee, to the National Agriculture Conference in Peking. Excerpts were broadcast yesterday by the official news agency.

The four regarded the regular army as the main obstacle to their plot, Mr. Wang said. So they tried to create chaos in the army while making the militia a second armed force with independent leadership by faking a directive from Mao, he added.

Gold, Diamonds Stolen At Hong Kong Airport

HONG KONG, Dec. 29 (Reuters).—Three men using false documents stole a consignment of gold bars, diamonds and coins worth 4 million Hong Kong dollars (about $850,000) from Kai Tak International Airport here during Christmas, police said today.

A police spokesman said that two of the men presented false documents to collect the cargo Monday and that the third man said he was an airline employee. A Hong Kong air cargo terminal spokesman said that the consignment was flown here from Zurich by Swissair.

Paris Police Arrest Six in Broglie Death

Deputy's Partners Said to Be Involved

PARIS, Dec. 29 (UPI).—French police announced today the arrest of six men in the Christmas Eve murder of National Assembly Deputy Jean de Broglie.

Authorities indicated that Mr Broglie, who helped negotiate the end of the Algerian war in 1962, was shot down on a Paris sidewalk not for reasons of politics, but for simple monetary gain.

Police said that two of Mr. Broglie's business partners, who owed him 4 million francs ($800,000), used a policeman to recruit two hired killers to kill Mr. Broglie.

They said that the two partners were probably responsible for a telephone call to a French news agency claiming that the shooting was the work of extreme rightists.

This led to initial but short-lived speculation that the shooting was politically motivated.

Resistance Hero

Mr. Broglie, 55, descendent of a distinguished family, was a hero of the French Resistance in World War II. He was a member of President Valéry Giscard d'Estaing's independent Republican party.

At a news conference presided over by Interior Minister Michel Poniatowski, police announced the arrest of Mr. Broglie's business associates Pierre de Varga and Patrick Allenet de Ribemont in addition to that of police inspector Guy Simoné and underworld figures Gérard Frèche, Serge Tessedre and Simon Kolkowicz.

Pierre Ottavioli, chief of the Paris police crime squad, said, "The Broglie affair was the result of a financial agreement between the victim and Mr. Varga and Mr. Ribemont. Mr. Broglie had ten 4 million francs to Mr. Varga and Mr. Ribemont, to be paid back in seven years."

Death Warrant

Mr. Ottavioli indicated that in signing the contract, last year, Mr. Broglie had signed his own death warrant. "The contract had a clause providing that in the event of Mr. Broglie's death, the other two were released of their obligation to pay," he said. "That was the motive for the crime."

The crime squad chief said, "Mr. Pierre de Varga and Allenet de Ribemont—to a lesser degree—were the instigators of the murder of Mr. Broglie. The policeman, Guy Simoné, organized the murder.

"A thug with a police record, Gérard Frèche, is the killer. Serge Tessedre, a friend of Frèche's, was with Simoné in the Rue des Dardanelles when the deputy was killed.

"An accomplice, Simon Kolkowicz, another thug and friend of Frèche's and Simoné's, put the two men [Frèche and Simoné] in touch with each other," Mr. Ottavioli said.

Restaurant Purchase

Mr. Ottavioli said that the money lent by Mr. Broglie was used for the purchase of a restaurant, La Reine Pédauque, in central Paris.

Earlier today, investigators said that Frèche had been promised 30,000 francs ($6,000) to do the shooting.

"Frèche, Tessedre and Simoné confessed to the killing," Mr. Ottavioli said. "Frèche confessed to actually shooting Mr. Broglie."

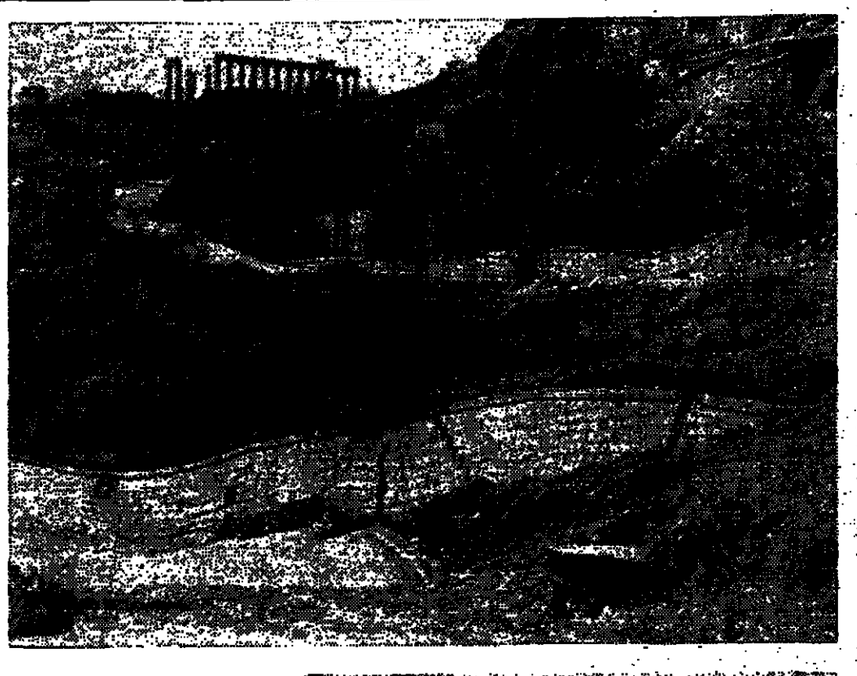
He said that Mr. Varga and Mr. Ribemont had not confessed.

Five Flee to West During Holiday

HANNOVER, Dec. 29 (UPI).—Five refugees fled to West Germany over the Christmas holidays, West German police reported.

The refugees included two East German border guards, another East German man, and a woman and her daughter, both ethnic Germans who fled from Poland, police said.

The two border guards abandoned their posts on the East-West German border and fled to the West Sunday in their uniforms and carrying their weapons, police said.



Religious Rights Unit Issues Moscow Protest

MOSCOW, Dec. 29 (Reuters).—A newly formed religious rights group today accused Soviet authorities of preventing representatives of the Georgian church from traveling to Switzerland to attend an international conference of Orthodox churchmen.

The group, two of whose members are priests, said delegates from the Russian and Georgian churches were to have attended last month's conference at Chabesy, near Geneva, which was called to prepare the first world synod of the Eastern Orthodox Church in nearly 1,200 years.

Just a Second

BOULDER, Colo., Dec. 29 (AP).—Federal scientists are adding a "leap second" to 1976 because the earth is spinning one second slower this year than the standard 365-day calendar calls for. The second will be inserted on Dec. 31 to keep atomic clocks functioning properly.

SICILIAN SLIDE—Huge cracks in retaining walls and broken pavement in roads were caused by an earthslide that forced the closing of the Agrigento archaeological park which includes some of the Mediterranean area's oldest and best-preserved Greek temples, dating back more than 2,500 years. About 200 residents of the area have been temporarily relocated. The slide stopped about a hundred yards short of the temples. In the background is the temple of Juno.

AP.

Palestinians and Christians Trade Fire in South Lebanon

BEIRUT, Dec. 29 (UPI).—Palestinian guerrillas and Lebanese Christian rightist forces in south Lebanon traded heavy artillery and machine-gun fire for six hours last night, a Palestinian spokesman said today.

"Israeli-backed rightist forces opened a barrage of heavy artillery and machine-gun fire on the town of Taybeh," 2 miles from the Israeli border, the spokesman said.

"Israeli gunners on the other side of the border supported the rightist forces with their long-range artillery located at Talawelda and Miskaffam settlements near the Lebanese border," he charged.

"Our joint [Palestinian and Lebanese leftist] forces replied to the fire," the Palestinian spokesman said. The six-hour exchange came to a halt at 10 p.m.

Rising Tension

Tension in south Lebanon has been rising for several weeks after Palestinian guerrillas began to move men and heavy weapons from camps around the cities to the south.

The region was the only area that was not entered by Arab peace-keeping troops who put an end to Lebanon's civil war six weeks ago. Their reluctance to enter the south was due to fears of possible Israeli military reaction.

An estimated 1,500 troops from the United Arab Emirates entered Lebanon from Syria yesterday to join the Arab Army.

The units were reportedly headed south to take up positions at the port city of Tyre, 18 miles north of the Israeli frontier. But this afternoon they were still assembling near Masmaa on the Syrian border.

Nucleus of Army

House speaker Kamel Assad said that President Elias Sarkis was forming the nucleus of a new army for Lebanon to begin policing the border areas in the south in two weeks.

Officials said that this was an assurance for rightist leaders who have expressed concern over what they described as "a Palestinian buildup of men and weapons" in south Lebanon, especially in the Arkoub region.

Israel's objections to the presence of Arab peace troops in the south have reportedly been sorted out through diplomatic mediation of the United States and other countries.

Hoss Sees Sadat

CAIRO, Dec. 29 (UPI).—Lebanese Premier Selim al-Hoss flew to Libya today following a one-day visit and talks with Egyptian President Anwar Sadat on the Middle East situation and postwar reconstruction plans in Lebanon.

Mr. Hoss told reporters before his departure that Mr. Sadat had assured him of Egyptian support of all Lebanese efforts "to find a suitable formula for a return to normalcy."

Mr. Hoss visited Saudi Arabia and Kuwait shortly before coming to Cairo seeking "a pan-Arab formula" for the reconstruction of Lebanon.

Government Lost 1st Knesset Test Since Rabin Quit

TEL AVIV, Dec. 29 (UPI).—Israel's minority government lost a decisive vote in the Knesset today in the first major test of strength since Prime Minister Yitzhak Rabin resigned last week.

The final count was 55-52 against a government bill on compulsory arbitration for striking public employees. Four opposition bills calling for tougher measures against strikes were approved on their first reading.

President Ephraim Katzir, meanwhile, continued his meetings with political leaders to appoint a new prime minister following Mr. Rabin's resignation.

But steps were under way in the Knesset to set a date for new elections sometime in May, which would halt that process and make Mr. Rabin interim prime minister of a transition government.

British Papers Back

LONDON, Dec. 29 (UPI).—All of Britain's national newspapers published normally today except the Daily Mirror.

Two Detroit Policemen Arrested for Robbery

DETROIT, Dec. 29 (AP).—Two Detroit police officers assigned to a special robbery-prevention detail were charged yesterday with armed robbery for stealing $100 from patrons during a bar brawl.

The officers, who have since been suspended, entered no plea and were released on $2,000 bond each. A hearing was set for Jan. 17.

Arms Fraud Data Known

(Continued from Page 1)

France nor, so far as could be learned here, made any effort to recover the money.

The French Finance Ministry has ordered three persons involved in the deal to appear in court here Jan. 20 to answer a charge of illegal currency transfers. One of them, Georges Starckmann, is well known to the French police for previous arms trafficking and customs violations, according to the French sources, and another, Joseph Abbatucci, was an employee of Thomson-CSF, a huge French electronics and armaments firm, until the story broke.

However, no other charges have been filed, neither for false export documentation, breach of contract, nor fraud. Mr. Starckmann has been reported in the French press as having fled to Portugal. The Portuguese Embassy in Paris said it has not received any request from French authorities to trace him or arrange his return.

Apart from the announcement about the Ministry of Finance's charge of illegal currency transfers involving a total of $500,000 in French francs, there has been no comment from the French government about any aspect of the affair.

As far as could be ascertained here, the U.S. government has not ordered any inquiries into how the first 110 Startrons got to Libya, a presumably illegal diversion.

It was learned privately that the United States had found out about the order for 3,000 more Startrons and asked the French government to prevent their delivery.

Thomson-CSF manufactures a device very similar to the Startron. While it is said by experts not to be quite of the same quality, it could legally be exported to Libya without any difficulties. The director of Thomson's arms exports, which has sold radars and missiles to Libya, said that the Libyans had never approached his company for the purchase of its light-amplifying instruments.

Government Lost 1st Knesset Test Since Rabin Quit

TEL AVIV, Dec. 29 (UPI).—Israel's minority government lost a decisive vote in the Knesset today in the first major test of strength since Prime Minister Yitzhak Rabin resigned last week.

Vatican Is Reported to Own Quarter of Rome

(Continued from Page 1)

been—turned into luxurious residences, hotels and offices."

The magazine also published a list of over 50 Vatican palaces it said would be up for sale, giving no price on them.

The Vatican policy appears to be, according to the report, "to divest itself from old convents or other institutions that produce no revenue. It sells and reinvests in modern housing or in land a bit far from the city, but is expecting the natural expansion of the city."

The magazine did not question the legality of the real estate transactions, but said: "It makes no sense for the Holy See to put its patrimony on the market and recycle earnings in speculative transactions."

In one transaction, the magazine said, the Holy See made 1.5 billion lire ($2.4 million at the time) by selling its Palazzo Antonelli around the corner from the presidential Quirinal Palace. Obtained free through donation from the will of the late countess Maria Emma Garcia, the building was sold to the Bank of Italy "without a single lira of taxes," L'Europeo reported.

While the Vatican withheld immediate comment, Vatican observers said L'Europeo's report did not seem "scandalistic and appeared within reason."

real estate holdings and business transactions—has been the subject of speculation. The Vatican seldom volunteers information on its finances, but has hinted at it when rejecting reports that the Holy See is rich. In 1975, when published reports put the Vatican's investment capital inside and outside Italy at $12 billion, the Vatican disclosed that the actual figure was under $130 million.

Without disclosing any figures, the Vatican had said its 1975 balance sheet was in the red, citing inflation, stock market problems and the shrinking offerings from Christians. Printed reports put the Vatican deficit for that year at $6.4 million.

Cross Desert in Land Rovers

West Sahara Guerrillas Harry Moroccans and Mauritanians

By Sadie Wykeham

ECHIDIRIAH, Western Sahara (NYT).—King Hassan of Morocco has maintained that there is no dispute in the Western Sahara, but in a weeklong tour of the territory I saw guerrillas travel in broad daylight across regions supposedly under Moroccan control and regularly harass enemy forces.

The guerrillas are pinning Moroccan and Mauritanian forces inside their garrison towns in Western Sahara—ambushing relief convoys and attacking outlying military bases.

Riding in special combat Land Rovers, the partisans are also raiding deep into Morocco and Mauritania, stung by Hassan's claims that they are a spent force.

The guerrillas of the Polisario Front oppose the partition of the territory, known as the Spanish Sahara before it was ceded to Morocco and Mauritania by Spain a year ago. They have proclaimed an independent Saharan Republic. Its government-in-exile is based in southern Algeria.

Lightning Assaults

Supported by both Algeria and Libya, the guerrillas often travel hundreds and occasionally thousands of miles in Land Rovers to launch lightning assaults against enemy targets.

They say they have attacked the town of Goulimine, 100 miles into Morocco, ridden into battle 1,000 miles farther south against the Mauritanian capital of Nouakchott and even hit positions near Mauritania's frontiers with Senegal and Mali.

The guerrillas usually operate in 30-man units, which can be merged with other commando patrols should the need arise. They ride into action aboard three, four or five vehicles carrying heavy machine guns, Soviet anti-tank weapons and even small artillery pieces.

The raiders are also armed with the Russian-produced AK 47, the automatic weapon used by liberation movements throughout the world, together with a ragbag of captured Belgian FN rifles and small arms dating back to the Spanish Civil War.

Their Land Rovers are specially prepared for battle. All windows and mirrors are stripped off to keep reflection of sunlight from signaling the unit's presence to enemy planes or positions. Headlights and paintwork are daubed with a gluelike substance and then camouflaged with sand. Finally the guerrillas cut off the vehicle's superstructure to increase its speed and effectiveness in hit-and-run strikes.

Inside Western Sahara, the Polisario Front appears to have pinned down most Moroccan and Mauritanian troops to the towns and their outlying bases. Their main strategy is aimed at cutting supply lines and ambushing relief convoys in a classic guerrilla war of attrition.

The guerrillas draw their main logistic support from Algeria, which also provides refuge for an estimated 105,000 Saharan nomads displaced by fighting. But recent reports indicating that the Algerians may be near reaching an accord with Morocco and Mauritania over the heads of the Polisario leaders are causing disquiet among the partisans.

With the Guerrillas

I traveled for 800 miles with the guerrillas. We drove for some of the time in a shiny, gray Toyota Land Cruiser across territories the Moroccans claim they control. I was escorted at times by a small squad of guerrillas in trucks, but often with just my own personal bodyguard of four armed men.

We drove across vast barren plains crisscrossed with wooded dunes and ringed with bizarre lunar mountains. We drove through the northeastern quarter of Western Sahara, from refugee camps near the southern Algerian town of Tindouf. We skirted the Moroccan-held towns of Mahbes, Hausa and Echidiriah, which all house army garrisons of up to 4,000 men.

Echidiriah is surrounded by three concentric rings of defense about a mile apart, with seven military positions scattered among the rings—and it was here I got my first real taste of danger.

We drove to a hill 1,080 yards from a small Moroccan base of 300 soldiers, where I met a Polisario commander.

He escorted me up to a lookout position on top of the 2,000-foot, slate-covered hill. Halfway up, I heard the first Moroccan mortar shells whistling past us and exploding in the valley below. On the summit I had a grandstand view.

On a hilltop to my right, four Polisario fighters were blasting the base with a B-10 Russian anti-tank gun. In a valley to my left, two guerrillas moved through the scrub as bullets began to explode around them.

Halfway through the engagement I saw sky tracks of a small jet, a Mirage. We all froze, praying it would go away, and within a few minutes it disappeared.

"The planes come out from the capital, El Aiun, and often bring American-supplied F-16 jets in their wake," said the commander. "But recently our SAM-7s seem to have deterred them.

"This year we've destroyed 12 of their planes and seven helicopters."

There was no way I could judge whether the Polisario tally of destroyed aircraft was accurate. Several Polisario commanders also told me their forces were using Russian-made SAM anti-aircraft missiles, but I was never allowed to see any tangible evidence that this was true.

By midafternoon, both the guerrillas and the Moroccan army seemed to get bored with the engagement. Fire became sporadic and then ceased.

Little had been achieved, or so it seemed. But the commander said the operation had been a success. "For the last six months we've managed to kennel them inside the towns, and this was a weekly reminder," he said. "They came in singing and now they hide in their trenches."

Sadie Wykeham is a freelance British journalist who visited the Western Sahara earlier this month.

Wedlock Held No Excuse to Play Hooky

UPPERHILL, England, Dec. 29 (Reuters).—A British magistrate ruled today that marriage is no excuse for a schoolgirl to stay away from classes, even if her husband is a local soccer star who feels she has no further need of education.

The court fined Harold Hunley, 37, —5 ($8) for his daughter Debbra's failure to show up at school since she married soccer ace Alan Groves three months ago.

Debbra, 16, is not due to finish school until Easter, but husband Alan, a star of the Oldham Athletics team, told the court: "My wife does not need to know anything about the Battle of Hastings. What she needs to know is how to make my tea."

Mr. Hunley explained that all he can do is order Debbra back to school. "If she refuses, there is nothing I can do," he said.

Spain Police, Reds Clash

(Continued from Page 1)

delegation prepared to leave Madrid after a two-day stay, two other foreign observers arrived.

Jacques Bourgaux, a Brussels lawyer representing the International Association of Democratic Lawyers, and Diogo Fernandez, an envoy from the Belgian League for the Defense of Human Rights, tried to see the judge involved in Mr. Carrillo's case. They were told they could not see him until after a decision has been made on the appeal.

At a hotel, two plainclothes policemen halted a news conference that the five-member Italian delegation was holding before about 20 journalists and the wives of the arrested Communist leaders. The policemen said politely that the Italians had not gotten official approval.

One of the delegates, Christian Democratic parliamentary deputy Carlo Fracanzani, told the gathering, "We Italians are not accustomed to this kind of method" and said it was not used in other democratic countries either. He protested the suspension because, he said, the Spanish government officials had refused to receive the delegation and it therefore had no opportunity to seek authorization to directly appeal for Mr. Carrillo's release.

As the Italian news conference was being suspended, across the street the Cortes (parliament) with Premier Adolfo Suarez and his Cabinet in attendance was holding its last full session of the year.

The deputies approved the budget for next year and were voting on several other routine bills.

Syria Confirms Lifting Restrictions on Jews

DAMASCUS, Dec. 29 (UPI).—Syria has lifted travel, employment and property restrictions from the country's 4,000 Jews, Syrian officials confirmed yesterday.

They confirmed the Kuwaiti newspaper report of yesterday saying that Jews would now have the same freedoms as other Syrians.

Regarding Mondale Role, Defense Cuts

Carter, Aide, Nominees Seem to Differ on Policy

By Morton Mintz

ST. SIMONS ISLAND, Ga., Dec. 29 (WP).—President-elect Jimmy Carter met for 5 1/2 hours yesterday with his top appointees and left a trail of conflicting signals on directions his administration will take.

Mr. Carter outlined, and Press Secretary Jody Powell later repudiated, an expanded role for Vice President-elect Walter Mondale that would have made him chief of staff in the White House. Also, two Cabinet nominees appeared to back off from Mr. Carter's campaign promises on defense spending and welfare reform, but their statements later were said by Mr. Powell not to represent changes.

Mr. Carter opened yesterday's meeting with his Cabinet nominees by saying of Sen. Mondale: "He's my chief staff person. He'll be in the White House with me. I've informed all the White House staff personally that he is their boss."

But at an hour-long press briefing last evening, Mr. Powell said that the statement that Sen. Mondale would be "their boss" had generated "understandable confusion." Sen. Mondale "will not be the chief of staff," Mr. Powell said.

"Generally, it would be correct to say Mondale will be involved in the broad range of responsibilities that a president has," Mr. Powell said.

The Vice-President-elect will function "almost as a co-equal" in many areas, Mr. Powell said. He emphasized the intention, stated by Mr. Carter yesterday morning, to try to meld the presidential and vice-presidential staffs "as much as possible."

Mr. Carter told his appointees that he wants their policies to be "compatible with the commitments that I made to the American people—because my word of honor is at stake."

No more than half an hour before the meeting began, however, two Cabinet nominees had exchanges with reporters suggesting that Mr. Carter's commitments in the areas of defense spending and basic welfare reform have at least temporarily generated a degree of confusion.

The exchanges occurred during impromptu questioning of Harold Brown and Joseph Califano jr., respectively the incoming secretaries of defense and of health, education and welfare.

Mr. Brown, replying to a question, said: "I don't think that we look for absolute reduction of $5 to $7 billion from this year's budget to next year's budget, for example. I'm quite sure Gov. Carter never said that, and that was never his intended meaning."

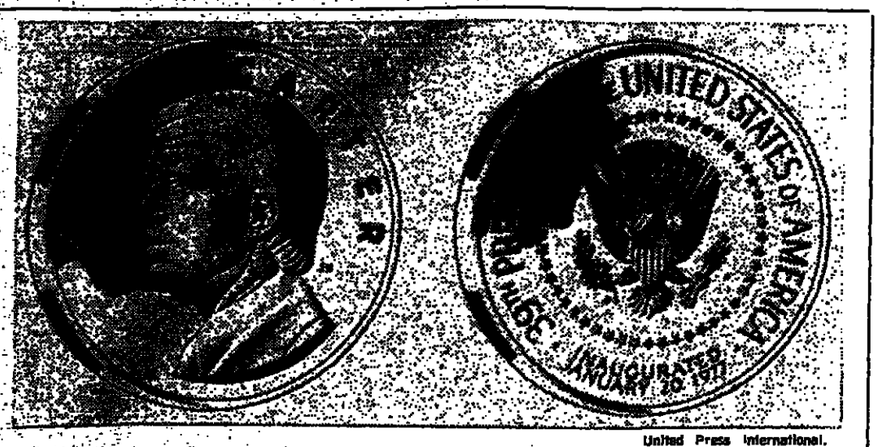
In a news conference a week ago, Mr. Carter said that he "will be very disappointed at the performance" of Mr. Brown if he does not cut the defense budget by $5 to $7 billion. "We'll start immediately with efficiencies and economies," he said.

Replying to a question later in that news conference, Mr. Carter said: "I believe that we have a good chance to make that much demonstrable savings in the defense budget in the first budget that I prepare."

A reporter asked, "But would you expect something like a $5-billion reduction in defense spending next year?" Mr. Carter's reply was:

"I would hope that—I can't say that, but as compared to what we are presently getting in defense capability, the answer is yes. In actual dollars, I can't say—I don't know what inflation and so forth will be."

Last evening, Mr. Powell told reporters, under prolonged questioning, that Mr. Brown "certainly was correct." He said he had "no memory" of Mr. Carter ever saying that he would cut the absolute level of spending by $5 billion to $7 billion in, say, fiscal year 1978, which starts in October. Rather, Mr. Powell said, Mr. Carter's position has been that he can achieve economies without a reduction in strength, economies that would hold rises in the budget down by at least the amounts in question.



In the area of welfare reform, Mr. Califano told reporters that his first priorities will be to eliminate "fraud" and "ripoffs" in existing HEW programs, especially Medicaid and Medicare, and to improve the efficiency of the department's programs.

Structural reform of welfare "may have to await economic growth," Mr. Califano said. Asked when programs for reform may be advanced, he said: "It may be that the realities of substantial welfare reform are related to a better economy."

Associated Press.

SERENDIPITY—A photographer (unidentified) was on his way back to base after photographing the break-up and oil spill of the tanker Argo Merchant when he made this picture of the setting sun as it sank into a layer of clouds about 1,000 feet over the Atlantic Ocean above Nantucket Island off the Massachusetts coast.

United Press International.

CARTER MEDAL—The official inaugural medal commemorating the installation of Jimmy Carter as the 39th President of the United States has his portrait, done by Georgia-born artist Julian Harris, on one side and the presidential seal on the other. The Franklin Mint will issue the medal in bronze, silver and gold.

Blacks in Line for Posts

Opposition Said to Be Fading To Bell as Attorney General

By Anthony Marro

WASHINGTON, Dec. 29 (NYT).—Although more than half a dozen organizations are actively investigating the judicial background of Attorney General-designate Griffin Bell, congressional staff members and spokesmen for some of these groups said yesterday that opposition to his nomination has begun to fade, and that a serious effort to block his confirmation now seemed unlikely.

"A lot of this is tactical, rather than a serious effort to stop him," a person involved in such research said. "The interest now is in trying to pressure him and the Carter administration to pick blacks and women and others they approve of for top jobs in the Department of Justice."

Mr. Bell privately has promised potentially hostile black leaders that blacks will get key posts in at least four areas of the Justice Department, the Los Angeles Times reported.

[A leading candidate for the No. 2 or 3 spot in the department is U.S. Judge Leon Higginbotham jr. of Philadelphia, a black named to the bench by President Lyndon Johnson, sources said.

Mr. Bell met last Thursday in his Atlanta law office with officials of the predominantly black National Bar Association and assured them that a black will be named as deputy attorney general or as solicitor general, the second and third highest positions in the department.

Posts in Other Divisions

[According to a Carter aide, Mr. Bell told the National Bar Association officials that blacks will also be appointed to policy-making posts in three other Justice Department divisions—the Law Enforcement Assistance Administration, the Parole Board and the Prison Bureau.]

Among the groups gathering information about Mr. Bell's judicial record are the National Association for the Advancement of Colored People, the Congressional Black Caucus, the American Civil Liberties Union, Common Cause and, to a lesser extent, attorneys for the AFL-CIO and for groups headed by the consumer advocate Ralph Nader.

The likely result, according to congressional sources and some of the persons involved in the research efforts, is that Mr. Bell could undergo tougher and more intense questioning than most of the other Cabinet nominees, but nonetheless be easily confirmed.

"I would be very surprised—unless something shocking comes up—that he could be blocked," said Alan Morrison, who heads Mr. Nader's litigation group.

Mr. Morrison said his group was not doing as extensive a research job as some of the other organizations, but was "keeping an eye on the situation" and checking cases that Mr. Bell was involved with that concerned anti-trust actions and attempts by consumer and public interest groups to seek class-action relief.

Much of the early opposition to Mr. Bell developed among civil rights activists, who had been unhappy with some of the 141 school desegregation rulings he had been involved in during his 15 years on the U.S. Court of Appeals for the Fifth Circuit, which includes Georgia, Alabama, Mississippi, Florida, Louisiana and Texas.

But in the past week, a number of black leaders have spoken in his favor.

Last Thursday, for example, an official of the National Bar Association said he and his colleagues "came away with a more favorable impression" of Mr. Bell than they had before their meeting with him.

And on Friday, the Congress of Racial Equality formally endorsed him, saying that his rulings as a federal appeals judge had been "open-minded and even-handed."

In remarks taped for broadcast today on television, Mr. Carter said that Mr. Bell "has not been treated fairly so far" and suggested that some of the opposition was coming from persons who had other candidates they favored for the post.

Kissinger Gives Data To Archives

By Don Oberdorfer

WASHINGTON, Dec. 29 (WP).—Secretary of State Henry Kissinger has donated the disputed records of his telephone conversations to the Library of Congress in an effort to avoid controversy in his final days in office. But a reporters' group announced it will file a law suit in an effort to obtain public access to the documents.

Mr. Kissinger's action, taken over the Christmas holiday after conferences with his legal advisers and other officials, was announced yesterday by the State Department about an hour after nine file drawers of the telephone records were taken to the Library of Congress in a private van.

On the basis of an opinion he obtained from State Department legal adviser Monroe Leigh, Mr. Kissinger has claimed that the extensive secretarial notes of his telephone conversations while in office are his personal property to use or dispose of as he sees fit. Aides said he does not plan to leave copies of this data in government files.

Condition Attached

The transcriptions had been specifically excluded from Mr. Kissinger's earlier donation of most of his records to the Library of Congress. A condition of that donation, announced Dec. 20, was that Mr. Kissinger, or persons named by him, would control access to the papers for 25 years or until five years after his death, whichever is later.

Public access to the telephone documents is restricted on the same basis, except that permission of the party to the telephone conversation with Mr. Kissinger would also be required as long as the other party lives.

The State Department announcement made clear that Mr. Kissinger has not backed away from his claim that the telephone data are his private property. This assertion is the target of the law suit that the Reporters' Committee on Freedom of the Press, a private organization, announced that it will file against the government.

Jane's Says Reds Can Match a U.S. Low-Level Missile

LONDON, Dec. 29 (AP).—The Soviet Union may already have a missile to match the U.S. Navy Tomahawk, which the Russians have argued threatens the international balance in long-range missiles, a weapon expert says.

The possibility was raised by editor Ron Pretty in the 1977 edition of "Jane's Weapon Systems," which appared Friday. It details the latest armaments of the world's fighting forces.

He said that three new Soviet missile types, the SS-NX-13, 17 and 18, about which little is known, could turn out to be the answer to the Tomahawk. This would reduce the deterrent value of the U.S. weapon. It could also hamper U.S. bargaining at SALT (Strategic Arms Limitation Talks) when the five-year freeze on long-range-missile levels between the two superpowers expires next October.

Tomahawk, with a nuclear or conventional warhead, can be launched from a submerged submarine to cruise at low level for more than 2,000 miles in search of its target. It is carried in an ordinary torpedo tube, and a single nuclear submarine could embark 20 or more of the missiles.

Tanker Chief Lays Error to Radio Device

NEW YORK, Dec. 29 (AP).—The captain of the Argo Merchant says his ship received inaccurate bearings before it went aground because its radio direction finder was either faulty or being improperly used.

"If I knew, the ship would not have been stranded," Capt. George Papadopoulos, 43, testified yesterday.

He was questioned in federal court here by an attorney for the Continental Insurance Co. who was challenging the assertion that the tanker was seaworthy. The vessel unleashed most of its 7.6-million-gallon cargo of oil into the Atlantic in the worst oil spill off the U.S. coast.

The company had insured the ship's cargo for $2.3 million. If the ship was not seaworthy and its owner knew, or should have known, that it was not, then Continental can try to win compensation from the owner.

The owner, Thebes Shipping Co., is also in court, trying to limit its liability to the current value of the wrecked tanker.

Shrinking Area

Oceanographers studying the spill, meanwhile, said yesterday that it was shrinking and breaking up and probably would not seriously harm sea life.

They said it was drifting away from shore, pushed by the wind, at a rate of four to five miles a day. But they cautioned that a change in wind might drive the slick back toward Nantucket Island and Cape Cod.

In addition, they said, no contamination of the bottom is expected because oil has to be very finely divided before it sinks and the Argo Merchant slick was breaking into large sections.

In the New York hearing, Capt. Papadopoulos said that according to his radio direction finder, tuned to signals from the Nantucket lightship, there was clear water ahead at the time the ship plowed into the Nantucket shoals Dec. 15.

On Monday, he told the court that the ship's gyrocompass was not working and that the ship was 24.5 miles off course when it ran aground.

U.S. Customs Set Records in 1976

WASHINGTON, Dec. 29 (AP).—The U.S. Customs Service says it processed more travelers and seized more drugs during the Bicentennial year than in any previous year in its history. It reported collections of $5.3 billion in duties and taxes and said the service collected $16 for every dollar it spent.

Customs agents arrested nearly 21,000 persons on drug charges and seised drugs worth $631 million if sold in street trade, customs commissioner Vernon Acree ssid in his year-end report.

The year produced a record 274.8 million travelers passing through 300 official points of entry. The number of travelers has been increasing each year and totaled 260 million in 1975.

Fears Effect on Congress

Seoul Envoy Asserts Charges Of Bribery Harm Relations

By Richard Halloran

WASHINGTON, Dec. 29 (NYT).—The South Korean ambassador to the United States, Hahm Pyong Choon, said yesterday that the damage caused by allegations of Korean bribery of U.S. Congressmen "has been rather serious, and it can become even more serious if we do not do more to preserve and protect our basic bilateral relations."

But Mr. Hahm, in the first interview given since the scandal erupted two months ago, asserted that he was optimistic because "the commonality of our respective national interests is perceived by members of Congress."

Widespread allegations of Korean bribes, entertainment, travel expenses, gifts and other improper lobbying are under federal investigation and a grand jury inquiry. It is directed primarily at discovering which congressmen have accepted illegal favors from the Koreans.

U.S. relations with South Korea are based on a mutual-security treaty that may require U.S. forces to fight in defense of South Korea. The United States has 40,000 troops in Korea under that treaty.

Fluent English

Mr. Hahm, whose fluent English is nearly flawless, expressed frustration with the Department of State for its alleged failure to give the Korean Embassy help in getting out of the present situation.

"I think it's important that the United States indicate some kind of direction in which we could both work. Unfortunately, this indication has been totally lacking so far," he said.

A spokesman for the State Department had no comment.

Mr. Hahm, however, had no specific suggestion to offer on behalf of the South Korean government to overcome what the Foreign Ministry in Seoul called an "air of open discord," in a statement released Monday.

Other Koreans, both supporters and critics of President Park Chung Hee, have suggested that the scandal is a conspiracy by the State Department, the Central Intelligence Agency, the Justice Department, certain congressmen and the U.S. press to discredit the Korean government.

Mr. Hahm, in the first public expression of official concern over the effect of the bribery scandal, said that "it would be most unfortunate if any member of Congress would be, shall I say, intimated or prevented from voting or acting according to his convictions and his assessment of the U.S. interest in the West Pacific region."

He also said the "when the new Congress meets, come January, that's the time we have to be in a position to know how much damage has been done on the Hill."

Mr. Hahm asserted, as did the Foreign Ministry statement, that Tongsun Park, the Korean businessman who allegedly passed money to and did favors for congressmen, had no connection with the Korean government. "Tongsun Park did what he allegedly did for his own financial interest," Mr. Hahm said.

"I don't think we have really done anything that is questionable, particularly on the part of the government and our embassy staff, to influence or to exert influence improperly on the members of Congress."

U.S. Sent Warships to Brazil At Time of '64 Military Coup

By Lewis H. Diuguid

WASHINGTON, Dec. 29 (WP).—The United States was prepared, if needed, to support militarily the Brazilian armed forces' ouster of the country's last civilian government, according to official U.S. documents recently declassified.

A U.S. naval task force with an aircraft carrier, a helicopter carrier, six destroyers and oil tankers was ordered to take up position off the Brazilian coast during the 1964 coup d'état against the leftist government of President Joao Goulart, the documents show.

The ships were to await orders from the U.S. ambassador of the time, Lincoln Gordon.

Mr. Gordon, who later became assistant secretary of state for Latin America, denied after the coup that the United States played any role. He denied it again yesterday in a telephone interview.

"It was a contingency never put into effect," he said. "We feared the possibility of a civil war—and one side might need some outside help."

Mr. Gordon said he recommended creation of the logistical force that became known in declassified military cables as "Operation Brother Sam."

The documents show that on March 27, 1964, five days before the culmination of the coup, Mr. Gordon cabled Secretary of State Dean Rusk that the probable leader of the military taking power would be Gen. Humberto Castello Branco.

Mr. Gordon's military attaché was Gen. Vernon Walters, a close friend of Gen. Castello Branco, who became President of Brazil. Gen. Walters has acknowledged breakfasting with Gen. Castello Branco on the morning after the coup and urging him to assume the presidency.

In the cables now made public, Mr. Gordon refers to Gen. Walters as being "very well informed." Gen. Walters retired recently as second in command of the CIA.

The coup came after turbulent rule by Mr. Goulart. In the March 27 cable to Mr. Rusk, Mr. Gordon said Mr. Goulart was seeking "dictatorial powers, accepting the active participation of the Brazilian Communist party."

The Brazilian armed forces rallied overwhelmingly behind the coup leaders and, on April 2, Mr. Gordon cabled his recommendation that the Johnson administration call off Operation Brother Sam.

The documents were published by the Rio de Janeiro newspaper Jornal do Brasil in its editions of Dec. 18-20. As an accompanying article explained, the newspaper's correspondent was "able to copy a good part of them, at 15 cents each," in the Lyndon Baines Johnson Library at the University of Texas in Austin.

A Brazilian editor reading a University of Texas publication noticed that documents about Brazil had been declassified. He sent a reporter to read them.

Brazil's press had been under intense censorship. But the censorship has loosened considerably for major daily newspapers considered relatively "safe" by the military government.

Mr. Goulart went into exile in Argentina, where he died of a heart attack Dec. 6 at the age of 58.

With Gen. Castello Branco in the presidency, the military soon decreed sweeping dictatorial powers—depriving opponents of their political rights and later dissolving the Congress.

At that point, another document shows, Mr. Gordon recommended that the U.S. government express its dissatisfaction.

Later messages from the embassy to Washington show that the CIA and military attachés had extraordinary access throughout Brazil. At one point, the messages describe conversations between Soviet diplomats and leaders of the then-proscribed Brazilian Communist party. The messages further indicate that the CIA infiltrated Brazilian exile movements then forming in Uruguay and Argentina.

U.S. critics of President Johnson's foreign policy in Latin America have long rejected Mr. Gordon's characterization of the Goulart government as increasingly Communist-dominated and headed toward dictatorship.

They point out that the military in fact installed a harsh dictatorship that only in recent years has shown any willingness to share political power. Human rights groups continue to document cases of torture and death of suspected leftists.

Haitians to Stay in France

PARIS, Dec. 29 (Reuters).—Seven Haitians, expelled from their own country, have been given permission to stay in France after arriving here by air last Saturday, police said today.

Rev. Moon Sect Is Denounced by Religious Leaders

NEW YORK, Dec. 29 (AP).—Leaders of Protestant, Roman Catholic and Jewish organizations yesterday denounced the Rev. Sun Myung Moon and his Unification Church as "anti-democratic, anti-Jewish and in direct conflict with basic Christian teachings."

At a news conference here, leaders of the religious groups accused Mr. Moon of fostering hatred and bigotry against Christians and Jews and encouraging the breakup of families.

Appearing at the news conference were the Rev. James Lebar of the Roman Catholic Archdiocese of New York, the Rev. Dr. Jorge Lara-Braud of the National Council of Churches, which includes Protestant and Orthodox denominations, and Rabbi Marc Tannenbaum and Rabbi James Rudin of the American Jewish Committee.

Rabbi Rudin, the committee's assistant inter-religious affairs director, said that a study of the Unification Church's 536-page "Divine Principle" turned up 125 references that give a "demonic picture of Jews."

Argentina Says It Has Ability to Produce A-Bomb

BUENOS AIRES, Dec. 29 (AP).—Argentina has achieved the capability to make an atomic bomb but has no plans to build one, according to the chairman of the Argentine Atomic Energy Commission, Carlos Castro Madero.

"We have attained sufficient capacity to manufacture nuclear weapons, but if we built one it would mean sacrificing our power-generating program, and besides we couldn't keep it secret," he said.

Mr. Castro Madero spoke after touring the construction site of Argentina's second nuclear plant in Embalse Rio Tercero, in the northern province of Cordoba.

"Also, if we started to build a nuclear device, the industrialized countries would immediately suspend the supply of nuclear elements to our country," Mr. Castro Madero said.

Algiers Breaks Gang in Casbah

ALGIERS, Dec. 29 (AP).—A 22-man gang that terrorized the Casbah of Algiers during the last year has been broken and its leaders face a possible death sentence, the official Algerian news agency reported.

Seventeen members of the gang led by Ali Kriba, known as "Lahneche" (the snake), have been arrested, and the other five are being pursued, the agency said. The report did not clarify whether Kriba was among those at large.

The gang, operating in the labyrinth of the Casbah, the ancient heart of Algiers, specialized in burglary, armed robbery and rape, the news agency said.

Argentine Colonel Slain

BUENOS AIRES, Dec. 29 (Reuters).—Col. Francisco Bonifacio Castellanos of the Argentine Army was shot dead today by left-wing guerrillas, a military communiqué said.

Book Ties French 'Illness' to a Reliance on Bureaucracy

By James F. Clarity

PARIS, Dec. 29 (NYT).—French society is sick, asserts a former Gaullist minister in a new, fast-selling book, and his diagnosis is provoking a wave of national self-analysis.

The book—"Le Mal Français" ("The French Illness")—says that over the last 300 years the French have become people who do not trust one another, prefer theories to facts and permit the bureaucracy to strangle the individuality that is their national characteristic and birthright.

The book has been described by some as one of the most penetrating and ambitious attempts by a Frenchman to analyse the French soul. Others criticize the author, Alain Peyrefitte, as superficial and for having written the book mainly to gain himself a place in the French Academy, a largely literary society.

Praises De Gaulle

Whatever its merits, the book is being vigorously discussed on television, in newspapers, cafés, restaurants and living rooms. Prime Minister Raymond Barre referred to it twice, with a grimace, during a television interview last week.

The 51-year-old Mr. Peyrefitte is a Roman Catholic who was at various times the Gaullist official in charge of information, education and scientific research, and his book praises Gen. Charles de Gaulle as the first French leader to try to cure the sickness. But it is not a partisan political book and has won praise, for example, as a "very important work" in a front-page review in Le Monde, the left-of-center daily.

In an interview in his Left Bank office the other day, Mr. Peyrefitte discussed the book, which he said took him eight years to write. He said it had been more or less in his head since, as a 13-year-old boy, he asked his father why the Maginot Line had not extended to the North Sea, a fact that enabled the Germans to outflank it in 1940. His father answered that headquarters knew what it was doing, and Mr. Peyrefitte said he wondered, "But what if headquarters didn't know what it was doing?"

French dependence on authority, Mr. Peyrefitte said, began under Louis XIV, generally considered the founder of the state that evolved into modern France. But for Mr. Peyrefitte, the king also began the bureaucracy that blocks initiative and has led to economic stagnation compared with other European nations and the United States.

Mr. Peyrefitte acknowledges that he was influenced by Max Weber, the German sociologist, who contended that the Protestant Reformation led to rapid economic development in Britain and the United States. Weber did not go far enough, the French author said, and neglected the impact of the Counter-Reformation on countries such as France.

Caustic Comments

While many readers are impressed with Mr. Peyrefitte's historical analysis, living-room discussions turn frequently to his caustic comments on the contemporary society that history has produced.

First, Mr. Peyrefitte said, it has produced a citizen who is constrained by bureaucracy. Mr. Peyrefitte quoted De Gaulle as having said, "Power is impotence," in exasperation over not getting anything done.

Thumbing through the pages of his book, Mr. Peyrefitte pointed to some of his observations about his compatriots.

"Everything moves us to consider reality impure," he said, adding that for a Frenchman "in case of failure, it is the facts that were wrong." Mr. Peyrefitte said that while the French like to talk, they are as suspicious of facts as they are of one another.

He said people today resembled "verbo-moteurs," or word-machines, and could be described, in a parody of Descartes, the 17th-century philosopher: "When I am not talking, I am not thinking, but when I think, I act."

The constraints under which the French live derive, in the author's view, from a lingering tendency to submit, grumbling, to a state bureaucracy that has replaced the Catholic Church in national power.

These constraints, Mr. Peyrefitte feels, have led France to repeated "explosions," such as civil wars and foreign wars. He said his viewpoint is dramatized by the dust jacket of his book, which depicts a map of France made up of matchsticks, with one match, burning close by, threatening to ignite the others.

Mr. Peyrefitte said the national malady could be cured only if people admitted what they were and decided to change their outlook. In response to a question, he picked up a telephone and asked his secretary how many copies of his book had been sold in the first week of publication. He was told that the publisher would not issue figures before January.

Was this an example of the sickness? "Yes," the author said with a slight smile, "the French habit of making everything a state secret is part of the disease."

Seven Million Unemployed in U.S.

Last month the Labor Department's survey counted 7.1 million unemployed Americans, an unacceptably high number. The next president, Mr. Carter, considers the creation of jobs to be his most urgent responsibility. But those 7.1 million people are unemployed for a lot of different reasons. To judge the policies now being pressed on Mr. Carter, it helps to know what goes into the huge total figure.

Why, for example, do we have high unemployment at a time when employers are running yards of help-wanted ads in most newspapers? It's an important point and deserves careful consideration. The explanation begins with a closer look at those ads: they are listed by the skill wanted, beginning with accountants and ending with X-ray technicians. There isn't much offered for people in the category of highest unemployment—the young people with little training and less experience.

Out of that national total of 7.1 million unemployed, about 2 million are people who have been fired, or whose jobs have collapsed. They are out on the street, looking anxiously for new jobs. They represent the classic picture of unemployment that most of us, no doubt, are carrying around in our minds. But they comprise fewer than one-third of the people carried in the unemployment statistics. Who are the others?

Some 1.4 million have been laid off temporarily, and very few of them are actualy looking for other jobs. Their view is that they have good jobs—but they are in cyclical industries like automobiles or steel where layoffs are a part of life. When consumer demand picks up again, they'll be called back to work that is, very often, highly skilled and highly paid. In the meantime they get unemployment compensation and perhaps supplemental benefits. Of all the unemployed, these people are likely to be reachd first and most effectively by a federal tax cut that leaves more money ir consumers' pockets.

Another 2 million of the unemployed are people who dropped out of the labor force altogether and are now coming back in. They dropped out for an infinite variety of reasons: to get more education, to rear children, or maybe just to go skiing. A good many lost jobs months or years ago, and found the market so bleak that they stopped looking altogether. Remember that the Labor Department doesn't count people as unemployed unless they are actively seeking work, or are registered for a call-back. When prospects improve, the dropouts flood back, start looking and become, technically, unemployed again. That's why unemployment never comes down as fast as the jobs increase during an economic recovery.

Another 900,000 of last month's unemployed are people who voluntarily left their last jobs. They decided to risk an uncertain period of unemployment in the hope of finding something better.

The final 800,000 are the people, most of them teenagers, who are looking for their first jobs. Most of them have very little in the way of skills to offer an employer. Of all the major categories, they will be helped least by a tax cut. Many employers will put their experienced work crews on overtime before hiring these young workers. That is one of the reasons why inflation rates begin to rise long before the unemployment rate drops to 4 per cent, the traditional idea of full employment. If these youngsters are to get effective help, it will have to be in the form of training, guidance and, as a last resort, public service jobs.

Even in times of high unemployment like the present, half of the people who are unemployed manage to find work in no more than eight weeks. The long-term jobless—people who have been looking for more than six months—are about one-eighth of the unemployed. Longer searches for the right job—meaning higher unemployment rates—may be inevitable in a rich society like ours, with an increasing number of two-job families. People's toleration is unpleasand working conditions drops when the income is no longer absolutely essential. Unemployment compensation, for example, raises the unemployment rate by a small but significant amount. But it is justified as a contribution to economic productivity, if it helps job-hunters to find the work best suited to their tastes and abilities.

Steady economic growth will make these searches a great deal quicker and more successful. Job training will help in some of the hardest cases. But Americans are increasingly inclined, evidently, to be selective and take their time in choosing jobs. The prospect for the coming year is higher unemployment than the country is accustomed to seeing during economic recoveries, despite anything the federal government can do—and despite those floods of help-wanted ads.

THE WASHINGTON POST.

Namibia's Independence

The United Nations General Assembly sneaked in another political atrocity the other day. Though negotiations for independence are under way in Namibia, the African name of the land South Africa rules as the colony of South West Africa, the assembly shouted through a resolution endorsing "armed struggle" to end Pretoria's control. It is true that the resolution, approved by the kind of margin (107-6) that has come to signal assembly hysteria, adds no guns to the guerrillas on the ground. The idea behind it, however, is appalling: The United Nations is ostensibly devoted to the peaceful resolution of international disputes. Others, not the United Nations, are in fact trying to resolve this dispute peacefully. Yet here comes the assembly to endorse a solution by violence. The vote tramples on the UN Charter and on good sense alike. Anyone wishing to understand why the General Assembly has fallen into such low repute can end his inquiry here.

Behind the vote, of course, lies a shabby political exercise. Some time ago, the Namibian group called the South West African People's Organization (SWAPO) got the assembly to anoint it the "sole" representative of the Namibian people. SWAPO is the Ovambo tribal faction that is probably the best organized political/military operation in the country. But its claim to speak for all Namibians is absurd—at least in the eyes of a plain majority of Namibians, those whose leaders are engaged in negotiations now. By skillful diplomacy and by brandishing its Marxist credentials, however, SWAPO won the assembly's critical sanction all the same.

This is the context in which the new assembly endorsement of "armed struggle" should be viewed—as another diplomatic victory for SWAPO. Its great fear, you see, is that other blacks in Namibia will negotiate the sort of independence that leaves to SWAPO, at best, only that share of power that it could hope to command by its own political resources. SWAPO would prefer to use the leverage of its guerrilla activity and its diplomatic strength to win total power. The UN is its patsy.

SWAPO's greatest ally, however, is not the General Assembly. It is South Africa. It is mainly South African rigidity that has stalemated the negotiations on Namibian independence, discouraged the moderate black tribes and mixed-race communities participating in those negotiations, and given SWAPO the opening that its guerrillas and diplomats are trying to widen now. Many Africans expect Jimmy Carter somehow to breathe new life into the negotiations when he takes office in January. Far more important is whether Pretoria changes its strategy and takes an approach that will permit the prompt establishment of an interim government in Namibia, the immediate ending of apartheid there, and an orderly transition to full independence—as promised by South Africa. By that process, SWAPO would have an incentive to join with its fellow Namibians in the building of the land they share.

International Opinion

The International Economy

In the past year or so the strong economies have continued to do relatively well and the weak economies relatively badly. The strong economies are those of the United States, West Germany and Japan... The new and old leaders of the industrialized democracies have a few months in hand in which to get to know each other—at bilateral meetings rather than a premature collective summit—and it is to be hoped that this is the course that will be followed... It is the United States, Japan and West Germany that are economically strong and are in a position to administer an economic stimulus without provoking new inflation. With this position goes a certain responsibility. The three most successful countries have become the guardians of economic order. They could make best use of this by acting together . . . There is a chance for economic leadership and coordination of a kind that has not been known for some time past.

Seventy-Five Years Ago

December 30, 1901

CHICAGO—The First National Bank in this city is about to erect one of the largest office buildings in the United States. It would cost over $5 million, will be 16 stories high, and will have a ground area double that of any other Chicago building. It is a remarkable fact that the Montauk building, a towering structure of 12 stories, built only a few years ago at a cost of 100,000 pounds, will be pulled down with other buildings to make way for the new Colossus.

Fifty Years Ago

December 30, 1926

LONDON—"If lines are clear and the party at the other end is available, a party in London should be able to say 'Hello, New York' within 30 seconds to a minute after picking up a receiver and asking for 'American service, please.'" E. H. Shaughnessy, assistant chief engineer of the British Post Office, said today in discussing the transatlantic phone service to be opened within two weeks. London businessmen declare the transatlantic service will be well worth the rates charged.

A Voice From the Grave in China

By Victor Zorza

WASHINGTON.—"People's heads are not like leeks," Mao said 20 years ago. "If you cut them off, they won't grow again." The speech has now been published with the kind of fanfare that Peking preserves for major statements of policy—and, as in all such circumstances, there is more to it than meets the eye.

The surface meaning of Mao's pronouncement is that his widow, Chiang Ching, and her three accomplices should not be executed, as some of the victors in the Peking power struggle demand. The first execution, Mao feared, would be followed by a second, then a third, "and then many heads will begin to roll."

In China today, with political passions running high, and with attempts to settle old scores evident everywhere, the bloodbath that would follow the first executions would be fearful to behold. The old guard of party officials and military officers who have been repeatedly demoted, dismissed, and humiliated by the radicals believe that there is only one way to prevent yet another challenge to them—by getting rid of the challengers altogether.

The call for blood to which Mao's speech is a reply is not a simple call for vengeance. It is an issue in the policy debate now going on in the post-Mao leadership on which road China should take. Soon after Mao's death, signs in China seemed to suggest that the new leaders, Hua Kuo-feng and his supporters, particularly those in the army, wanted to adopt some aspects of the Stalinists' mode of government. This interpretation was disputed on the ground that no Chinese leaders would wish to emulate the Soviet example. But the blood purge which some Chinese leaders want to launch in order to liquidate the opposition is a typical Stalinist device, as was the earlier attempt—launched by the army press, and since followed by all the Chinese media—to build up a "cult of personality" for Hua.

A Challenger

The opposition to Hua within the Politburo became evident almost as soon as he had arrested Chiang Ching and her associates. His opponents were pressing for a form of "collective leadership" rather than the one-man rule which he and the army wanted. It even became possible to identify Hua's main challenger, the mayor of Peking, Wu Teh, whose speeches, seemingly in praise of Hua, were couched in terms suggesting that he harbored certain reservations about the new leader.

Wu Teh, who disappeared for a while from public view, has now reappeared. But his record suggests that he is at odds with Hua.

Other Chinese leaders have disappeared from view in the past, and later events confirmed that their disappearances were connected with disputes and power struggles at the top, but some of them were to reappear in due course in positions of even greater strength than before. Indeed, the Wu Teh faction in the leadership seems strong enough to have published a major policy statement of its own—in the form, that is, of Mao's speech of 20 years ago.

It is Wu Teh who has associated himself publicly with the policy of leniency to the radicals, while Hua has insisted that the struggle against them must be carried out "to the end." The use of Mao's speech to oppose the calls for the execution of the radical leaders thus suggests that the Wu Teh faction in the Politburo is still strong enough to have forced on Hua and his military supporters the publication of a document which is, in some ways at least, unwelcome to them.

Nor have Hua and the military been able to force on the rest of the Politburo the major increases in arms spending which the radicals had opposed. Even after Hua defeated the radicals there were signs, between the lines of the Chinese press, that the debate about defense spending was continuing in the leadership. What the evidence suggested was that the army wanted from Hua more money for more and better weapons, as an immediate reward for its support, and that he was unable to grant it to them because of continuing opposition in the Politburo. The Wu Teh faction is now using Mao's voice from the grave to put the military, too, in their place.

Mao's Proposal

Mao spoke at a time when the Peking leadership was divided by a similar dispute on military spending, and he insisted, as political leaders have often done elsewhere, that the best way to increase the country's defense strength was to strengthen the economy first—and to do this by reducing military expenditure. He wanted to cut defense spending by a third so that, he argued, the money should be used "for building more factories and turning out more machines." The defense buildup which the military wanted could be obtained "only with the faster growth of economic construction."

If they really wanted more and better arms, Mao told them, they would cut the arms budget. Otherwise, "you will stay in the old rut."

There are many other points in the Mao speech which could provide ammunition for those who wish to challenge Hua's policies. The old argument about priority for heavy industry on the one hand, and agriculture and light industry on the other, which also plays a major role in the current policy debate, was resolved in the Mao speech to the detriment of heavy industry. But Hua's emphasis on modernization demands a much higher priority for heavy industry than was given to it in the past—even though he also wants more rapid development of agriculture. The military have always argued for a stronger heavy industry as the foundation of a stronger defense capability. The radicals opposed too rapid a pace of modernization because they feared the effect this would have on the peasant-based Maoist model of society.

Thus China's most fateful year since the Communists took power ends, as it began, in a fog of words which seems, at first sight, to make the confusion worse confounded. But the fog can be penetrated. The outlines of the conflict have repeatedly emerged from the fog to make it clear that behind the struggle for power lies a debate over the policy which is to determine the future of a nation of 900 million people. It is surely no exaggeration to say that the way in which the future of the world's most populous—and potentially most powerful—nation is determined could, in the long run, also determine the future of the world.

A Season of Hope, And One of Regret

By David S. Broder

WASHINGTON.—When you look back at 1976, it turns out that the highlight of America's bicentennial year was the Bicentennial. Defying the great American axiom that anything that is planned for more than three weeks or by more than 30 people is bound to be messed up, the 200th Fourth of July produced a smashing success.

Thanks to absolutely glorious weather, a profusion of local inventiveness and a superlative job of coverage by the television networks, we were able to share the experience of a continent-sized block party—a dramatization of national unity that packed more emotion than anything else that happened in this past year.

There were some other memorable moments in the political world: Daddy King's benediction at the Democratic convention, the 28-minute silence on the first debate, Betty Ford's reading of her husband's concession statement.

But, for the most part, the politicians' efforts to perform up to the level of the occasion, or to sustain the spirit of community we briefly glimpsed on that glorious summer day, fell short.

Jerry Ford—A President with whom all Americans felt comfortable and slightly more than half felt frustrated—had a campaign song with the line, "I'm feeling good about America, I'm feeling good about me." An Irving Berlin he isn't, let alone a Lincoln.

Adjective-itis

Jimmy Carter, the fellow who ran against him and beat him, had a speech in which he promised to make the government "as good and honest and decent and truthful and fair and competent and idealistic and compassionate, and as filled with love, as are the American people." If he'd left out half the adjectives, more folks might have believed him—or voted for him.

Some voters felt the contest between these two worthies lacked issues, and Lord knows they were right. But there was a choice to be made, and people understood that, too.

Ford symbolized one kind of unity—built around the traditional Midwestern virtues of eagle scout, self-reliance and commonsense conservatism, leavened by the tolerant attitudes of a close-knit but individualistic family.

Carter was a more complex symbol—a Deep South fundamentalist who had leaped the intellectual, social and political barriers of his upbringing without losing contact with his personal roots. He symbolized a unity of the rural South with the industrial North, of no-longer-segregationist whites and no-longer-intimidated blacks. There were more dimensions to his design, just as there were more complexities—and ambiguities—to his character.

But Carter's constant, too, had its built-in limitations. It worked in the East, but not in the West. It did nothing about the gulf between the cities and the suburbs. Nor did it mark the transition from the World War II veterans who have controlled the government since 1952 to the younger Americans waiting all these years, for their turn.

Over the Hill

The "new generation" of government which Carter promised has turned out, on inspection, to bear a remarkable resemblance to that familiar Washington institution, George Allen's "over the hill gang." Ten of the 11 top appointees, like Carter himself and like Walter Mondale, are Coolidge-era babies. Maybe his slogan should have been, "Keep cool with Carter."

It's hard to see 1976 as the start of a new era for America. Bicentennial romanticism to the contrary notwithstanding. We limp into the third century with a familiar cast of characters and a familiar set of problems, starting with an "economic recovery" that has left us with 8 per cent unemployment.

It is a season of hope—and rightly so. But it is also a season for regret, that some who journeyed through the years past will not be back. Among the congressional retirees, I will miss particularly Senators Mike Mansfield and Stuart Symington, who proved every day that successful careers of public service do not depend on the ruthless indulgence of personal ambition, and that effective politicians can also be considerate human beings.

Like others, I mourn the death of that good man, Sen. Philip Hart.

We will be lucky if this new year—and its leaders—come anywhere close to measuring up to the heritage and the hopes of these men.

Mondale as Chief of Staff

By James Reston

WASHINGTON.—Most new administrations come to Washington proclaiming great changes, and leave regretting the stubborn resistance of the human race to all their noble plans, but as the Carterization of Washington proceeds, the idea is getting around that it may really be a new year after all.

There is already a new emphasis on the home front, on the problems of the American family, on the importance of Vice-President-elect Mondale, who has been appointed "chief of staff," and on collective Cabinet responsibility, particularly in the fields of economics, finance and military and foreign affairs.

All this, of course, we have heard before in other transitions from intentions to realities, but while these are still personal tendencies reflecting Carter's naval and managerial techniques, the difference now is that the President-elect is acting on them.

Some Firsts

Mondale has been given a larger role in the selection of the Cabinet and the preliminary discussions of policy priorities than any other vice-president-elect in memory. He was in on the first pre-Cabinet meeting with the economic subcommittee of the President-elect's first team and will preside over the National Security Council in the absence of the President.

This has happened before too, but Carter apparently means to assign Mondale, as the only other official elected by the people, the hard and critical task of seeing to it that presidential decisions are carried out by the departments and agencies—a result often evaded down below.

Every American president elected in the last 36 years has been preoccupied with foreign affairs—with the preliminaries, the operations and the consequences of the Second World War, the Korean and Vietnam wars and the cold war. But Carter is apparently persuaded that a strong nation—economically and morally—is the first priority for the new world stability he has been talking about.

Maybe he will be diverted like so many of his predecessors, for he will quickly face many urgent world economic and political problems, but he is taking over responsibility in a country with almost 8 million unemployed, and a capital city which according to the latest figures now has as many abortions per year as live births, and as many illegitimate births as legitimate.

Priorities

We have not heard much from the President-elect lately about the physical, mental and moral health of the American people, or about policies at home and abroad that will reflect the moral integrity of the nation, but once the clatter of Cabinet-making is over, his deep personal concern over these matters will undoubtedly get a high priority.

Carter has been talking vaguely about seeing Leonid Brezhnev of the Soviet Union and Premier Rabin of Israel, President Sadat of Egypt and other Middle Eastern leaders, but much later in the new year, and probably in this country rather than overseas. In fact, he is being urged in some quarters to ground Henry Kissinger's shuttle, and avoid the crisis-oriented, glamorized diplomacy of the Kissinger era.

For example, J. Robert Schaetzel, former U.S. ambassador to the European Common Market, has recently written a paper urging him to give foreign policy a "low priority" for a time in order to master the intricacies of energy availability and pricing, the Middle East tangles, the strategic arms talks, North-South relations, and the international economic crisis.

The world, of course, may not accommodate itself to Washington's desires—it never has—particularly with Italy, Britain and Panama among others clamoring for attention. Nevertheless, Schaetzel argues that now is the time for more reliance on U.S. ambassadors abroad and for a "calculated pause before rushing at problems" so that the President can concentrate at the beginning on the domestic economy. "In point of fact," he says, the U.S. economy "is precisely America's most critical foreign policy issue."

Time Needed

The news out of the President-elect's first Cabinet meetings on St. Simons Island, Ga., tends to support this cautious approach rather than going for spectaculars in "the first hundred days." For it is clear that the new team needs much more time to analyse the facts and work out coherent policies that will stand the test of legislation and negotiation later on.

There is one other fairly obvious change. The new designated hitters on Carter's team seem to be taking Carter's promise of authority literally, for while they have not been as available to the press as expected, they do seem to talk as informally as they look when they do appear.

For example, they are now hedging a bit on that Carter talk about cutting $5 to $7 billion out of the defense budget and taking it a bit easier on sudden reforms of welfare and national health care.

But overall, there is a sense of change in the air, not only within the Cabinet and the White House staff but in their relations to one another, the President and the Congress. Carter said the new "chief of staff," Fritz Mondale, "shores up my weaknesses" and told his Cabinet not to worry about orders from the White House staff.

"You'll never experience any directive coming from my White House staff to you (the Cabinet) on their own initiative," the President-elect said. "If they tell you and say the President wants so and so done, you can rest assured I've told them that's what I'd like them to ask you to do."

It hasn't always been that way around here.

The International Herald Tribune welcomes letters from readers. Short letters have a better chance of being published. All letters are subject to condensation for space reasons. Anonymous letters will not be considered for publication. Writers may request that their letters be signed only with initials but preference will be given to those fully signed and bearing the writer's complete address.

Officials See a Breakthrough

India Progresses in Birth Control

By William Borders

NEW DELHI (NYT).—India is coming to the end of 1976 with a record of decidedly the most significant progress in birth control that it has made during any year in its history.

In a vigorous program launched last spring to give "top national priority" to solving what many perceive as one of the world's gravest population problems, India is now performing sterilization operations at four times the rate of a couple of years ago.

From the crowded urban slums to the dusty farm villages where most of the people live, there is a new awareness of the federal birth-control program, because of a system of official vasectomy quotas at every level and a strong program of what the government calls "incentives and disincentives."

"People have come to realize the importance of family planning to them, to their families, to the community, to the nation as a whole and to the children yet to be born," said Family Planning Commissioner Serla Grawal in a year-end statement.

According to government figures, about 7 million sterilization operations have been performed in India, most of them on men, since the beginning of this year, bringing to 20 per cent the proportion of fertile couples now protected one way or another against conception. With a population of 620 million, and adding 35,000 more people every day, India still has a population problem that is "most urgent," as Prime Minister Indira Gandhi has been saying more and more frequently.

But the successes of recent months have generated, at least temporarily, a new enthusiasm in an area previously often marked by despair. As a rural doctor in a birth-control clinic 1,000 miles south of here said recently: "I get the feeling for the first time that there's a real sense of commitment to population planning in India, all the way from the top to the bottom, and that can truly make the difference."

Critics of the government program charge that it often amounts to compulsory sterilization, which they find repugnant. They say there are particularly widespread abuses in the new quota systems, in which low-ranking officials and teachers are often charged with bringing in a certain number of vasectomy candidates a month.

In reply, the government concedes that there have been instances of overzealousness, sometimes leading to rioting. But it denies that compulsion is the intention and maintains, as Mrs. Gandhi put it earlier this year, at the beginning of the current drive: "We should not hesitate to take steps which might be described as drastic. Some personal rights have to be kept in abeyance for the human right of the nation, the right to live, the right to progress."

The greatest source of the program's impetus is Sanjay Gandhi, the Prime Minister's increasingly powerful 30-year-old son, who constantly promotes vasectomies in his frequent public appearances around the country.

Mr. Gandhi, who is married but has no children, is the leader of the ruling Congress party's important youth wing, which has adopted family planning—with the slogan "Stop at Two"—as one of the points in a five-point program of social improvements that also includes tree planting and an attack on illiteracy.

India has officially encouraged family planning for 25 years, but the program, fighting superstition and backwardness among a largely illiterate population, achieved only limited success.

Part of the cover of Pakistani booklet on birth control.

Only 6% of Couples Participate

Survey in Pakistan Indicates Birth-Control Drive Founders

KARACHI (NYT).—After an intensive program of education, at a cost of more than $50 million, Pakistan is scarcely any closer to solving its population problem now than it was 10 years ago, according to an official survey.

The comprehensive survey, which was published a few months ago, indicates that only 6 per cent of the fertile couples in the country are practicing any method of birth control, despite propaganda and the wide distribution of contraceptives.

"Naturally it's discouraging," said one of the many officials working on the ever-expanding government program. "It just means we'll all have to try harder."

With 75 million people living in a poor, arid land that is only twice the size of California, Pakistan has one of the world's gravest population problems, as it officially recognized in the middle 1960s.

'Gets You Down'

"That's what gets you down—that they've been working on it so long here in Pakistan, with so little results," said one of the many foreigners who have come to Pakistan to help deal with the problem. "In Africa, in parts of Latin America, they're just beginning to take note of population, but the Pakistanis were thought to be way ahead."

According to the fertility survey, which was based on interviews with 5,000 carefully selected women around the country, Pakistan's birthrate is 40.5 per 1,000 of population. Some independent estimates place it even higher, at 43 or so per thousand—which is three times the birthrate in the United States.

Here, as in other underdeveloped nations, the phenomenon known as the population explosion results not from an increase in the birthrate but from a decline in the death rate, because of improvements in health care and sanitation. At the present rate of growth, Pakistan's population will double in 23 years.

"The shadow of overpopulation darkens the prospect of our economic advance; it nullifies our efforts toward social progress," Prime Minister Zulfikar Ali Bhutto said recently. But some of Mr. Bhutto's critics complain that he is not a sufficiently enthusiastic advocate of birth control.

Moslem Orthodoxy

Pakistan is a rigidly orthodox Moslem society with a particularly low literacy rate among women, many of whom rarely venture out in public, and talking about birth control is not considered politically wise here. Nevertheless, some people expect Mr. Bhutto to step up the population-control program after the general election expected early next year.

Already he has given the birth-control program greater priority by elevating its director to the rank of government secretary, a significant move in this protocol-conscious government. The man who holds the job, Badruddin Zahidi, spoke in a recent interview of giving "top priority" to the program.

The government has nearly doubled its birth-control budget, and it is planning to involve thousands of practitioners of indigenous medicine and other locally influential people.

Mr. Zahidi also plans to lay much greater stress on sterilization and government planners hope that by the early 1980s as many as 7 per cent of the couples will be protected by sterilization —of the woman, in most cases.

Obituaries

Mainbocher, a Couturier, Ran Salons in Paris, U.S.

NEW YORK, Dec. 29 (NYT).—Main Rousseau Bocher, 85, a fashion designer from Chicago who, under the name of Mainbocher, was a dominant figure in Paris couture during the 1930s, died in Munich Monday night.

Douglas Pollard, a fashion artist and a long-time companion of the designer, said Mr. Bocher had pneumonia for several months and died of emphysema and other complications in Harlaching Hospital.

Mr. Pollard said that Mr. Bocher's body would be cremated and that the ashes would be buried in France.

For 40 years, Mr. Bocher dressed rich and influential women, starting in his custom salon in Paris from 1930 to 1940. "Hitler put me out of business," he recalled.

Transit, Gloria

He then set up shop in New York, where he dressed such women as Gloria Vanderbilt, C. Z. Guest, Mary Martin and Esme Hammond, until he closed his salon in 1971.

He was then 80 years old, and felt he had "10 more good years" work in him, but the landlord had raised the rent on his salon and he felt he could not afford the extra cost. His clothes were still made primarily by hand, in the old couture tradition.

He presented his scrapbooks of his collections for 40 years to the Costume Institute of the Metropolitan Museum of Art—the sketches were made by Mr. Pollard—and moved to Europe.

For the rest of his life, he alternated between Paris and Munich.

He had gone to Europe originally to study music, but soon began to sketch dresses for fashion designers there to help support his mother and sister. Later, he worked for Harper's Bazaar as an artist and for French Vogue as fashion editor.

It was a time of grandeur and Mainbocher—he ran his name together in the manner of other couturiers—startled the fashion world by his designing simplicity. He made short evening dresses instead of long ones, designed cloth coats for wear at night instead of furs and used peasant-like checked cottons for grand evening dresses. He became the rage of Paris.

Later, when he worked in New York, he introduced the decorated sweater that continued in fashion from 1941 to the mid-1950s.

Perhaps his biggest achievement was his conception of the basic black dress, which was varied by the addition of flowers peplums and overskirts.

He was also proud of the uniforms he designed for the WAVES, the Women's Auxiliary of the Marine Corps and the Girl Scouts.

Perhaps his most celebrated client was the Duchess of Windsor, the former Mrs. Wallis Warfield Simpson. He designed her wedding dress. The gown's color Wallis Blue, was devised to fit in with the pale watery green of the salon in the Chateau de Cande, where the wedding to the former King Edward VIII of England took place.

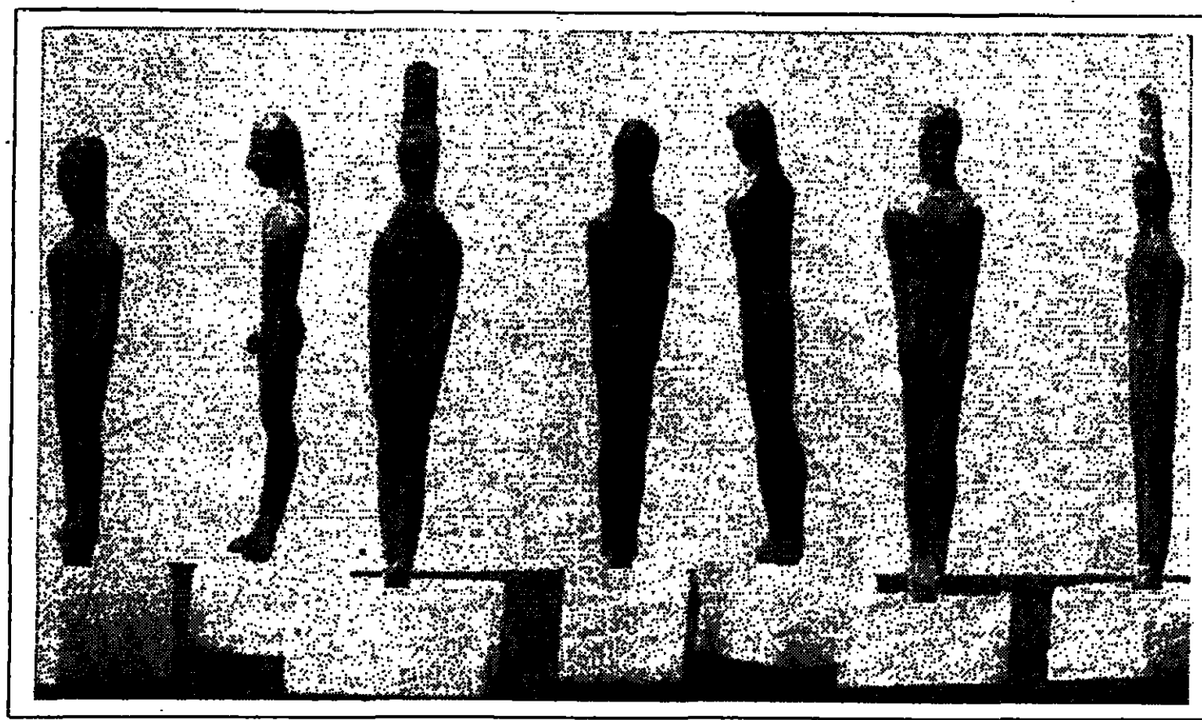
Ivan O. Belinsky

MOSCOW, Dec. 29 (AP).—Ivan O. Belinsky, 100, the Soviet Union's oldest general, has died, the *Soviet Army* newspaper *Red Star* reported military. The general started his military career as a cadet in 1887 at the age of 11.

Philip Iselin

NEW YORK, Dec. 29 (UPI).—Philip Iselin, 74, president of the New York Jets football club and Monmouth Race Track, died yesterday here after suffering his second heart attack in three months.

Noor Amin



NAIROBI, Dec. 29 (AP).—A son of Ugandan President Idi Amin, Army Capt. Noor Amin, 35, collapsed and died after a Boxing Day party Sunday, according to reports from Kampala.

Ivo Van Damme

ORANGE, France, Dec. 29 (UPI).—Middle-distance runner Ivo Van Damme, 22, of Belgium, 800-meter and 1,500-meter silver medal winner at the Olympic Games in Montreal, was killed in a car accident near here today, police said.

Prineess Andrée

CANNES, Dec. 29.—Princess Andrée, 70, the former second wife of the late Aga Khan, died here today, family sources said. Princess Andrée, the former Andrée Caron, was the mother of the United Nations High Commissioner for Refugees, Prince Sadruddin Aga Khan.

Bronze Bonanza

These bronze statuettes (about 10 centimeters high) are among the treasures excavated at Gabbi, 12 miles east of Rome, at a 2,700-year-old shrine. Italian authorities discovered the site last spring by trailing relic hunters. The shrine was evidently part of a much larger sanctuary. Scientists are now examining the finds—the dig will begin again in the spring.

The French Winemakers in California's Napa Valley

By Frank J. Prial

YOUNTVILLE, Calif. (NYT).—"When we first came to California, there were two stories being told about us," said John Wright, president and board chairman of M. & H. Vineyards in California's Napa Valley. "One was that we were involved in a land ripoff. We were going to buy land and sell it. The other was that we were going to make bad wine purposely to downgrade all California wines."

Boths rumors about M. & H. were false. It did buy a lot of land in the Yountville area—1,300 acres—and it has made wine. But it is hardly bad wine. In fact, even some of the most committed California wine chauvinists are saying that M. & H. already has set a new standard for fine American sparkling wine.

M. & H. stands for Moët & Hennessy, the French holding company that controls Moët & Chandon, the largest champagne maker in the world, Hennessy Cognac and the house of Christian Dior among other things. Moët, already a successful sparkling wine maker in Argentina, decided more than five years ago that the new American wine boom was worth a major investment.

First Fruit

Last week the first fruits of the investment were released to the public: 2,000 cases of Domaine Chandon Napa Valley Brut. The sparkling wine, which has been wondered about and worried about for five years in California, was snapped up and sold within days. "We've already angered half the retailers in the state," Mr. Wright said.

Eventually, M. & H. hopes to ship 120,000 cases a year. Between now and next September, however, only about 10,000 cases will be released, all of it to the California market.

Half of it will be Napa Valley Brut. The rest will be called Cuvée de Pinot Noir. The brut is a blend of about 60 per cent pinot noir grapes, 20 per cent chardonnay, 15 per cent pinot blanc and 5 per cent ugni blanc, a grape Moët has had success with in Argentina. The cuvée is composed predominantly of pinot noir, the classic Burgundy and Champagne grape.

Mr. Wright said, "We really don't see any wine going to the East Coast until the first quarter of 1978," a situation that might lead to an informal trade that could surpass the Coors beer fad of recent years.

Bottle at a Time

"A lot of what I sell will probably go East a bottle at a time in someone's luggage," a San Francisco wine merchant said. Both the Napa Valley Brut and the Cuvée de Pinot Noir sell for $7.80 in California.

"We won't be competing with our own imports," Mr. Wright said. "But we're positioned in the full Moët champagne line. Dom Pérignon is up there," he said, pointing toward the ceiling of his temporary office, "and we're here." He patted the surface of his desk.

Just above Domaine Chandon, the label chosen for the new line, is Moët's nonvintage champagne at about $10.

The resident winemaker at Domaine Chandon is Sergio Traverso, a young Chilean with a degree from the University of California. The man in charge at crucial moments is Edmond Mautière, Moët & Chandon's cellarmaster in France. The French company, with an estimated $11 million invested here, keeps Domaine Chandon on a very short leash.

All champagnes are blends. Each champagne label represents a specific style and sometimes 25 or 30 wines are mixed to maintain that style year after year. Domaine Chandon is no exception. But its blends must be approved at Moët headquarters in France.

In addition to Mr. Mautière, who spends about a third of his time in California, Moët also dispatched its head *remueur*, Lucien Dambron, to Yountville to teach the Americans the art of *remuage* (or riddling, as it is known in California)—turning the upended champagne bottles every day or until the sediment settles on the corks.

All this activity takes place in a winery destined to become one of the showplaces of the Napa Valley, already a treasure trove of magnificent wineries. Domaine Chandon is a huge winery by Northern California standards. When completed, perhaps in the spring, it will have storage and bottling facilities for 7 million bottles.

Visitor facilities will include a tasting room, a retail shop, a museum and, if the Napa County Board of Supervisors approves, a French country restaurant. County officials are wary of anything too touristy in what is still mostly a beautiful rural area.

"We want the restaurant very much," Mr. Wright said. "We have a job of education to do here. We want to show people that sparkling wine is more than something for special occasions. We want to show that it goes with meals, too."

Mr. Wright explained that sales were being confined to California for marketing purposes. "If we spread it around the country, we'd have no way to learn who buys it and whether they come back for more. This is really our test marketing period."

Almost Rosé

The sparkling wine—it will not be called champagne—that Californians are buying now under the Domaine Chandon label is a blend of both the 1973 and 1974 vintages. The Napa Valley Brut has a very slight taste tinge to it. The Cuvée de Pinot Noir is almost a rosé. The color is the result of the way the pinot noir grapes were picked and vinified.

The 1974-'75 Cuvée de Pinot Noir is lighter in color. Eventually it may be made with the same golden color as traditional champagnes, but Domaine Chandon people are waiting for public reaction. If it is good, they may keep the color the way it is.

At present all Domaine Chandon grapes are purchased from other growers. M. & H.'s own vineyards will begin to bear usable grapes next year. So far, 200 acres have been planted. Eventually an additional 700 acres of vines are planned.

To date, Domaine Chandon has kept a low profile. Even now the promotion budget is almost nonexistent. There has been some good publicity, though, from a man who swears he will have nothing to do with the stuff: Victor Bergeron—known to most people as Trader Vic.

Mr. Bergeron, himself of French descent, says the French have smeared California wines for years. "Now they come in here, where the market is growing and take business from our own wineries," he said. "When you buy California wine, you support California business and the money stays here."

Trader Vic backs up his anger with table-top announcements in his restaurants depicting himself and a terrified-looking Frenchman. "We will not buy any of Domaine Chandon wines," he says.

From Throne Rooms to Toothpicks

SHOPPING IN LONDON

By Naomi Barry

LONDON (IHT).—"A bacon and egg sandwich in 18-carat gold, please. Our chairman was in Geneva last summer. Couldn't get any food he liked."

Asprey made up the order in various shades of gold, set it on a slab of quartz, and dispatched it to the United States.

An ardent duck hunter from Anchorage called for a duck press. "The same kind they use at Tour d'Argent, but silver-plated." The press now sets the tone for gourmet dinners in Alaska.

Asprey, the world's most extravagant gift shop, is having its biggest holiday season in its 195-year history. But, as usual, there seems to be hardly a soul in the New Bond Street shop. This is because of sales abroad. Last year Asprey's got the Queen's Award to Industry for outstanding export achievement. This year the falling pound brought business from customers of every nationality. All packages were wrapped in shiny paper of the color known as Asprey purple.

Own Designs

The firm, which was established in 1781 by descendants of Huguenot craftsmen, differs from most other purveyors of fine china, crystal, jewelry, bibelots, antiques, leather goods and expensive novelties. It maintains its own ateliers and designing rooms over the selling floors.

Clients who want throne rooms turn to Asprey. Asprey's Porteous Wood has designed three for Saudi Arabia and one for Nepal, among others.

"There's nothing like it, I venture to say," remarked 74-year-old Eric Asprey. "We are the Pabergé of our times."

What makes the house so special? Mr. Asprey touched on a few high spots. To commemorate the first commercial flights of the Concorde this year, Asprey made up for stock a silver model of the plane. It took a year to prepare. As plans changed for the Concorde, the model was altered to the new specifications. The Asprey model was sold two days after it went on the floor.

There has long been a tidy business in the making of precious gold and silver replicas of favorite horses, dogs, vintage cars, sailboats, homesteads. The silver model of the QE 2 in London's Ritz Hotel came from Asprey's workrooms.

Scale Models

This year saw requests for scale models of a gun carriage and a half-track, the last word in a floating oil rig and a log cabin in South Carolina. Down to the Persian Gulf went a number of jeweled sheaths for heirloom daggers. A house classic now is a chess set—medieval bands in white and yellow gold—designed for Ringo Starr.

The Germans are buying antique silver. The Japanese want leather goods. The discreet Asprey luggage, shows off only in the lining with a company pattern of fleurs-de-lys in beige on beige, harking back to the family's French origin. The latest status symbol is a matched set of seven pieces which fit with tooled precision into the trunk of a Rolls-Royce. Popular are fitted buckets with all the necessaries for grooming a pony and fitted baskets for grooming a horse. The deluxe picnic hamper is a big seller.

"An American family came back this year laughing," Mr. Asprey said. "Told me they had to buy a bigger car to hold their hamper."

Rich people come to Asprey for the luxurious interpretation of their daily needs. An American wanted a folding toothbrush to carry in his waistcoat pocket—for his dentures. The handle was in solid gold and with real bristles. The gold toothpick is part of regular stock. The gold-toothed beard comb has handles either of ivory or jade. The pepper mill is in 9-karat gold with a cabochon turquoise knob.

Mailing List

A purchase puts you on the mailing list for the full-color catalogue. If you don't make a second purchase after three years, your name is scratched. As long as you are part of the customer family, however, Asprey will go to all lengths.

The problem of a duck press came up again recently. A client wanted one for a private party. Nothing special, just a regular model. Asprey had none in stock. After scouting every other possible London shop and finding nothing available, the firm borrowed one from the Westminster Technical School, which teaches catering, and lent in to the client.

Said an Asprey executive with true club spirit, "If we can't do it one way, we do it in another."

Art Work Is Stolen From Italian Convent

L'AQUILA, Italy, Dec. 29 (UPI).—Thieves broke into the tiny Michetti convent before dawn today and stole a 17th-century painting of the Madonna and Child, police said.

The painting has not been attributed to any artist but it has been judged to be of great artistic value.

The thieves smashed through the door of the adjoining church to enter the convent in nearby Francavilla, police said, and made off with the 2.3-by-2-foot painting after removing it from its frame.

Closeup on 'Hansel and Gretel' Shows Pitfalls of Opera on TV

By Henry Pleasants

LONDON, Dec. 29 (IHT).—One of the besetting problems of televised opera is the difficulty, if not the impossibility, of sustaining illusion with a medium required to work at such close quarters.

This proved, not surprisingly, to be a consistently inhibiting factor in the otherwise charming new BBC-TV production of Engelbert Humperdinck's "Hansel and Gretel," sung in English and shown this week on BBC-2 with the score broadcast simultaneously in mono on Radio 3.

In an opera house, the spectator's distance from the stage assists the director and the artists in persuading an audience that an adult soprano and an adult mezzo may be just a little girl and her little brother. In this TV production it was impossible ever to imagine Elizabeth Gale, the Gretel, and Patricia Parker, the Hansel, as anything but two delightfully personable young British opera singers. Some way should have been found to relieve Miss Parker of the proud assertion: "I am a boy!"

Nothing to do about it, probably. It is conceivable that an accomplished choirboy might be found to play Hansel, but Gretel's music is too operatically demanding to be entrusted to a young girl. It is, come to think of it, too operatic for this fairy tale, and may be counted a miscalculation on Humperdinck's part.

For the rest, the production, with Benjamin Luxon, Elizabeth Connell and Ann Howard ideal as father, and mother, and witch, is another impressive success for the team of Brian Large (producer) and David Lloyd-Jones (conductor), whose past productions have come closer than any other to a satisfactory translation of opera from stage to screen, including the fact that the musical performance is not pre-recorded, and the lip-synchin- so vexatious in other productions is thereby avoided.

Visual diversions for the overture and instrumental interludes are imaginatively conceived and executed, including, of course, a fanciful "Ride of the Witches" and, less obviously, a ride on a lily pad gondola through the magic forest for the dreaming children during their nap. One notes that the gondola leaves no wake—but then remembers that this is, after all, a magic forest.

ART CONSEIL CLUB AND THE CHRISTMAS & NEW YEAR'S HOLIDAY

A work of Art is a gift that honours the person who receives it; it is a mark of good taste on the part of the person who offers it

ART CONSEIL offers a personal membership card to its adherents (1). Thanks to this card, ART CONSEIL allows you to purchase at a good price, works of renowned and esteemed painters.

1976 N° 0010669

Sur présentation de cette carte

ART CONSEIL-INVESTISSEMENTS

est heureux de faire plaisir à

Mrs. C. Smith

d'une réduction exceptionnelle de 20 % sur tous achat payé

les éditions ART CONSEIL (Chagall, Dali, Buffet, de Segonzac, Zadkine, Hartung, Manessier, Miró, Picasso, Wesselmann, etc . . . ainsi que toutes une pléiade de jeunes artistes contemporains).

Signature du Lecteur :

If you use this card before the end of the year, you will get a 20% discount on our editions and a large rebate on our paintings (2). If used in 1976, the card will be renewable in 1977. So, use it for your Christmas presents

ART CONSEIL is open daily from 10 a.m. to 7 p.m. except Sunday, 122 Rue La Boétie, 75008 PARIS. ART CONSEIL will exceptionally be open on Sunday, December 19 and 19 to facilitate your eventual purchases.

(1) If you don't have a card please come to the Gallery, without obligation, and apply for it.

(2) If desired, you may buy now and pay later

PARIS, THURSDAY, DECEMBER 30, 1976

Itoh Will Absorb Ataka; Debt Put at $3.4 Billion

TOKYO, Dec. 29 (AP-DJ).—C. Itoh & Co., Japan's fourth largest trading house, signed an agreement today with the financially stricken Ataka & Co. to amalgamate by next Oct. 1.

The object of the merger is to stave off the near unimaginable financial consequences if Ataka were unable to repay its debts, currently estimated at 1 trillion yen (about $3.4 billion), officials involved in the merger said.

The major banks—Sumitomo Bank and Kyowa Bank—which arranged the merger, said the agreement was completed "with the understanding that the problem of Ataka isn't only the problem of a single private business entity but also a problem affecting the whole national economy."

A bank official said that the government and its agencies were particularly concerned about the fate of Ataka—the country's 10th largest trading concern—because of the enormity of its debts.

The official said that over 230 Japanese financial institutions held about 540 billion yen on the trading firm's debts. About 44.1 billion yen is owed to foreign banks and financial institutions. The rest is owed to customers and affiliates of Ataka.

"We hope that this agreement can be worked out successfully. If it can't be, not only the credibility of the huge Japanese trading houses will be undermined, but the worldwide effect might be a kind of panic," a Sumitomo Bank official said.

The memorandum of agreement said that both Itoh and Ataka seek "warm support and understanding for the purported amalgamation not only from the Nippon Steel Corp., which has backed the two companies since the initial business tie-up (Feb. 16), but also from the government authorities . . . and Dai-Ichi Kangyo Bank (Itoh's major bank)."

Sumitomo Bank said, however, that the government support would not be in the form of financial aid.

Sumitomo said that it and Kyowa Bank had extended about 50 billion yen in additional aid to the company since its problem began when Newfoundland Refinery Co. of Nova Scotia defaulted on a huge sum of payments. The Canadian refinery is a wholly-owned subsidiary of Shahsen Natural Resources of New York. Ataka's U.S. unit, which acted as an import agent for Newfoundland Refinery, was owed about $75 million when the trouble became public late in 1975.

Today's agreement will result in the creation of the third largest trading concern in Japan, ranking behind Mitsubishi Corp. and Mitsui & Co. Marubeni is currently ranked No. 3 among the trading companies.

The agreement stipulates that the formal agreement for amalgamation will be signed by the end of May. Shareholder approval is expected by June and the actual merger is scheduled for next Oct. 1.

By that time Ataka is expected to have divested itself of most of the divisions which in the past competed with those of Itoh.

About half of Ataka's 3,500 employees are expected to remain with the restructured concern. It is expected that Ataka's chemical and iron-steel divisions will remain intact while other divisions such as textiles will be sold off for their assets.

The memorandum of agreement said the following conditions will have to be met before the merger can be completed:

- "Positive cooperation" of the major banks involved with Ataka and Nippon Steel as well as other customers of the company.
- The financial condition and profitability of Ataka will have to be improved.
- It will have to meet the requirements of Japan's anti-monopoly laws.
- There must not be any "material impediments to the amalgamation."

Ataka reported earlier this year that it had a net loss of 35.485 billion yen in the fiscal first half ended Sept. 30 compared with a loss of 650 million yen in the year-earlier period. Its sales totaled 821.871 billion yen, down from 997.344 billion yen.

Kuwait to Back Loan for Spain

NICOSIA, Dec. 29 (AP-DJ).—Kuwait is to underwrite a $500-million bond issue for Spain, the Saudi Arabian press agency reported today.

The money is to be raised through loans in Kuwait and other oil-wealthy Arab countries, the agency said.

Norwegian Unit Recommends Aid To Shipbuilders

OSLO, Dec. 29 (Reuters).—A government-appointed committee has proposed a series of measures aimed at helping Norway's crisis-hit shipyards.

The measures include a government-backed guarantee of 400 million kroner (about $77 million) to secure the necessary delivery credits next year. The committee also proposed a fund of 300 million kroner for reorganizing the shipbuilding industry into other production.

Industries Minister Bjartmar Gjerde warned that further cuts in Norway's shipbuilding capacity were necessary despite a previous 20-per-cent reduction through restructuring and shorter working hours.

The report said that several Norwegian yards would be without contracts in six months. Japanese yards are offering new ships at prices 30 to 40 per cent less than Norway's yards, it said.

U.K. Aid Sought

LONDON, Dec. 29 (Reuters).—British shipbuilders today appealed for urgent government aid to prevent the industry's decline through lack of orders.

John Wright, president of the National Association of Shipbuilders and Repairers, said Britain was now the only major European shipbuilding country without a survival policy for its industry. He said orders are running at no more than one-third of the tonnage required to maintain the output of U.K. yards at its present level.

N. Korea Settles Debt

TOKYO, Dec. 29 (AP-DJ).—Japan and North Korea reached an agreement on the rescheduling of North Korea's $200-million trade debts to Japan Sadao Murakami, president of the Japan-North Korea Trade Council, said today. The agreement also included new interest rates to be charged on overdue debts but Mr. Murakami declined to disclose details, because, he said, North Korea now is negotiating its debts with West European nations.

Financial News and Notes

KemaNord to Bid for Swedish Match

Sweden's KemaNord chemicals group plans to make a take-over offer to the shareholders of the Swedish Match group (Svenska Taendsticks AB) following rejection of the offer by the STAB board. KemaNord plans to offer one new KemaNord share and a 200-kronor convertible bond carrying a 9-per-cent coupon for every four STAB shares. The STAB board said it will recommend that its shareholders reject the offer. The two companies are both part of the Wallenberg industrial empire. The president of the STAB board, Lars Erik Thunholm, who also heads the Wallenberg command ship, the Skandinaviska Enskilda Bank, says that "there were primarily two factors which made us advise the shareholders against accepting the KemaNord bid: It cannot give STAB advantages in the long run and it is not attractive enough for the shareholders. Furthermore, the two companies are structurally different."

Luxembourg Banks to Merge

Banque Internationale à Luxembourg (BIL) will absorb Banque Lambert-Luxembourg, a wholly-owned unit of Banque Bruxelles Lambert. The Belgian bank currently holds an undisclosed interest in BIL and as a result of the transaction will own 45 per cent of the Luxembourg bank. A special shareholders' meeting has been summoned for Jan. 6 to vote on the merger proposal. The nominal stock capital of BIL is to be raised to 1 billion francs (about $28 million) from 800 million francs and will be paid from Lambert-Luxembourg's assets, totaling 468 million francs. Former Luxembourg Banking Commissioner Albert Dondelinger has been nominated as chairman of the merged unit.

U.S. Airline Traffic Rising

U.S. airline travel has shown unexpected growth in 1976 after slumping for three years. Domestic trunk traffic will be about 10 per cent above last year's, putting some carriers over the break-even point. TWA, which last year reported a corporate loss of $86 million, this year will make around $30 million. Eastern Air Lines, which lost nearly $50 million in 1975, will report record earnings in 1976. And Pan American World Airways, which has lost money every year for seven years, hopes to get closer to breaking even in 1976. George James, senior vice-president for economics at the Air Transport Association in Washington, estimates profits for the U.S. industry as a whole will range between $325 million and $375 million. Traffic next year is seen rising 6 per cent or so, and Mr. James says industry earnings could hit $400 million.

Metal-Substitute in Buildings, Vehicles

Fibered Epoxy Seen U.S. Industrial Boon

By Victor K. McElheny

NEW YORK, Dec. 29 (NYT).—One of industry's holy grails, pursued with growing fervor as pressure mounts to conserve energy and scarce materials, is to reduce the weight of a structure—such as a space shuttle, an airplane, an automobile, a bicycle or a golf club—while retaining its strength.

In the last 10 years, an increasingly economical but still expensive way to achieve strength with lightness was to embed fibers, composed of the somewhat amorphous form of carbon called graphite, in epoxy and other resins to make components as stiff and strong as metal, but much lighter.

The price of the fibers, made first from rayon, then from polyacrylonitrile and finally from pitch, sank from $500 a pound at introduction in the mid-1960s to $32 this fall.

Larger and larger structures became possible. The record currently is held by the giant doors of the space shuttle's cargo bay, fabricated by the Tulsa plant of Rockwell International Corp.'s Space Systems Division. The graphite yarn used in the 60-foot-long door assemblies is called Thornel 300 by its manufacturer, the Carbon Products Division of the Union Carbide Corp.

Use in Autos

If the cost of the graphite fibers could be driven below $10 a pound, enthusiasts say, the product would gain such mass-market uses as a graphite-epoxy frame for an automobile.

To achieve the overall stiffness of a steel frame, the graphite-epoxy structure would only have to weigh a fourth as much, according to William Chambers, who until recently headed carbon fiber development for Union Carbide.

Furthermore, he reported last year, the graphite-epoxy composite—in contrast to "monolithic metal"—could be tailored to provide stiffness and strength only at the precise points needed, thus saving more weight. Also, the frame would not have to be overdesigned to allow for rusting.

In Dr. Chambers's view, lightening a car's frame would also bring massive savings in engine power and weight, suspension systems, brakes, wheels, tires and energy consumption.

The day when such possibilities can be considered seriously now seems much closer after Union Carbide's recent announcement that it is producing a continuous graphite fiber from pitch at a price of $20 a pound instead of $32.

2,000 Filaments

The fiber contains 2,000 filaments. Its stiffness, or "elastic modulus," is rated at 50 million pounds per square inch. Its tensile strength is rated as 175,000 pounds per square inch.

Union Carbide is predicting that the price of the fibers in the early 1980s, when production is expected to go above a million pounds per year, will be less than $10 a pound.

With the assistance of such light materials as graphite fiber, regular flights of the space shuttle in 1980 and afterward would allow both larger and cheaper communications satellites to be placed in orbit, according to James Fletcher, administrator of the National Aeronautics and Space Administration.

Domestic communications satellites like those serving Canada, Indonesia and the Western Union system in the United States, Dr. Fletcher notes, cost about $10 million to manufacture but $13 million to launch.

By spending up communications satellites in the 60-foot-long, 15-foot-wide cargo bay of the shuttle, and then using a rocket to boost them to positions 22,300 miles above the equator, Dr. Fletcher estimates, the launching expenses would be reduced "from more than half to less than a quarter of the total cost."

Dr. Fletcher said that the shuttle could carry up structures of communications satellites equipped with transmitters much more powerful than today's. The satellites could handle up to 25,000 switched channels.

As a result, he said at a meeting on public-service satellite communications in Greenbelt, Md., this month, "wristwatch radio" receiver-transmitters could communicate via the giant satellites.

The little transmitters could have a power as small as a fraction of a thousandth of a watt, be no larger than a watch crystal and cost about $10, Dr. Fletcher forecast.

Bangladesh Prospects Better After Two Good Rice Harvests

DACCA, Dec. 29 (AP-DJ).—Defying predictions of a few years ago, Bangladesh is showing surprising political stability and economic strength.

Benefiting from unusually good weather, Bangladesh farmers have produced two record annual rice harvests in a row. Storehouses are full and food imports have been reduced. This two-year respite from mass starvation, in turn, has enabled the military-backed government of Gen. Ziaur Rahman to consolidate its position.

However, not even the optimists see any way out of Bangladesh's long-term problems. The worst is its population growth, 3 per cent or more a year, which has turned a nation that before 1959 had been a big exporter of rice into a net importer of grain, despite an increase in rice production.

A Natural Greenhouse

The land itself is a natural greenhouse: half of the cultivated 22 million acres is suitable for double cropping, and some could raise three crops a year. But growing more than one crop requires irrigation during the dry winter season, and only 1.2 million acres are irrigated. As a result, Bangladesh has one of the lowest yields per acre anywhere—about half a ton per acre, compared with an average of 1.5 tons elsewhere. Just a 20-per-cent increase in yield, experts say, would make Bangladesh self-sufficient and perhaps an exporter again.

But improvement is unlikely soon. Farmers seem reluctant to grow more rice than they themselves need, and even those with irrigation systems are reluctant to use them, citing high gasoline prices and the low price paid for rice.

The low price is mostly due to the recent bumper harvests and the government's success in stopping massive smuggling of rice to India. The government also has purchased rice—perhaps 500,000 tons of the estimated 13 million tons grown this year—at above-market prices and thus has bolstered farmers' incomes. Somewhat offsetting this price support, however, has been another government program, a massive food-for-work plan in which laborers receive free foreign wheat (and thus buy less rice) in return for employment in public-works projects.

Cheap Rice Fuels Recession

Cheap rice means that almost everyone has enough to eat, but it also means that most Bangladeshis, whose income derives from rice-growing, have less money to spend. A recession has resulted.

Meanwhile, the government has continued to press for food aid from abroad in order to store grain against the inevitable return of bad weather (Bangladesh averages only two years of unusually good growing conditions out of five).

However, Bangladesh will get only 600,000 tons of foreign grain this fiscal year, compared with 2.8 million tons in recent years. Spoilage is a problem with grain-storage, officials note, and they argue that if grain production drops again, there would be enough time to increase imports. But no one knows what will happen if crops fail both in Bangladesh and in such wheat-growing countries as the United States, Canada, Russia and Australia.

Price Rises Cut in France

PARIS, Dec. 29 (IHT).—The cost-of-living increase slowed last month, registering an 0.8 per cent rise compared with 0.9 per cent in October and 1.1 per cent in September, the Finance Ministry reported today.

The slowdown in the rise of the retail price index follows a two-month price freeze, a key part of the government's anti-inflation program. The freeze ends at the start of next month, but a cut in the value added tax next month is expected to offset any increase manufacturers are likely to put through then.

The ministry said that the rise in the price index last month would have only been around 0.5 per cent if there had been no increase in the price of petroleum products.

Food Prices

It noted that food prices last month rose 0.8 per cent, down from the 1.3 per cent registered in October and 1.7 per cent in September. Prices on manufactured products were up 0.4 per cent, excluding petroleum products, and 1.2 per cent after taking into account the higher cost of oil.

For the year to date, the increase in the index is 10.1 per cent with the seasonally-adjusted index at 173.2.

In related news, the national statistics institute reported that the wholesale price index rose a provisional 0.5 per cent in November to 213, on the 1962-based index after showing no movement in October. The year-to-year rise in November was 12.6 per cent.

Profit-Taking Pushes Dow Index Below 1,000

NEW YORK, Dec. 29 (Reuters).—Wall Street paid little attention to some bullish economic statistics as prices on the New York Stock Exchange moved lower today for the first time in three sessions.

Just as the market opened, the government reported the index of leaning economic indicators rose 1 per cent.

Analysts said the market appeared to be a little overextended on the plus side and simply paused to digest some of the recent gains.

These analysts also believed some investors may have been disappointed by the failure of the Dow Jones industrial average to hold above 1,000.

Today's action was the 13th time this year that the Dow Jones industrial average failed to sustain itself above the 1,000 mark after closing over that level the preceding day.

The slide was attributed to stiff and persistent profit taking, leaving the blue chip index at 994.93, down 5.15 points. At 3 p.m. it was off 3.90 points.

Volume totaled 21.91 million shares, compared with nearly 26 million yesterday.

Heavily traded Sony eased 1/8 to 9 1/4, while Morton-Norwich slipped 3/8 to 20 7/8.

Other soft spots in less active trading included Du Pont, down 1 1/2 to 133 1/2; IBM, off 2 at 276 1/2; Sperry Rand, down 1 at 42 5/8, Armstrong Cork, off 1 1/4 at 27 1/2 and Pittston, down 1 3/8 at 36 5/8.

Marley, another weak performer, surrendered 2 1/2 at 50 5/8.

But NCR rose 1 to 37 1/2, while Baxter Travenol gained 7/8 to 39 7/8.

Johnson & Johnson rose 1 to 77 1/8 and Koppers 1 1/8 to 24 5/8.

Motors and steels generally surrendered fractions.

Amex Prices Lower

Prices on the American Stock Exchange were mostly lower, with the index off 0.27 at 107.82.

New Process fell 3/4 to 10 1/2 following a forecast of lower earnings.

Houston Oil, a volume leader, dropped 1 1/8 to 45 3/8. But RLC rose 1 3/8 to 10 1/2.

Asamera Oil added 5/8 at 11 3/8.

In Chicago, soybean futures fell 6 1/2 cents a bushel and apparently influenced lower prices for several other commodities.

Soybean meal lost $2 a ton and soybean oil was down nearly 50 points, or half a cent a pound. Wheat futures fell one cent a pound but corn and oats prices were irregular.

In Washington, meanwhile, the Commodity Futures Trading Commission said it asked the New York and Chicago Mercantile Exchanges and the New York Cotton Exchange to phase out fixed member commission rates and floor brokerage fees.

CFTC Chairman William Bagley asked for a voluntary phase-out program to bring fees into line with other exchanges, which have scheduled eliminations of such fixed charges. He called the fixed charges "anti-competitive in nature."

'Lead' Index In U.S. Rises 1% in Month

Economist Sees End Of Long Slowdown

WASHINGTON, Dec. 29 (IHT).—The government's index of leading economic indicators—considered a key barometer of future business trends—registered a 1-per-cent increase in November, the Commerce Department reported today.

The department also revised upward to 0.6 per cent the October increase in the index. It previously had been put at 0.2 per cent.

The department's chief economist, John Kendrick, said the improvement in the last two months "indicates that the slowdown in the economy is behind us and we are entering into a period of more substantial growth in the economy."

He said that a three-month summer decline in the index reflected the economic situation at that time and does not point to any additional slowdown in months ahead.

Other Good Signs

He said that the improvement in the economy has also been seen in other economic statistics, and may be reflected in an improved employment picture when the December employment report is released next week. Unemployment last month was at a 1976 high of 8.1 per cent. But optimism was created by recent reports of rises in industrial production, retail sales and personal income.

The November rise, which put the index at 127.5 per cent of the 1967 average, was the strongest increase since June, which also produced a 1-per-cent gain.

November's strong showing by the indicators, coming with the strengthened report on October's performance, followed three consecutive monthly declines that had raised concern among economic advisers to both President Ford and President-elect Jimmy Carter.

Independent economists said that while the revised figure for October and the report on November are encouraging, and may indicate that the pause in the nation's economic recovery is ending, today's report should not generate too much optimism, because the index measurements are subject to major revisions.

For instance, the Commerce Department today said that revisions of the index measurements for July, August and September now show that the indicators had a decline in each of those months. July showed a drop of 0.1 per cent. August a 0.2-per-cent decline and September a dip of 0.6 per cent.

6 Indicators Up

For November, today's report said, six indicators increased and four declined. The two other indicators normally included in the index—changes in inventories and net business formation—were not available.

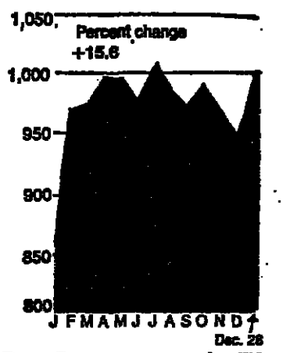
The Commerce Department also issued reports for the first time on two other indexes. One is the so-called composite index of coincident indicators, which increased by 1.1 per cent in November. The second, the composite index of lagging indicators, decreased by 0.4 per cent.

Coincident indicators are designed to give a picture of how the economy is doing in a given month, while the lagging indicators are supposed to confirm signals given earlier by the leading indicators.

Analysts Optimistic on Outlook for NYSE

NEW YORK, Dec. 29 (AP-DJ).—Wall Street's year-end rally has raised hopes anew that a third upward phase has begun, similar to those that boosted stock prices early in 1975 and 1976.

Many technical analysts give the Dow Jones industrial average a good chance of soon besting its 1976 high of 1014.79, set Sept. 21, and even challenging the peak of 1051.70, reached early in 1973.



Beneath the surface, however, the dynamics of the marketplace may be fuzzier than they appear in the pleasing picture painted by the charts. It is not clear to some analysts that even a move to new highs by the industrial average would actually resolve the market's nine-month-old trading range impasse on the upside.

With yesterday's close of 1000.08, the Dow Jones indicator crossed above the 1000 line for the 12th time this year on a daily closing basis. Except for a sharp drop to the 924 level on Nov. 10, the average has spent most of its time since the buying stampede of January and February in the 970-1015 range.

The recovery since Nov. 10 and the vigor of the year-end rally have increased the expectations of technicians, with a few exceptions, for a "breakout" to new highs.

"The market could top out early in the first quarter," says Gail Dudack, of Pershing & Co. "Nevertheless, with both the Dow Jones transportation and utility averages recently at new highs, we expect industrials to catch up and test the 1050 level in the next four to eight weeks."

Outright skeptics are few but they do exist. One is John Mendelson of White, Weld & Co., who says he remains unconvinced by the year-end rally.

Dow Jones average in '76.

"We continue to believe that the long consolidation, or correction, in effect since early March, isn't over and that it will end with further weakness rather than the widely expected upside breakout." He expects the Dow industrial average to begin a decline of about 10 per cent soon and expects broader market indexes to fall by a greater amount.

One of the question marks for analysts is the state of institutional investors' buying power. Institutions have remained fully invested and did not raise cash reserves appreciably during the November decline, says Robert Farrell of Merrill Lynch. "Professionals may not only be reducing cash reserves to minimal levels but also may be using funds normally invested in January," he says.

He sees evidence that money managers, trying to anticipate the kind of market spurt seen in the early months of 1975 and 1976, have jumped the gun. Average daily volume this month has been nearly 26 million shares, he says, compared with 15.9 million last December. "Obviously, something is being borrowed from January, and conditions aren't similar to those that led to January reinvestment stampedes in each of the last two years."

Although he is bullish about the longer-term market trend, Mr. Farrell believes the most likely course over the near term will be a peak in January followed by "a significant intermediate reaction" in the first quarter.

Jack Solomon, of Thomson & McKinnon, Auchincloss, Kohlmeyer Inc., says he is impressed by the market's latest moves and believes both a new recovery high and a new all-time high appear "likely and logical" as the inauguration of President-elect Jimmy Carter approaches.

"We wouldn't regard achievement of new highs as the threshold of a dynamic new market, but an amber warning signal for a full-sized correction of the advance of the past two years," he says. The December, 1974, low from which this bull market began was 577.66.

Charles O'Hay, market strategist at ABD Securities Corp., believes the Dow could reach 1060 next month, then fall back to the 960 level by spring if Mr. Carter's tax-reduction package is too small or nonexistent. He believes the market will recover to about the 1150 level by next July or August, followed by a decline of about 20 per cent in late 1977 and a more dynamic bull market in the 1978-82 period.

All these securities have been sold. This announcement appears as a matter of record only.

Japan Aid Down 2d Year in Row

TOKYO, Dec. 29 (UPI).—Japan's economic aid to developing countries declined for the second consecutive year because of the unfavorable economic conditions at home, the Foreign Ministry reported.

The ministry said that aid commitments totaled 234.2 billion yen ($780.6 million) this year, down 25.1 per cent from last year. The 1975 figure of 312.6 billion yen was a decrease of 23 per cent from 1974, it said.

Of the total pledged this year, 170 billion yen have been held up due to the domestic financial situation, the ministry said.

Panel Will Ask Relief For U.S. Shoe Industry

WASHINGTON, Dec. 29 (AP).—For the second time this year, the U.S. International Trade Commission found unanimously yesterday that the American shoe industry is being seriously injured by imports. The commission said it would meet Jan. 6 to recommend specific government relief for the industry.

Last April, President Ford rejected an ITC recommendation that he impose tariffs of 25 to 40 per cent on shoe imports. Instead, Mr. Ford ordered federal aid to people thrown out of work in the domestic shoe industry.

new highs. Every day in the Financial Section. **International Herald Tribune**

STOMPING THE BLUES

By Albert Murray. Produced and with art directed by Harris Lewine. McGraw-Hill. 264 pp. $12.50

JAZZ PEOPLE

Photographs by Ole Brask. Text by Dan Morgenstern. Harry N. Abrams. 300 pp. $25.

Reviewed by Mel Watkins

"THE blues as such are synonymous with low spirits. Blues music is not. . . . Not only is its express purpose to make people feel good, which is to say in high spirits, but in the process of doing so it is actually expected to generate a disposition that is both elegantly playful and heroic in its nonchalance." So says Albert Murray in "Stomping the Blues." And in this frolicsome paean to blues music, the artists who play and sing it, and the spirit that invigorates it, Murray cuts through many prevailing clichés and ossified assumptions to present a picture of a musical tradition steeped in affirmation.

As in his previous books—among them "The Omni-Americans," "South to a Very Old Place" and the novel "Trainwhistle Guitar"—Murray's narrative style draws on two distinct, apparently conflicting, traditions. Reading his work is, often, like listening to a streetwise dude whose language is draped in Ivy League syntax or vice versa; in fact, he is a black Southerner whose ideas are couched in East Coast academe. In this explication and evocation of the blues, that style is perfectly suited to the subject.

Tracing blues music back to what he calls its "Afro-U.S." origins, Murray places its emergence at "the old downhome Saturday night functions . . . the honky tonks and juke joints." It became one of the secular alternatives to the church and gospel music as a counteragent or exorcist for dispelling that lowdown, wretched feeling that is the blues. He follows its development through ragtime, Dixieland, country and urban blues wailing, the swing era, be-bop and on to modern innovators such as John Coltrane, Ornette Coleman and Archie Shepp. Throughout, he persuasively argues that blues music is essentially "good-time music" created for "dance-beat oriented people"—a folk idiom with its own stylistic and ritualistic imperatives that may be seen even in artists as seemingly disparate as Louis Armstrong and Charlie Parker. Central to his definition of blues music is the idea of counterpoint—the tension between woeful lyrics or "blue" notes and upbeat tempo, which contradicts or mocks the sorrowful thrust of the tune. This quality, Murray contends, characterizes blues music, and is most often lacking in pop music such as country, soul and rock.

Duke Ellington, for Murray represented "the pre-eminent embodiment of the blues musician as artist . . . [he] achieved the most comprehensive synthesis, extension, and refinement to date of all the elements of blues musicianship."

One need not, however, completely agree with Murray to enjoy this romp through the "wherefores and whatnots" of the blues. His definition seems somewhat inflexible, for instance, when he summarily dismisses soul music as being sentimental instead of earthy and forced when he includes as an example of his definition the music of Charlie Parker and explains that "he could make your insides cut all the steps that your feet could not, anyway." But no matter. "Stomping the Blues" is, at once, serious, humorous, mocking and witty. If the message is insistent, the style, the rhythm of the prose—in the tradition of blues counterpoint—is decidedly up-beat, filled with the "ritualistic playfulness" and put-on that Murray attributes to the blues itself. And Harris Lewine's handling of the illustration and art layout provides additional impact—there are more than 250 photographs, all in black and white, that complement the text and the "finger snapping, foot tapping" mood that Murray creates.

In "Jazz People," Dan Morgenstern says, "The blues is the strain that runs through all American music and makes it unique . . . [it] is part and parcel of all jazz styles, from the earliest to the most recent." And in this lavishly illustrated volume, he gives a detailed account of what he calls "America's own music" from the early 1900s, when, as the legend goes, Buddy Bolden joined ragtime and the blues, to the present. In addition to the historical account, there are numerous sketches of individual jazz artists, and the text is further buttressed by Dizzy Gillespie's laconic foreword and James Jones's musing introduction. But most impressive are Ole Brask's photographs—they are indispensable here. Again, all black and white, they vividly portray the stark intensity of alternately, the capricious merriment that typified jazzmen and their milieu.

Both "Stomping the Blues" with Albert Murray's sprightly narrative and dance, and "Jazz People," with Ole Brask's striking photographs, are excellent books in their own manner. And, incidentally at this time of the year, either could satisfy the most demanding of jazz lovers.

Mel Watkins is on the staff of The New York Times.

BRIDGE — By Alan Truscott

An unusual play occurred on the diagramed deal.

South reached a shaky three-no-trump contract after a one-heart opening bid to his right. He won the opening heart lead with the king, and took a losing club finesse. East shifted to a diamond, and South ducked in the faint hope that both missing honors were on his right. West took the jack and shifted back to hearts. South won with the ace and cashed his club tricks, ending with the lead in his hand in this position:

	NORTH ♠Q1084 ♡Q ◇10 ♣—
WEST ♠K97 ♡— ◇953 ♣—	EAST ♠AJ ♡542 ◇8 ♣—
	SOUTH ♠632 ♡10 ◇AQ ♣—

The declarer had five tricks at this point, and could clearly make three more. But to make his contract he needed a spade trick, and as East held the spade jack he was about to fail. East can gain the lead twice in spades to establish and use his hearts.

But when South led a spade, a funny thing happened. West made a careless error by putting up his spade king, thus destroying the defense. It was obvious to East and to South that this was not a sensible play, but East found a brilliant way to restore the status quo. He smoothly played his spade ace on his partner's king, exactly like a man with a singleton, and cleared hearts.

South won in dummy, took the diamond finesse and cashed the diamond ace. If he had tried for nine tricks by leading to the spade queen, he would have made only 11. But South was completely certain that West held the spade jack and the overtricks were important. So he finessed the spade ten and went down a trick.

	NORTH ♠Q1084 ♡Q83 ◇106 ♣A1103
WEST (D) ♠K975 ♡97 ◇3953 ♣862	EAST ♠AJ ♡J6542 ◇K872 ♣K4
	SOUTH ♠632 ♡AK10 ◇AQ4 ♣Q975

Both sides were vulnerable. The bidding:

West	North	East	South
Pass	Pass	1♡	Dbl.
Pass	3NT	Pass	Pass
Pass			

West led the heart nine.

Olympic Report to Await Carter

WASHINGTON, Dec. 29 (UPI).—President-elect Jimmy Carter will have an opportunity to take quick action in helping U.S. amateur athletics onto the right track for the 1980 Olympics in Moscow.

A final report of a special commission on Olympic sports to be submitted to the White House on Jan. 13—seven days before Carter is inaugurated—is expected to contain a series of tax and government financing proposals which the incoming chief executive could recommend to Congress early in his administration.

Michael Harrigan, executive director of the commission set up by President Ford last year, declined to give details of the report but said it would be a "comprehensive blueprint" for a new approach to U.S. Olympic preparations in every sport.

"We're not advocating putting the government in the sports business," he said in an interview, "but there will be significant legislative guidelines in a number of areas, particularly in the area of tax incentives and financing of some sports projects."

Harrigan said he and commission chairman Gerald Zornow plan to discuss the broad outlines of the report with Gord. Treasury Secretary William Simon and Health, Education and Welfare Secretary David Matthews in the coming week, prior to releasing it at commercially sponsored news conferences in New York and Los Angeles on Jan. 13.

However, any federal implementation of the commission's work would have to be carried out by Carter. Harrigan indicated a preview copy of the report would be sent to Palms, Aga.

The new President could advocate that some of the tax sports incentive features be included in a general tax reduction bill which is expected to go to Congress early in the session.

Harrigan said that the 22-member commission, which included a number of former U.S. Olympic stars, would strongly caution against establishing any sort of government sports "czar" or dominant federal agency to direct amateur sports efforts in this country.

Instead, he envisions a quasi-government body "which would not be regulatory but representative of all groups involved and would bring into play appropriate checks and balances."

While such a group might have mediation and arbitration authority, Harrigan said he hopes the commission would be able to bring about an effective Olympic effort through persuasion and guidelines. "It's pretty hard to argue with democracy," Harrigan commented.

He credited the U.S. Olympic Committee with being responsive to changes which may prove significant in the future, particularly the decision to set up year-round training centers for prospective Olympic participants.

The Amateur Athletic Union "also seems willing to work for reasonable changes in approach," he added and noted the rival National Collegiate Athletic Association is tending to cooperate in such overlapping fields as wrestling, basketball and track and field.

"I think our existence forced them to change their view," Harrigan said of the commission, which heard 60 witnesses at formal hearings and hundreds more through the work of individual task forces which studied the problems of every Olympic sport, from luge to swimming.

Harrigan also pointed out that witnesses representing women's sports groups stressed that they wanted more of a voice in the conduct of the Olympics.

He said there will be a major chapter on varying views of amateurism in the 400-page report, citing that hockey and soccer, for instance, have far different definitions than that in track and field.

"The report should have a direct impact on what we do in Moscow in 1980," Harrigan said. "There's no question in my mind about that. How much impact, however, will depend on the sports authorities, the public and the new President."

Poll of Fans Favors Free Agents

Money Best Way to Buy a Pennant

By Red Smith

NEW YORK, Dec. 29 (NYT).—Sportswriters and sportscasters blessed with more sensitive antennae than some of the rest of us have been assuring us for years that "the fans are fed up" with the financial demands of greedy athletes and "the public is sick and tired" of complaints from spoiled brats crying for their freedom. Since the authorities who give us this information never reveal their sources, it has not been clear how they could be so sure about public attitudes.

Now, for the first time, comes a more or less reliable sampling of opinion nationwide. A Harris poll has ascertained that a substantial majority of baseball fans approve the players' newly won right to work out their contractual obligations and then sell their services on a fairly open market. The margin was 54 per cent in favor of the free agents, 32 per cent opposed and 14 per cent undecided. Thus even if all the fence-straddlers were to fall off on the side of the opposition, freedom would still get a fatter slice of the popular vote than Jimmy Carter did.

When the Messersmith-McNally decisions of last winter opened a fissure in the restrictive old reserve system, everybody in the baseball hierarchy squealed like a pig under a gate. Club owners cried that they couldn't stay in business without owning their employees outright, as they had for a century. Now, though, there is evidence at least some of them have discovered that they can profit by the change.

More Changes Ahead

The head of one club predicted recently that 200 players, an average of eight a team, would play out their options and become free agents in 1977.

"Do you think your team will lose eight players?" he was asked.

"I certainly hope so," he said.

When representatives of the clubs and players agreed on a modified reserve system last summer, they fixed Aug. 9 as the date it would become effective. Players who signed 1976 contracts before Aug. 9 would have the right to play out the option in 1977 and be free at the end of the World Series next October. Players who signed after Aug. 9 would come under the new arrangement requiring six years of major league service as a precondition to free agency.

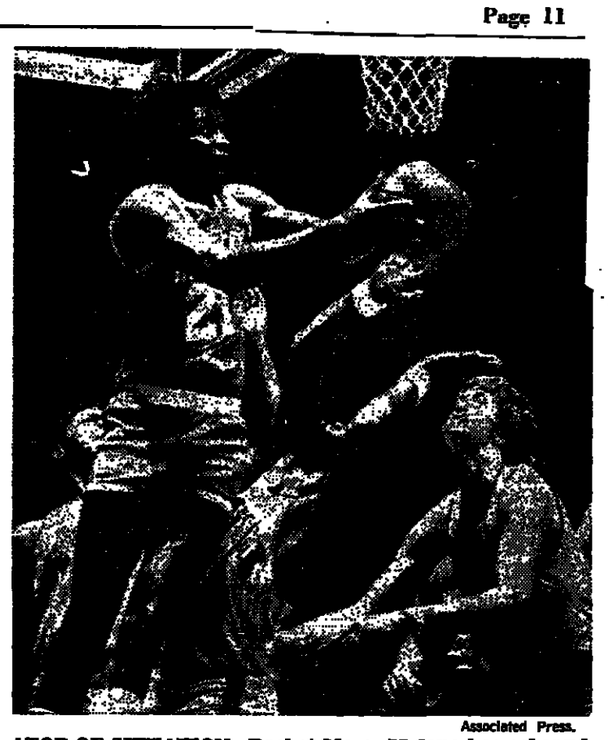
Most players signed before the deadline and are entitled to play out their options next year. All but 24 of the others agreed to terms after Aug. 9, and it is the prices that some of those 24 commanded that makes some believe the free-agent ploy will be much more popular in 1977.

The executive who hopes to lose eight players has been trying for years to build a contender, and he knows from painful experience what a laborious task that is. It demands luck, sound scouting, luck, judicial development of talent, luck, crafty trading and luck. This man thinks maybe Gene Autry found a better way when the Angels' owner invested $5,240,000 in Bobby Grich, Joe Rudi and Don Baylor.

This man has a rich owner who, like Autry, will spend big to win. If there is really going to be a huge pool of talent on the market next fall, the way to prepare is obvious: sign your best players to multiyear contracts and let the disposables play out their options. If eight of these walk out on you, you are entitled to sign eight others who will be, presumably, more desirable than those you lost.

It's like trading a player and cash for a better player. Just as California, in effect, traded Paul Dade, Billy Smith, Tim Nordbrook and $5 million-plus for Rudi, Grich and Baylor.

To be sure, this strategy may be questionable on ethical grounds. And if somebody does buy a winner that way, it will reinforce the old argument about the rich clubs monopolizing the talent. Yet having 200 qualified players on the open market would only recreate a situation that existed earlier in this century before Branch Rickey invented the farm system.



Good Old Days

In those days a club controlled only the players on its own roster. Connie Mack could, and did, go out to Punxsutawney, Pa., and pick up a Rube Waddell by settling his debts with all the merchants on Main Street. He could, and did, raid the National League for players like Larry Lajoie, Lave Cross and Topsy Hartsel, pluck an Eddie Collins off the Columbia campus, get a Chief Bender from Dickinson College, a Jack Coombs from Colby, an Eddie Plank from Gettysburg. He could, and did, pay Greenville, S.C., $325 for Shoeless Joe Jackson, whom he traded to Cleveland.

As late as the 1920s there were still enough players on the market to staff a pennant winner. In that era Connie bought Bing Miller from Washington, Rube Walberg and Mickey Cochran from Portland, Ore., Al Simmons from Milwaukee, Max Bishop and Lefty Grove from Baltimore and Jimmy Foxx from Easton, Md.

In later years when big league teams had all the talent tied up in their minor league teams, Connie yearned for the good old days. He said Judge Landis did, too, and that's why the commissioner policed the farm systems as vigilantly as he did.

If there are hundreds of free agents on the market next fall—and it should be remembered that this is what the hierarchy predicted for this year—then the old days will be back, but only for a short visit.

Associated Press.

ATOP OF SITUATION—Rocket Moses Malone has rebound from Knicks' Jim McMillian, center, and Tom McMillen.

Psychology Super Factor for Raiders, Vikings

By Dave Anderson

NEW YORK, Dec. 29 (NYT).—It should be known as the Superpsyche Bowl this time. With the Minnesota Vikings and the Oakland Raiders in it, one team finally will "win the big one" and the other team will "lose the big one" again. As the monkey leaves one team's back, it will jump and double the future burden on the other team.

Neither the Vikings nor the Raiders have ever won their last post-season game. The Vikings have lost three Super Bowl games, the Raiders have lost one Super Bowl and six American Conference championship games. But a week from Sunday in the Rose Bowl at Pasadena, Calif., either the Vikings or the Raiders will win—perhaps by default in the third overtime period.

Their link as losers of the "the big one" is ironic because the franchises are linked in pro football history. Not many National Football League aficionados remember that the Raiders exist only because the Vikings do. When the American Football League was organized for the 1960 season, Oakland did not have a team. Instead, the AFL had granted a franchise to a Minneapolis-St. Paul group that included Max Winter, now the Vikings' president. But the NFL had expanded to Dallas for 1960 and George Halas, the Papa Bear with the loudest roar in the NFL at the time, wanted the Minnesota area for its TV market and also to keep the AFL from establishing a stronghold.

When the NFL granted a 1961 franchise to the same Minneapolis-St. Paul group that had the AFL franchise, the owners naturally chose to join the established league.

Several months later, Oakland was selected as the AFL's afterthought team. Despite a late start in signing players, the Raiders produced a respectable 6-8 won-lost record in 1960. But during the next two seasons they lost 19 consecutive games. Wayne Valley, then the Raiders' most prominent owner, hired Al Davis, then an assistant coach with the San Diego Chargers, as head coach.

"I hired him," Valley once said, "because everybody hated his guts."

And a decade later Valley also hated Al Davis's guts. In litigation over stock ownership ("I've got a fox in my chicken coop," Valley claimed), Davis won. As a coach and managing general partner, Davis has won everything except the Super Bowl.

And the Vikings also have won everything—except the Super Bowl.

Perhaps to prove it to themselves, the Raiders and the Vikings each have compiled statistics that show their success despite failure. Since the arrival of Davis, the Raiders have the best won-lost-tied record in pro football—139-46-11—and since the 1970 merger of leagues, the Vikings have the best record—75-22-1.

But both those statistics are based on regular-season competition. Up to now, neither the Vikings nor the Raiders talk much about postseason games. But after the Superpsyche Bowl, one will.

Emotionally, the Vikings appear ot be entering the Super Bowl on a more reasonable level. After their 24-13 victory over the Los Angeles Rams on Sunday, they reacted quietly. They realized their mission was not complete. But the Raiders, in contrast, celebrated like high school kids after dethroning the Pittsburgh Steelers, 24-7—the players tossed both Davis and coach John Madden into the showers. That might be the sign of a team that is merely happy "to be in" the Super Bowl. Those teams invariably leave their best game in the victory that qualified them "to be in" rather than saving their best game for the Super Bowl itself.

Only the Green Bay Packers, the New York Jets and the Steelers won the Super Bowl in their first appearances.

Too Much Show

For the Raiders, who lost in the Super Bowl nine years ago, this will be the first appearance for most of their players. For most of the Vikings, it will be the third or fourth time round. Does that, Bud Grant was asked, diminish some of the glamour?

"I think," the Vikings' coach said with his small smile, "that there's already too much glamour in the Super Bowl anyway."

But the Raiders, in their difficult manner, already appear to be uptight about their Super Bowl practice facilities at the University of California at Irvine.

"We're going down to take a look at them," Al Locosale, the Raiders' executive assistant, said Monday. "If they're not adequate, we'll make other plans."

For the Raiders, adequate means private. Davis would prefer the Raiders to practice in an empty prison yard with machine guns along the wall. Grant is not worried about the Vikings' practice facilities. Their workouts will be at the Rams' complex at Blair Field in Long Beach.

"That should be fine," Grant said.

In the Superpsyche Bowl, the team that can best handle the monkey on its back will win. For a team that hasn't won the big one, the worst possible pressure is the thought of losing to another team that hasn't won the big one.

Mississippi State Basketball Finally Earning Recognition

NEW YORK, Dec. 29 (UPI).—Not much attention was paid to Mississippi State when it won its first seven games this season. But last night the Bulldogs won their eighth straight and this time the opponent was previously unbeaten and 10th-ranked Wake Forest.

Mississippi State handed Wake Forest its first loss in eight games, an 88-83 decision that advanced the Bulldogs into tonight's final of the Kiwanis-Old Dominion Classic in Norfolk Va. They'll take on host Old Dominion, which beat Dartmouth, 95-70, in the opening game.

Last year Mississippi State placed Ray White and Gary Hooker on the all-rookie Southeastern Conference team and White was named the conference "freshman of the year."

This season the Bulldogs added a player who may be better than both, freshman Ricky Brown. He scored 29 points and grabbed 14 rebounds. The 6-foot-10 center, rated among the top nigh school prospects in the nation last year, received help from three teammates who scored in double figures. Hooker and Wiley Peck each scored 18 points and White added 15 to help Mississippi State overcome a 43-38 half-time deficit.

Wake Forest, playing without injured scoring leader Rod Griffin, was led by Frank Johnson with 25 points.

Elsewhere, top-ranked Michigan beat Rhode Island, 95-85; No. 3 San Francisco stopped St. John's (N.Y.), 80-70; No. 4 Alabama downed Western Michigan, 83-74; No. 8 UCLA routed Southern Methodist, 99-71; No. 14 Marquette beat Wisconsin, 64-57; No. 15 Louisville defeated Rutgers, 76-68; No. 16 Maryland topped Xavier of Ohio, 84-74, and No. 18 Syracuse crushed Duquesne, 116-86.

Phil Hubbard scored 25 points to help Michigan (6-0) beat previously-unbeaten Rhode Island and move into the final of the Industrial National Classic against host Providence, which beat Texas, 81-67.

Reginald King scored 23 points to lead Alabama, 7-0, past Western Michigan.

Substitute Brett Vroman scored a career-high 19 points and Marques Johnson added 17 to guide UCLA over SMU.

Butch Lee scored 25 points and Bo Ellis 23 as Marquette beat Wisconsin for the championship of the Milwaukee Classic, the ninth straight year the Warriors have won the title.

In the consolation game of the Milwaukee Classic, Wayne (Tree) Rollins scored 23 points and Derrick Jackson had 18 assists to lead No. 11 Clemson over Boston College, 128-76.

Louisville scored 22 straight points during a second half rally that overcame Rutgers, 76-68, in the Louisville Holiday Classic. Louisville trailed 52-48 when freshman Darrell Griffith scored 10 points and Phil Bond eight to key the two-minute outburst. Louisville advanced to the title game against Creighton, an 81-76 winner over Auburn.

Freshman guard Bill Bryant scored 12 of his 17 points in the first half to lead Maryland past Xavier in the opening game of the Maryland Invitational Tournament. The Terps advanced to the finals against Syracuse, which got 30 points from James Williams in beating Duquesne.

Nugget May Have Scored 'Turning' Point

DENVER, Dec. 29 (UPI).—Byron Beck, one of only three players to survive all nine years in the old American Basketball Association, said the Denver Nuggets' 110-102 victory over the Phoenix Sums last night may be a turning point for him.

The reserve forward, 31, struggling this season with a 5.8 scoring average, hit nine key points to give the Nuggets a 10-point lead at the half.

"I've just been struggling to get back this year," Beck said. "I haven't been consistent. One game I've hit well, and another I haven't. It just takes one game, and this could be a turning point."

Playing only 11 minutes, Beck hit four of seven field-goal attempts and added one free throw. He also had two rebounds and a steal.

Phoenix center Alvan Adams, the National Basketball Association's rookie of the year last season, reinjured his right ankle early in the second period and left the game with only two points and one rebound.

Center Dan Issel finished with a game-high 34 points for the Nuggets, now 22-10 including 16 home-court victories, and guard David Thompson, the third leading scorer in the NBA, had 24.

Bullets 117, Pacers 111

At Indianapolis, Elvin Hayes hit 31 points and Larry Wright came off the bench to add a season-high 25 in pacing Washington to a 117-111 victory for the Pacers' third straight home loss.

SuperSonics 120, Hawks 119

At Atlanta, Fred Brown made two free throws with 3 seconds to play to give Seattle a 120-119 victory over the Hawks—only the SuperSonics' third victory in 18 road games.

Kings 113, Cavaliers 106

At Richfield, Ohio, Brian Taylor hit 11 of his 14 shots from the field in collecting his season high of 29 points to spark Kansas City to a 113-106 victory over the Cavaliers.

Knicks 111, Rockets 99

At New York, Tom McMillen scored 18 of his career-high 31 points in the first half and Lonnie Shelton keyed a third-quarter burst with 14 of his 24 points to lead the Knicks to a 111-99 victory over Houston. The game, the Knicks' fourth sellout of the season, was the second for New York without both injured Spencer Haywood and Bob McAdoo, and it was feared Earl Monroe would be lost as well when he went out midway through the first quarter after taking an elbow in his left shoulder.

Spurs 127, 76ers 116

At San Antonio, Texas, George Gervin scored 12 of his game-high 29 points during a third-quarter spree to help the Spurs post a 127-116 victory over Philadelphia.

Trail Blazers 87, Bulls 79

At Chicago, Bill Walton scored 29 points to lead Portland to an 84-79 victory over Chicago before 19,889 fans—the largest crowd in Bulls history.

Bucks 113, Warriors 102

At Oakland, Calif., Bob Dandridge and Brian Winters each scored eight points in the fourth quarter giving Milwaukee their second road victory in 18 games this year, a 113-102 decision over the Warriors.

Lakers 134, Celtics 105

At Inglewood, Calif., Kareem Abdul-Jabbar scored 30 points and grabbed 16 rebounds to send the Lakers off on their best offensive showing of the year, a 134-105 victory over Boston.

NHL Rangers Achieve a Lot In Winning in Washington

LANDOVER, Md., Dec. 29 (UPI).—The New York Rangers accomplished more than a 5-2 victory over the Washington Capitals last night. They ended a losing streak and shattered a jinx.

The Rangers, last in the National Hockey League's Patrick Division, had won only two games in December and were carrying a five-game road losing streak. More significantly, they hadn't beaten the three-year-old Caps in four previous Capital Centre appearances.

"Someone said once that 'today is the first day of the rest of your life', said Rangers" captain Phil Esposito, who scored goals in the second and third periods. Maybe that's how we should look at today's game, because we really don't have anywhere else to go but up."

Esposito's first goal, which came on a deflection with four seconds remaining in the second period, capped a three-goal period that brought New York back from a 2-0 deficit.

"They really surprised us because they came out pretty hard in the first period," said New York coach John Ferguson. "They were aggressive and I don't think we were ready for that."

Ferguson's reaction to the aggressiveness was to tell right wing Pill Goldsworthy to shoot more and draw defenders from Esposito. The strategy worked as Goldworthy got assists in two of the three second-period goals.

The Caps were outshot, 45-16, including a 20-3 disadvantage in the second period.

"They haven't figured out a way yet that you can score if you don't shoot," said Washington coach Tom McVie. "And we sure didn't shoot, so we had no business scoring at all."

North Stars 5, Kings 3

At Bloomington, Minn., shorthanded goals by Tom Younghans and Bill Fairbairn powered the North Stars to an 8-3 victory over Los Angeles.

Blues 4, Islanders 4

At St. Louis, Garry Howatt and Billy Harris rifled home goals in the closing minutes of the final period, climaxing a rally that lifted the Islanders to a 4-4 tie with the Blues.

All-American Running Duel Expected in the Rose Bowl

PASADENA, Calif., Dec. 29 (AP).—The Rose Bowl Saturday is a matchup of all-American runners, Ricky Bell of Southern California versus Rob Lytle of Michigan.

Southern California coach John Robinson has said Bell "may be the best college football player of all time," while Michigan coach Bo Schembechler—who rarely lavishes praise—has had only praise for Lytle.

Bell finished second to Tony Dorsett of top-ranked Pittsburgh in the balloting for the Heisman Trophy. Lytle finished third.

Bell, No. 42, is a senior from Fremont High School in Los Angeles. Lytle, No. 41, is a senior from Fremont High School in Ohio.

Both the tailback or fullback positions, Bell mostly at tailback and Lytle mostly at fullback.

Last year Bell led the nation in rushing with 1,957 yards. He had 347 this year against Washington State (in 51 carries) before hip and ankle injuries hampered him. But he wound up with 1,417 yards rushing and needs just 52 on Jan. 1 to pass former USC star Anthony Davis's Pacific Eight Conference career record of 3,724

Lytle this year set Michigan records in career rushing (3,250 yards), single-season rushing (1,402) and rushing average (6.9 a carry). He was the team's offensive "champion-of-the-week" an unprecedented five times.

Both teams held rough practices yesterday. Lytle said the long break between the end of the season and the Rose Bowl was beginning to make things "drag" but there is more enthusiasm with the game just a few days off.

New Year's Defense

TOKYO, Dec. 29 (AP).—Champion Gustavo Espadas of Mexico and challenger Jiro Takada of Japan have signed contracts for their World Boxing Association flyweight title bout in Tokyo on New Year's Day.

Soccer a Success for 1976

By Brian Glanville

LONDON, Dec. 29 (IHT).—At the turn of the year, how does soccer look? By and large, I would say, substantially better, though there are what one might call pockets of obscurantism. The European Nations Cup finals last June in Yugoslavia were a marvel of exhilarating, total soccer. Neither the formidable, ever consistent West Germans nor the Czechoslovaks deserved to lose a glorious final which the Czechoslovaks eventually took on penalties.

Since then, of course, the World Cup qualifying tournament has gotten well under way. It seems highly possible that Britain will not have a single qualifier for the finals in Argentina in 1978. I am also far from convinced that Argentina will stage the finals at all.

There is reason to believe that FIFA, the organizer, has behaved in a light-minded and unrealistic way. It sent a delegation a few weeks ago to Argentina, watched a match against Russia which went off without incident, and pronounced itself satisfied that Argentina could put on the tournament.

Joao Havelange, FIFA's controversial Brazilian president, threatened draconian measures against any team which withdraws from the competition, but some of the reasons he adduced for feeling confident that there would be no acts of violence and terrorism were simplistic to say the least.

There had been, he said, acts of terrorism in Northern Ireland and England, as well as in Argentina. To which one must wearily reply that no one ever suggested staging the World Cup in Belfast, while to draw an analogy between what is going on day by day in Argentina, which has now set up special courts to mete out punishment to terrorists, and England, which has suffered but a handful of terrorist acts by the IRA, totters on the brink of absurdity.

Havelange went on to say that some relatives of his had been spending a long holiday in Argentina, and they have not suffered in any way from terrorism. One might as well say, "My granny went to Belfast for the weekend and loved every minute of it." That the president of FIFA should descend to such arguments is a matter for some anxiety.

My feeling is that when the time comes, if the situation in Argentina has not improved, several European countries could well withdraw, and if they don't, a number of famous individual players could well do so. As for FIFA's threats, they are not only meaningless but could well be self-destructive. UEFA, the European union, is spoiling for a showdown, incensed that while its countries provide the bulk of the world's best teams and players, the bulk of FIFA's finances, the pseudo-democracy of one country one vote means that he who manipulates Afro-Asia, as Havelange did for the presidential elections, can still wield the power.

FIFA and the World Cup, as we know them today may not have very long to go. At least Artemio Franchi, president of UEFA, has now gone in hard for a de-zoning of the World Cup competition, something I have been urging for the last ten years, so that the fatuity of Italy and England eliminating one another while some fifth-rate team from Africa, Asia or the CONCACAF section of the Americas gets through to the final tournament will be laid to rest.

My hope for 1977 is that total soccer will continue to make great strides. Thanks to West Germany, Czechoslovakia, the Netherlands, Yugoslavia and Saint Etienne, who deserved to beat dour Bayern Munich for the European Cup, 1976 was an exciting year. Why even the Italians, under the impetus of their team manager Enzo Bearzot, are declaring finally for progressive soccer.

American, 101st in Rankings, Reaches His 1st Quarterfinal

SYDNEY, Dec. 29 (UPI).—Three Americans, including lowly-ranked Hank Pfister, reached the quarterfinals today of the $100,000 New South Wales Open tennis championships.

Pfister, 23, beat Ray Ruffels of Australia 4-6, 7-6, 7-5 to join Roscoe Tanner and Dick Stockton in the last eight.

Ranked No. 101 in the world before this tournament, Pfister had a booming serve and kept the pressure on Ruffels.

A student at San José State University in California Pfister had a term to finish for graduation but decided to waste no more time in launching his pro tennis career. Today was the first time he had reached the quarterfinals of a tournament since he turned pro three months ago and now he says he feels his decision is justified.

Pfister faces Tanner in the quarterfinals. Tanner beat Australian junior John James, 6-2, 6-4.

Stockton, ranked No. 5 in this tournament, had a good workout against another young American, Peter Fleming, in winning 6-4, 6-3.

Australian Ken Rosewall eliminated the other American in the last 16, Marty Riessen, 7-6, 6-1. Top-seeded Argentinian Guillermo Vilas gave leading Australian junior Brad Drewett a quick lesson while taking his third-round match, 6-2, 6-2.

Observer

Nantucket Trade-Off

By Russell Baker

NANTUCKET, Mass.—The 7.5 million gallons of oil sloshing around in the ocean to the southeast of here remind us that places like Nantucket are expendable in the modern world.

If the island is to be soaked in oil or, as will more probably happen, be covered in asphalt, it will surely be a pity, but it will be, after all, merely another one of those "trade-offs" we accept in return for the modern condition.

Baker

Nantucketers themselves understand and accept the necessity of these "trade-offs." For years now they have been trading off the fragile beauty of their island for spending money, and it would take a hard heart not to sympathize with them. Despite its extraordinary beauty, the island is, by most measures of wealth, one of the poorest areas in Massachusetts. When the rich are paying big for beauty, it is only natural that the poor should sell.

It is a sucker's deal for the rich, of course, and Nantucketers know it. When the real estate crowd has finished turning the island into another typical American suburb, the beauty will have turned into an eyesore.

The islanders' needs clash inevitably with the desires of the well-heeled summer people who want Nantucket preserved as a refuge from the mainland hells where they normally domicile. Having acquired what they regard as a piece of paradise, the summer people tend to conservationist schemes aimed at stopping development, and thus become political enemies of the islanders who often view them as fat interlopers insensitive to the needs of the year-round people.

In the past few years, the conservationists have shown growing muscle. They have even stopped or hindered a few of the more grandiose projects for trimming the island moors and ponds with summer housing of the suburban-development variety. These victories have been won in the courts, however. In the local Nantucket political arena, the advocates of "growth" usually prevail.

Earlier this year, political decisions in which the summer people do not participate put Nantucketers on record in favor of an oceanside Holiday Inn motel designed principally to cater to oil drillers working off Georges Bank.

In another test of Nantucket attitudes toward conservation, the islanders voted against endorsing the so-called Kennedy bill, which would create a joint federal-local partnership to prevent unchecked real estate development throughout the island.

Obviously, Nantucketers take much the same attitude toward "growth" that is commonly taken by people who stand to profit from it. They may not be well disposed to growth-enhancing oil tankers that break up on their shoals and threaten their tourist business, but they are not above making another "trade-off"—nature for subdivisions—when it promises to boost the local economy.

This is not to suggest that they should be more high minded than anybody else. Their economic need is certainly more pressing than the oil industry's. The point is that economics seems to compel us all, the poor and the rich alike, to turn things into slums.

The oil compulsion is now turning the Atlantic south of here into a marine slum, and the real-estate compulsion promises to turn places like Nantucket into island slums. And we accept both as "trade-off" to keep us moving along the road to a better life.

There is still no oil on the beaches of Nantucket, and dead birds are few. On the roads to the beaches, however, one sees once beautiful moors scarred by dozens and dozens of real estate speculations—newly-erected summer houses, each placed to create a "view," and woods already cut for new developments. Ten years ago, all these lands were empty except for wildlife. Twenty years from now, at the present growth rate, the island will look like coop city.

And although it will be too bad, it will be absolutely justifiable. An economic necessity. An inevitable development toward a more modern human condition. Another step down the ladder to paradise.

'The reason theater is different from our ordinary life is that you are making a statement that has to be witnessed and shared. And that is why I object to certain moderns who don't communicate anything...'

Agnes de Mille—From Paralysis to 'Wings'

By Anna Kisselgoff

NEW YORK (NYT).—"I don't know that I'll do much more that's new," Agnes de Mille said, reflecting on her long career as a choreographer. "I have come to a change in my life. It's not a diminution. It's just different. That's the biggest discovery I've made."

On May 15, 1975, at 5:50 p.m., only two hours before she was to go on stage with her company in New York, Miss de Mille suffered a stroke that left her, at first, near death then paralyzed on the right side. Last fall, after a year of rehabilitative therapy, she was able to supervise the restaging of her 1942 ballet, "Rodeo," for the Joffrey Ballet. The vibrant new production looked as fresh as a premiere, reworked in all its dramatic details and bursting with exuberant spirit. A hit of the Joffrey's engagement last October, it is also the success of the company's current season at the City Center.

Agnes de Mille

Better Health

Miss de Mille was unable to see the Joffrey production on stage until last week. On Oct. 14, at President Ford's White House dinner in honor of Martha Graham, Miss de Mille became ill and had to re-enter a New York hospital.

Miraculously, she came out in better health than when she went in. "Nobody explained, but I regained my balance," the 67-year-old choreographer said. "I can walk now." However, Miss de Mille still needs a cane, and, for writing, she has trained herself to use her left hand.

She can indeed write, as readers of her stylish, candid prose have always known. Recently, after her last hospital stay she finished a new book—another autobiographical volume about herself and the prominent families from which she is descended. Henry George, the social economist and proponent of the single-tax reform, was her mother's father. Cecil B. de Mille (who capitalized the d) was her uncle, and William de Mille, the playwright and screen writer, was her father.

"When I was here scrabbling in New York, my family ruled Hollywood," she said the other day in the New York apartment in which she settled just before World War II, determined to hit the big time. She did—with "Rodeo" and with her choreography for the 1943 Broadway musical, "Oklahoma!", followed by "Carousel," "One Touch of Venus," "Brigadoon" and other popular shows.

A few days ago, to give the Joffrey dancers a sense of her own excitement about "Rodeo" when she performed in its premiere 34 years ago, she read them a letter she had sent to "a soldier" during World War II. This was Walter Prude, now her husband and until last spring a vice-president of Hurok Concerts. The letter detailed the anxieties—and triumph—of the occasion.

Looking relaxed in a turquoise Chinese jacket with matching yarn in the curled-up braids of her hair, Miss de Mille addressed the dancers following a rehearsal in a City Center studio. "I had never had a success until 'Rodeo,'" she told them. "But because of the ballet, I had grown to love America. I understood it better because of the love for this soldier. He was from west Texas and he had a feeling for the earth."

"'Rodeo' has a plot. A tomboyish cowgirl pines away for the head wrangler but is lassoed romantically by her pal, the champion roper, after she sheds her riding breeches for a pretty dress.

Summing Up

Summing up her artistic credo, Miss de Mille said: "Dance is communication, theater is communication. It can be through the body, with speech and through the voice."

"The reason theater is different from our ordinary life is that you are making a statement that has to be witnessed and shared. And that is why I object to certain moderns who don't communicate anything. They are doing studies—a technical study for something. And they get grants," she said.

"My style of pantomime, which is very basic and perfectly natural, is close to acting, legitimate acting," she said.

It is the meaning of the dance gestures in "Rodeo" that Miss de Mille polished up last week. Vernon Lusby and Paul Sutherland, her two assistants, had done the initial rehearsals. At this phase, she said: "The dancers knew the steps. I was doing the thing I can do—which is telling them why they're doing what they're doing."

In this respect, Miss de Mille functions as the theatrical director that she really is. Her disability no longer allows her to demonstrate the steps and style through her own body. But her directional techniques are effective by any standard.

When, for example, the cowgirl hopes to get her man by putting on her dress, Miss de Mille sized her up this way: "You look up like a little child. You are asking, 'Do you like me in my little dress?' You come out like a Christmas tree. You don't have to do anything. That's the secret of love. Believe me. I learned it. I kept trying, trying. 'I'm the greatest, I'm the greatest,' That's not being lovable."

She is awaiting the publication of the book she has just completed. The title, suggested by her husband, is "Where the Wings Grow." She explained, "It's from a statement that Martha Graham made to a student—to John Butler—when she said, 'Hold your back straight, never forget that's where the wings grow.'"

PEOPLE: *A Job for the Man Who Revealed Tapes*

At last Alexander Butterfield has found a job. He is the former White House aide who revealed to the Senate Watergate committee in 1973 that President Richard Nixon's Oval Office conversations had been taped. Butterfield, who subsequently lost his government job, complained some months ago that although he had sent out dozens of resumés, he had been unable to find a job. On Tuesday, he was named executive vice-president of the International Air Service Company Ltd., a California-based concern. Butterfield is a former Federal Aviation Administration official.

* * *

Another job seeker: accountant Walter Dobson, 53, the "supermind" of Britain. He won the title Tuesday night on a TV quiz program. "I have a university degree and am qualified as a lecturer in further education," said Dobson, who has been out of work for two years. "Unfortunately this is not a good time to go into teaching... It is very depressing on the dole."

* * *

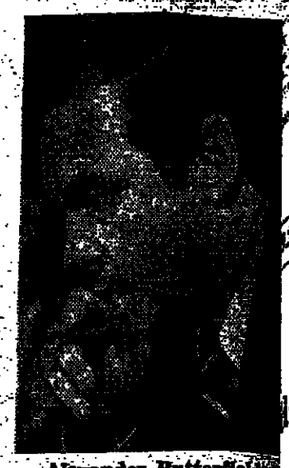
Eldridge Cleaver has been granted another postponement of his trial on charges of assault and attempted murder. An Oakland, Calif., judge, Alan Lindsay, has moved the trial from Jan. 24 to May 2, so that Cleaver's new lawyers will have time to familiarize themselves with the case. The charges against the former leader of the Black Panther party stem from a shootout between members of the party and Oakland policemen in 1968. Cleaver jumped bail shortly after he was indicted and fled the United States. He returned of his own accord last fall and is now free on $100,000 bail.

* * *

According to Jack Reilly, Chicago's director of special events, former President Richard Nixon has pledged $200 to Richard Daley's Youth Foundation in memory of the late mayor. Reilly said that Nixon phoned him after Daley's death to find out which was the mayor's favorite charity.

* * *

Three executors and two legal firms handling the estate of the oil billionaire J. Paul Getty Tuesday got $5 million—a down payment on what they will earn for their work. Getty's sons and executors, Gordon Peter and Jean Ronald, got $960,000 each. The third executor, Title Insurance and Trust Co., picked up $1.08 million. The law firm representing Title Insurance picked up $1 million as did attorneys for the Getty sons. Getty, who died June 6 at age 83, left an estate whose estimated inventory is $720 million. But on that inventory, the estate commission will finally pay about $7.1 million. It will take years for Getty's will to clear probate.



* * *

Five top U.S. artists—Andy Warhol, Jacob Lawrence, Roy Lichtenstein, Robert Rauschenberg and Jamie Wyeth—have been commissioned to do their impressions of President-elect Jimmy Carter's inauguration. A hundred sets of the signed prints will be sold, for $2,500 each, to raise inaugural funds.

* * *

King Carl Gustaf of Sweden and his Labrador Atl saved a young Chinese girl from freezing to death in a snowdrift near Ulrisdal Palace on Christmas Eve. The palace confirmed the story Wednesday. The King and his dog went out for a walk after lunch. All suddenly stopped and sniffed at a snowdrift. Under the snow was a lightly dressed woman showing only faint signs of life. The King carried her into the palace and after attempts to revive her failed called an ambulance. She was taken to hospital where doctors now say that she is out of danger. The police said she was a 21-year-old Hong Kong resident but withheld her name. She had been at a Christmas party given by the International Federation of Institutes for Advanced Studies. Apparently she wandered out in the park to see the snow.

—SAMUEL JUSTICE.

Lebanese Participation Urged

Sadat Lists New Conditions For Peace Talks on Mideast

By Thomas W. Lippman

CAIRO, Dec. 30 (WP).—President Anwar Sadat listed new conditions yesterday for reconvening the Middle East peace conference and for reaching a settlement that could further complicate the already tangled negotiating process.

He said that Lebanon must be a full participant in any Geneva conference, that any Palestinian delegate must be formally linked with Jordan and that Israeli withdrawal from territories occupied in the 1967 war must be swift, not phased over an extended time.

During much of an hour-long interview at his retreat on the banks of the Nile north of the capital, Mr. Sadat stressed his desire to reach a comprehensive regional peace settlement that would relieve both his country and Israel of a military burden neither can afford and that could defuse a dangerous situation.

He also emphasized again that new initiatives from the United States are required to bring about a settlement. "If the U.S. is ready for peace to prevail in the area, it can be done in a month," he said.

Anwar Sadat

Pressure Sought

That is the position he has been taking publicly ever since the summit conferences in Riyadh and Cairo last October at which Arab leaders agreed on a formula for ending the war in Lebanon and on a strategy to persuade President-elect Jimmy Carter that it is in the best interests of the United States to put pressure on Israel to accept a settlement with the Arabs.

The foundation of that agreement, he said, should be United Nations Security Council Resolution 242, adopted after the 1967 war, which called in obscure terms for Arab acceptance of Israel's right to exist in exchange for Israel's withdrawal from the occupied territories.

When the President got down to details, it became clear that at the least there is a long, delicate period of bargaining ahead before any settlement acceptable to all parties can be reached—not just between the Arabs and Israel but among the Arabs themselves. On some points his position appears to have hardened since his meetings last week with President Hafez al-Assad of Syria.

The United States and Israel have called for resuming the Geneva conference with the original participants of 1973—themselves, Egypt, Jordan, Syria and the Soviet Union. The Arabs have long insisted that the Palestine Liberation Organization be represented as well, but Mr. Sadat added a new twist. He said he would "insist" that Lebanon also attend as "an equal partner."

'Confrontation State'

Lebanon signed an armistice with Israel in 1949 and ever since has avoided both direct conflict and participation in peace negotiations. But Mr. Sadat said that Lebanon, which is now virtually under Syrian military occupation, is a "confrontation state" that would have to be included if a truly comprehensive settlement is to be reached.

He said President Elias Sarkis of Lebanon agreed with him.

Mr. Sadat and other Arab leaders have called for the creation of a Palestinian state on the West Bank of the Jordan and in the Gaza Strip once these areas are yielded by Israel. The idea that this state should be formally linked to Jordan will be welcome to the Israelis, but is sure to be unpalatable to many Palestinian leaders.

Mr. Sadat said he and Mr. Assad had not discussed what kind of Palestinian state should be created or who should run it.

'A Certain Relation'

But he said that after a meeting with King Hussein of Jordan in 1974—the year in which the Arab nations formally stripped King Hussein of any claim to the West Bank—"we issued a declaration and I was attacked vehemently by the Palestinians at that time. My idea was and still is that a certain relation between the Palestinians and Jordan should be declared to take place whenever the Palestinian state is created." He said it could take the form of a confederation or "whatever mode] they agree on between them."

Before his conference with Mr. Assad, Mr. Sadat had been suggesting publicly that the Arabs might be willing to accept a peace accord in which Israel would agree in principle to withdraw from the occupied territories but the pullout would be phased over an extended period of time. Yesterday he ruled that out.

"We shouldn't say that Israel will evacuate the land in two or three years. No. This is wrong. They should evacuate in a suitable time," he said.

After occupying the Sinai in the Suez war of 1956, he said, the Israelis pulled out in two or three months, and they can now follow their own example.

Defense Pact

Mr. Sadat said Resolution 242 imposes obligations on both the Arabs and the Israelis. If both sides commit themselves at Geneva to carrying out those obligations, he said, "the result will be this. We are asking for a peace agreement to be signed and declared officially all over the world... If we want to reach a genuine, permanent peace, Israel should withdraw from the land and this should be stated in the peace agreement, and give Israel whatever guarantees she wants. We shall not oppose this. To the extent of a defense pact with the United States I shall not oppose it."

Any arrangement demanded by the Israelis—demilitarized zones, UN supervision, superpower guarantees—would be acceptable to

Spanish Communist leader Santiago Carrillo waving after release from Madrid prison.

Spain Releases Carrillo on Bail, Won't Oust Him

By James M. Markham

MADRID, Dec. 30 (NYT).—Santiago Carrillo, the secretary-general of the Spanish Communist party, emerged this afternoon from Carabanchel prison on bail of 300,000 pesetas ($4,400), effectively gaining the right to reside legally in Spain.

Only hours after Mr. Carrillo left prison, the government announced that it was abolishing the special Court of Public Order that had considered the Communist leader's case as well as hundreds of other political cases during the Franco regime.

In another significant legal reform, the government decreed that "terrorism" cases would no longer be considered by the Supreme Court of Military Justice, but instead by ordinary civilian courts.

These two sweeping measures, announced after a Cabinet session presided over by Premier Adolfo Suarez, marked further dismantling of the authoritarian institutions of Franco Spain and seemed likely to ease tension in the Basque country, where about 150 possible appeals cases of political crimes are pending.

Though ordered by a court, the decision to free Mr. Carrillo amounted to a reversal of government policy, which had been to deny the 62-year-old Communist leader a passport and oblige him to operate underground. Waving cheerily to a large cluster of reporters, Mr. Carrillo was whisked from Carabanchel at 2:55 p.m. in a dark sedan.

A little more than an hour later, six members of the Communist party Executive Committee and Mr. Carrillo's personal secretary, who were arrested with him Dec. 22, were also freed on bail.

Hanging over the eight are charges of "illegal association" in the widely tolerated Communist party. It seemed more than likely that the case would never come to trial.

End Up in Archives

"The case is following its natural course," commented Joaquin Ruiz-Gimenez, a prominent Christian Democrat politician who is Mr. Carrillo's lawyer. "And I think it may end up in the archives." Mr. Carrillo's dossier is being held by the National Court of Public Order, which tries political cases.

Partisans of Franco's nationalists in the Spanish Civil War have accused Mr. Carrillo of ordering the execution of political prisoners—an accusation he has denied. A general amnesty proclaimed by Franco in 1969 covering crimes arising from the civil war excludes any chance that Mr. Carrillo could be prosecuted for the alleged executions.

Rather than prosecuting him, the government will now have the burden of protecting Mr. Carrillo, since there is widespread fear that his outspoken rightist enemies may try to kill him.

"If terrorist crimes are the only ones that do not merit amnesty," declared El Alcazar, an ultrarightist daily in a recent front-page editorial, "Santiago Carrillo does not deserve amnesty." The newspaper ritually refers to the Communist chief as a "murderer."

Today, police vehicles patrolled the streets around the five-story apartment building in the industrial suburb of Vallecas to which Mr. Carrillo repaired.

Mr. Carrillo's wife, Carmen Menendez, and one of the couple's sons returned from exile in Paris in October and took up residence in the building.

At a surprise press conference here Dec. 10, Mr. Carrillo declared that he had been living clan-

Swiss Signal To Ring In 1977 For Europe

NEUCHATEL, Switzerland, Dec. 30 (AP).—The bells of hundreds of European churches and town halls will ring in the new year at the same instant thanks to a fast-growing Swiss timekeeping enterprise.

Public clocks of many cities and towns of Western Europe are remote-controlled by a powerful, low-frequency radio transmitter at Prangins, near Geneva. Its signals are set, in turn, by the atomic clock of the Neuchâtel Observatory.

The system insures that electronic clocks on towers and in the streets of Switzerland, France, Italy, West Germany and even Malta give the same time. The precision is equal to that of the atomic clock which is supposed to err by no more than one second in 3,000 years.

Joan Baez, Others Condemn 'Abuses'

U.S. War Protesters Assail Vietnam

By William Claiborne

NEW YORK, Dec. 30 (WP).—Leading anti-Vietnam war protesters of the 1960s—including folk singer Joan Baez and poet Allen Ginsberg—yesterday protested against the Communist government of Vietnam.

They were among the signers of a petition presented to the permanent Vietnamese observer to the United Nations which condemned the Vietnamese government for "gross abuses" of civil liberties, for surpressing free speech and filling prisons with civilians accused of nothing more than holding certain religious and ideological beliefs.

The Communists were accused of "grievous and systematic violations of human rights," including the detention of an estimated 300,000 people in so-called "re-education" camps, the suppression of cultural and political expression and the stifling of nonviolent dissent.

Apart from Miss Baez and Mr. Ginsberg the protesters included: Roger Baldwin, founder of the American Civil Liberties Union; Kate and Geoff Pope, of the War Resisters League; Aryeh Neier, executive director of the ACLU; Paul O'Dwyer, the ueral New York City Council president; the Rev. Richard John Neuhaus, a founder of Clergy and Laity Concerned About Vietnam; James Forrest, who was imprisoned for draft resistance during the Vietnam war, and Theodore Jacqueney, a former State Department foreign aid employee who resigned in 1971 to protest U.S. involvement in Southeast Asia.

All of the 90 petition signers were leaders of the anti-war movement of the late 1960s and early 1970s, and their rhetoric against the Socialist Republic of Vietnam was as strongly phrased as their denunciation of U.S. military involvement against the Viet Cong.

Held Accountable

"Even those countries that are not democratic must be held accountable for basic human rights," said Rep. Edward Koch, D-N.Y., one of the most outspoken anti-war members of Congress during the Vietnam era, and one of the petition signers.

"I was one of those opposed to our involvement in Vietnam and I was pleased when our involvement ended. But we now have a new involvement and the United States must bring economic or any other kind of pressure to bear on a new kind of repression over there," Rep. Koch said.

The petition, drafted by the International League for Human Rights and mailed to Dinh Ba Thi, the Vietnamese observer to the United Nations, said the former anti-war leaders were "deeply saddened to hear of the arrest and detention of a wide range of persons, including religious, cultural and political figures who opposed the Thieu government despite considerable political risks."

"The actions of your government constitute a great disappointment to all those who expected not the bloodbath so eagerly predicted by the American White House, but rather an example of reconciliation built on tolerance."

The league asked the Communist government to permit on-the-spot inspections of so-called re-education camps by UN or Amnesty International teams, and to release all prisoners held purely for their political or religious beliefs. The group also demanded of the Vietnamese government "recognition of the right to open and free communication."

When asked if their demands did not appear in conflict with their previous stands, some of

Working on Economic Package

Carter Discusses Programs With Cabinet and Advisers

By Charles Mohr

ST. SIMONS ISLAND, Ga., Dec. 30 (NYT).—President-elect Jimmy Carter concluded a series of meetings with his future Cabinet and other major advisers yesterday, announced more meetings for next week to fashion the outlines of an economic recovery program and, in effect, confirmed that it was uncertain that his administration would seek a reduction in defense spending.

After the meetings, Mr. Carter confirmed that Cabinet members would do much of their work in smaller groups, one each for economic affairs, international security affairs, domestic affairs and the energy and environment field.

"We've had a chance to review the prospective programs that we will pursue with the American public and the Congress, to arrange items of interest to the American people in an order of priority, to get to know one another," Mr. Carter said as the last meetings broke up at a resort home owned by a wealthy friend on this coastal island. He then returned to his home in Plains.

Mr. Carter said that his chief economic advisers and Vice-President-elect Walter Mondale would meet with him at Plains next Thursday to "try to evolve the outlines, at least, of an economic package," to provide stimulation for a sluggish economy.

The next day they will be joined by a group of congressional leaders whose views will be solicited and whose support will be asked for the program, which is expected to involve tax cuts and some programs to create employment.

Mr. Carter said that after the meeting with the congressional leaders, "perhaps" he would have an announcement about the character of the economic package.

In other remarks, Mr. Carter indicated that there was no controversy or conflict between him and his future secretaries of defense and of health, education and welfare.

Harold Brown, who will be secretary of defense, indicated on Monday that the defense budget would be hard to reduce and Joseph Califano jr., who will head HEW, had suggested that Mr. Carter's promise to relieve cities of their share of welfare costs might have to await economic recovery before being fulfilled. Mr. Carter yesterday seemed to confirm the remarks of both men.

Mr. Carter also said that it was a misinterpretation of his opinions to say that he had pledged in his long presidential campaign to reduce the size of the defense budget.

When he was asked to say what

(Continued on Page 2, Col. 6)

To Our Readers

Friday's New York and American Stock Exchange tables will be published in the Monday editions, along with the regular Monday financial report.

British Navy Will Protect North Sea Oil

By Drew Middleton

NEW YORK, Dec. 30 (NYT).—Early in 1977, Britain's Navy will deploy five small warships as the first step toward military protection of the North Sea oil and gas fields.

By early in the 1980s, these fields will include 80 to 100 platforms and 6,000 miles of pipeline and will be producing a third of the oil requirements of the European members of the North Atlantic Treaty Organization.

Adm. Isaac Kidd, Supreme Allied Commander Atlantic, and his staff are planning for a more powerful defense of the fields in war. The only other NATO member directly involved besides Britain is Norway, but West Germany, the Netherlands, Denmark, Belgium and France, all of which will be in the market for Norwegian or British North Sea oil, are also interested in the defense of the fields.

A British government announcement said that the navy would put into service "five lightly armed offshore patrol vessels... capable of remaining at sea for long periods and fitted with rapid means of communication "with naval and police installations ashore.

The defense of the fields in war is complicated because of their extent and their proximity to the main bases of Soviet sea and air power in Northern Europe. Russian forces at these bases have recently been strengthened by the deployment of the new Soviet bomber and by the steady growth of the northern fleet based on Murmansk.

The oil fields are in three distinct areas.

In the south, 53 to 54 degrees north, are fields in the British sector. The water in the area is shallow, and almost all the discoveries were of gas. All the British gas is landed by pipeline on the east coast of England. There is one large gas field, called Placid, in the Dutch sector.

Most of the oil discoveries were in the middle North Sea, 55 to 58 degrees north. Again, most of the fields are in the British sector, but there is one large Norwegian field centered on Ekofisk. The five major British fields are in water 250 to 420 feet deep.

Above 58 degrees north lie a gas field and an oil field in the Norwegian sector and seven British fields. Weather has made the exploitation of these fields more difficult than was the case farther south. Wave heights in winter average seven feet for half of the time and exceed 15 feet for 20 per cent of the time. Waves in storms may be up to 100 feet, and winds gust up to 100 miles an hour. Water depth is 400 to 500 feet.

-Week Trip by Richard

.K. Negotiator Goes to Africa o Gather Views on Rhodesia

LUSAKA, Zambia, Dec. 30 (R).—Ivor Richard, chairman the stalled Rhodesia talks in neva, today ruled out the use British troops as a peace-eping force during the transi-n from white minority to black jority rule in Rhodesia.

on his arrival here at the start a three-week southern Africa r aimed at finding a Rhodesia ce formula, he also said Brit-does not favor suggestions t the Commonwealth should d "peace-making forces" to odesia.

he purpose of his visit, Mr. hard said, is to gather views m African presidents, Rho-ian black nationalist leaders and the Rhodesian government of Prime Minister Ian Smith.

"I am here to find out from all those directly involved in the Rhodesian independence problem what they would like to see as the degree and nature of the British government's involvement during the transition to majority rule in Rhodesia," he said.

Neutral Presence

Before leaving Britain, Mr. Richard said he was convinced Britain will have a direct role to play in the Rhodesian transitional government leading to majority rule. Only a neutral British presence, he predicted, could bring about a peace agreement.

But on his arrival in Lusaka, he repeated that "the British government will not administer Rhodesia for the second time."

"We have already taken an active and effective role to the Rhodesian settlement," he said.

Mr. Richard will meet Zambian President Kenneth Kaunda tomorrow. He is also expected to see Rhodesian black nationalist leaders Joshua Nkomo and Robert Mugabe, who jointly head the hard-line Patriotic Front, during his Lusaka stopover.

The nature of Britain's role in a transitional government is also expected to dominate Mr. Richard's discussions with the leaders of Rhodesia, South Africa, Botswana, Mozambique and Tanzania, all of whom he is expected to see during his southern Africa shuttle.

January Reopening

The Geneva conference adjourned Dec. 14 with Rhodesian black nationalists and the Smith government unable to agree on the nature of a transitional government. It is scheduled to reopen Jan. 17.

Mr. Richard will fly to Salisbury Saturday for talks with Mr. Smith and nationalist leader Bishop Abel Muzorewa before leaving for South Africa and talks with Prime Minister John Vorster Monday.

The first stage of Mr. Richard's trip will conclude with stops in Botswana, Mozambique and Dar es Salaam.

New Party's Demand

SALISBURY, Dec. 30 (Reuters).—A new political party led by black former members of the Rhodesian Cabinet said today that it wants to be represented at the Geneva conference.

Chief Jeremiah Chirau, president of the newly created Zimbabwe United Peoples Organization, said the party would ask for a seat at the conference table when talks resume.

Chief Chirau denied that ZUPO was being financed by the Smith government or that it was "an arm of the right-wing Rhodesian Front," as charged by the country's black nationalists.

.S. Sees Failure f Soviet Satellite terception Test

ASHINGTON, Dec. 30 (AP).—he Soviet Union has staged fourth test of a satellite ceptor this year, but it tenively is being classified as a ure by U.S. intelligence ces.

ne Russians resumed their ing of anti-satellite devices y this year after a lapse of t five years and the U.S. ces said the latest test was ducted Monday.

tests have involved only et satellites, and no effort been made by the Russians disable, destroy or interfere U.S. spy-in-the-sky vehicles, intelligence sources said.

Monday's test, sources say, mos-886 was launched from ikam, in central Russia, on 27, and on its second orbit nd the earth it apparently mpted to intercept Cosmos-

Cosmos-880 was launched 9 and originally was thought be a photo reconnaissance ite.

he hunter satellite never e closer than a mile to its et, sources said, and disinte-ed on its third orbit. Cos-880, the target, is said to be in space.

Ads Give White Rhodesians Some Ideas for One-Way Trips

Promoters Seek to Exploit Growing Emigration

By Robin Wright

SALISBURY, Rhodesia, Dec. 30 (WP).—The selection of new ads in Rhodesian newspapers suggests exotic travel: the Spanish coast, the lush mountains of Argentina, the garden provinces of South Africa, the islands of Britain and a wide selection of places in Europe.

The advertisers are not aiming at tourists. The appeal is to whites considering emigration from the troubled southern African territory for safer terrain elsewhere.

The ads and the discussions they have stirred reflect how deeply Rhodesia's 11-year-old constitutional crisis and the rapidly escalating four-year-old guerrilla war have affected the minority white population of 270,000, outnumbered 22 to 1 by Africans.

The haggling between white and black delegations at the Geneva conference on terms for transition to black majority rule has been the last straw for many frightened whites, who now believe there is no hope for moderate leadership under any of the four rival nationalist leaders.

Militant statements from the nationalists—such as the one from Robert Mugabe that he wanted to bring to court anyone in the government, the Rhodesian Army or in other positions involving "collaboration with the illegal Rhodesian regime"—have terrified whites, since all white men are required to serve in either the army or police.

Animosity among black delegations in Geneva also had an impact, making many whites fear that the traditional rivalries had reached a new peak and could result in an Angola-style civil war once majority rule is installed.

A third factor is the intensifying insurgent campaign. Since a black government now appears inevitable, an increasing number of whites have begun wondering whether it is worth risking life and limb in a war against nationalist guerrillas.

The emigration situation has become so serious that Prime Minister Ian Smith acknowledged in a speech on Dec. 16 that "we are losing more than we would like through emigration."

The population is dwindling at the rate of 550 a month on the average.

As one white farmer explained about his recent trip to Brazil: "We Rhodesians don't go on holiday anymore—we go on reconnaissance trips to discover where we can settle next."

And a Salisbury travel agent reported the sales of one-way tickets abroad has averaged 30 a week recently.

Foreign companies, land developers and "consultants" have gone to unusual lengths to press the possibilities of settling in their respective countries.

An Argentin businessman, Michael Deane, felt the prospects were so good that he flew to Salisbury to advise whites, especially farmers, on how to make the move to South America. Large daily ads in the Rhodesian Herald invited whites to visit him at his hotel suite, where he provided information on behalf of the Argentin Farming Corp.

Another ad pushes the Costa Blanca—clearly translated for non-Spanish-speaking Rhodesians as the "White Coast"—to "let us help you find peace and prosperity within the stability of sunny Spain."

Acres and Havens

Other ads offered "acreage in all areas of beautiful sunny Florida," farmland on the northern coast of New South Wales in Australia, a "tax haven" in Malta, and sites in Italy, Germany and France.

When a Perth land developer announced a plan to settle 1,000 white Rhodesians with jobs and homes, Australian Immigration Minister Mike MacKellar quickly reacted by announcing that "we screen people to avoid accepting those with marked racist tendencies. We don't want to import this problem."

The reaction may be premature, since only 138 Rhodesians emigrated to Australia in the first 10 months of this year.

Rhodesians also have a serious problem taking assets with them. A government regulation passed in July restricts the amount of cash emigrants may take with them to $1,800, making it difficult for anyone to resettle elsewhere unless a job awaits.

Some governments, such as Argentina, require an emigrant to have a minimum of $10,000 available before granting residency.

But the pressures have apparently become so great that whites are willing to abandon their assets, and the concern at government level has increased to the point that all prospective emigrants now receive a friendly, personal letter asking for reasons.

United Press International.

MADRID DEMONSTRATION—Demonstrato rs hurling insults at police Wednesday night on the Gran Via in Madrid. They were demanding the release of Communist leader Santiago Carrillo. Police responded with tear gas. Mr. Carrillo was freed yesterday.

Park Is Said To Deny Link To Payments

U.S. Lawmaker Tells Of Meeting in Seoul

By Gaylord Shaw

WASHINGTON, Dec. 30.—President Park Chung Hee of South Korea denied to a visiting U.S. congressman this month that he or his government had any role in an alleged campaign to buy the support of U.S. officials.

Rep. John Murphy, D-N.Y., said yesterday that he met with Mr. Park for two hours on Dec. 15 and received the denials when he asked the Korean President about the allegations now being investigated by U.S. authorities.

Rep. Murphy, a supporter of the Park government, apparently is the only member of Congress to visit South Korea since the allegations surfaced in October.

He said he went to Seoul at his own expense on Dec. 12 after the cancellation of a parliamentary conference he was in Japan to attend.

In his meeting with Mr. Park, Rep. Murphy said, he asked about Mr. Park's relationship with Tongsun Park, a Washington-based Korean businessman who has given cash and other gifts to members of Congress.

U.S. and Korean sources have said that Tongsun Park met with President Park and other Korean officials in 1970 to plan the campaign to influence U.S. officials, but Rep. Murphy said the President told him, "I met that man only once."

That was in 1965 when Tongsun Park was among a group paying a courtesy call on Park Chung Hee when he visited the United States, Rep. Murphy quoted the Korean President as saying.

"He said, 'That's the only time I ever spoke to that individual,'" Rep. Murphy continued.

As for charges that the Seoul government coordinated the gift-giving campaign, the congressman quoted Mr. Park as saying: "I have always conducted my affairs and the affairs of my country with the counterparts in the American government that are set up to receive those communications. I will not and have never ventured into anything like that which the press has built up."

Rep. Murphy said he also asked Mr. Park about allegations that the Korean Central Intelligence Agency (KCIA) had harassed and intimidated Koreans living in the United States.

"He said, 'The KCIA operates the same way the U.S. operates... Your Constitution says you must protect yourself against enemies foreign and domestic, and we do the same thing you do. We have to keep an eye on those people who we feel are trying to hurt us.'" Rep. Murphy quoted Mr. Park as saying.

Beirut Daily Suspending Publication

Editor Says Action Will Be Indefinite

BEIRUT, Dec. 30 (UPI).—[illegible] independent newspaper An-[illegible] will be indefinitely suspended from publication, editor in chief Michel Abu Jawdeh said today.

The publisher of An-[illegible] Chiassan Tueni, summoned [illegible] top editors to a meeting last night to discuss the situation at the newspaper, which was seized and occupied by Syrian troops of the Arab League peacekeeping force 11 days ago.

"Lebanon is more important than An-Nahar," Mr. Abu Jawdeh quoted Mr. Tueni as saying. "The paper will be suspended indefinitely."

But another editor who attended the meeting insisted that "nothing has been decided finally yet" and said the editors were still waiting for the government to assume a position on the [illegible].

"We still don't know what they are expecting from us," he said.

Mr. Tueni flew to Paris last night. One editor said the publisher intended to take up residence in France, but another said he would be back in Lebanon next week.

The confusion at the newspaper—which since its founding by Mr. Tueni's father in 1933 has been one of the leading dailies of the Arab world—reflected the uncertainty that has reigned in the Lebanese press since the Syrians seized six newspapers and one magazine in the last month.

Only Rightists Pleased

The action left only rightist and pro-Syrian Lebanese publications still operating.

"The Syrians don't want more than two or three newspapers to publish in Lebanon," editor Nabar editor said. "They don't want to have to institute real censorship; they want newspapers and journalists that print what they want without being told. An Nahar can continue to exist under the circumstances."

Other editors of the newspaper indicated there was still enough money to pay employees for one or two months more and that a final decision on the occupied newspaper's future would be made until then.

Meanwhile, a Palestine Liberation Organization spokesman denied reports of fighting in Beirut among rival Palestinian factions.

"There has been no fighting anywhere in or near Beirut today," he said.

In another development, rightist newspapers reported today that President Elias Sarkis has delayed dispatching Arab peacekeeping troops to the tense area of northern Lebanon due to continued Israeli objections to such a move.

The pro-Syrian daily Al Shir said diplomatic contacts have been made through Washington, Paris and Moscow in an effort to pressure Israel into dropping its objections to the entry of peacekeeping troops in the south.

Estimated 4% Increase

China Reports Grain Harvest For 1976 Is at All-Time High

By Fox Butterfield

HONG KONG, Dec. 30 (NYT).—China reported today a record grain harvest, with a majority of its provinces equaling or surpassing their totals for last year.

The Chinese press agency gave no figures in making the claim, in keeping with a common Chinese practice. The press agency said only that "China's grain output hit an all-time high in 1976, marking the 15th consecutive year of good harvests."

On the basis of still incomplete data from China's provinces, analysts in Hong Kong have estimated that this year's crop will be about 300 million tons, or roughly an increase of 4 per cent over last year's, which was also said to be a record harvest.

The analysts calculated the 1975 harvest at 380 to 389 million tons.

China's exact grain production has become a subject of heated controversy among specialists in the past few years, given a lack of precise information and some conflicting Chinese claims. Some analysts in the U.S. Department of Agriculture and the CIA reportedly believe this year's harvest will be only marginally better, at most, than last year's and may be closer to 290 than 300 million tons.

China needs to increase its grain production by 5 million tons a year to keep even with its annual population growth of about 2 per cent. The size of China's population is also in dispute, with Western estimates ranging from 850 to 950 million persons. Peking itself uses a figure of 800 million.

That the country achieved a record harvest in the face of reported adverse weather in some areas suggests that China has begun to reap important benefits from a major program begun in 1972 to improve irrigation and flood-control facilities. In the past year alone, more than 100 million peasants are reported to have been mobilized in their spare time for irrigation work and reclamation of farmland.

In addition, Peking launched a nationwide drive last year to mechanize agriculture within five years and improve the performance of rural party units. According to Chinese figures, 1.6 million party and state cadres have been sent to work in the countryside in the past year to spearhead this drive.

Spain Frees Carrillo, 7 Aides on Bail

(Continued from Page 1)

destinely in Spain since February and had made several trips out of the country.

The Communist party organized another press conference this evening, but, after the civil governor of Madrid declined to give permission for Mr. Carrillo to appear before the press, its organizers called it off.

A spokesman appeared at the conference, announced the cancellation and saluted the liberation of Mr. Carrillo and his seven comrades as "a victory for democracy and an important step toward the legalization of all political parties in Spain."

The day following Mr. Carrillo's press conference, gunmen kidnapped Antonio Maria de Oriol y Urquijo, the highly conservative president of the advisory Council of State and a former justice minister.

The two events stirred a loud outcry from the right, forcing the government to announce publicly that firm orders for Mr. Carrillo's arrest had been given to the police.

Today, the Madrid daily El Pais published the latest in a series of communiqués from Mr. de Oriol's supposedly leftist kidnappers, declaring that if the government did not declare a new amnesty for political prisoners by Sunday, they would murder him.

Leftist Credentials

There was some doubt about the authenticity of the communiqué—just as there is considerable doubt about the leftist credentials of the self-styled October First Anti-Fascist Resistance that says it holds Mr. de Oriol.

In centrist political circles, there is hope that Mr. Carrillo may now slowly become "demythified"—"people will see that he puts on his pants in the morning and breathes in and out like other human beings," as a political analyst put it.

The Communist leader's successful wresting of his right to stay in Spain, however, could set the stage for the return to Spain of another Communist leader still in exile—Dolores Ibarurri.

The 83-year-old La Pasionaria of the civil war currently resides in Moscow, but may not be able to support the initial rigors of clandestine existence that a Carrillo-style return would entail.

Mr. Carrillo's provisional freedom does not seem to have altered Mr. Suarez's position—pledged to high military figures—that his government will not legalize the Communist party.

The Premier recently told two members of an opposition negotiating team that he would not receive it if its Communist representative were present in projected negotiations on the ground rules of next year's parliamentary elections.

The legal reforms announced tonight will effectively remove the military from civilian justice, limiting the generous reach Franco gave military judges.

The abolition of the widely feared Court of Public Order, which was created in 1963 and was infamous for its political guidance, also goes a long way toward bringing the Spanish judiciary into line with the rest of Western Europe.

"This is the most important legal measure since the death of Franco, after last summer's amnesty," said a government official closely involved with the new reform.

Situation Said To Improve In Paoting

PEKING, Dec. 30 (Reuters).—The situation in the northern city of Paoting, where political feuding erupted into armed conflict, was "gradually improving," a Chinese official said tonight.

He told correspondents that Paoting's factional disputes dated from the days of the Cultural Revolution in 1966. He gave no details of the latest clashes.

The official People's Daily newspaper has reported "beating, smashing, looting," the destruction of military equipment, disruption of transportation and theft of state funds.

Other reliable sources said there had been murders, rapes and bank robberies and that armed gangs were, at one point, taking prisoners.

Mao Tse-tung's widow, Chiang Ching, and other extremist radicals have been officially accused of stirring up the unrest with the eventual aim of threatening the security of Peking.

An article in the People's Daily on Dec. 20 said the radicals were creating disorders in Paoting, 110 miles south of here, as part of a plot to seize power.

Reliable sources said Paoting, which lies on China's main north-south rail line, had a long history of political strife. It was not known when this year's violence was at its peak.

Orders to quell the unrest were issued by central authorities, apparently shortly after the arrest of Miss Chiang and other radicals last October, the sources said. Troops were sent in and have been rounding up all weapons, ammunition and explosives, they added.

Other sources reported that three weeks ago the situation "had not been completely resolved."

Killer Gary Gilmore Is Put in Solitary

DRAPER, Utah, Dec. 30 (Reuters).—Condemned murderer Gary Gilmore was today put into solitary confinement and will stay there until 24 hours before his executior scheduled for Jan. 17.

Before he entered solitary, he issued a new appeal to be allowed to go before a firing squad without further legal interference. He was sent to solitary for breaking prison rules, attempting suicide and scuffling with guards.

Ford Agrees U.S. Should Again Pay Its Unesco Dues

VAIL, Colo., Dec. 30 (UPI).—President Ford agreed yesterday that the United States should resume its contributions to the United Nations Educational, Scientific and Cultural Organization.

The White House announced that Mr. Ford had accepted a State Department recommendation that the United States pay Unesco $97 million in dues—$40 million of which is overdue.

Following a series of anti-Israeli resolutions adopted by the general conference of Unesco in 1974, Congress directed the President to withhold the payment of annual dues until he could certify that Unesco had adopted policies fully consistent with U.S. objectives and had taken concrete steps to correct previous actions.

At its 1974 meeting, Unesco adopted resolutions which, among other things, excluded Israel from membership in any regional group of the organization and condemned Israel for undertaking archaeological excavations in the Old City of Jerusalem.

A State Department official in Washington said that enough progress was made at the recent Unesco conference in Nairobi to convince the President that the United States should pay its assessed dues.

Death on the Matterhorn

ZERMATT, Switzerland, Dec. 30 (Reuters).—A British climber, David Robertson, 24, was killed in a 1,640-foot fall on the Matterhorn after he and a companion had scaled the sheer north face of the mountain, police said yesterday.

Air Force Chief Quits in Portugal; Other Shifts Seen

LISBON, Dec. 30 (Reuters).—The young commander of the Portuguese Air Force, who was given the post at the height of leftist influence in the armed forces last year, was replaced today by a man with a more orthodox military background, Gen. Jose Lemos Ferreira.

A military communiqué announced that Gen. Jose Morais da Silva, 35, had resigned. He was temporarily promoted from major to take over the air force command in May, 1975.

His resignation could put pressure on other young officers holding high positions, observers said.

Gen. Morais da Silva has recently taken conservative political positions but at the time of his appointment he pledged to identify the normally conservative air force with the leftist revolution.

The change in command reflects moves by some air force officers for a return to an orthodox system of promotions based on seniority and qualifications gained in specialized courses, military sources said.

100 Blacks Died In S. Africa Feud

PIETERMARITZBURG, South Africa, Dec. 30 (Reuter).—About 100 blacks died in factional fights and tribal feuding in Natal over the Christmas weekend, police said here today.

They said that 176 persons had been detained after the fighting in which 180 huts were destroyed and numerous cattle shot and mutilated.

"There may be more dead, because the blacks regard it as a matter of honor to remove their casualties from the battlefield as soon as possible," a police spokesman said. "Only the corpses from the defeated side remain."

3 Poles Sentenced For Demonstrations

WARSAW, Dec. 30 (UPI).—A Polish court yesterday sentenced three workers of the Ursus tractor plant for their participation in anti-government demonstrations last June.

The severest penalty was three years. The defense attorneys said they would appeal.

Says Lebanon Must Be Participant

Sadat Lists New Peace-Talks Conditions

(Continued from Page 1)

him, he said. What the settlement must include, he said, is recognition of the Palestinians' right to a homeland and a complete pullout by the Israelis from all territory, including East Jerusalem. The Israelis have annexed East Jerusalem and have said its status is not negotiable, but Mr. Sadat, without elaborating, said he thought it was open to discussion.

Mr. Sadat did not say that all his views on a peace agreement are shared by Mr. Assad. "What I'm telling you is my view," he said, "and Mr. Assad has the right to disagree."

Last week's Egyptian-Syrian communiqué, in which the two nations announced the creation of a "unified political command," was not intended to lead to an actual merger or to silence the voice of either leader, he said.

The outlines of the Arabs' appeal to the United States for action to break the Mideast diplomatic impasse were agreed upon at the October summit conferences, at which King Khaled of Saudi Arabia brought Mr. Sadat and Mr. Assad together after their long estrangement. But Mr. Sadat said yesterday that he had no promise or commitment from Saudi Arabia to use its oil power to promote this course of action.

Saudi Arabia's refusal to go along with the 15-per-cent price increase for next year adopted by 11 other members of the Organization of Petroleum Exporting Countries—an action for which the Saudis said they expect a show of U.S. "appreciation"—was described by Mr. Sadat as "a master coup."

But he said the Saudis acted "of their own free will and without any interference from anybody."

Mr. Sadat said the Arabs were not trying to "stampede or harass" Mr. Carter by aiming a major diplomatic initiative at him before he even takes office. What they are doing, he said, is resuming a "peace process" that started after the war of October, 1973.

"What I am saying is this. Let us resume the momentum of the peace process that we have already started," Mr. Sadat said.

No U.S. Comment

WASHINGTON, Dec. 30 (UPI).—The State Department declined substantive comment on the interview.

"Quite apart from the fact that there is so much in Sadat's reported statements that it would take weeks, even months, to develop a policy, it would be a presumption for us in the last weeks of this [Ford] administration to comment on the interview," an official said.

He added it was clear Mr. Sadat was not addressing his remarks to the Ford administration but to the incoming administration of Mr. Carter.

The reluctance by U.S. officials to comment on Mr. Sadat's remarks follows a general line that has been established by Secretary of State Henry Kissinger to avoid saying or doing anything likely to embarrass either Mr. Carter or Secretary-of-State-designate Cyrus Vance.

Israel Rejects Views

TEL AVIV, Dec. 30 (UPI).—Israel today rejected the bulk of Mr. Sadat's views as representing a tougher Egyptian stance.

In the first official reaction to Mr. Sadat's interview, Foreign Minister Yigal Allon showed interest in the Egyptian leader's call for a Palestinian state to be set up on the West Bank with links to Jordan.

But Mr. Allon rejected as "rigid" Mr. Sadat's demand for a total Israeli withdrawal to the pre-1967 borders and the inclusion of Lebanon in a reconvened Geneva peace conference.

Carter Discusses Programs With Cabinet and Advisers

(Continued from Page 1)

he "conceived to be your campaign commitments on the defense budget and on cutting it," Mr. Carter said: "The defense budget will be adequate any time, now and in the future, to provide defense capability and security for our nation. We will analyze the structure of the defense budget, the assignment of personnel, the length of stay [of personnel] on a station, the standardization of weapons, the time of completion of major weapons systems. And my estimate, which I have no reason to change, is that we can achieve a savings, through efficiency, economy and better management, of $5 billion to $7 billion below the present expenditures and the future expenditures, no matter what is required."

Not everyone was certain what this meant and Mr. Carter was asked by one of the reporters, "Well, Governor, when you say present expenditures, do you mean this fiscal year's budget, and you're actually saying you would present a defense budget that would be in real dollars below that?"

"I can't say that," Mr. Carter replied. He added that the budget for the 1978 fiscal year would be prepared by President Ford, "and the amendments we can make to it early in this next year will be relatively minimal."

He went on to say that most of the changes meant to cut waste and increase efficiency were the kind of things that "will take longer."

"But after these economies are effectuated, and I think they can be substantially prescribed within the next following budget, the savings will, I think, be $5 billion to $7 billion."

Mr. Carter was asked whether he thought people, on the basis of his campaign speeches, "perceive you talked about absolute reduction?"

"Well," he said, "I would hope not, because I've never said anything but that the first responsibility of any president is to guarantee the security of this country.

"I would hope that if we can achieve a working relationship with the Soviet Union with substantive progress in the SALT [Strategic Arms Limitation Talks] negotiations to lessen the dependence on atomic weapons," and if talks on the mutual and balanced reduction of forces in Europe "can be productive," and "if we can resolve the threat of war in the Middle East, that we might realize a substantial dollar reduction in expenditures."

"But," he added, "I can't and never have promised. What I have promised is to manage the Defense Department in such a way that economies and efficiencies would amount to $5 billion to $7 billion."

Brazil Will Force Its Indian Policy On Missionaries

RIO DE JANEIRO, Dec. 30 (Reuters).—The government plans to remove all missionaries from the country's Indian tribes next year unless they cooperate with official policy.

The move, announced by Interior Minister Mauricio Rangel Reis, is the latest round in a conflict between church authorities and the government over Indian policy.

Mr. Reis said the position of the Roman Catholic Church was "dreamy, feudal and backward." The government has called for the rapid integration of Indians into modern society. They are believed to number between 100,000 and 200,000.

Mr. Reis said the vast majority could be integrated in 10 years. But the church and many anthropologists say the policy would condemn the primitive Stone Age tribes, many of them living in the jungle, to cultural extinction and social disintegration.

Mr. Reis said bilingual education for the tribes would end and they would only be taught to read and write in Portuguese. The new measures against missionaries affect both Roman Catholics and Protestants, active in widely scattered parts of the country.

Crime Rate in France Declines 9% in 1976

PARIS, Dec. 30 (Reuters).—France's crime rate dropped by 9 per cent this year, the first decrease in 15 years, Interior Minister Michel Poniatowski said today.

He told a news conference that burglaries were down 14 per cent and armed robbery had been reduced by 10 per cent. There were also fewer rapes, but the year saw an increase in drug offenses, he said.

Saudis Dismiss Iceberg Reports

BELGRADE, Dec. 30 (AP).—Saudi Arabia denied today reports that it would bring icebergs from the Antarctic to secure fresh water.

The Saudi Arabian news agency SNA reported in the Nonaligned News Agencies Pool, distributed here by the Yugoslav agency Tanjug, that Abderahman al-Sheik, minister of agriculture and water economy, denied the iceberg reports and said that Saudi Arabia was rather trying desalinization of seawater and searching for new water sources in the country.

The idea, the reports said, was to float icebergs to Saudi Arabian shores, where they would melt into drinking water. Some scientists said this would be cheaper than desalinization.

Protesters Hit Vietnam

(Continued from Page 1)

the petition signers offered varying rationales.

Father Neuhaus emphasized that his protest of the war was not contingent upon approval of the alternative... There was a choice between the perpetuation of a dictatorial regime and unknown quantity."

He recalled there were strong differences between anti-war activists who advocated a military victory by North Vietnam and those peace demonstrators who opposed an immediate take-over by the Communists as vociferously as they opposed the presence of U.S. troops in Indochina.

"We wanted to believe [illegible]—so desperately—that the pledges and the promises of respect that would be shown by the Communists] toward human beings and human rights [illegible] were told time and time again by them, 'We know your record [for suspicion], but this time it will be different,'" Father Neuhaus said.

Rep. Koch said, "I'm one of those who always said, 'Vietnam always was a repression of South Vietnam. But I did not believe the United States would ever become involved in the middle of a civil war between two repressive regimes.

"I have no regrets about opposing our involvement. Repression? I'm against it whether it's from the left or the right."

E. Berlin Curbs Foreign Visitors

BERLIN, Dec. 30 (Reuter).—Foreigners crossing the wall from West Berlin for a day's visit will have to pay for a visa from now on, I the East German Communist daily Neues Deutschland said today.

The visa will be valid until midnight of the day they buy the newspaper said.

Until now, foreign visitors received passes at the checkpoints allowing them to stay in East Berlin for 24 hours. West Germans and West Berliners have long been required to leave the city by midnight.

Jailbirds Have to Give Up Pen Pals

By David Larsen

SAN QUENTIN, Calif., Dec. 30.—Saturday will be sad for many inmates of San Quentin Prison. The prison authorities have decreed that all pets must go, and the men will have to get along without cats, rats, mice, birds, snakes, hamsters, goldfish and even a pet raccoon.

Ernie Rodriguez likes to keep a cat in his cell to keep the roaches down.

"This place used to be infested with roaches," Rodriguez said. "But my cats knock them off the wall and kill them."

Rodriguez, 40, has been keeping seven cats in his third-tier cell. Two years ago he adopted Princess, then subsequently kept her kitten, and recently found himself custodian of five other kittens of hers.

In a first-floor cell is Suki, the father of the kittens. Suki is kept by Michael Schwerdtfeger, 30.

In the Morning

"Suki wakes me up in the morning by licking me on the neck," he said. "I'm going to miss him."

Suki will be entrusted to Schwerdtfeger's family, and Rodriguez has been busy finding owners on the outside for Princess and her offspring.

"I guess we've had 90 animals go out through the visiting room already," prison spokesman Bill Merkle said. "Pets have always been against the rules, but the inmates sneak them in."

The problem, he went on, is that for every prisoner who likes cats—the most common prison pet—there are four who do not.

Fistfights have resulted. Complaints have been registered over odors. Guards have been bitten while searching cells.

No Veterinarians

In addition, there are no veterinarians on hand to treat pets that get sick.

Neno Chapman, an inmate who is president of the Men's Advisory Council, estimates that 20 per cent of the prison population of 2,186 has been keeping pets, although the estimate by officials is lower.

"We have had mice, birds, snakes, hamsters and goldfish," Mr. Merkle reported. "At the minimum security ranch they even had a pet raccoon."

Chapman remembers a convict who walked around with a pigeon on his shoulder.

Gary Phoenix, 35, had a pet rat.

'Frisky' Rat

"I kept him in a cage in my cell," he said. "He weighed a pound and he was frisky as a puppy. We would play tug of war with a piece of string. But my wife has him now."

Phoenix also developed a reputation for bird care, and in the springtime other inmates would bring him baby birds that had fallen out of nests.

But on the 460 acres of San Quentin, the big issue has been cats.

Princess, a familiar sight on the third tier, slips between the bars into unoccupied cells during the day, but returns to Rodriguez at night for company, a clean litter box of torn newspaper and a good meal.

"I give her and her daughters my entire plate of chow, and then I go and buy something for myself at the canteen," Rodriguez said.

Army Choice Of Helicopter Called Wrong

Congressional Unit Questions Tactics

By John W. Finney

WASHINGTON, Dec. 30 (NYT).—The Congressional Budget Office suggested yesterday that the Army was buying the wrong type of helicopter and planning to form the wrong kind of division if it is expected to fight a short, intense war in Europe.

In one of a series of issue papers it is preparing on the defense budget for congressional committees, the Congressional Budget Office analyzed the Army's weapons needs in terms of the length of war that should be planned for in Europe.

If the planning emphasis should be shifted toward meeting a short, intense war that breaks out with little warning—as is being advocated by Sen. Sam Nunn, D-Ga., on the Senate Armed Services Committee—then the study said that Congress must re-examine some of the expensive weapons-procurement plans of the Army.

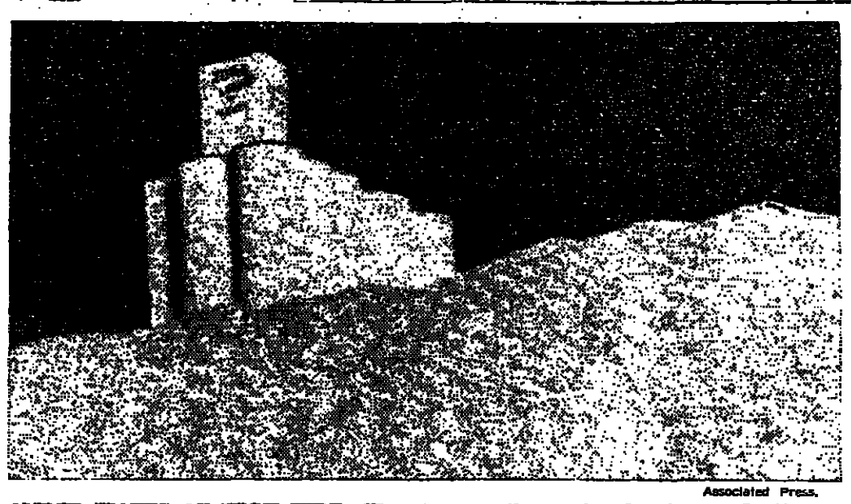
A New Approach

The study, which seeks to lay out alternatives rather than make specific recommendations, introduces a new approach for congressional committees in analyzing the defense budget. In the past, the link between strategic plans and weapons programs has not generally been made by congressional committees, which have tended to focus on the technical features of new weapons rather than on their intended utility on the battlefield.

In countering a surprise attack by the Warsaw Pact's armored forces, for example, the study questioned the usefulness of the new attack helicopter wanted by the Army as an anti-tank weapon. The Army recently awarded the Hughes Aircraft Co. its first production contract as part of a plan to buy 536 of the new attack helicopters at a cost of $3.7 billion.

One of the main justifications advanced by the Army for the expensive new Hughes helicopter—which does not yet have an Army code name—is that it will be able to fire its anti-tank missiles and then duck down for protection, thus reducing its vulnerability to enemy ground fire. In contrast, the present generation of Cobra helicopters are vulnerable because they must stay up to guide their missiles all the way to the target.

The study, however, raised the objection that in firing its Hellfire anti-tank missiles, the Hughes helicopter must depend on friendly forces, either on the ground or in other helicopters, to illuminate the target with a laser beam which is picked up by the incoming missile.



Short, Intense War

In the confusion of a surprise attack and a short, intense war, the study questioned whether there would be friendly forces readily available for providing the target guidance for the missiles. Faced with such a tactical situation, it suggested that it might be preferable to buy the less expensive Cobra helicopters.

The study also questioned the Army's plans to convert two of its light infantry divisions to heavily mechanized divisions on the grounds that the light divisions lack the firepower and mobility to deal with the armored divisions of the Warsaw Pact.

The Army plans to station the two divisions in the United States and ship them to Europe on the outbreak of war. In the event of a short war, however, the study questioned whether there would be time for an airlift and sealift to get the heavily mechanized divisions to Europe before the war was over.

It might be preferable, therefore, it suggested, to maintain them as rapidly deployable light infantry divisions, equipped with anti-tank missiles, which could be quickly transported by air to Europe.

AMBER WAVES AT HIGH TIDE—The sign on the grain elevator reads "Iowa, land of plenty." And bumper crops this year left an unprotected mountain piled up for storage outside of this grain shipping and storage facility in Sully, Iowa.

Mondale Says He Is Playing 'Historic Role' in Transition

By Morton Mintz

ST. SIMONS ISLAND, Ga., Dec. 30 (WP).—Walter Mondale said yesterday that he has had a "historic" role in the transition, because Jimmy Carter gave him responsibilities "different and more useful" than those ever before assigned a vice-president-elect.

"I've been through all the crucial decision-making processes establishing this government," Sen. Mondale said.

Former Vice-President Hubert Humphrey "has told me he never participated at any point in the Johnson government the way I have," Sen. Mondale added. "The history of this office is nothing short of grim."

Sen. Mondale said he expects to have duties in the White House that will "break a lot of historic precedents," adding, "We're working on suggested tasks for me in government that I think will be unique and to be announced later."

Sen. Mondale and the President-elect appeared together in interviews that ABC-TV taped Monday for its "Good Morning America" program.

The admiration each man expressed for the other probably diffused much of the puzzlement that Mr. Carter created Tuesday when he told his Cabinet appointees that Sen. Mondale will be "my chief staff person" in the White House.

Later in the day, and again yesterday, Mr. Carter's press aide, Jody Powell, told reporters that the quoted phase had caused "understandable confusion," because it could be misconstrued to mean that Sen. Mondale will be the White House chief of staff. Mr. Powell emphasized that Mr. Carter has repeatedly pledged never to have a chief of staff, a role H. R. Haldeman—and later Gen. Alexander Haig—played in the Nixon White House.

Describing his "unprecedented relationship" with Sen. Mondale, Mr. Carter told the Cabinet nominees, "I've informed all the White House staff personally that he is their boss . . ."

But Mr. Carter set the "boss" phrase in a context that made clear who the real boss will be, saying that Sen. Mondale, "along with the other people who'll speak for me, will be very careful to do just that, and will try to meld as much as possible his staff and my staff."

The press secretary said the Carter staff does "look to Mondale as a boss in virtually the same degree as we do Gov. Carter . . . I certainly would no more question a directive from Sen. Mondale than I would from the Governor."

Generally, "it would be correct to say Mondale will be involved in the broad range of responsibility that a president has," Mr. Powell said. Sen. Mondale "will function as the Governor's principal adviser across a long range of issues," he added.

Mr. Carter, on the TV program, said Sen. Mondale will be "an equal partner with me." He went on:

"We both recognize that the Constitution places on my shoulders the ultimate responsibility for administration of the government, but at any moment, if an accident should befall me, he would instantly be the president, and I want him and he wants to be completely qualified to take over the reins of government in the eventuality."

United Press International.

SO THERE, TOO—Amy, daughter of President-elect Jimmy Carter, sticking her tongue out at her nephew Jason, the 19-month-old son of Jack Carter, as the Carter family was leaving after a stay on St. Simons Island, Ga.

50 Kidnappings For Ransom in '76 Reported in Italy

ROME, Dec. 30 (UPI).—Italian kidnappings occurred at a rate of nearly one a week this year, according to a survey published today.

Fifty persons—42 men, three women and five children—were kidnapped for ransom during the year, the survey said. The figure showed a slight improvement over 1975, when at least 53 persons were abducted for ransom. Of this year's 50 victims, 38 were released after the payment of ransoms totaling a reported 7 billion lire ($11.4 million) or through the efforts of police rescue squads. Another 11 are still in the hands of their abductors, and one was killed.

Authorities believe the actual ransom payments were much higher than the figures published, according to the survey.

Relatives of kidnap victims usually tend to minimize the amount of ransom paid for fear the tax man will take a second look at their finances.

Others pretend to have paid no ransom at all, for fear of police charges of aiding and abetting kidnappers. At times, officials have "frozen" the assets of relatives to keep them from paying ransoms, but the money is often secretly borrowed from friends and repaid later.

Moon in Moscow

MOSCOW, Dec. 30 (UPI).—Walter Mondale arrived by special U.S. Air Force jet today to take up his post as U.S. ambassador to the Soviet Union.

Inventory Shows Ex-CIA Man Held Hundreds of Documents

By Robert Meyers

WASHINGTON, Dec. 30 (WP).—Virtually every room and closet in the home of Edwin Moore 2d, a former CIA employee charged last week with trying to sell CIA documents to the Soviet Union, contained stacks of secret and confidential CIA papers, according to an FBI inventory list of Mr. Moore's home filed in a Baltimore court.

Hundreds of documents containing thousands of pages, as well as cassette tape recordings, undeveloped film, a Polaroid camera, three "nimble fingers rubber gloves," and a military textbook written in German were taken in eight cartons from Mr. Moore's home by FBI agents.

Directories listing names, addresses and telephone numbers of CIA personnel, a CIA security roster, 10 secret "control logs," a list of otherwise unidentified "key executives," a planned weekly schedule marked "Executive Office of the President (official use only)," and two pages of numbers with the words "Latin America is a very warm place," were among the more than 500 items catalogued in the 25-page FBI inventory list.

Included was "a typewritten original of a note offering to provide penetration into the CIA for $10 million," according to the handwritten FBI inventory.

'Valuable Stuff'

"We are concerned," said a government source close to the investigation of the 56-year-old former CIA employee. "There is some very valuable stuff in there. The fact that it's old doesn't mean it's out of date."

The government's concern is founded not only on the number of documents found everywhere in Mr. Moore's home, including on a couch, but by the fact that some of the documents are dated after he left the agency in 1973.

Mr. Moore reportedly retired from the CIA's Mapmaking and Logistics Section after 22 years of service. It was not known whether Mr. Moore has returned to the agency since he stopped working there. However, the briefcases of employees are not checked as they leave the Langley, Va., headquarters, a CIA spokesman acknowledged.

If Mr. Moore did not obtain personally the documents listed in the FBI inventory, then he "might" have obtained them with the help of someone currently employed by the CIA, according to the government source.

A CIA spokesman expressed surprise that the inventory list had been filed as a public document in connection with the case. "I didn't know the system moved that quickly," he said.

Mr. Moore, who is married and the father of five children, reportedly suffered a form of heart attack on Tuesday afternoon and was taken to a hospital, according to U.S. Marshal John Spurrier.

Mr. Moore was arrested a week ago as he allegedly stooped down to pick up a package left by FBI agents across the street from his home. The package had been placed at the site by the FBI in response to an espionage offer allegedly made by Mr. Moore to Soviet Embassy officials.

Sweden Rules Drunkenness To Be No Crime

STOCKHOLM, Dec. 30 (Reuters).—After New Year's Day, drunkenness will no longer be a criminal offense in Sweden and the country's severe drinking-and-driving laws will be eased.

Other new laws, effective Saturday, end an employer's traditional right to hire and fire and allocate job functions. There will be more staff participation in decision-making and access to confidential company affairs.

Union interpretations of collective-bargaining agreements will have priority over employers' views in disputes, unless a court decides otherwise.

Former Convict Is Charged In Murder of French Deputy

From Wire Dispatches

PARIS, Dec. 30.—Gérard Frèche, a 31-year-old former convict, was formally charged today with the murder of Jean de Broglie, a former French deputy foreign minister, as Justice Ministry officials strongly criticized official revelations on the case.

Officials at the ministry made known to the press their "profound astonishment" at yesterday's press conference by Interior Minister Michel Poniatowski and senior police officers.

Mr. Poniatowski and the officers named Frèche and five other persons, including two business associates of Mr. de Broglie, as being responsible for the murder, although none had then been charged in the case.

Police said that all but the two business associates, Patrick Allenet de Ribemont and Pierre de Varga, had confessed.

The Justice Ministry officials noted that the details of the investigation and the allegations made during the news conference were "in contradiction" with the French penal code, which rules they are secret until charges are brought.

'Doesn't Hold Water'

Mr. de Broglie's widow indicated, meanwhile, that she did not believe the official thesis that her husband had been killed to wipe out a 4-million-franc ($800,000) debt for which he had been the guarantor. "It's an idiotic affair which doesn't hold water," she said in a radio interview. "One can't imagine he was assassinated simply for that."

"The de Broglie affair has just begun," the afternoon daily Le Monde said. "The investigation is at the starting point," said France-Soir, the other major Paris afternoon newspaper.

Mr. de Ribemont, 39, accused with Mr. de Varga of having masterminded the murder, protested his innocence in a statement released by his lawyers.

The lawyers said he was "outraged by the inadmissible and gravely defamatory allegations spread against him, that he was in any way the instigator of the crime." Police have described him as playing "a lesser role" than Mr. de Varga.

An $800,000 Loan

Mr. de Varga and Mr. de Ribemont borrowed 4 million francs from a bank, on Mr. de Broglie's guarantee, to buy a Paris restaurant. Police claim the contract provided for the shares to go to the two men in the event of Mr. de Broglie's death, and that a life insurance policy on Mr. de Broglie would have repaid the bank.

Mr. de Broglie, 55, was a National Assembly deputy. He had helped in the negotiations ending the Algerian war in 1962.

French news media said police were scrutinizing stacks of financial documents showing that Mr. de Broglie was a partner in 42 different business firms. Police sources said investigators were puzzled that Mr. de Broglie should have associated himself with Mr. de Varga and Mr. de Ribemont, who already had been investigated several times on charges of unlawful business transactions.

Leader of Ethiopian Junta Thrives on Anonymity, Force

By David Lamb

ADDIS ABABA, Dec. 30.—Lt. Col. Mengistu Haile Mariam, 38, who has emerged as the strongman of Ethiopia's ruling military junta, is one of the world's least-known national leaders.

Most Ethiopians do not even know his name. He is inaccessible to Western diplomats and he is seldom identified by name in the daily Ethiopian Herald.

The Ministry of Information's voluminous files on revolutionary accomplishments include no Mengistu biography for public consumption.

The anonymity is of his own choosing: Partly because the Dirgue, as the junta is known, portrays itself as a faceless, democratic body and partly because, after an assassination attempt in September and several failed coups, Col. Mengistu is worried enough about his safety to have moved last month from the military barracks to a room above his office in one of the late Emperor Haile Selassie's palaces.

Son of Revolution

Although much of his life remains an enigma, Col. Mengistu appears well cast as the son of the revolution. Born to humble Christian parents in southern Ethiopia, he had neither the means nor the status to attend Harasr, the leading Ethiopian military academy. Instead, he enrolled as a cadet at Guennet, a poor man's academy, and began a slow rise through the ranks as an ordnance officer, showing no political inclinations.

He twice studied briefly in the United States. A member of the dark-skinned Galla tribe—dominated in Ethiopia by the elite Amhara tribe—Col. Mengistu has said that he was deeply troubled by the racial prejudice he encountered in the United States. It was as deep as the prejudice against the Gallas he had experienced at home, he told U.S. friends at the time.

After Haile Selassie was deposed in a relatively bloodless coup in September, 1974, Col. Mengistu quickly emerged as one of the most ruthless soldiers in the Dirgue—a secretive junta whose 40 to 50 members range in rank from private to general.

According to diplomatic intelligence reports, it was Col. Mengistu who shot down Gen. Aman Andom, the Dirgue's purported leader, a few weeks after the overthrow of Haile Selassie. A week later, it was Col. Mengistu who first opened fire on 60 former officials of the Haile Selassie regime in a mass execution in Akaki prison. And in September, diplomatic sources said, it was Col. Mengistu who calmly drew a revolver at a conference table and shot dead a military colleague whose indecisiveness had displeased him.

Grumbling in Dirgue

Knowledgeable Western sources say that there is some grumbling within the Dirgue these days that Col. Mengistu has assumed too much power and extended the bloodletting too far. A point of contention: His policy of exterminating the Ethiopian Peoples Revolutionary party, a Marxist group of disgruntled students, teachers and labor union members who want a return to civilian rule.

There are indications, these sources say, that Col. Mengistu may not be as far left as his rhetoric suggests. Although few doubt that Ethiopia's revolution of "scientific Socialism" is typically Marxist, Col. Mengistu has shown some reluctance to put any other country's trademark on his revolution.

"I am married to my country," he has said. "I shall never marry another."

In title, Col. Mengistu, who was promoted last month from major, is the Dirgue's first vice-chairman. The second vice-chairman, Lt. Col. Atnafu Abate, shares a mutual distrust with Col. Mengistu and for a while each did not allow the other out of his sight. The Dirgue's chairman, Brig. Gen. Teferi Benti, is a figurehead.

Col. Mengistu, a nonsmoker and nondrinker, is an avid swimmer, tennis and soccer player despite an occasionally troublesome stomach ulcer. He is married and has four children.

Dirgue Reorganized

ADDIS ABABA, Dec. 30 (Reuters).—Ethiopia's military rulers, in the first restructuring of their all-powerful council since it was created more than two years ago, have adopted a three-tier system aimed at improving its work.

A proclamation last night also defined more closely the functions of the leaders of the Dirgue, the provisional military administrative council.

Flu-Shot Ban Extended

ATLANTA, Dec. 30 (AP).—The U.S. Center for Disease Control extended its moratorium on the swine flu immunization program indefinitely yesterday pending a more conclusive study of the vaccine's relationship to the Guillain-Barre syndrome, a mysterious paralysis contracted by 242 of the more than 41 million people who have been vaccinated.

Mountains Thought to Have Deposits

U.S. Craft Scour Antarctica for Uranium

By Walter Sullivan

VICTORIA LAND, Antarctica, Dec. 30 (NYT).—Lt. Comdr. Mike Mack flies his helicopter directly at the towering rock wall of Solar Mountain. Then, just as a crash seems inevitable, he banks and turns to parallel the wall 100 feet from its craggy sandstone face.

Dr. Frank Tessensohn of West Germany's Geological Survey, perched between pilot and cockpit so he can look ahead, calls out. Kent Crisler, a student at the University of Kansas, that a run has begun.

A steady stream of chart paper emerges from the gamma-ray detector between Mr. Crisler's knees. A big metal cylinder—and on the paper margin alongside he dabbles continuous wiggles and dots inscribed in red by a nearby pen. He must keep track of where each observation is made. The search is for uranium—not with a step toward immediate exploitation, but to help those nations, including the United States, now trying to formulate a policy for the ultimate disposition of the resources hidden within this vast continent.

The targets are the topmost sedimentary layers of the higher mountains of this region. The best surveyed—Shapeless Mountain, Mistake Peak and the like—are 9,000 to 10,000 feet high. In most cases all but the uppermost few thousand feet are buried in the ice flowing off the South Polar plateau toward the sea.

Beacon Sandstone

The ranges are part of the Transantarctic Mountains that span the continent from its Pacific to its Atlantic shores, forming one of the world's major mountain systems. The higher ones are often capped with flat-lying layers of Beacon sandstone, a formation made famous early in this century by the accounts of Robert Falcon Scott and Sir Ernest Shackleton.

When the continents figuratively are fitted back together, as they seem to have been 200 millions years ago, the formations here appear related to those of similar age and structure that produce uranium in the Karroo area of South Africa and in India.

According to Dr. Edward Zeller of the University of Kansas, in charge of the uranium hunt, part of the Karroo formations contains 2 per cent uranium. The search is being conducted with helicopters flying out of the U.S. base at McMurdo Sound. It is done by Navy aircraft under contract with the National Science Foundation.

The most encouraging find so far has been a recording made a few days ago with Dr. Gisela Dreschoff at the detector. She is a German-born associate of Zeller and like him a radiation physicist. The needle swept off scale as the helicopter flew along the flank of Maya Mountain that forms the west wall of Beacon Valley.

For about a mile and a half the radiation was three times normal. The area is near the head of Taylor Glacier, which flows into a valley whose lower part is free of ice.

The observation must now be followed up on the ground and specimens collected. "It may turn out to be nothing," according to Dr. Zeller, but the "hot area" is clearly defined and not associated with any change in surface topography, implying that the radiation represents a localized deposit.

While the readings did not indicate a very rich resource, the searchers believe it may show that uranium concentrations exist in the Beacon sandstone—some of them perhaps of economic importance.

The cliff-hugging flight strategy is necessary because the horizontal surfaces here are almost all buried in ice and snow, which mask the gamma rays generated by uranium and other radioactive elements.

While most of Antarctica is buried in ice, the Beacon sandstones have been lifted high enough to be exposed along much of the mountains. The present flights can only reach those near McMurdo Sound, but Dr. Zeller hopes the search can later move south near the Beardmore Glacier where the formations are thickest.

New-Style Netherlands Dike Lets Sea In. Rhine Water Out

By William Drozdiak

ROTTERDAM, Dec. 30 (WP).—For centuries the Netherlands has studded its coastline with dikes that keep North Sea waters out, but now the Dutch government, following a debate about the ecological dangers of such levees, has decided to build one that lets the sea in.

A unique flow-through dike will be erected across the five-mile-wide Oosterschelde, the last open estuary of the Rhine River delta.

Earlier this year, fishermen and ecologists forced a halt in work on a closed dike there. Blocking the inlet, they said, would turn a pristine bay into a stagnant lake and disrupt the tidal flows that nourish the region's thriving oyster and mussel beds.

The compromise choice of an "open" dike fulfills a 20-year national commitment to provide full security against the sea, a vow born in the wake of the worst flood in Dutch history. It also resolves a bitter political debate that threatened to split the governing center-left coalition.

In February, 1953, a surging North Sea storm breached the low dikes around the Oosterschelde, taking the lives of 1,800 people and leaving 70,000 homeless. Damage was estimated at nearly a billion dollars, leading the Dutch parliament to approve in 1957 a bill calling for complete coastal protection against floods.

But as dikes rose in Holland over the last two decades, so did fears about pollution from the brackish Rhine River.

The conflict pitting flood protection against clean water reached a climax when the government proposed to close the Oosterschelde, the sole remaining gap in the wall of dikes ringing the Dutch coast.

Tractors and cranes had already started filling in the inlet last spring when the government relented under growing public pressure to find an alternative.

At a projected cost of $2 billion, twice that of a closed dike, it opted for a flexible, open dike that permits the entry of fresh sea water but closes tight in case of storms.

The flow-through dike will have 80 doors, each 120 feet wide, that will allow sufficient tidal sway for fresh sea waters to bathe the oyster beds and soiled inland waters to reach the open sea.

New Beginning: Foreign Policy

Jimmy Carter will inherit a world situation not free of crisis but one that is not likely to demand immediate agonizing decisions—no burgeoning Vietnam war, no ongoing Bay of Pigs invasion scheme, no Berlin blockade. Intractable problems fester on several continents and some will demand action by the United States: but with luck, Carter will have time to play himself gradually into his self-appointed role as "the spokesman for the nation in the area of foreign affairs."

Successful foreign policy begins at home and the President-elect has often demonstrated that he is aware of this. His choice of Cyrus Vance to be secretary of state surely means an end to "Lone Ranger" diplomacy and the restoration of collectivity to the shaping of this country's actions abroad. This means again utilizing to the fullest the expertise and energies of the State Department and foreign service, which atrophied under Secretary Kissinger.

As Carter has emphasized, it also means presidential vigilance to insure better cooperation and coordination from those executive departments—Agriculture, Commerce, Treasury, even Justice—whose actions often affect the State Department's administration of foreign policy. It also means the rebuilding of a vital partnership with the Congress and regaining, through greater openness and candor, the confidence and support of the American people for foreign policy initiatives.

Barring some unanticipated explosion, Carter and Vance will have time to rebuild a structured, collective responsibility for foreign policy, drawing on all available expertise and talent. Nothing they could do in their first weeks of office would be more likely to pay long-run dividends for stability, world order and effective crisis management, should it become necessary.

Given his own evident passion for halting the arms race and the well-timed appeal from Leonid Brezhnev for restarting the Strategic Arms Limitation Talks, Carter may be tempted by the prospect of an early meeting with the Soviet leader. And given the improving climate for Middle East negotiations, coupled with the undoubted fact that time for a settlement there is slowly running out, the new President will understandably give urgent attention to that most dangerous of all world problems. In this vital area, which Secretary Kissinger through the most painstaking and skillful negotiations has led nearer to peace than it has been in years, Carter should lose no time in building on these foundations.

In nearly all of his statements on foreign policy, Carter emphasized priority for rejuvenating this country's major alliances—for perfecting "a partnership between North America, Western Europe and Japan," as he said at the Foreign Policy Association in New York last June.

It is a wise priority. President Ford and Kissinger have mended fences with the NATO partners and Japan since inter-allied relationships sank to a dangerous low in a miasma of distrust and backbiting after the Arab-Israeli war of 1973. But the processes of consultation could still be greatly refined with "continuing contacts at all levels," as Carter has said. And as he also recognized, "to the maximum extent possible," American dealings with the Communist powers "should reflect the combined view of the democracies, and thereby avoid suspicions by our allies that we may be disregarding their interests."

Closest possible cooperation with the European allies and Japan is essential in order to avoid serious economic difficulties with the European Community, improve the conditions of international trade, cope with such common problems as inflation and energy shortages, and fashion a more constructive response to the increasingly strident demands of the poorer nations for a greater share of the world's bounty.

In Asia, free of the terrible burden of the Vietnam war, and with relations with Japan on the upgrade, the Carter administration ought to be able gradually to make contact with the new regimes of Indochina, expand relations with China without sacrificing the independence of Taiwan, and strive for healthier, less-dependent relationships with South Korea and the Philippines.

In Africa, the administration must persevere with the praiseworthy but very belated effort of its predecessor to help bring a peaceful transition to majority rule in Rhodesia and the transfer of control from South Africa to a majority government in Namibia, elected under United Nations supervision.

In this hemisphere, there is one clear priority. It is certain to become urgent, even critical, during 1977. It is a new treaty that will insure unrestricted access to the Panama Canal and a United States share in its defense while conferring sovereignty over the Canal Zone itself to the Republic of Panama.

This will require Carter to recast some of his campaign statements on this emotive issue. But without a new treaty that will remove a symbol—odious in all of Latin America—of an outdated colonial relationship, the administration cannot hope to have an effective policy for the Americas.

THE NEW YORK TIMES.

International Opinion

U.S.-Soviet Relations

Mixed feelings must greet Mr. Carter's announcement that he wants to meet Mr. Brezhnev before next September in order to "lay the groundwork for much more drastic reductions in common nuclear capabilities" . . . American presidents since Eisenhower have hoped that by getting together with the leader of the Soviet Union they could bring order, safety and financial savings into their relationship. All who met the Soviet leader were disappointed. Will Mr. Carter be luckier or cleverer?

This is not to suggest that he should give up trying. The questions are about means, not ends. The control of nuclear weaponry has become an extraordinarily complicated and difficult problem even less susceptible than before to high-level intervention by politicians. There is no single Gordian knot tied by bureaucrats which can be cut by a powerful president. Nor is there on this issue any fundamental misunderstanding with the Soviet Union of a type that can be overcome only by a top-level meeting.

—From the Times (London).

Britain and South Africa

We in Britain have a very special responsibility for what is happening in Cape Town's black African townships. For the racist regime draws its strength from the economic support provided by British big business investments, which at £3,000 million ($5.1 billion) account for over half of all foreign investment.

economic support provided by British big

New British investments averaged £40 million a year from 1964 to 1968; £61.5 million a year from 1969 to 1973, and in 1974 they shot up to £179.8 million. South Africa is also heavily dependent on Britain for trade; 29 per cent of its exports go to Britain. With this economic support comes political support. At the United Nations, Britain invariably opposes international action against South Africa. ... The Labor government must be compelled to break these links with apartheid.

—From the Morning Star (London).

Seoul View of U.S. Ties

It is gratifying to learn that Seoul and Washington, as made known by the South Korean government on Dec. 28, have affirmed their traditional friendship will not be affected by the recent troubles. . . . The (three) issues in question might have been magnified by some uncontrollable elements, such as the post-Watergate zeal prevailing in American society to condemn anything immoral or even anything that appears so.

Reports about the case of Tongsun Park seem rather exaggerated or misled in that he was treated as a Seoul government agent. A more absurd case is the report of U.S. intelligence bugging of President Park Chung Hee's office.

It is not imaginable that the United States, which is prouder of its greater respect for morality than any other democracy, would ever resort to such an act. In this sense, it is fortunate the denial of such reports by responsible American authorities serves to clear the doubts.

The case involving a counselor at the Korean Embassy in Washington, named Kim Sang-Keun [who has sought asylum in the United States] can be also settled in a mutually agreeable way if Washington follows international practice.

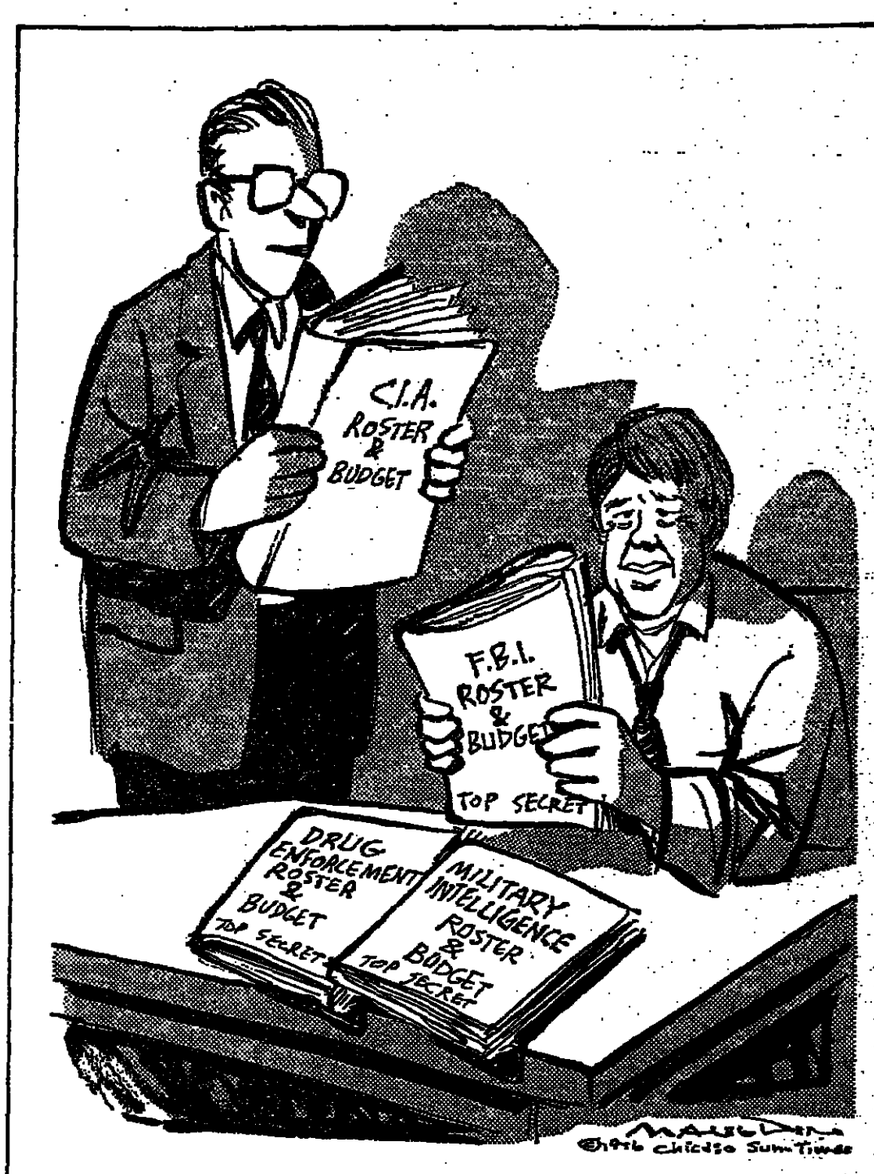
The lesson from the recent trouble is that the two countries have little to gain by making a fuss any further about the incidents .... Such a dissonance will only satisfy our common adversary who has already launched a campaign to drive a wedge between Seoul and Washington.

As an old Korean saying goes, we can seldom afford to burn our house to kill a few bugs ...

—From the Korea Herald (Seoul).

In the International Edition

Seventy-Five Years Ago



December 31, 1901

LONDON—The New Year is expected to be welcomed in the usual way tonight with the customary drunken scenes and the breaking of bottles around the historical cathedral of St. Paul's. In the West End, on the other hand, the restaurants are expected to be crowded with cheerful New Year supper parties. The Carlton, the Savoy and Prince's have every table engaged.

Fifty Years Ago

December 31, 1926

PARIS—The close of the year 1926 brings France out of one of her most critical and eventful periods since the proclamation of the Third Republic. In the first half of the year it appeared that national bankruptcy was inevitable, but the second half saw the recovery of the Franc and the balance of the Budget. Mr. Raymond Poincaré's government is to be congratulated.

'Looks as if Our Crawling Army Is Bigger Than Our Standing Army.'

Griffin Bell's Record

By Anthony Lewis

BOSTON.—In 1966, the Georgia House of Representatives refused to seat Julian Bond, a newly elected black member. The reason was his endorsement of a statement by the Student Nonviolent Coordinating Committee criticizing the war in Vietnam and sympathizing with men who resisted the draft for service there.

Bond sued, claiming a violation of his right to free expression under the First Amendment. He lost in the U.S. District Court. An opinion co-authored by Judge Griffin Bell said: "The SNCC statement is at war with the national policy of this country—we are committed in Vietnam."

A legislator has less right to free speech than a private citizen, the opinion reasoned, because he takes an oath to support the Constitution. The court said the Georgia House could properly find Bond's endorsement of the SNCC statement inconsistent with the oath, and could exclude him.

Quickly Reversed

That decision was quickly and unanimously reversed by the Supreme Court. Read today, just 10 years later, it seems like something from the dark ages of judicial jingoism during World War I. No one would bother to read such an anachronistic, discredited opinion now—except that it so recently was considered judgment of the man named to be the next attorney general of the United States.

Jimmy Carter says that Griffin Bell is superbly qualified. With most nominees, such a claim would be hard to test. But a man who sits on the bench for 15 years, as Bell did, leaves a record—his opinions in the law reports. I have read a very small part of Judge Bell's large output, but I think enough for a fair impression of his work.

The Bell opinions I have read are singularly opaque. They show none of the intellectual command, the marshaling of language that mark a great appellate judge. They ring of no passion for justice. They are unanalytical, almost inarticulate. So far as one can tell, the quality of mind behind them—and you usually can tell a good deal—is second-rate.

Carter, in addition to praising Judge Bell's intellectual qualifications, has implied that he was a judicial leader in bringing the South into a new age on race relations. The record is otherwise.

Center of Battle

The United States Court of Appeals for the Fifth Circuit, on which Judge Bell sat, was at the center of the struggle over segregation in the South. But other judges led the fight for compliance with the Constitution. They are among our great contemporary judicial heroes, and their names are no secret: Among them Richard T. Rives, Elbert P. Tuttle and John Minor Wisdom.

Griffin Bell often disagreed with Judges Rives, Tuttle and Wisdom on racial questions. As the Supreme Court spelled out the law, closing more and more loopholes, Judge Bell wrote opinions complying in narrow terms. He by no means defied the law in the name of segregation, but it is a travesty to class him with his legendary colleagues on the Fifth Circuit.

Those impressions of Griffin Bell as a judge were checked with people who know the man and his work intimately. The unhappy but unavoidable conclusion is that he is an undistinguished legal thinker, conservative in instinct with no demonstrated breadth of moral or philosophical outlook.

Much of the criticism has focused mistakenly on Griffin Bell's personal friendship with Jimmy Carter. A president must have confidence in his attorney general, and friendship need not be disabling. The real question is whether the friend has the needed qualities of mind and heart. Herbert Brownell jr. had the credentials on paper when President Eisenhower named him, but he turned out to be an opportunist. Robert Kennedy had few on paper, but he had an open mind and a compassion that made him a humane influence on his brother.

Griffin Bell has a reputation as a skilled negotiator. The chances are that he will be a better attorney general than some. He is not likely to sink to the corrupt level of, say, Richard Kleindienst or John Mitchell. But will he have the independence and the moral conviction and the intellectual self-confidence to resist pressure from the intelligence agencies as Edward Levi has? Or to bear the other necessary burdens? The record is not encouraging.

An attorney general of unassailable quality is more central in this country now than in the past. After Watergate, we need a reaffirmation of law—law in its moral and human dimensions, not as a mere instrument of power. And Jimmy Carter promised just that.

Asked about the criticism of Griffin Bell, Carter said the other day that it seemed to come from disappointed backers of other possible nominees. That nasty crack reflects only on the President-elect. There are dozens of lawyers in this country better qualified to be attorney general than Griffin Bell—and better for the real interests of Jimmy Carter.

Carter's Defense Cuts: Will-o'-the-Wispish

By Rowland Evans and Robert Novak

ST. SIMONS ISLAND, Ga.—Two years of seeming to promise an unattainable lowering of defense spending caught up with Jimmy Carter here at precisely the wrong moment, just as he and his prospective Cabinet were stressing the desperate need to establish credibility with the public.

Ten minutes before Carter's Cabinet convened for a pre-inaugural session at this coastal resort, Secretary of Defense-designate Harold Brown told newsmen in a hotel lobby the immutable truth: Net *defense* spending under President Carter will rise, not fall—perhaps even beyond inflationary increases.

This was followed by a 6 1/2-hour Cabinet session where little was said about defense spending but heavy emphasis was put on the necessity of fulfilling campaign promises to combat rampant public cynicism. So, when Brown's comments were learned, Carter staffers claimed the President-elect had never promised a smaller defense budget.

But the record is abundant with Carter's repeated calls to cut defense spending by $5 billion to $7 billion. Some, though not all, of his statements contain semantical escape hatches. Nevertheless, average voters could reasonably conclude only that Carter was promising less, not more, spending at the Pentagon.

Self-Damaging

Actually, reduced defense spending was not a major Carter campaign issue and was seldom mentioned after his nomination. The President-elect has had excellent opportunities since the election to acknowledge, as Brown did here, the realities of defense requirements. Instead, he doggedly repeated the $5-7 billion cut, revealing a stubborn streak which in this case was self-damaging.

To reassure the Democratic party's powerful left wing early in his campaign, Carter urged defense spending reductions without explaining how they would be made—once mentioning $15 billion but later settling on the $5-7 billion range. Although his written testimony to the Democratic Platform Committee proposed an *annual* $5-7 billion reduction, neither he nor his staff had any idea then where the cuts would be made.

After his nomination, Carter talked once or twice about administrative Pentagon reforms suggested to him by the Brookings Institution, all of which could not possibly yield $5 billion in gross cuts, much less a $5-billion net reduction in the defense budget. Between Labor Day and Election Day, we find no record of Carter repeating the $5-7 billion figure.

Accordingly, the stage was set for the President-elect to let that $5-7 billion cut quietly slip from memory, as John F. Kennedy's "missile gap" did in 1961—a much easier task for Carter since defense spending was a far less prominent campaign issue for him. But Carter passed up the opportunity.

Sticks With It

Asked by Walter Cronkite on CBS on Nov. 29 whether he had learned anything to shake his view of "lots of fat" in defense, Carter replied: "No, no. I think my opinions have been corroborated." While adding, "I have not had a chance since I've been elected" to study the military, he stuck by "a 5-per-cent reduction in the military budget—$5.6 billion of the current budget, $61 billion in next year's."

On Dec. 20, when Brown was named secretary of defense, Carter was asked whether he still planned that $5-7 billion cut. "Yes," the President-elect replied, "we'll start immediately." He did not point out that a net defense reduction would be possible only through massive manpower cuts which nobody even contemplates.

These hard realities were suggested by Brown in a Los Angeles Times interview published Dec. 27, prompting questioning of him by reporters here the next day. Brown told them spending will rise next year over the current fiscal year's $113 billion, perhaps exceeding inflationary increases, and added he was not sure that even a gross reduction of $5-7 billion in savings could be accomplished. Beyond what Brown said, it may be impossible to reduce President Ford's $112-billion Pentagon budget for next year.

This problem was not discussed seriously as the Cabinet meeting here agreed on the necessity to keep faith with the public. Accordingly, press secretary Jody Powell vigorously denied that Carter had ever promised an absolute reduction in defense spending.

But emerging from dinner with his Cabinet that night, the President-elect still would not publicly acknowledge that unattainable defense budget. While declaring "we'll spend whatever is necessary to defend our country," he again invoked that magic $5-7 billion defense cut without adding that this would not lower overall defense spending. Anxious, though he is to restore governmental credibility, Jimmy Carter showed stubborn reluctance to be seen moving away from a campaign pledge even when that is indeed the case.

A Philosophy of the Center

By C. L. Sulzberger

PARIS.—While, at present, French politics are being increasingly polarized between right and left, with the leftwing Socialist-Communist coalition attaining a lead in opinion polls, there is no doubt in the mind of President Giscard d'Estaing, symbol of centralism, that regardless of possible changes in the parliamentary majority he will remain in office until 1981, the end of his designated term as chief of state.

Giscard's position in French political esteem has declined during recent months and the left *alliance has gained. At the same* time, Jacques Chirac, until recently Giscard's ally and prime minister, chief of the Gaullist faction, has formed a new group known as the Rally for the Republic which has shown a resurgence of relatively rightwing opinion.

Thus, either the left or the right seems likely to dominate the National Assembly following scheduled legislative elections in 1978. This probability has led to speculation as to whether Giscard would be ready to remain as chief of state with a parliament dominated by an antipathetic majority.

The answer is yes—definitively. The President considers his constitutional role is to complete his designated seven-year term. He came to office in 1974. The Fifth Republic, created by De Gaulle in 1958, has until now never seen a chief of state who was not supported by a parliamentary majority.

Giscard is a subtle, intellectual man who believes style is the aesthetic of action. He reckons there has always been too wide a psychological gulf between the central power and the masses. He has sought to bridge this gap by various means but acknowledges he has not wholly succeeded.

France, after all, has a long tradition of prestigious central authority that is difficult to chip away. Giscard has been trying by his own "style" of presidential life—and without marked success—to erase such ideas by acting on a different basis with ordinary people.

His approach is basically intellectual and a search for psychological balance rather than personal popularity. Giscard does not regard popularity as an essential political trump. For him, everything depends on the period during which a government and its leader function. At present, in France, there is a phase of social and economic difficulties which requires measures that by necessity are unpopular.

Yet, he reckons, the individualistic French people prefer success to popularity and the test of his approach will come in 1978, during the scheduled legislative elections, when the people can judge whether the course of his leadership has achieved its announced purposes.

Ideologically he regards himself as a kind of mixed-up centrist, center-right in terms of national customs and family life; center-left in terms of economic, social and educational affairs. He acknowledges it may take a considerable time for the French people, not always accustomed to self-discipline, to habituate themselves to voluntary restrictions and reforms.

France is currently being subjected to exceptionally strong criminal pulls, as between right and left, have stopped but the President evidently hopes this tendency will disappear during 1977 and that centrist leadership will be reaffirmed. His assumption is that economic circumstances will improve with the first signs visible in about six months.

Politically, Giscard admits having been much influenced by De Gaulle although at the ending of the general's regime he publicly expressed reservations. He acknowledges strong allegiance to such earlier republicans as Pierre Waldeck-Rousseau, prime minister at the turn of the century, and Raymond Poincaré, president during World War I.

Finally, Giscard stresses his philosophical indebtedness to the great nineteenth-century political philosopher and analyst, Alexis de Tocqueville, who wrote beautifully and was a friend—that is how I feel about him."

Tocqueville, over a century and a half ago, was prophetically concerned with the looming eminence of America and Russia. Giscard, his posthumous pupil, like most of his countrymen focuses much more on his troubled country, France. He thinks it can successfully be led from the center. Within the next four years we shall see if he is right.

Letters

Real Pests

Those high-powered Americans who try to do England's thinking are talking through their hats and turning into real pests. They do a lot of boring sermonizing about "production" and "growth" and what the English should do about them, but they ignore the character of the English. England is not a country of pushy, ostentatious, noisy showoffs who try to outdo their neighbors. They take their time and enjoy life. It is an existence that has never strayed very far from the first principles of civilization. They like simplicity, good taste, basic qualities, and the lovely physical character of their country.

Automobile production is righteously invoked in trying to make the English feel guilty. Other countries make more cars per worker/hour than England does. So what? For years Detroit carmakers have been hustling over here trying to tame the English workers. Well, the Detroit carworker is a mindless, cowed robot, and Detroit is a vicious wasteland that was jerry-built in the first place. The English carworker is a sensitive, self-respecting person who reads books and isn't afraid of the boss. In an English factory the boss is expected to keep a low profile and not make a nuisance of himself. If he forgets that, the workers walk out and stay out until he decides to behave himself. Confronted with that arrangement Americans who have bought their way in over here get enraged, but that's their problem.

England's pious, gratuitous critics forget that the English invented the industrial revolution without consulting America, and if they decide to phase it out for something finer and less soul-destroying, they won't need America's permission to do it.

WILLIAM REIMBOLD.
Teddington, England.

Taiwan

Taiwan was ceded to Japan in 1895 under the Treaty of Shimonoseki after China was defeated by Japan in the first Sino-Japanese War.

In October of 1945, Taiwan was returned to China under the Cairo Declaration of Dec. 3, 1943, signed by Generalissimo Chiang Kai-shek, President Franklin D. Roosevelt and Prime Minister Winston Churchill, after Japan was defeated by the Allied forces in World War II.

At the time when Taiwan was returned to China, Kuomintang still ruled China, it took over the rule of Taiwan in lieu of international treaty. F. R. Canning's letter (IHT, Dec. 1) saying Kuomintang forces invaded and occupied Taiwan after they were driven out of China misrepresented historical facts.

PARIS: A Theatrical Look at Playwright Adamov

By Thomas Quinn Curtiss

PARIS, Dec. 30 (IHT).—"A.A., Théâtres d'Arthur Adamov" (at the Palais de Chaillot) is a three-hour spectacle, organized and staged by Roger Planchon of the Théâtre National Populaire in Villeurbanne. It is devoted to the life and works of the late dramatist.

Adamov had a split personality. Constantly at war with himself, he committed suicide in 1970.

Born in 1908 in the Crimea, he was the son of an Armenian oilman. He left his homeland at the age of four and was educated in Germany and Switzerland. The Planchon dramatization pictures his hometown, Kislovodsk, on the eve of the Bolshevik revolution—his family's holdings were eventually confiscated. It is romantically suggested that he—hating his father and his bourgeois ways—intended joining the revolutionaries—but he was only 9 in 1917. Ten years later, perhaps in another fit of self-depreciation, he became a Communist.

Arthur Adamov whose life and works are the subject of Roger Planchon's latest production.

At 16

At 16, in 1924, he came to Paris, intrigued by surrealism. He contributed poetry to surrealist magazines and made the acquaintance of its leaders. He edited an avant-garde periodical and frequented the bohemian cafés of the Left Bank, holding court in his favorite haunt as his reputation grew. In an autobiography he has left, "L'Aveu," he recorded his soul's torment in Dostoevskian fashion, confessing his need for humiliation at the hands of the lowest prostitutes, the flagellants of the St. Denis district, and his incapacity to complete the sexual act.

After World War II he began to write for the stage and was soon one of the foremost playwrights of the absurd. Among his memorable plays of this phase are "La Parodie," "La Grande et la Petite Manoeuvre" and "Ping-Pong." A polyglot, he also translated into French Büchner, Gorki, Rilke, Dostoevski, Strindberg, Gogol (an admirable adaptation of "Dead Souls") and, significantly, Jung, an expert on his translator's neurosis.

It would have been enlightening to have Freud's diagnosis of Adamov's rejection of his "absurd" plays, his conversion to militant Communism, his sudden compulsion to serve the cause by confecting political melodramas and his suicide. Planchon in his dramatization treats these complex matters simply and sentimentally with Adamov belatedly wooed by the revolutionaries of the red-bannered train he had failed to board in 1917.

The evening begins in the lobby of the Chaillot palace where on platforms and runways about the hall snatches from Adamov's earlier plays are sketchily performed, together with the voicing of the notion that the postwar Parisian theater was ruled by the boulevard. Certainly, this is an erroneous "reconstruction." The late 1940s and the 1950s saw the emergence of Sartre, Beckett, Genet, Ionesco, Adamov, Audiberti: the Barrault premieres of Claudel; the last play of Gide; Montherlant's "Port-Royal"; Gérard Philipe in "Le Cid" and "The Prince of Homburg."

Indeed, in retrospect it appears a golden era of intellectual theatrical activity. The excerpts from Adamov are interrupted by Laurent Terzieff impersonating the author and the audience is ushered into the main auditorium to view the biography.

Here unfolds a lengthy session—with Terzieff delivering an absorbing characterization of Adamov as drawn by Planchon—in which we have scenes of the author's Crimean childhood, the tug-of-war of family obligations, his unhappy introduction to love, his harsh schooling, his agony as the spirit and the flesh battle and the tardy awakening of his social conscience.

Frank in Exposé

Frank in its exposé of the protagonist's sexual mania, the portrait, not without its grotesque touches, is sketched without an inkling of overt irony, though the spectacle of an obsessed masochist's conversion to militant Communism has a sardonic flavor.

In the gloomy, brooding twilight of his life, Adamov wrote a play on the Paris Commune, "Le Printemps '71," an interesting but somehow unsatisfactory "epic" piece. It is curious how this inviting subject has evaded proper dramatization. The Norwegian Nordahl Grieg attempted it in "The Defeat" which Brecht sought to revise with meager results. Lucien Descaves and Nozière having managed it relatively better in "La Saignée" with its echoes of the Terrible Year.

The performance of "A.A." is uneven. Some sequences are crude and shrill in interpretation; some are adroitly executed, while Terzieff with personal magnetism succeeds in uniting the traffic of the sprawling script and keeping audience attention from wandering.

Archbishop's Silver

LONDON, Dec. 30 (AP).—Cutlery and silver worth £800 ($1,360) was stolen in a Christmas raid at Lambeth Palace, the London residence of the archbishop of Canterbury, Donald Coggan, police said today. The archbishop was at Canterbury at the time.

Opposition Head in Turkey Urges Lockheed Probe

ANKARA, Dec. 30 (AP).—Bulent Ecevit, Turkey's opposition leader and former premier, called on the government today to bring to light allegations about Lockheed payoffs in Turkey.

"In Turkey time is being lost with arguments over the method of investigations, and there is no sign yet that a negative or positive conclusion can be reached on the subject," Mr. Ecevit stated at a news conference.

His statement was made in answer to Premier Suleyman Demirel, who asserted yesterday that his government had no cause to attempt a coverup of the Lockheed affair.

Mr. Demirel pointed out that F-104-S military jets, manufactured in Italy under Lockheed license, were purchased by Turkey in 1974, during the premiership of Mr. Ecevit.

Mr. Ecevit replied that Mr. Demirel was trying to restrict the scope of the affair, dwelling only on the purchase of F-104-S jets, although Turkey had dealings with the U.S. aircraft corporation since 1966.

Old-Time Religion Still Barred

Dervishes Whirling Again In Turkey—for Tourists Only

By Steven V. Roberts

KONYA, Turkey, Dec. 30 (NYT).—The pilgrims shuffle slowly into the green-domed mausoleum, the mud of their fields still clinging to their plastic shoes. When they reach the sarcophagus, they raise their hands chest high, palms up, and begin to murmur the old prayers. Some try to kneel on the brightly patterned prayer rugs, but the guard usually stops them. Officially, the building is now a museum, and devotion cannot be too obvious.

The sarcophagus contains the remains of Mevlana Celaleddin Rumi, one of Turkey's greatest poets and mystics, who died here 703 years ago this month. The steady procession of pilgrims to his tomb symbolizes one of Turkey's greatest problems.

After Mevlana's death, his followers formed a religious sect and called themselves "Mevlevis." Westerners knew them as the Whirling Dervishes, after the trancelike dance they performed as part of their weekly ritual.

Blocking Modernization

Dervish means beggar in Turkish and there were more than a dozen such sects under the Ottoman Empire. When Kemal Ataturk created the Turkish Republic after World War I, he felt that Islamic doctrines and leaders were blocking the country's modernization. Accordingly, he abolished all dervish orders, including the Mevlevis, and closed all their centers, or tekkes.

But more than 50 years after the Ataturk reforms, the spark of Islamic fervor still glows in the hearts of many Turks.

"Religion is a human fact in every country. Even in Russia, religion has not been suppressed," said Ibraham Cubukcu, professor of theology at Ankara University. "In a democratic country like Turkey, the dervish orders were bound to continue."

To other Turks, these religious impulses pose a dangerous threat to progress. "You have to be a Turk to understand our struggle against the religious people," said a journalist. "No one has the right to leave the next generation a dark Turkey."

Religious Laws

The Koran, the Moslem holy book, prescribes a whole set of laws that the religionists want to reimpose on Turkish life, the journalist noted. In 1973, a religious-oriented party won enough seats in parliament to hold the balance of power and is now a member of the governing coalition.

Konya has been a wellspring of culture and ideas since Neolithic times and by the 13th century it was the capital of the Seljuks, the Turkish tribesmen that first stormed out of Central Asia and settled in the West.

Mevlana was born in Balkh, a city that is now in northern Afghanistan. His father, a noted philosopher, moved the family westward to escape the Mongol invasions and settled here under the patronage of the Seljuk ruler.

Music and Dance

The Turks were still new converts to Islam and Mevlana's work drew heavily on the Asian and shamanistic heritage of his people. He introduced music and dance into the ritual, practices that were banned in the austere world of Arabic Islam. His poetry had an unusually tolerant and humanistic flavor, as exemplified by a famous verse, the favorite of the local tourist office: "Come, come again, whoever, whatever you may be, come."

Many dervish orders were more warlike and less open-minded, however, and Ataturk considered them to be sources of division and reaction.

"For a period, we stopped our religious way of living," said Adil Gucuyener, publisher of the daily Yeni Konya. "But it came to a point where we understood it was a loss for us. We started to get back and learn about our God and our religion."

In 1954, Konya received special permission to revive the dance of the Whirling Dervishes for two weeks every year. One of the last genuine dervishes left is Ahmet Bican Kasaboglu, who serves as dance master for the troupe here.

Officially, the dance is now performed strictly for the tourists. But part of the original spirit clearly remains.

Entertainment In New York

NEW YORK, Dec. 30 (IHT).—This is how critics for The New York Times rate new films:

"Mikey and Nicky," Elaine May's third film, is a melodrama about male friendship "told in such distinctly claustrophobic detail that to watch it is to risk an artificially induced anxiety attack," Vincent Canby says. The script, which is by Miss May, tells of two small-time Los Angeles hoods who have grown up together, joined the same mob. On the day that the film takes place, Nicky (John Cassavetes) summons Mikey (Peter Falk) because he thinks his bosses have put out a contract on his life. The film follows the friends as they wander in aimless desperation around the city. "As we learn eventually, Mikey is, in fact, the finger man. By this time, though," Canby says, "it's too late to retrieve the film" from "busy banality." Still "short portions" come to "vivid life." Several supporting actors "have some good moments," including Ned Beatty and Carol Grace. "What Cassavetes and Falk do, though, exists beyond the fringe of film criticism. They just seem to be carrying on—making elaborate actorish fusses—in front of the camera." Canby says that it "took guts" for Miss May to attempt a film like this. "But she failed."

"In Search of Noah's Ark" is a "leisurely, pedantic but picturesque journey," according to A.H. Weiler, to Mt. Ararat on the Turkish-Soviet border where the ark, according to some, landed. It starts with a dramatization about Noah and his family, encompasses interviews with several scholars, and takes the viewer to assorted Turkish villages and the American Earth Resources Satellite Center. Despite the documentation, Weiler remains skeptical. The points are "arguable." James L. Conway directed.

Pope to Phase Out Jurisdiction Of Some Abbeys

VATICAN CITY, Dec. 30 (UPI.—Pope Paul VI announced yesterday that he is phasing out abbeys of monks with religious jurisdiction over lay people in surrounding areas.

In a Latin-language decree, the Pope said that abbeys played a precious role in preserving civilization and the faith "when the Roman empire collapsed and barbarians swarmed into its provinces," but their role had changed in modern times.

The decree called for the phasing out of abbeys "nullius dioceseos" (of no diocese), which are not dependent on any bishop and whose abbots have a rank similar to that of bishops, with spiritual authority over lay people.

The 1976 Vatican Yearbook lists 21 such abbeys. The papal decree did not call for immediate and full elimination of existing abbeys but ruled that no new ones will be established in the future, "unless this is required by very special reasons for the welfare of souls."

2 Ex-GIs Sentenced In Thai Heroin Case

BANGKOK, Dec. 30 (WP).—A Bangkok criminal court this week sentenced a former U.S. Air Force sergeant to life imprisonment and a former U.S. Army sergeant to 33 years for their role in a multimillion-dollar heroin smuggling ring built around the U.S. military's trans-Pacific transport network.

They were James Smedley, 53, the former Air Force sergeant, who until his arrest in October of last year ran "Jack's American Star Bar" in Bangkok, and Jasper Myrick, 33, the former Army sergeant.

OPERA: *Authenticity and 'Queen of Spades'*

By David Stevens

PARIS, Dec. 30 (IHT).—Opera in concert form is usually a watery substitute for the real thing, but the performance of Tchaikovsky's "The Queen of Spades" last night at the Théâtre des Champs-Elysées under Mstislav Rostropovich offered a lot to make up for the absence of scenery and costumes.

For one thing, it was obviously well-rehearsed. The concert was a spinoff of the recording of the opera that Rostropovich has just made for Deutsche Grammophon with the same soloists, orchestra and choruses—a package similar to the "Tosca" he did last season in Paris.

For another, there was experience and authenticity. Although the work was sung in the original Russian with only one bona fide Russian in the cast, it was nonetheless a cast familiar with the language and able to handle it with security. Nor was there any shortage of authentic Slavic vocal projection, whether by way of Sofia, Vienna or New York.

Galina Vishnevskaya's soprano no longer has the freshness that one might ideally expect in Lisa, but it is still a compelling dramatic instrument that can be thrilling even when effortful or harsh, and it is used with total conviction. Peter Gougalov, the Bulgarian who sang the killing dramatic role of Hermann—whose passion for gambling and for Lisa destroys them both—is a real Slavic tenor, slightly constricted in mid-range but opening up repeatedly in exciting high notes.

Regina Resnik *the Countess.*

The 80-year-old Countess—nicknamed the Queen of Spades—has a much shorter role than the other two principals but, like them, her character is fully drawn in the music. Regina Resnik is not the kind of performer who lets the brevity of her part obscure the fact that it is the title role. She did her long scene of reminiscence, evoking the Countess's youth in 18th-century France while falling slowly asleep, in a way that erased the line between singing and acting. The scene won the biggest ovation of the night.

In this scene, as with some others, there were visual aids for the audience. Resnik semi-acted her role, slumping in a chair between verses of her Grétry air and simulating fright and death when confronted with Hermann. The house lights were darkened for the hallucinatory scene in which Hermann gets his bum steer on the winning cards from the ghost of the Countess. As for Vishnevskaya, acting out what she sings is an irrepressible impulse even on the concert stage.

Finally, there was passionate involvement, emanating mainly from Rostropovich. He is at one with this quintessentially romantic music that in turn responds to his romantic temperament—as it did when he conducted "Eugene Onegin" here, with the Bolshoi seven years ago. For him, the Orchestre National de France played with uncommon vigor and precision, and the Choeurs Tchaikovsky and the French Radio's children's chorus sang with enthusiasm and rhythmic sharpness.

There was some fine singing in the smaller parts, notably from Bernd Weikl, whose glowing lyric baritone was perfect for Prince Yeletsky; Hanna Schwarz, a rich contralto Pauline; Lucia Popp, the bright-voiced Chloe of the pastoral in Act II, and Dan Iordachescu, the bluff Tomsky.

Dutch Painting Stolen

THE HAGUE, Dec. 30 (AP).—When Dutch Justice Ministry officials returned to work after Christmas, they discovered that thieves had robbed the ministry of a painting valued at 200,000 guilders (about $80,000). The work, a small landscape painted in 1830 by Dutch master Andreas Schelfhout, was cut out of its frame.

Soviet Dissidence, Repression In the Rise in Recent Months

By David K. Shipler

MOSCOW, Dec. 30 (NYT).—Dissident activity appears to have been in recent months, bringing a series of government countermeasures. Jews trying to emigrate have staged demonstrations and attempted to hold a symposium on Jewish culture. Activists struggling for human rights have formed committees to collect information and disseminate regular documents on oppression. Three religious dissidents yesterday announced the formation of a committee to defend the rights of churchgoers, who, they said, were being persecuted by the state.

Authorities have responded with arrests, interrogations, arrests and threats of criminal punishment. They have stopped short of handing out prison sentences during this period, but have tried to create the impression that cases are being prepared that could result in long imprisonment or internal exile.

The increased maneuvering on both sides seems more episodic than a result of any shift in government policy or any new ferment among the population. For part, the recent activity reflects improved communication among the various factions of dissent, which find common ground in the human rights provisions of the final act of the European Security Conference, signed by 35 heads of state at Helsinki last year.

Dissident Committees

In May, nine dissidents formed a group to monitor Soviet compliance with the Helsinki document. That committee, including Andrei Sakharov, the wife of Andrei Sakharov, the Nobel Peace Prize winner, recently spawned seven other committees with the same purpose—one in Kiev, the other in Vilnius.

Several members of the Kiev committee have come under harassment, according to Yuri Orlov, a physicist who heads the Moscow group. On Christmas Eve, the KGB searched their homes, and came up with "evidence" which they said had been planted: pornographic cards, vodka and 36 U.S. dollars, possession of which is illegal for Soviet citizens. The Kiev group's chairman, poet Mikola Rudenko, also found a death threat in his mailbox.

In October, a dozen Jewish dissidents said they were taken by policemen to some woods outside Moscow and beaten after they staged a sit-in at a government building. The beatings simply widened the protest, in which some 30 demonstrators were held for up to 15 days. Two of them, tried under the criminal code and subject to five years' imprisonment, were ultimately released.

Cultural Symposium

When another group of Jews attempted a symposium for last May to discuss Jewish culture, officials searched the organizers' apartments, confiscating a wide range of Jewish materials. They picked up some would-be participants from other cities and sent them home. In Leningrad, Riga, Kiev, Kishinev and elsewhere they barred dissidents from leaving for Moscow. They denied visas to Americans who had been invited.

The day of the symposium, authorities took the organizers into custody and held them and many others under house arrest for most of the week. They conducted an unusually long 18-hour search at the home of Vladimir Slepak, a well-known electronics engineer who received a telegram of support from Jimmy Carter before the election. About 220 items were confiscated, according to Anatoly Shcharansky, a Jewish activist and friend of Mr. Slepak. The police pressure was accompanied by an article in the government newspaper Isvestia assailing Jewish cultural interest, calling it propaganda of national exclusiveness.

What are the authorities afraid of? "They are afraid of the grave consequences for them if a revival of Jewish culture really starts taking place in this country," Mr. Shcharansky remarked. "They can control what people do, but they can't control what happens in the minds of those people."

J. Thannhauser Dies at 84; Was Noted Art Dealer

GSTAAD, Switzerland, Dec. 30 (AP).—Justin Thannhauser, 84, a German-born U.S. art dealer whose landmark exhibitions spread the fame of modern masters like Pablo Picasso, Edvard Munch and Paul Klee, has died here of a heart attack, a personal friend said today.

Mr. Thannhauser, whose five galleries in Germany, Switzerland, France and the United States handled some of the best works of the greatest 20th-century artists, died last Sunday after suffering a heart attack in his Gstaad hotel room Dec. 24, the friend said.

Mr. Thannhauser turned the Moderne Galerie in Munich, which his father founded in 1904, into a focal point for artists, including the "Blaue Reiter" and "Die Bruecke" group expressionists. He branched out to Lucerne in 1919 and opened Galerie Thannhauser in Berlin in 1927.

During a 1937 Swiss visit, the Jewish dealer's Berlin collection was seized by the Nazis. He reestablished himself in Paris, then fled to New York in 1941 and started from scratch. Among many works he donated to museums, 75 paintings including valuable French impressionist works are now in the Thannhauser wing of New York's Guggenheim Museum.

WAVERLEY ROOT

Fiddleheads or the Consumption of Youth

FERNS are famine food, as any European can tell you. During the French famine of 1709, according to George Blond, "The poor tried to trick their torturing hunger with fern or straw bread." "More than half our population," said the Bishop of Mâcon, "is living on nothing but grass and fern bread."

During World War I, in 1916, when Central Europe ran out of potatoes, the poor made do with what was referred to as spinach, but it contained more fern leaves than anything else. "The rhizomes of the eagle fern," says the Larousse gastronomic encyclopedia, "have been employed in the form of flour in times of famine."

This view of ferns as the last resort of the desperate is hard to reconcile with the opinion of Euell Gibbons that "fern fiddleheads" are "one of the greatest delicacies among wild vegetables." The difference might be explained by a European concentration on that part of the fern which hides in the ground, while Americans think first of the frond which flourishes in the air; or, when Europeans have fern fronds in mind too, by neglect of an element all-important in the case of the fern—the season.

The Bread

The fern bread of times of famine was usually made of flour obtained from the rhizome, seldom esteemed as food. American Indians nevertheless ate the roots of some ferns. In Japan, starch was formerly refined from fern rhizomes in quantities so massive that laws were enacted to protect the plants. Even in finicky France, a country which has never looked upon the fern as food, *Polypodium vulgare* is sometimes called *réglisse sauvage*, wild licorice, because children munch its rhizomes for their pale sugary, almost sickish, licorice flavor.

The "spinach" of World War I was derived of course from the leaves, not the rhizomes; and when Georges Blond reported on the eating of "fern or straw bread," one wonders if he was not referring to a food which utilized the leaves too, for in the case of straw, at least, there could have been no question of utilizing roots. If so, the resulting bread would have been revolting all year around, with the exception of an extremely brief period in the spring: The fiddleheads, which are hailed as a great delicacy in some parts of the United States, are restricted to one of the shortest seasons inflicted on any food offered us by nature—about two weeks.

New Englanders talk ecstatically of the fiddlehead fern, a plant which does not exist. That is why Euell Gibbons was careful to write not "fiddlehead ferns," but "fern fiddleheads," a phrase which may have sounded strange to some of his readers. It was, nevertheless, entirely exact. Though there is no fiddlehead fern, there are many ferns which form fiddleheads, also called crosiers, in both cases because of their shape, which will evoke different images for you depending on whether you happen to be a musician or a bishop.

A fiddlehead is the tightly curled spiral at the top of fern fronds found early in the spring before they unfold into leaves. When you eat fiddleheads, you are not consuming a definite species of food, you are consuming youth; lest this weigh on your conscience it may be pointed out that, in ferns as elsewhere, youth, if not consumed by others, consumes itself. Fern fronds are palatable only in this infant stage: as soon as they open, it is too late. Later in the season the mature leaves are utterly inedible.

In New England

In early New England the merits of fiddleheads were perhaps learned from the Indians, who ate these young shoots as well as the rhizomes. (The Indians of the Pacific Northwest, after salmon had been split open and cleaned, rubbed the flesh before grilling it with sweet ferns, imparting a delicate flavor to the fish.) Ferns must have come as a relief from the monotonous winter diet for the Pilgrims, for fiddleheads were the first fresh vegetables of the year. They discovered quickly that these tender sprouts, snipped from the plants when they were only a few inches high, simmered slowly and laced with butter which melted mouth-wateringly into the steaming strands, had a rich, leafy texture like broccoli and a taste which has often been likened to asparagus (for want of a closer comparison, probably, for ferns have a unique flavor which is not actually very much like asparagus). Fiddleheads have a special affinity for some other foods with which they are regularly served as side dishes during their short season—broiled trout in Vermont, moose in Alaska.

Russians to Translate Tolkien's Trilogy

MOSCOW, Dec. 30 (Reuters).—J. R. R. Tolkien's novel "The Lord of the Rings" will appear in Russian translation in 1977, a Soviet publishing house spokesman said today.

The publication of the trilogy will follow the appearance last month of "The Hobbit." Tolkien, an Englishman, wrote the books between 1936 and 1960. He died in 1973.

SHARPS & FLATS

LONDON—Madeline Bell opens at the Talk of the Town on Jan. 3 for a three-week engagement, as does Salena Jones at Ronnie Scott's. Gladys Knight and the Pips will be at the New Victoria Theatre Jan. 6-8.

* * *

BRUSSELS—The Golden Gate Quartet will be featured at the Centre Culturel Uccle on Jan. 5 at 7 p.m.

* * *

AMSTERDAM — Golden Earring will be the New Year's Day attraction at Jaap Edenhal at 8 p.m.

* * *

PARIS—Dalida opens at the Olympia Jan. 4; Rhoda Scott and Bill Elliott are appearing nightly at the Club St. Germain as is Christian Donnadieu and Michael Silva at the Lady L and the Haricots Rouges at the Club Zed.

THOIRY (20 miles west of Paris)—Jeane Manson will be the feature attraction at the inauguration of the Auberge du Vieux Pressoir on Dec. 31.

* * *

MONTE CARLO—Nicole Croisille will be at the Sporting Club for the Gala des Rois on Jan. 4.

* * *

The Delta Rhythm Boys, starting their tour of Finland, will be in Hyvinkaa at the Hotel Rantasipi from Jan. 4-8.

* * *

"Mississippi," a pop tune sung by the Dutch group Pussycat, emerged as the top single of the year in Britain. Runner-up was "Fernando" by the Swedish group Abba. Third place went to "Don't Go Breaking My Heart" by Elton John and Kiki Dee. American listings for the year have not yet been released.

PARIS, FRIDAY, DECEMBER 31, 1976

lant Outlays ff 8% in U.K. n 9 Months

ecline From 1975 igher Than Forecast

ONDON, Dec. 30 (AP-DJ).— d-quarter capital spending the manufacturing sector was s than originally estimated, government reported today. The Department of Industry announced that there was le change in manufacturers' ventories during the period. Capital spending by the manu- turing industry is now esti- ated to have been £411 million the three months ended Sept. compared with an earlier ovisional estimate of £419 mil- n, the department said. In the cond quarter, capital spending taled £408 million and in the ird quarter of 1975 it was £416 illion.

For the first nine months of is year, capital spending in this ctor fell 8.3 per cent to £1.22 llion from £1.33 billion in the rst nine months of 1975.

Only one industry, metal anufacture, with a rise of 10 r cent, had a higher level of vestment in the first three arters of 1976 than in the year- rlier period. Capital spending the textile, leather and cloth- g sector fell 29 per cent in the rst nine months while invest- ent in the paper, printing and ublishing industries was 21 per nt below year-earlier levels.

Capital spending in the distribu- tive and services industries taled £472 million in the third arter, compared with £474 mil- n in the second quarter and 96 million in the third quarter 1975. For the first nine onths, investment by this group l 5.5 per cent to £1.41 billion on £1.49 billion.

Shipping industry capital in- stment totaled £68 million in e third quarter, compared with 7 million in the second and £90 illion in the third quarter of 75. For the first nine months this year, the industry's capi- l spending plunged 44.3 per nt to £156 million.

The department also said at revised statistics showed nufacturers' inventories had anged little in the third quar- although stocks of materials d fuels rose about £20 million ring the quarter, inventories of k in progress and finished ds declined by £18 million.

etailing concerns increased ventories by £23 million during quarter and wholesalers by million, giving a total increase inventories of about £30 llion.

oth the capital-spending and inventory statistics are sea- ally adjusted and based on 5 prices.

FINANCIAL NEWS AND NOTES

U.S. Steel to Bypass Pittston

U.S. Steel Corp. has decided not to purchase any metallurgical coal in 1977 from Pittston Co. and has opted instead to buy coal on the spot market, where coal is generally selling at about $10 a ton less than the contract price with Pittston. The contract was for metallurgical coal, a major raw material used in steelmaking, and was to expire in January 1979. But apparently during annual price discussions Pittston and U.S. Steel could not agree on prices for 1977 and "U.S. Steel decided to go to the spot market," according to a Pittston spokesman. He says that U.S. Steel's decision not to renew its contract "isn't a material development" in that the contract involves the sale of less than a half million tons of coal. The company annually ships about 15 million tons of coking coal. Pittston also says that U.S. Steel was the only U.S. buyer of its metallurgical coal to cancel its contract in 1977. "Everybody else wants to be assured of a long-term supply of coal," he says. Nevertheless, Wall Street's reaction to the news was sharp, with Pittston's stock down $1.375 Wednesday and another $.50 Thursday.

Renault Sees 'Reasonable' Results

Renault expects to report "reasonable results" for 1976. The state-owned car maker posted a loss of 551.2 million French francs (about $110 million) in 1975. Production this year is expected to be a record 1.66 million units, up 19 per cent over 1975. Domestic sales were up 25.2 per cent over 1975, giving the firm 32.8 per cent of overall new registrations in the country. The company says that the "offensive" of foreign car makers was worrisome—foreign models accounted for about 23 per cent of total new registrations.

British Steel to Raise Prices

British Steel Corp. has notified customers that its prices for stainless and some regular steel products next month will be increased up to 15 per cent, depending on the product concerned. The state-run firm has been warning for some time that higher costs of nickel and chrome imports, due to sterling's weakness, would mean increased prices for its stainless steel products. The maximum increases will be among stainless items, although some of these are to be increased by only 2 per cent, BSC says. Increases for flat stainless products will range 10 to 12 per cent.

Thomson-CSF Sales Up 20%

Turnover at Thomson-CSF, the electronics arm of the Thomson-Brandt group, increased almost 20 per cent in 1976 to about 5 billion francs (about $1 billion). It estimates that consolidated sales rose 17 per cent to around 6.1 billion francs excluding the sales of Le Materiel Téléphonique (LMT), in which it acquired a stake this year. Consolidated turnover including LMT would come to about 7.8 billion francs. The company recently increased its holding in LMT to a majority interest by buying stock from Thomson-Brandt. In exchange, the parent firm acquired Thomson-CSF's 16-per-cent stake in Sté. Française des Téléphones Ericsson—the French unit of L.M. Ericsson of Sweden.

Survey Finds Upsurge in Construction

November Contracts 37% Over 1975 Month

NEW YORK, Dec. 30 (AP-DJ).—November contracts for new construction rose 37 per cent to $7.69 billion from the year earlier's depressed level of $5.62 billion, the F.W. Dodge division of McGraw-Hill Inc. reported today.

"It appears that the recovery of the construction industry is back on the track," George Christie, Dodge's chief economist, said.

Last month's rate of contracting was about the same as October's after adjustment for a couple of big nuclear power plants that inflated that month's figures, he said.

"In terms of the bread-and-butter types of residential, commercial and institutional building that will provide more jobs and stronger demand for building materials in the near future, these past two months reflect a decided improvement since summer," he added.

The Dodge index for November was 186, down from October's record 237 but the same as the 1976 first half average of 186. The index is a seasonally adjusted figure that uses 100 to represent the year 1967.

November contracts for residential building rose 50 per cent to $3.72 billion from the November 1975 level, mainly because of a continuing increase in apartment construction, Mr. Christie said.

Nonresidential building contracts rose 36 per cent to $2.49 billion. The heaviest gains were in commercial and industrial building. Nonbuilding construction contracts increased 13 per cent to $1.48 billion from the year-ago level.

Economic Analysis

Carter Tax Cuts to Total Very Close to $10 Billion

By Eileen Shanahan

WASHINGTON, Dec 30 (NYT).—The long public argument over what ought to go into President-elect Jimmy Carter's plan for stimulating the economy has made the issues appear to be much more a matter of either-or than they actually are in the minds of most of the parties to the dispute. As the discussion has progressed, it has often appeared, quite incorrectly, that the decision that has to be made is between concentrating exclusively, or almost exclusively, on tax reduction or on spending programs that will create jobs.

Mr. Carter himself has contributed to the misunderstanding by seeming to vacillate from advocacy of spending programs to advocacy of tax reduction and back again. His comment Tuesday that tax reduction has only a "second priority" behind "moves to put our people back to work," adds to the confusion.

In fact, everyone involved in shaping the stimulus package believes that a substantial amount of tax reduction will have to be included in the package, unless the economy shows a degree of strength in the next months that is unimaginable now.

The difference of opinion centers on the amount of money that could efficiently and productively be spent on government programs aimed at direct job creation.

The range of opinion on this issue is large. Most of the old-line, liberal Democratic economists, especially those who have served in government and have memories of how long it takes to create jobs through such programs as public works construction, scoff at the notion that more than $5 billion could be spent next year on projects that are both fast-acting and desirable on their own merits. Probably $3 billion would be a better figure, in the view of this group.

At the other end of the range, such economists as Charles Killingsworth of Michigan State University are advocating expenditures of $8 billion, including $5 billion for jobs on public payrolls (public service employment), $2 billion for public works and $1 billion for job-training programs for the disadvantaged.

They argue that such expenditures not only create jobs immediately, as opposed to the slowed effects of a tax cut, but also create more jobs per dollar than tax reduction.

This argument is heatedly disputed by the advocates of tax cuts, but the point is that even if an $8-billion spending program was adopted there would still be a need for some tax reduction as a part of the stimulus package. That is so because almost no one in or near the Carter circle can foresee a situation in which a stimulus package of less than $12 billion or $13 billion would be perceived as necessary.

Despite recent improvements in the economic statistics, a stimulus package of at least $15 billion is being discussed more often than anything smaller.

If, as he indicated Tuesday, Mr. Carter decides first on how large the direct job-creating expenditures should be and then allocates whatever additional stimulus seems needed to tax reduction, that would appear to leave something in the neighborhood of $10 billion for tax cuts.

Dow Probes 1,000-Mark, Falls Back

But Modest Gain Set In Heavier Trading

NEW YORK, Dec. 30 (IHT).—Prices on the New York Stock Exchange closed broadly higher on active trading today, although the advance lost some ground late in the day on renewed profit taking.

The Dow Jones industrial average closed up 4.16 at 999.09. The index was up around six points at one point and at 3 p.m. was ahead 5.40 points.

Volume totaled 23.7 million shares, up from yesterday's 21.9 million shares.

The market shook off some early profit taking and headed higher following more news that the U.S. economy may be gaining strength: construction contracts rose sharply last month and retail sales were up 8 per cent from a year ago.

After the market closed, the New York Federal Reserve reported that the narrowly-defined money supply (M-1) rose $700 million to $311.8 billion in the week ended Dec. 22.

The four-week average for M-1 showed a 6.1 per cent rise from the 13 previous weeks.

The broader measure (M-2) also rose $700 million in the week, showing a 12.6 per cent rise, over the four-week average.

Heavily-traded Amerada Hess climbed 2 1/4 to 32. The company could not explain the reason for the activity.

Levitz Furniture, also active, added 1/8 at 6 1/8. IBM rose 3 1/2 to 280, Texas Instruments 1 5/8 to 101 7/8, Procter & Gamble 1 1/2 to 92 5/8, Hewlett-Packard 1 1/8 to 86 1/4, Johnson & Johnson 1 1/8 to 79 1/4, and Cummins Engine 1 1/2 to 48 5/8.

Sears, Roebuck was unchanged at 68 1/2. It said December sales were strong, and ahead of last year's record.

Mobil Oil gained 1 to 64 1/8. Motors generally scored fractional gains.

RCA eased 1/8 to 26 5/8. It announced price reductions on some television sets.

Prices on the American Stock Exchange advanced in active trading. The index rose 0.84 to 108.66.

Flavorland Industries gained 1 3/8 to 6 5/8. It said a merger with Foxley & Co., which owns 85 per cent of Flavorland, is being considered.

Dejur-Amsco "A" rose 1 3/4 to 7 1/4. It said its majority shareholder is seeking liquidation of the company.

Syntex picked up 1/2 at 23, while Houston Oil gained 1 1/8 to 46 1/2.

In Chicago, soybean futures advanced 7 cents a bushel and soybean meal was up $2 a ton, but other commodity futures closed mostly lower.

Market Shut

U.S. commodity markets will be closed on Friday for the New Year holiday. Stock exchanges, however, will remain open and those prices will be carried in Monday's IHT.

A Result of U.S. Tax Reform Act of 1976

Dec. 31: A Key Date for Capital Gains Tax

By Jack Egan

NEW YORK, Dec. 30 (WP).—End-of-the-year stock and bond trading is usually dominated by special considerations, such as selling by individuals to take capital gains or losses for tax purposes, or action by institutional fund managers to shift holdings in order to dress up portfolios for reporting purposes.

But the last trading day tomorrow holds a special significance this year.

As a result of the Tax Reform Act of 1976, a historical price benchmark will be established for all stocks and bonds on Dec. 31, 1976, to calculate how much income tax individuals will pay in the future on securities they inherit which were purchased before this date.

And all of the nation's stock exchanges are staying open for a full trading session on this day before New Year's for that reason.

In addition, other provisions of this year's monumentally complex tax bill have added to the decisions investors have had to make in the waning weeks of 1976.

The minimum holding period to qualify for long-term capital gains changes from six months to nine months on Jan. 1 (It goes to 12 months at the beginning of 1978).

And investors holding stock for more than six months but less than nine months have had to decide whether to sell to take advantage now of the tax code's 50-per-cent exemption on income derived from these long-term gains, or whether to wait into the new year to qualify under the longer time requirement when prices of their holdings will have unpredictably moved up or down.

Beginning in 1977 there will also no longer be a $30,000 exclusion for special tax-preference items, like capital gains income, that are subtracted from the amount of earned income qualifying for the lower maximum federal tax rate of 50 per cent. The maximum tax on investment and other unearned income, by contrast, is 70 per cent.

So many high-income individuals, like doctors, lawyers and high-salaried corporate executives who stand to realize substantial capital gains, have been advised to take accumulated profits on securities holdings up to $30,000 before the new law takes effect.

One of the most important features of the 1976 tax reform bill, however, involves a radical reshuffling of how realized capital gains on inherited assets are determined as part of a major overhaul of the estate and gift tax provisions of the tax code.

And for stocks and bonds and other "marketable securities," their market price on Friday will stand as the "basis" for calculating these capital gains in the future.

Under the old code, someone who held securities or property until death would avoid paying any capital gains taxes on their appreciated value. And after the federal tax was paid on the estate (based on market value at death), the heirs would avoid paying any taxes on the capital gains accumulated by the decedent.

The new law modifies this significantly, using Dec. 31 as a price benchmark.

Until now, someone who inherited securities would only pay a capital gains tax on the difference between the securities' market value the day before the death of the original purchaser, and the price on the day the inheritor finally sold them—or the value six months later, if it was lower.

Under the new law, the price of the stock on Dec. 31 will govern for all marketable securities purchased before that date and sold by an inheritor afterwards.

If XYZ Corp. was bought at $10 per share inherited at $100 but fell to $50 by Dec. 31, future capital gains will be based on this $50 price. If the heir waits until the stock regains its $100 price and then sells sometime in the future, the capital gain will be calculated as the difference between $100 and $50.

If XYZ shares were purchased at $100 but were inherited at $20 per share, and the stock closes at $50 tomorrow, that $50 price again will govern calculations for future capital gains.

This step up in basis to Dec. 31 prices is meant to give a one-time "fresh start" to this whole matter of calculating capital gains on inheritance.

Beginning Jan. 1, 1977, however, the initial purchase price will serve as the capital gains basis for the heirs.

U.S. Seen Safe From Supply Cuts of Major Minerals

By Ann Crittenden

NEW YORK, Dec. 30 (NYT).—An independent study of the international supply situation in seven critical commodities, for which the United States depends heavily on foreign sources, finds optimistically that the likelihood of damage from supply interruptions in all but one—chromite—is small.

This analysis, reached by a team of economists at Charles River Associates Inc. of Cambridge, Mass., contradicts warnings that the country is vulnerable to new Third World commodity cartels, and it flies in the face of a recent government decision to expand official stockpiles of these commodities at tremendous expense.

The new study is perhaps the most comprehensive economic analysis to date on the vulnerability of U.S. industry to existing or potential international cartels, and it considers a wide range of government policies aimed at discouraging such coalitions or mitigating their impact.

The work was done by a group of seven economists for the Experimental Technologies Incentive Program of the National Bureau of Standards in an effort to determine whether there was any economic justification for more government-sponsored research and development in anticipation of possible supply interruptions in several strategically important commodities. Those examined were aluminum-bauxite, chromium, manganese, cobalt, platinum-palladium, copper and petroleum.

According to James Burrows, director of the 18-month project, the impetus for the study came after the oil crisis in 1973, when numerous individuals approached the government to ask for funding of new technologies designed to enable this country to achieve independence in oil and other key commodities.

In general, the group found that there is "very little justification," as Mr. Burrows put it, for such government involvement and expense, primarily because the likelihood of significant supply interruptions is so small.

In the case of oil, for example, the analysis concluded that government "subsidization of synthetic fuels is shown to be a very inefficient policy choice of doubtful feasibility."

The report said: "The seven commodities we looked at are the most critical, because of our high import dependency and the nature of the producing countries. Of these, chromite was the only one where we find that serious damage from cutoffs or price increases is quite possible within the next 10 years."

The main sources of supply for chromite are the Soviet Union, South Africa and Rhodesia. The United States has no domestic source. Substituting for the metal, used as a rustproof coating for stainless steel, is extremely difficult.

Nevertheless, since chromite is currently relatively inexpensive, the study did not recommend costly research into alternatives; instead it advocated the maintenance of stockpiles of approximately one year of domestic consumption. Such a stockpile already exists.

Similarly, the group's basic policy recommendations in the case of the other commodities examined were the maintenance of stockpiles ranging from one month's consumption (in the case of copper, in which imports constitute only 27 per cent of the nation's needs) to about eight months' consumption (in the case of cobalt, two-thirds of which is imported from Zaire).

For all these commodities—except copper and oil—existing reserves are already greater than those recommended.

The Federal Preparedness Agency (FPA) announced plans last October to accumulate even larger supplies of virtually all the minerals and to create a copper stockpile that would also far exceed the Charles River group's analysis of national needs in that commodity. (A separate federal program for building a strategic oil reserve of half a billion barrels, proposed by the Federal Energy Administration, is quite close to the Charles River recommendations for an oil stockpile.)

The FPA's strategic stockpile program involves substantial acquisitions of 72 out of 93 minerals, metals and other industrial materials that have been stockpiled in the past. The total cost of the new purchases, designed to assure a three-year supply of critical materials in the event of a major war, has been put at $6.8 billion.

According to Mr. Burrows, the FPA program would cost the public $4.3 billion more than his group's recommendations on the materials it considered, not counting petroleum.

The difference between the recommendations stems from the fact that, while the economists' stockpile estimates were based on an analysis of the probabilities of supply interruptions and the dislocations they might cause to the normal economy, the FPA's estimates were based on a projection, taken as given, of a three-year conventional war, and the requirements and dislocations that would result. This assumption represents a shift from the previous objective of the strategic stockpile, which was to meet the needs of the nation during the first year of a conventional war.

ndustrialized States Easing ntry of Tropical Products

By Victor Lusinchi

ENEVA, Dec. 30 (NYT).—eloping countries hope to see ir export earnings expand as result of the first concrete ults achieved at the world de talks here.

Taking good an undertaking n by ministers at the formal ning of the talks in Tokyo 973, most of the industrializ- nations are opening their s wider to the tropical prod- of the poorer countries out waiting for the conclu- of the negotiations that is many months away.

he major exception is the ted States, which is waiting ear what it will get in ex- nge for the trade concessions as offered on tropical prod- s.

eanwhile, the Common Mar- Finland, Sweden, New Zea- l and Switzerland will have ducted on or before Jan. 1 ff reductions, tax concessions, ther trade advantages to the orts of coffee, tea, cocoa, es and similar products of developing world.

addition, Austria, Canada Japan will be introducing r concessions on these prod- s over the coming months they complete the legislative other required procedures, ording to the General Agree- t on Tariffs and Trade, the ncy sponsoring the 97-nation t to liberalize the world's merce.

he trade advantages accorded the industrialized countries in series of individual negotia- tions with the underdeveloped lands cover processed and semi-processed items as well as raw products, GATT said.

The agency did not attempt to gauge the benefits that the poorer countries could hope to extract from the new opportunities to reach consumers in the industrialized world. Much will depend on how effective these countries are in marketing their products.

Ministers agreed at Tokyo that tropical products would be treated as a "special and priority sector" at the trade talks because of their importance as a source of export earnings for most developing countries.

It was also agreed that the industrialized nations would not expect from the poorer lands the "reciprocity of commitments" that they demand of each other when swapping trade concessions.

In the spirit of these undertakings, most of the industrialized nations agreed that they would give effect without delay to their concessions on tropical products although they expect something in return in the "final package" that will conclude the negotiations.

Washington, however, rejects the contention of the developing countries that they can not say what they can give in exchange for concessions made to them in any one sector before they can measure the overall benefits they are to derive from the negotiations.

SEC Sues American Hospital Supply on Saudi 'Fees'

ASHINGTON, Dec. 30 (NYT).— he Securities and Exchange mission charged yesterday American Hospital Supply p submitted to Saudi Arabian nands that it pay millions of lars in questionable fees for tracts to equip the ultramod- King Faisal specialist hospital iyadh.

he money, according to an complaint filed here in fed- l district court, was to bene- "persons in charge of the jects," persons in an affected istry of the Saudi govern- t and persons of power and luence" with the government.

In all, some $4.6 million was paid by the company in 1973 through 1975, most of it in consultant fees to a dummy company called Assem Establishment, a Liechtenstein trust, the SEC said.

The contracts resulted in total equipment sales by American Hospital of more than $31 million. The hospital is a Saudi showpiece, perhaps the best medical facility in that part of the world.

The disclosures came in a complaint charging the company with violating securities laws by failing to disclose the transactions in periodic reports to the SEC and to stockholders.

Two weeks ago American Hospital outlined the payments in a filing with the SEC. But it did not identify the country involved or the method of transmitting them.

In conjunction with the formal charges, American Hospital signed a consent decree agreeing to various SEC requests without admitting or denying any of the allegations.

The company agreed, among other things, not to make unlawful payments to obtain business—a provision the SEC has insisted upon in relatively few instances during its long post-Watergate drive against corporate corruption.

According to the complaint, American Hospital learned in mid-1971 that the Royal Cabinet Office of Saudi Arabia was building the hospital and a year later began discussing an equipment contract with the medical consultant to the director of the project.

In October 1972 the company was told by the consultant and "other persons" that it would be required to pay two commissions or fees to people who would be

'CABLE GLENSCOT'

THE ARAB MINING CO.
ESTABLISHED BY THE ARAB ECONOMIC UNITY COUNCIL WITHIN THE FRAMEWORK OF THE ARAB LEAGUE WITH A CAPITAL OF KUWAITI DINAR 120 MILLION.
Seeks consulting services from firms with wide international experience in mining and particularly in Copper, Phosphates, Zinc, Lead, etc...
The Company invites interested firms for general prequalification for the above consulting services.
The scope of work will mainly consist of checking, evaluation and rendering consulting advice on the technical, operational and commercial aspects relating to individual projects in the Arab Countries. Detailed scope of work will be defined later on in the Agreement to be made with consulting firm.
Documentation with full particulars of interested firms are requested to be forwarded to the following address before end January 1977:
The Arab Mining Co.
P.O. Box 20,198,
AMMAN (JORDAN).

SEC Sues Over 'Fees' to Saudis

(Continued from Page 7.)

identified before the signing. These would each amount to 10 per cent of the total contract price.

The following month American Hospital authorized its representatives to enter contracts with the Royal Cabinet Office to equip the hospital and, with Scientific Control Systems, a subsidiary of British Petroleum, to perform all installation and warranty work.

The SEC said a financial statement for the hospital contract that included an expense item of $1.56 million for "commissions" was submitted to the company's board but that no board approval of the fee was sought or obtained. The company, the SEC said, maintained that those working on the contract failed to inform the top company officials.

The contracts with Assem, the consultants, and with Scientific Control Systems were concluded in mid-December 1972.

Assem, the SEC charged, had "no employees or operations and no capacity to perform the services specified."

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or paid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

Sales figures are unofficial.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. i—Declared or pid after stock dividend or split up. j—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

x—Ex-dividend or ex-rights. y—Ex-dividend and sales in full. z—Sales in full.

cld—Called. wd—When distributed. wi—When issued. ww—With warrants. xw—Without warrants. xdis—Ex-distribution.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies.

Year's high and low range does not include changes in latest day's trading.

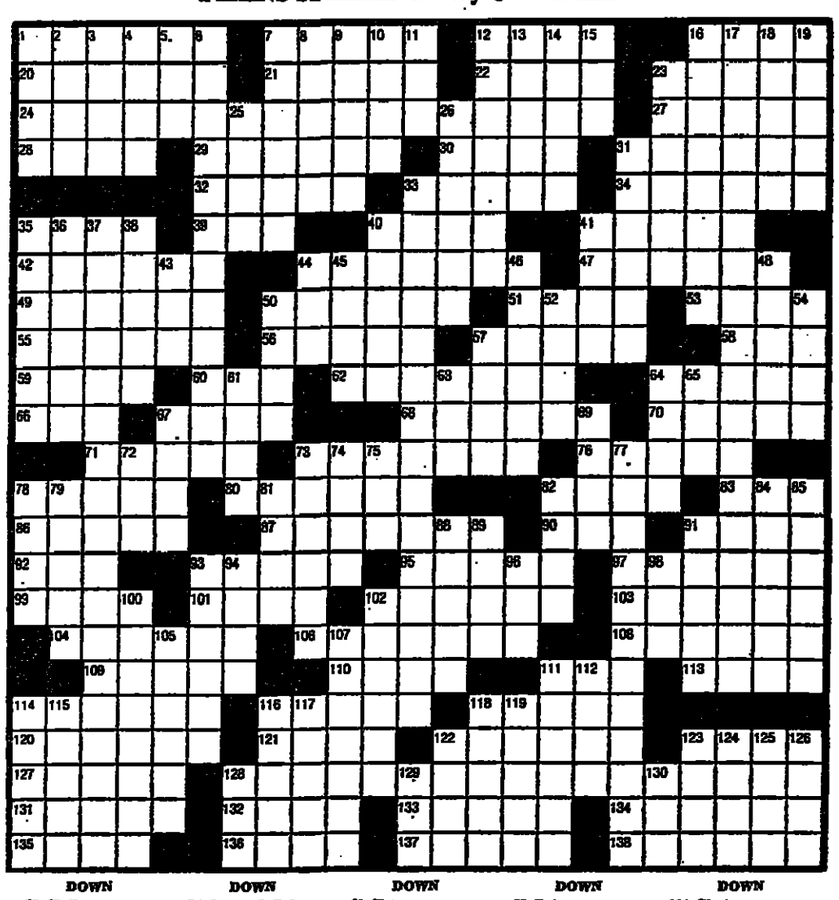
Your castle in Spain

Selling one? Buying one? We've helped sell a few Spanish castles and German castles and French castles and a lot of other real estate as well.

Some of our readers buy castles, others buy more modest apartments. The thing they have in common is the fact that they can afford to buy and invest in real estate. And since they are international they can come to see it, and find time to live in it.

'International Real Estate' appears every Friday.



Contact our office in your country or write directly to:

Mr. Max FERRERO, I.H.T., 21 Rue de Berri, 75380 Paris Cedex 08.

BOOKS

PICASSO'S MASK

By André Malraux. Translated from French and annotated by June Guicharnaud with Jacques Guicharnaud. Holt, Rinehart and Winston. Illustrated. 273 pp. $10.

Reviewed by John Leonard

IT's as if André Malraux had left a tape-recorder running while he walked around the Museum Without Walls inside his own skull. The transcript is this headcheese of a book, back and forth in the time of his life and in the time of art, opening and shutting closets—inside this one, the Little Man from the Cyclades with his violin-shaped idol, inside that one a black Aztec death's-head—with constant interruptions by Picasso, non sequiturs, clunky aphorisms, critical insights, jabs in the eye, moonings about the unknowable, essays on courage, gushes of memory. "Picasso's Mask," the third volume of his autobiography, after "Anti-Memoirs" and "Felled Oaks," is exasperating. But, like everything else he wrote, it is exciting too.

What company the man kept until his death! And how odd that Mao, with whom he had so many portentous chats in "Felled Oaks," should have died in the same year. If his conversations with Picasso sound more believable than those with Mao, it may be because we know from other memoirs that Picasso actually talked this way, in moody fidgets, sometimes the child, sometimes the theory-monger. Malraux himself is consistent in the solemnity he brings, like a cowbell tied to his neck, to every encounter with the great and near-great. No idle gossip here.

To Chagall: "Don't you believe that color changed when Europe invented shadow?" To André Breton: "Do you know where the religious center of the Hopi Indians was? . . . Los Alamos." To Yehudi Menuhin and Nadia Boulanger: "When the Asians heard our great musicians they got the impression that the deepest emotion felt by Europeans was nostalgia."

These conversations are more fun when people talk back. Menuhin and Boulanger, for instance, disagree with the Asians. "I'd say it was praise, not nostalgia," says Menuhin. And when Malraux tells Picasso, "When the Connétable de Bourbon captured Rome his archers chose as their target 'The School of Athens,'" Picasso replies: "They didn't like Raphael, was that it? They were already cubists." Malraux, though, is unstoppable, going on: "For months all the characters—Plato, who was in fact a portrait of Leonardo da Vinci, and some other Greek, who was in fact a portrait of Michelangelo, and all the rest of them—had arrows stuck in their eyes. Great scene for a film."

But some people don't want to talk back: "A few days before, when I had asked Rouault what he thought of Poussin, he was chillingly evasive." Or: "The first time I ever saw Utrillo was at a Montmartre grocery woman's house . . . Wild-looking he was, with a fantastic gorilla at his side. His vocabulary at that point was limited to two words. Lifting his very heavy eyelids onto a desolate void, he asked me, 'Painter, or poet?' sat down, and went to sleep."

A lot of this can be exasperating, and there is a lot of it in "Picasso's Mask." The style, too, exasperates, having gone blowsy and baroque. And perhaps we've heard enough of the Museum Without Walls, that juxtaposing of the ages of art to argue against death, in behalf of "the revolt against man's fate," "the sacred, the supernatural, the unreal." We are as familiar with his theories of metamorphosis as we are with his own many metamorphoses, the series of selves he invented.

And yet the excitement is here as well. There is much on the genius of Picasso, his vital Negro period, those last tarots, the appropriating of the demons and fetishes and fertility figures and spider-dreams of the anonymous past in the service of an aggressive art of the future. There is a superb appreciation of Takanobu's "Portrait of Taira no Shigemiro," a 12th-century Japanese masterpiece I curse myself for never having seen—an appreciation that calls into question most of the assumption of Western art, from perspective on.

There is also a preoccupation with death. The inscription of Thebes is ever with him: "Listen to the procession of the dead, buzzing like bees . . ." Facing it, one must wear a mask, signifying man, ordaining a soul. One finds, and talks to, Quixotes.

There is nothing here of politics or literature, only a fleeting reference to "Man's Hope," none at all to the superior "Man's Fate," and some glimpses of his career as a bureaucrat of culture: commissioning designs from André Masson and Chagall for the ceilings of the Théâtre de l'Odéon and the Paris Opéra, wanting to plant Picasso's bronze statue of "The Reaper" on the promontory of the Ile Saint-Louis as a monument to Baudelaire's "Fleurs du Mal." Was this the way for an existentialist swashbuckler to fade out, in the arms of De Gaulle?

And what if his cherished Museum Without Walls turns out to be a tourist trap? What if the ages of art, in the form of snapshots and facsimiles, end up in the form of souvenirs, in a gift shop, to show the children and our friends, when we come back from the museum to our everyday iconography of oil rigs and neon and Coke bottles and parody? What if it ends up quaint, instead of wondering and wondrous?

No matter. Mutation and continuity are both necessary to metamorphosis. Malraux's books are in my museum. And if I'm disappointed in his last invention of himself—did he have to be pompous?—there are all the others to keep me company, and he earned the right, and one by one the ones who earned that right are gone, until it seems there won't be anybody left to talk to who is worthy of wearing the mask.

John Leonard is on the staff of The New York Times.

CAGO, Dec. 30 (UPI).— who" one of the Black shouted at Dennis Hull ng last night's 6-3 Chi- victory over the Detroit Wings.

two goals and strong ve play highlighted the second straight victory interim coach Bill White, ood wood on that second brother of hockey ma- bby Hull admitted. "I foot slapshot, on which alle Ed Giacomin never uova.

e he was afraid to move," White, who laughed and "Dennis's first goal was ort power-play rebound, really unloaded that last

ictory was marked by the the Hawks' leading Martin, and Jim Har- o had a goal and two Chicago recorded its core since a 7-2 victory Louis Oct. 24.

of Hull's goals and Har- seventh of the season in the second period as o rallied from a 2-1 def- were flat, that first pe- riod, but we really began to pick up this tempo in the second period," White said.

Bill Russell opened the scoring for the Hawks just 33 seconds into the game, but Dennis Polonich converted neat passes from Walt McKechnie and Nick Libett for a power-play goal. It was McKechnie's 300th NHL point, and Libett moved past Marcel Dionne into eighth place on the Red Wings' all-time scoring list.

Michel Bergeron gave Detroit a 2-1 lead early in the second period before Keith Magnuson scored his first goal of the year to tie it up.

Rockies 3, Capitals 1

At Denver, Gary Croteau and Simon Nolet scored goals in the final three minutes to give Colorado a 3-1 victory over Washington and snap the Rockies' six-game losing streak.

Croteau scored what proved to be the game winner at the 17-minute mark and Nolet added the insurance goal with 76 seconds left in the game.

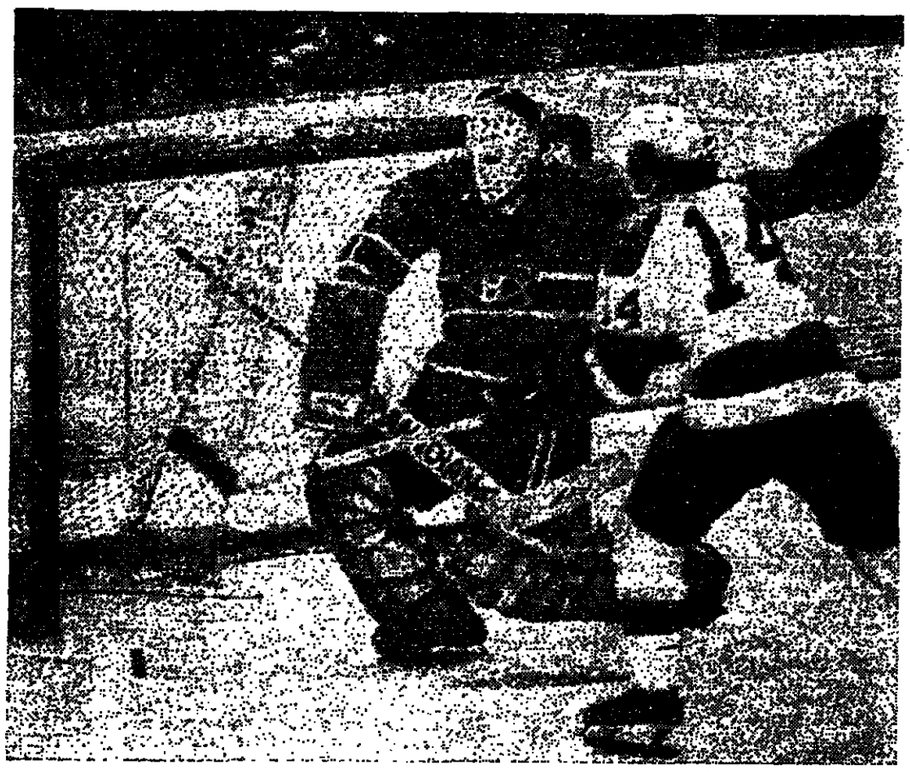
Bruins 8, Canucks 1

At Vancouver, Peter McNab scored three goals, including two during a four-goal second period, to lead Boston to an 8-1 victory over the Canucks.

Jean Ratelle and Earl Anderson gave Boston a 2-1 lead at the end of the first period. Vancouver's Dennis Ververgaert had his shot deflected by a Boston skater to score the lone Canuck goal.

The Bruins then took advantage of numerous Vancouver errors in the second period to score four times on goals by Matti Hagman, McNab twice and Rick Middleton.

Sabres 6, Flames 3



At Atlanta, Terry Martin, Fred Stanfield and René Robert all scored in the third period to lead Buffalo to a 6-3 victory over the Flames.

Maple Leafs 6, Barons 2

At Cleveland, Darryl Sittler rammed in two goals and defenseman Borje Salming added a goal and three assists as Toronto skated past the Barons, 6-2.

Penguins 3, Canadiens 3

At Pittsburgh, captain Ron Schock's sixth goal of the season, scored from the edge of the crease early in the final period, pulled the Penguins into a 3-3 tie with Montreal.

In NBA Action

Rockets Stymie Erving, Defeat 76ers by Two

HOUSTON, Dec. 30 (UPI).— The Houston Rockets' game plan was to jam the middle. Thanks to a missed shot by a weary Julius Erving at the buzzer, they could say it worked.

As Erving's 15-foot jump shot rolled around and off the rim, Rockets' coach Tom Nissalke jumped to his feet and held his arms up for victory.

Rarely had Nissalke shown such emotion since taking the Houston job this year. Never had he so many people to share his feelings. A record crowd of 16,012 watched Houston survive with a 93-91 victory over Dr. J. (Erving) and the Philadelphia 76ers last night.

In the process, Houston widened its lead in the NBA Central Division to one game.

"No doubt," Rockets guard Calvin Murphy said, "this was the biggest win in our history. There were a lot of people out there who will remember this game and come back."

"I just didn't want him to drive," Nissalke said of Erving, who was held to 12 points. "That's what he does best, so that's what we took away from him."

The other factor was 6-11 Moses Malone, whose seven blocked shots set a club record.

As Houston led 92-91, with 15 seconds left, Malone came up with the biggest play of the game when he batted away a shot by Lloyd Free, who led all scorers with 29 points.

But Philadelphia, 18-14, was not finished. After Rudy Tomjanovich canned one free throw for a two-point Houston lead, Steve Mix inbounded the ball to Erving with four seconds remaining. The 6-foot-6 forward glided into range, went up and fired a shot off the backboard.

"It was the shot I wanted. I won't miss often from there," Erving said.

"I was in his face all the way," said the Rockets' Mike Newlin. "In fact, we had him double-teamed. We deserved to win, don't you think?"

But the Philadelphia big men found rough-and-tumble basketball inside and shot poorly. George McGinnis scored 26 points, but on only 9 of 23 field goals. Erving hit on 5 of 12.

Bullets 96, Hawks 92

At Landover, Md., Leonard (Truck) Robinson scored 17 points and pulled down 10 rebounds as Washington handed Atlanta its seventh straight defeat, 96-92.

The Bullets outrebounded the Hawks, 53-37, and held Atlanta to just one rebound in the second period while building a 52-42 halftime lead.

Pistons 120, Trail Blazers 111

At Detroit, Bob Lanier scored 40 points and Howard Porter added a season-high 27 to lead the Pistons to their ninth victory in 12 games, a 120-111 triumph over Portland.

Lanier contributed 13 rebounds, 9 assists and 4 steals and held Portland center Bill Walton to 14 points.

Sonics 102, Nets 96

At Uniondale, N.Y., Fred Brown, who scored a game-high 29 points, broke a 94-94 tie with 41 seconds left to play to give Seattle a 102-96 victory over the New York Nets.

Brown, whose two free throws with three seconds gave Seattle a one-point victory over Atlanta Tuesday night, broke the 94-94 tie with a long jumper and Slick Watts clinched the victory for Seattle four seconds later with a steal on an inbounds play and a layup.

Kings 113, Braves 103

At Buffalo, Kansas City guards Ron Boone, Brian Taylor and rookie Andre McCarter combined for 59 points and Jim Eakins and Ollie Johnson played key relief roles in the Kings' 113-103 victory over the Braves.

Boone scored a game-high 31 points, including 21 in the first half, Taylor had 16 and McCarter 13 as the Kings posted their second straight victory after four consecutive losses and ended Buffalo's two-game winning streak.

Suns 97, Celtics 87

At Phoenix, Paul Westphal scored 30 points to lead the Suns to a 97-87 victory over Boston, the Suns' second victory in as many meetings with the defending NBA champions.

Westphal, who hit 13 of 17 field-goal attempts, also had six assists and three steals. Nine of his points came in the fourth quarter when the Suns spurted away after taking a 66-62 advantage into the period.

Look at How the Weekend College Football Bowl Games Shape Up

Rose

By Mal Florence

S ANGELES, Dec. 30.—USC re talented but Michigan erhaps more dedicated and better as a unit. That is ed Hughes evaluates the s that will meet in the Rose game Saturday.

ches, who coaches UCLA's linebackers, knows some- about both teams, especial- Michigan. He coached the ine linebackers for three before joining Terry Dona- staff the past season.

admits that he is partial higan because he still has emotional ties with the s he coached. He says he ot know the USC players lly but has great respect m as a team.

ow how hard Michigan has to get to the Rose Bowl," Hughes said. "This game means so much to them. And Bo Schembechler is super at getting his team prepared from all aspects. But, from a physical standpoint, USC is much bigger and stronger."

Hughes said that what intrigues him most is USC's offense opposing Michigan's defense.

"USC's offensive line is bigger than Michigan's defensive line and the comparison would be similar to the USC-UCLA contest, except that I think Michigan is smaller than we [UCLA] are," he said. "But Michigan has great quickness and plays as a cohesive unit on defense.

"USC also has big-play people in Vince Evans, the quarterback, and the two skilled receivers, Randy Simmrin and Shelton Diggs. Then there's guard Donnie Eickman. I haven't been coaching that long [seven years] but he's the best lineman I have confronted as a rival coach."

Q. It would seem then that USC would simply overpower Michigan.

A. Not necessarily. USC may have trouble blocking Michigan because Bo's players are so quick. Michigan plays angle defense, meaning that its line will be moving in different directions most of the time.

Q. Who are Michigan's key defensive players?

A. Greg Norton, an All-America defensive tackle, is one. He's a three-year starter and an intense, competitive guy. Then there's Calvin O'Neal, an All-America linebacker. He can really move for his size [6-2, 230]. He'll be as strong and quick as anyone USC has played against. And Michigan has some players in the secondary such as Dwight Hicks, Jim Pickens and Derek Howard who can really hit.

Q. What will be USC's offensive strategy?

A. I think USC will try to loosen Michigan up by throwing just as Alabama did to us in the Liberty Bowl. They'll try to take the secondary out of run support. Then, in the second half, they'll come back to their bread and butter, which is running the ball.

Q. Reversing the matchups, compare Michigan's offense, which leads the nation in total yardage, rushing and scoring, to USC's defense.

A. Michigan has a young offensive line and the players all come off the ball together hard. It's hard to single out any one player but Mark Donahue is an All-America guard and Walt Downing an all-Big 10 center. Rob Lytle is the most versatile football player Michigan has ever had. He plays both fullback and tailback, catches passes, runs wide, hits the quick openers and runs the 40 in 4.4. Then there's Jim Smith, an All-America wingback who is a deep pass-receiving threat like Lynn Swann. Also Rick Leach, a sophomore quarterback, has come of age t' season. He's a real competitor and a great athlete.

ow Tops U.S. Team

RADO SPRINGS, Colo., (UPI).—The Moscow bilized Michigan State it with six goals in the period, including four in of 2:11, to humble the 11-4, and win the ior International Hockey ament.

Colts' Jones Is Honored

NEW YORK, Dec. 30 (AP). —Bert Jones, the quarterback who led the Baltimore Colts into the National Football League playoffs, was chosen the league's most valuable player today.

He received 41 of the 84 ballots cast in an Associated Press poll by sportswriters and broadcasters representing the league's 28 franchises.

Pittsburgh Steelers linebacker Jack Lambert finished second in the balloting with 19 votes, just ahead of Oakland Raiders quarterback Ken Stabler, who had 16.

Orange

MIAMI, Dec. 30 (AP).—Look for Ohio State to trot out its favorite weapon—a clock-eating, ball-hogging rushing attack—against Colorado in the Orange Bowl Saturday night.

Pete Johnson, the Buckeyes' 238-pound senior fullback, put it bluntly: "I know we can run on them. They're not as quick as Michigan, but they're bigger."

Jim Pacenta, the Buckeyes' starting quarterback, adds that Ohio State must re-establish its vaunted running attack. It was all but dormant in the last two games, 155 yards against Minnesota and 104 against Michigan.

Colorado's defense allowed 24 points or more in five games, but tailback Jeff Logan, Ohio State's 1,169-yard rusher, is impressed with the Buffaloes' defenders.

"They're aggressive and that's the most important thing. They switch defenses a lot. They don't make mistakes either," Logan said.

Colorado's basic defense offers a five-man front, but sometimes the Big 8 champions slip into an eight-player line. And they have several variations from those formations.

"The thing is their players are always moving until you snap the ball. It presents problems for your blocking adjustments," said George Chaump, Ohio State quarterback coach.

"We'll have to call some audibles at the line of scrimmage, conceded Ralph Staub, the Buckeyes' offensive coordinator.

Ohio State coaches believe that the Buffaloes will be vulnerable to passing when they swing into eight-man fronts.

"That means they have to bring a deep back up to the line. So we should be able to get somebody open," Chaump said.

Meanwhile, Colorado's defenders know they must cut off the Buckeyes' ball control.

"We've got to take away their run. To do that," said linebacker Brian Cabral, the Buffaloes' leading tackler, "we've got to stop their quarterback, fullback and tailback."

Juantorena Honored

PARIS, Dec. 30 (AP).—Alberto Juantorena, Cuba's Olympic gold medalist in the 400 and 800 meters, yesterday was named Athlete of the Year by L'Equipe, the French sports daily.

Peach

ATLANTA, Dec. 30 (UPI).— Matt Kupec, North Carolina's freshman quarterback, bristles when people put down the Tar Heels' 9-2 record.

"People called us the worst 9-2 team in America," he said. "We had trouble making the nation's top 20. All season long people kept pushing us down. They said we didn't play anybody. They said all our scores were close.

"Now don't get me wrong," added Kupec, in Atlanta to prepare for tomorrow's Peach Bowl game against Kentucky. "We are happy to be in the Peach Bowl. But we are disappointed. The Gator Bowl picked two teams on tradition alone. We had a better record than both."

The Peach Bowl ranks about eighth or ninth on the bowl ladder, but only six bowl teams have better records than UNC. They are both Rose Bowl teams, both Sugar Bowl teams, Maryland and UCLA.

North Carolina was 3-7-1 a year ago and finished this year's regular season at 7-2 as Mike Voight piled up 1,407 yards rushing for a career total of 3,971, while Kentucky went from 3-8-1 to 7-4-0.

"It'll be a real brawl," Voight said.

Voight's coach, Bill Dooley, also figures a close game in the contest.

"Back 10 years ago, the ACC wasn't very good," he said. "But in recent years we have come a long way. I think it is a matter of reputation and we don't have that football reputation that some conferences have."

Sugar

NEW ORLEANS, Dec. 30 (AP).—Some dogs chase mailmen, some chase cars. But Georgia's Junkyard Dogs will be chasing Tony Dorsett in the Sugar Bowl Saturday.

"The Dogs vs. Dorsett. You can't help but be excited," said Georgia linebacker Ben Zambiasi, holding back the yelps while pointing toward the game against top-ranked Pittsburgh.

"You can expect a real physical, real intense game," said Dorsett, a top dog himself with 18 NCAA records and a Heisman Trophy. "When you're hit by one of the Junkyard Dogs, I'm quite sure you realize you're in a football game."

The biggest Georgia defender is lineman Ronnie Swoopes, a 245-pounder who outweighs any other member of the pack by at least 20 pounds. Despite that relative lack of size on defense, Georgia allowed an average of only 10.7 points a game this season.

"Georgia will have the most intense, intent defense we've played all year," said Pitt offensive coach Joe Avezzano. "They're always at an emotional peak, jumping up and down, patting each other on the back."

Georgia's defensive alignment amounts to what coaches call an eight-man front, bunching four linebackers at the line with four linemen. Pitt had problems running on that defense this season against Duke and Penn State, but it found two solutions.

Against Duke, quarterback Matt Cavanaugh threw five touchdown passes. Against Penn State, Pitt moved Dorsett to fullback in the second half, setting him closer to the line for quick openers up the middle, including a 40-yard touchdown run.

Georgia is aware of Dorsett's stamina, and the Dogs have panted their way through extra sprints. "We feel the fourth quarter will be the key," Zambiasi said.

Dorsett remembers when he took the field four years ago at Georgia in his collegiate debut. The Georgia defense had not yet adopted the Junkyard Dogs, but the entire squad had its traditional Bulldogs nickname and Dorsett felt like the main course.

"All the fans were screaming, 'Dog food. Dog food,' and coming right out of high school. It was sort of frightening," Dorsett recalled.

Sun

EL PASO, Texas, Dec. 30 (UPI). —The Sun Bowl in recent years has become one of the closest but highest-scoring of the post-season games. This year's meeting between Texas A & M and Florida figures to be another.

The Gators and Aggies clash Sunday in the season's final bowl game.

Florida, which finished with an 8-3 record, and Texas A & M, 9-2, feature explosive wishbone offenses.

Florida, the Southeast Conference total offense and scoring leader, averaged 28.5 points a game this year while the Aggies, who also boast one of the country's toughest defenses, averaged 39 points a game in their final six contests. Despite the proficient scoring machines on both sidelines, coaches Emory Bellard of Texas A & M and Doug Dickey of Florida say the game could be a low-scoring one.

"Most of the time, scoring comes from breaks and field position," Bellard says. "If there are not too many turnovers, it could be a defensive struggle."

"I don't necessarily expect it to be a high-scoring game," Dickey said.

Florida quarterback Jimmy Fisher, who threw for 1,511 yards and 10 touchdowns off what Dickey likes to call "our broken wishbone", continued to look impressive in his initial workout at the Sun Bowl. On the ground, the Aggies appear to have the edge with fullback George Woodard and halfback Curtis Dickey.

Woodard and Dickey combined for 1,879 yards this season, setting an A & M record, Woodard also led the Southwest Conference in scoring with 17 touchdowns, second best in the Aggies' history, while Dickey ran for eight TDs and threw for two more off halfback-option plays.

Stockton Moves To Semifinals of Tennis in Sydney

SYDNEY, Dec. 30 (AP).— American Dick Stockton moved into the semifinals of the New South Wales Open Tennis Championships today with a strong victory over veteran Australian Ken Rosewall.

Stockton beat Rosewall, 6-3, 6-2, and at no stage of the match was in trouble. He will meet American Roscoe Tanner in tomorrow's semifinal.

Tanner was forced to three sets to beat fellow American Hank Pfister in a match billed as the battle of the big servers. Tanner won, 7-6, 4-6, 6-1, after a spirited fight from the 23-year-old.

After Pfister took the second set, Tanner called on his experience to break his young opponent's serve three times in the deciding third set.

Argentine Guillermo Vilas pulled back from the edge of defeat twice in his quarterfinal against defending champion Ross Case to move into the semifinals.

Vilas won, 6-3, 4-6, 9-7, after Case failed on two occasions in the third set—when leading 5-4 and 7-6 with his service to come—to press home his advantage.

Vilas will play Australian Tony Roche, who beat countryman Phil Dent, 7-6, 6-2.

In the women's quarterfinals, Renata Tomanova of Czechoslovakia scored a hard-fought 6-3, 4-6, 9-7 victory over Romanian Virginia Ruzici.

Brooks Robinson Is Still an Oriole

BALTIMORE, Dec. 30 (AP).— Brooks Robinson has announced that he will return as player-coach for the Baltimore Orioles next season, but said he hopes to do a lot of playing and not much coaching.

"I still think I can play, and I'm glad to get the chance to play here," the 39-year-old third baseman said in the first news conference he has held in 22 years with Baltimore.

Robinson appeared in just 71 games last season and his batting average slumped to .211. He said he will go to Florida for spring training "knowing I'm not a first teamer."

Italian Boxer Released In Shooting of Official

ROME, Dec. 30 (UPI).—A prosecutor ordered former European light-heavyweight champion Domenico Adinolfi released from prison after failing to find evidence linking him to the shooting attack on a boxing official.

Court sources said Adinolfi was questioned for a dozen witnesses before District Attorney Vincenzo Monteleone ordered that Adinolfi was released. Adinolfi was arrested at his home village of Ceccano, 57 miles southeast of here, when Piero Pini, secretary-general of the European Boxing Union, was shot in the legs in his office here last Thursday.

Lack of NFL Draft Breeds Insecurity

By William N. Wallace

PALO ALTO, Calif., Dec. 30 (NYT).— Perhaps Gary Green is one of the best U.S. college football players and one who might play professionally for 15 years, like Mel Renfro of the Dallas Cowboys or Pat Fischer of the Washington Redskins. Perhaps. Green has no idea how good he is. Inasmuch as there are no plans, as of this moment, for a draft of the college players by the pros early next year, the class of 1977 lacks any sense of its worth in terms of dollars.

Green, from Baylor University, is here with 59 others practicing for the All-Star Game, the original one called East against West, to be played in Stanford Stadium on Sunday for the benefit of San Francisco's Shrine Hospital for Crippled Children.

Housed in adjacent motels along El Camino Real, these players are surrounded by pro scouts and agents, with the former infinitely preferred to the latter. "You don't know who to believe," Green said, "and you are inclined to distrust them all. They want something. Those agents are after your money."

For 40 years, the National Football League's annual draft distributed the collegiate crop among its membership, but the process was defined as illegal by a federal judge earlier this year because it prevented competitive bidding for talent. The judge did not necessarily do the athletes a favor.

"We're confused and I'm scared," said Green, a highly regarded defensive back who will play for the West. "It looks to me like there will be a lot more money for some people and a lot less money for a whole lot more people."

Green's problem is that he does not know to which group he belongs, the privileged few like Tony Dorsett, the Heisman Trophy winner from Pitt who will attract competitive bidding, or the larger assembly of John Does and Joe Doakes who will be told by the pro teams: "This is our best offer—take it or leave it."

"It's obvious," Green said, "that there are only so many dollars out there and if you are a middle-rated person you are not going to get so much because the top-rated ones will get more. It's like high school and the college recruiters. Only this is more important because it's your profession."

The draft accomplished specific recorded ratings, first-round choices, second-round and so on through the 17th round. The rounds helped to set salary and bonus, a first-round choice in recent years getting somewhere in the neighborhood of a three-year staggered contract of $30,000, $35,000 and $40,000 plus a $50,000 bonus. Dorsett could command thrice that without a draft and with competitive bidding.

The anxiety for Green and the others here is created by no knowledge of worth. "I'm told I'm top-rated, a certain first-round draft choice," Green said. "But how am I to know that for certain? I could fall down in Sunday's game or get hurt next week in Mobile before the Senior Bowl. I could go from first to the middle just like that."

A middle-round draft choice, a seventh or eighth, could roughly expect a $25,000 contract for one year with a $10,000 bonus. Without a draft the teams could try to cut those numbers to $20,000 and $5,000, exploiting the players' inability to rate themselves.

"We know we are rated," Green said. "The pro scouting systems do that and the agents also have ratings. But we don't know where we're rated and if there isn't any draft we'll have to believe what they tell us."

10 to 15 Calls a Day

The agents are swarming about the athletes. "My phone," said Green, "is jumping off the wall. I've been getting 10 to 15 calls a day from agents. They all say the same things but it takes 30 to 40 minutes for each one to say it. That can kill your day and we're here to play football. I look on these games as rewards, rewards for what I did in college ball."

Of the agents' spiels, Green said, "All I see is lips moving. I hear them but I don't know what they're saying. They talk so fast, they're so slick, and they use some words I never heard before."

A week ago, Green signed with an agent, Andrew Benson of Houston, who will take 8 per cent of his football earnings and 10 per cent of any profits Benson generates by investing Green's income. "I could communicate with him," said the 22-year-old from San Antonio.

What about the pro scouts, the personnel people from all 28 of the NFL teams? "They're okay," Green said. "They don't know what's going to happen either without a draft. They tell me, 'We know all about you. You're doing good. Keep going.'

"But the pressure's building up. Living with the unknown is scarey."

Great HEW Secretary

WASHINGTON.—I don't know about President-elect Carter's other Cabinet appointments, but I can speak with authority when I say he couldn't have selected a better secretary of health, education and welfare than Joseph Califano. You see, Joe Califano has been our football-car-pool driver to the Redskin games for the last eight years. He learned all his driving skills from his ex-boss, Lyndon Johnson, at the L.B.J. Ranch, and if Joe can run a government department as well as he can maneuver his beat-up station wagon on Massachusetts Ave., this country's health, education and welfare will be in safe hands.

Buchwald

I'll have to admit that the seven of us who ride with Joe to the Redskin games never thought of him as Cabinet material. But then again, no football-car-pool *chauffeur* is a hero to the people he drives to the stadium.

When the FBI men came to see me to do a check on Joe, I thought they were kidding when they said he was being considered for secretary of HEW. But I discovered the FBI never jokes.

"What kind of man would you say Mr. Califano is?" one of them asked me.

"He's a gutsy Evel Knievel," I said. "Evel Knievel has jumped over 14 chartered Greyhound buses on a motorcycle, but Califano is the only man I know who has ever tried to drive straight through them. Ask anyone in the car pool."

"Would you say he's unstable?" the other FBI man asked.

"I should say not. He's as stable as they come. Have you ever seen a man drive on the sidewalk for three blocks just to avoid being tied up in stadium traffic?"

* * *

The FBI man was taking notes.

"Does he have any deep-seated prejudices that you know of?"

"He hates red lights. I've seen him cuss and scream at a red light for two minutes. He also has contempt for stop signs. Every time he sees one he goes livid."

"I mean for people. Does he have any prejudice against certain kinds of people?"

"Only pedestrians. He thinks pedestrians should stay off the streets during football games regardless of race, creed or color."

"How does he feel about busing?"

"He's for busing people to football games only as a last resort. But if the Supreme Court says you have to bus spectators to the stadium he will follow the law of the land."

"Would you say he's imaginative?" one of the FBI agents asked.

"Yup. No matter how many times he's driven us to the game he always goes a different way. One time he took the wrong turn and we wound up in Richmond, Va. The thing that endears Joe to the car pool is that you never know what he's going to do next."

* * *

"What would you say are his best traits?"

"He'll always look you in the eye—when he's driving—even when you're sitting in the back seat. And he's one of the most patriotic men I know. I've seen him sideswipe an ambulance rather than miss the Redskin band playing the 'Star-Spangled Banner.'"

"Then you think very highly of him."

"All of us in the car pool do. He's saved our lives many times."

"How is that?"

"Well, there's this large fountain by Union Station, and in eight years of driving Joe has never crashed into it."

"Then you think he'll make a good secretary of HEW?"

"The greatest. Our loss is the country's gain. We hate to see him go, but we would never stand in the way of Joe getting his own chauffeur-driven limousine. Only Jimmy Carter would pluck his HEW secretary out of somebody's car pool."

Ancient Ship Is Found Off Italy's Coast

DIANO MARINA, Italy, Dec. 30 (UPI).—Underwater archaeologists have discovered the wreck of a Roman cargo ship which sank off the Riviera more than 1,800 years ago, the International Institute of Ligurian Studies announced today.

The institute said that the ancient ship had been identified as the Felix Pacata, which sank off the coast of this resort town 25 miles east of the French border sometime in the 1st century.

The archaeologists were able to identify the ship by reading inscriptions carved into the lids of giant terra-cotta storage containers found intact in the ship's hold.

Mary Blume

'Birthdays are days when we hope we will become wiser, nicer, slimmer; the only certainty is that we will get older.'

Sure Thing for '77—Yet Another Birthday

PARIS (IHT).—Nineteen seventy-seven marks the centenary of the presidency of Rutherford B. Hayes and of the publication of Anna Sewell's "Black Beauty." What else the new year may bring is the business of economists and astrologers and only a killjoy would spoil the holidays by examining their predictions too closely.

The one certainty about the new year is that it will bring to each of us a birthday. The first to be commemorated, on Jan. 1, are Lorenzo de Medici, Paul Revere, E.M. Forster, Alfred Steiglitz and J. Edgar Hoover; the last, on Dec. 31, include Henri Matisse, John Denver, Nathan Milstein and Odetta. On the 363 days in between we will each have our moment of glory or anguish, depending on how we feel about it: I for one will never look upon my day with the same pleasure since I learned I share it with Henry Kissinger, information gleaned from Linda Rannells Lewis's new book, "Birthdays," published in the United States by Atlantic-Little, Brown.

Mrs. Lewis has the same birthday (May 29) as Charles II, Patrick Henry, G.K. Chesterton, Beatrice Lillie, John F. Kennedy and Bob Hope. Debbie Reynolds was born on April Fool's Day (so were Bismarck, Rachmaninov and Brillat-Savarin); *Rossini and Frederic in "The Pirates of Penzance"* were born on Leap Year Day; Rebecca West, Clara Barton, Conrad Hilton and the patient of Sigmund Freud known as Wolf Man were born on Christmas.

'Nothing for Nothing'

A birthday is not simple, fusing past and present, confusing pleasure and fatality. Not surprisingly, Mrs. Lewis has chosen to quote quite a lot from Freud's views on the subject. On gifts and gift-giving, Freud wrote when he was turning 75, "The aggression bound up with the tenderness of the donor demands its gratification... You get nothing for nothing, and you have to pay heavily for living too long!"

To give pleasure to those who wished to celebrate his 80th birthday, Freud suggested an album of photographs of the members of the International Psychoanalytic Association, then abandoned the idea: "I am taking umbrage at the aesthetic monstrosity of 400 pictures of mostly ugly people of whom I don't know half and of whom a good many do not want to know anything of me." Still, he was, like anyone, susceptible to the truly thoughtful present. To the poet H.D., who had sent him flowers on an earlier birthday, he wrote, "What you gave me was not praise, was affection, and I need not be ashamed of my satisfaction."

Carl Gustav Jung, asked on the eve of his 85th birthday what the day would be like, replied, "They will come; they will eat a bit of my flesh, and they will go away feeling much better for it." Jonathan Swift used to spend his birthday reading the Book of Job ("Let the day perish wherein I was born..."). Julie Nixon Eisenhower, pressed for evidence of her father's good nature, mentioned his enjoyment of birthdays and of the trick candles that relight themselves after having been blown out.

Diane de Poitiers got the château of Chenonceaux as a birthday present. Anne Frank received a diary when she turned 13. Oscar Wilde's Infanta is given a dancing dwarf who dies, brokenhearted, at her feet. "For the future let those who come to play with me have no hearts," she cries.

Little Lord Faintleroy, on the other hand, was a perfect poppet when his birthday was feted with flags flying from the top of the castle and happy peasants joyously crying out, "God bless him, the pretty little dear!"

Delight

"Little Lord Faintleroy was delighted. He stood and smiled, and made bows, and flushed rosy red with pleasure up to the roots of his bright hair.

"Is it because they like me, Dearest?" he said to his mother. "Is it, Dearest? I'm so glad."

Birthdays are days when we hope we will become wiser, nicer, slimmer; the only certainty is that we will get older. And yet, as Harry Hope says in "The Iceman Cometh," "Yes, bejees, I'll do it. My birthday tomorrow. That'd be the right time to turn over a new leaf. Sixty. That ain't too old."

Charlotte Brontë, when she turned 31, noted, "My youth is gone like a dream; and very little use have I made of it. What have I done with these last 30 years? Precious little." She was writing "Jane Eyre" at the time. On the eve of his 33d birthday Lord Byron went to bed "with a heaviness of heart at having lived so long, and to so little purpose." On Feb. 8, 1841, when he was 22, John Ruskin wrote, "Hang all birthdays, I shall cut the memory of mine."

The ancients, writes Mrs. Lewis, celebrated birthdays. In the early Christian church celebrating the self was bad: "Sinners rejoice and make merry on such days," wrote Origen of birthdays. Instead, babies were named after martyrs and celebrated their name days. Gradually, birthdays came back and the birthday cake, says Mrs. Lewis, came to us via Germany.

Birthdays are not only the daily bread of astrologers: two English sociologists have studied the relationship of birthdates and professions (army officers are born in the summer and early autumn, artists in spring) and a French husband and wife team, Michel and Françoise Gauquelin, have examined the influence on birthdates of "sunspots, solar 'wind,' the stream of material from other planets, and the particular disrupting influences of certain planets on the earth's electromagnetic fields."

Nixon and Lee

It is hard to know what sense could be made of the fact that Richard Nixon and Gypsy Rose Lee were both born on Jan. 7, Alice Faye and Sören Kierkegaard on May 5, Hedda Hopper, the Marquis de Sade, Martha Washington and Johnny Weismuller on June 2. Mrs. Lewis's husband, Anthony Lewis, was born on the same day (March 27) as Gloria Swanson, and James Joyce, who had several of his works published on his birthday, was born on Feb. 2, which is also Groundhog Day and the birthday of Havelock Ellis and Jascha Heifetz.

In the days of occasional verse, there were many birthday poems. Swift wrote an annual poem to Stella, though he found the task wearing:

At Fifty-six, if this be true,
Am I a Poet fit for you?
Or at the Age of Forty-Three
Are you a Subject fit for me?

These days there are fewer birthday poems, although the fact that, like Theodore Roosevelt, Roy Lichtenstein and Sylvia Plath, he was born on Oct. 27 gave us Dylan Thomas's lovely "Poem in October," his celebration of his "thirtieth year to heaven," which closes:

O may my heart's truth
Still be sung
On this high hill in a year's turning.

PEOPLE: *Undaunted British Envoy Is Honored by the Queen*

The fighting in the streets of Beirut was raging, Queen's birthday or no Queen's birthday. But undaunted, the British ambassador, Peter Wakefield, 52, stepped out on the balcony to propose the royal toast. For his disdain of danger and his skill as a diplomat Queen Elizabeth is making him a knight Friday. Among the 727 others on her New Year's honors list is the man who designs her clothes, Norman Hartnell, 75. He is now Sir Norman. Donald Stewart, leader of the Scottish National party, becomes a privy councilor as does Sir John Kerr, 62, governor-general of Australia. Among the other new knights: theater critic Harold Hobson, Howard Kirkley, director of the *Oxford Committee for Famine* Relief, and pianist Clifford Curzon.

* * *

Danish director Jens Jorgen Thersen can't make his film about the sex life of Jesus in Israel. The Ministry of the Interior has told the controversial filmmaker that he is welcome in Israel as a tourist but to forget about making the film there. Israel thus joins Denmark, West Germany, France and England in refusing permission for filming.

* * *

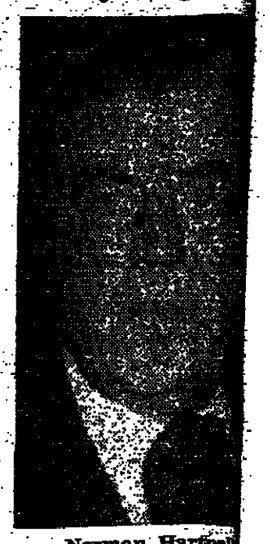
Able Nathan, the Israeli peace campaigner, plans to take his floating radio station, Voice of Peace, through the Suez Canal on New Year's Day—Egyptian authorities permitting. The vessel is carrying $17,000 worth of American and Israeli-made toys and chocolate for the children of Port Said—the town at the northern entrance to the canal. Nathan, who has both British and Israeli nationalities, is traveling on his British passport. None of the 18 volunteers in his crew is using an Israeli passport—which Nathan thinks may soften Egyptian officials. The last Suez Canal trip, in 1975, was aborted because, Nathan said, he had not completed formalities. This time he has paid the required $2,600 fee.

* * *

Sen. Herman Talmadge, D-Ga., is seeking a divorce from his wife of 35 years, Betty. His petition states that their marriage is "irretrievably broken." Marie Louise Weicker, wife of Sen. Lowell Weicker, R-Conn., has filed for divorce in Stamford. She said that the marriage "has broken down irretrievably." Weicker gained national prominence as a member of the Senate Watergate subcommittee.

* * *

A 19-year-old California woman has become the first person to swim across the Strait of Magellan, separating Tierra del Fuego from the mainland of Chile. Lynne Cox, a student at the University of California at Santa Barbara, braved 40-knot winds and cold water to make the four-mile crossing in one hour. Miss Cox has also swum the English Channel in minutes over the world record of eight hours 56 minutes.



* * *

Escape expert Tino Belli wriggled free from a straitjacket, handcuffs and chains in 57 seconds this week to break the second record previously held by the late American magician Harry Houdini. The 38-year-old Finnish "chain king" accomplished his feat in Tampere, Finland, during a 394-foot descent down Nasinneaula Tower.

* * *

Riad Ghali, brother-in-law of the late King Farouk of Egypt, was arraigned this week in Los Angeles on a charge of murdering his wife, the former Queen Fathia, on Dec. 10. Ghali, a Coptic Christian, was kicked out of Egypt's diplomatic corps in 1950, he married Farouk's sister. His wife, a Muslim, was stripped of her title as the king's brother. They separated in 1974. Ghali shot himself in the head after his wife was shot. He is in good condition at the Los Angeles County Jail infirmary. In recent years, the former Queen had lived in virtual hiding in Rome. She worked briefly as a secretary to support herself, her son Farouk and her mother. Last September the family jewels were put up for auction in an attempt to raise nearly $1 million in debts. But there were no takers.

—SAMUEL HUSTON
